### **PREFACE**

### a Oa

THE Editors have to thank many correspondents who during the past year have sent them suggestions for the improvement of this book. The Indian Year Book is intended above all to be a book of reference, and its completeness and convenience of arrangement must necessarily depend to a great extent on the part taken in its editing by the members of the public who most use it.

The help extended to the Editors by various officials, and more particularly by the Director of Information and Labour Intelligence, Bombay, and the Indian Commercial Intelligence Department, has again been readily given and is most gratefully acknowledged. Without such help it would be impossible to produce the Year Book with up-to-date statistics.

Suggestions for the improvement or correction of the Year Book may be sent to the Editors at any time, but those which reach them before January have a better chance of being adopted than later suggestions which only reach them after the work of revision has been partly completed.

The Times of India, Bombay,
April, 1935.

### An Indian Glossary.

ABKARI --- Excise of liquors and drugs.

ACHHUT -- Untouchable (Hindi) Asuddhar.

ZOP-TALLEY,-Tribute paid to

ZULH, ZULUH.—Tyranny. Oppression.

#### Manners and Customs.

Next to the complexion of the people, which varies from fair to black, the tourist's attention in India is drawn by their dress and personal decoration. In its simplest form a Kindu's dress consists of a piece of cloth round the iolins. Many an ascetic, who regards dress as a luxury, wears nothing more, and he would dispense with even so much if the police allowed him to. The Mahomedan always covers his legs, generally with trousers, sometimes with a piece of cloth tied round the waist and reaching to the ankles. Hill men and women, who at one time wore a few leaves before and behind and were totally innocent of clothing, do not appear to-day within the precincts of clylisation and will not meet the tourist's eye. Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes of the rich The child Krishna, with all the jewels on his person, is nude in his pictures and images.

Dress—The next stage in the evolution of the Hindu dress brings the loincloth nearly down to the teet. On the Malabar coast, as in Burma, the ends are left loose in front. In the greater part of India, they are tucked up behind—a fashion which is supposed to befit the warrior, or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf thrown over the left shoulder, or round both the shoulders like a Roman toga. Under this garment is often worn a coat or a shirt. When an Indian appears in his full indigenous dress, he wears a long robe, reaching at least down to the calves—the sleeves may be wide, or long and sometimes puckered from the wrist to the elbow. Before Europeans introduced buttons, as coat was fastened by ribbons, and the fashion is not obsolete. The Mahomedan prefers to button his coat to the left, the Hindu to the right. A shawl is tied round the waist over the long coat, and serves as a belt, in which one may carry money or a weapon, if allowed. The greatest variety is shown in the head-dress. More than seventy shapes of caps, hats, and turbans, may be seen in the City of Bombay. In the Punjab and the United Provinces, in Bengal, in Burma and in Madras other varieties prevail. Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles: folded brims, projecting brims long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the "parrot's beak" of the Maratha turban—all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head-covering whether the weater is a Hindu, Mahomedan or Parsi, and whether he halls from Poons or Dharwar, Ahmeda bad or Bhavnagar.

Fashion Variations.—Fashions often vary with climate and occupation. The Bombay disherman may wear a short coat and a cap, and may carry a watch in his pocket; yet, as

he must work for long hours in water, he would not cover his legs, but suspend only a coloured kerchief from his waist in front. The Pathan of the cold north-west affects loose baggy trousers, a tail head-dress befitting his stature and covers his ears with its folds as if to keep off cold. The poorer people in Bengal and Madras do not cover their heads, except when they work in the sun or must appear respectable Many well-to-do Indians wear European dress at the present day, or a compromise between the Indian and European costimes; notably the Indian Christians and Parsis. Host Pathas however have retained their own head-dress, and many have not borrowed the European collar and cuffs. The majority of the people do not use shoes; those who can afford them wear sandals allippers and shoes, and few cover their feet with stockings and boots after the European fashion in public.

Women's Costumes —The usual dress of a woman consists of a long piece of cloth tied round the waist, with folds in front, and one end brought over the shoulder or the head The folds are sometimes drawn in and tucked up behind In the greater part of India women wear a bodice: on the Malabar coast many do not, but merely throw a piece of cloth over the breast In some communities petricoats, or drawers, or both are worn. Many Mussainan ladies wear gowns and scaris over them. The vast majority of Mahomedan women are gosha and their dress and persons are hidden by a vell when they appear in public a few converts from Hinduism have not borrowed the custom In Northern India Hindu women have generally adopted the Mussaiman practice of seclusion In the Dekhan and in Southern India they have not.

As a rule the hair is daily oiled, combed, parted in the middle of the head, planted and rolled into a chignon, by most women. Among high caste Hindu widows sometimes shave their heads in imitation of certain ascetics, or monks and nuns. Hindu men do not, as a rule, completely shave their heads, Mahomedans in most cases do. The former generally remove the hair from a part of the head in front, over the tempies, and near the neck, and grow it in the centre, the quantity grown depending upon the fancy of the individual. Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Indian Christians. Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere, where the Mahomedan influence was parsimonit in the past. Parsis and Christians follow their individual inclinations. Hindu ascetics, known as Sadhus or Bairagis as distinguished from Sanyasis, do not clip their hair, and generally coil the uncombed hair of the head into a crest, in irritation of the god Shiva.

Hindu women wear more ornaments than others of the corresponding grade in soliety, Ornaments bedeck the head, the ears, the nose, the neck, the arms, wrists, fingers the walst

until motherhood is attained, and by some even later—and the toes. Children wear anklets. Each community affects its peculiar ornaments, though imitation is not uncommon. Serpents with several heads, and flowers, like the lotus, the rose, and the champaka, are among the most popular object of representation is gold or silver.

Caste Marks.—Caste marks constitute a mode of personal decoration peculiar to Hindus, especially of the higher castes. The simplest mark is a round spot on the forehead. It represents prosperity or joy, and is omitted in mourning and on fast-days. It may be red, or yellowish as when it is made with ground sandalwood paste. The worshippers of Vishnu draw a vertical line across the spot, and as Lakshmi is the goddess of prosperity, it is said to represent her. A more elaborate mark on the forehead has the shape of U or V, generally with the central line, sometimes without it, and represents Vishnu's foot. The worshippers of Shiva adopt horizontal lines, made with sandalwood paste or ashes. Some Valshnavas stamp their temples, near the corners of the syes, with figures of Vishnu's conch and disc. Other parts of the body are also similarly marked. The material used is a kind of yellowish clay. To smear the arms and the chest with sandalwood paste is a favourite kind of toilet, especially in the hot season. Beads of Tulsi or sacred Basil, and berries of Budraksha eleccarpus ganulrus, strung together are worn round their necks by Valshnavas and Shaivas, respectively. The Lingayats, a Shaiva sect, suspend from their necks a metallic casket containing the Linga or phallus of their god. Bairagis, ascetics, besides wearing Rudraksha rosaries round their necks and matted hair, smear their bodies with ashes. Religious mendicants suspend from their necks figures of the gods in whose name they beg. Strings of cowries may also be seen round their necks. Muslim dervishes sometimes carry peacock's feathers.

Hindu women mark their foreheads with a red spot or horizontal line. High caste widows are forbidden to exhibit this sign of happiness, as also to deck themselves with flowers or ornaments. Flowers are worn in the chignon. Hindu women smear their faces, arms, and feet sometimes with a paste of turmeric, so that they may shine like gold. The choice of the same colour for different purposes cannot always be explained in the same way. The red ilquid with which the evil eye is averted may be a substitute for the blood of the animal slaughtered for the purpose in former times. In many other cases this colour has no such associations. The Muslim dervish affects green, the Sikh Akali is fond of blue, the Sanyasi adopts orange for his robe, and no reason can be assigned with any degree of certainty.

Shiva.—India is a land of temples, mosques and shrines, and the Hindu finds at every turn some supernatural power to be appeased. Shiva has the largest number of worshippers. He has three eyes, one in his forehead, a moon's crescent in his matted hair, and at the top of the coil a woman's face representing the river Ganges. His abode is the Mount Kailas in the Himalavas, from which the river takes its

source. Round his neck and about his cars and limbs are serpents, and he also wears a necklace of skulls. In his hands are several weapons, especially a trident, a bow, and a thunderbolt, and also a drum which he sounds while dancing for he is very fond of this exercise. He sits on a tiger's skin, and his vehicle is a white buil. His wife Parvati and his son Ganesha sit on his thighs. An esteric meaning is attached to every part of his physical personality. The three eyes denote an insight into the past, present and future: the moon, the serpents, and the skulls denote months, years and cycles, for Shiva is a personification of time, the great destroyer. He is also worshipped as a Linga or phallus which represents creative energy.

Ganpati —Ganesh or Ganpati, the controller of all powers of evil subject to Shiva, is worshipped by all sects throughout India. Every undertaking is begun with a prayer to him. He has the head of an elephant, a large abdomen, serpents about his waist and wrists, several weapons in his hands, and a piece of his tusk in one hand. He is said to have broken it off when he wanted to attack the moon for ridiculing him. The different parts of his body are also esoterically explained. His vehicle is a rat.

Parvati —Parvati, the female energy of Shiva, is worshipped under various names and forms. She is at the head of all female supernatural powers, many of whom are her own manifestations. Some are benign and beautiful, others terrible and ugly Kall, the tutelary deity of Kalighat or Calcutta, is one of her flerce manifestations. In this form she is black: a tongue smeared with blood projects from her gaping mouth: besides her weapons, she carries corpses in her hands, and round her neck are skulis. Bombay also takes its name from a goddess, Mumbadovi. Gouri, to whom offerings are made in Indian homes at an annual festival, is benign On the other hand the epidemic diseases like the plague and smallpox are caused by certain goddesses or "mothers."

Vishnu, the second member of the Hindu trinity, is the most popular detty next to Shiva. He is worshipped through his several incarnations as well as his original personality. His home is the ocean of milk, where he reclines on the colls of a huge, many-headed serpent. At his feet sits Lakshmi, shampooing his legs. From his navel issues a lotus, on which is seated Brahma, the third member of the trinity. In his hands are the conch, which he blows on the battlefield, and the disc, with which the heads of his enemies are severed. Round his neck are garlands of leaves and flowers, and on his breast are shining jewels. As Shiva represents destruction, Vishnu represents protection, and his son is the god of love. To carry on the work of protection, he incarnates himself from time to time, and more temples are dedicated nowadays to his most popular incarnations, Rama and Krishna, than to his original personality. Rama is a human figure, with a bow in one of his hands. He is always accompanied by his wife Sita, often by his brether Lakshmana, and at his feet, or standing before him with joined hands, is Hanuman, the monkey

chieftain, who assisted him in his expedition igainst Ravana, the abductor of his wife. Krishna is also a human figure, generally represented as playing on a flute, with which he charmed the damsels of his city, esoterically explained to mean his davotees.

Brahma is seldom worshipped: only a couple of temples dedicated to him have yet been discovered in all India.

Minor Deities —The minor gods and goddesses and the deified heroes and heroines who fill the Hindu pantheon, and to whom shrines are erected and worship is offered, constitute a legion. Many of them enjoy a local reputation, are unknown to sacred literature, and are worshipped chiefly by the lower classes. Some of them, though not mantioned in ancient literature, are celebrated in the works of modern saints.

The Jains in their temples, adore the sacred personages who founded and developed their sect, and venerate some of the derites common to Hinduism. But their view of Divinity is different from the Hindu conception, and in the opinion of Hindu theologians they are athelsts. So also the Buddhists of Burma pay almost the same veneration to Prince Siddhartha as if he was a god, and indeed elevate him above the Hindu gods, but from the Hindu standpoint they are also athelsts.

Images—Besides invisible powers and derfied persons, the Hindus venerate certain animals, trees and inanimate objects. This veneration must have originated in gratitude, fear, wonder, and belief in spirits as the cause of all good or harm. Some of the animals are vehicles of certain gods and goddesses—the eagle of Vishnu: the swan of Brahma the peacock of Saraswati: Hanuman, the monkey of Rama: one serpent uphoids the earth, another makes Vishnu's bed: elephants support the ends of the universe, besides one such animal being Indra's vehicle: the goddess Durga or Kali rides on a tiger: one of Vishnu's incarnations was partly man and partly hon The cow is a useful animal: to the Brahman vegetarian her milk is Indispensable, and he

treats her as his mother. So did the Righi of old, who often subsisted on milk and fruits and roots. To the agriculturist cattle are indispensable. The snake excites fear Stones, on which the image of a serpent is carved, may be seen under many trees by the roadside. The principal trees and planty worshipped are the Bacred Fig or Pipal, the Banyau, the Sacred Basil, the Bilva or Wood Apple, the Asoka, and the Acacia. They are in one way or another associated with some delty The sun, the moon, and certain planets are among the heavenly bodies venerated The ocean and certain great rivers are held sacred. Certain mountains, perhaps because they are the abodes of gods and Rishis, are holy. Pebbles from the Gandaki and the Narmada, which have curious lines upon them, are worshipped in many households and tempies.

Worship —Without going into a temple, one can get a fair idea of image worship by seeing how a serpent-stone is treated under a tree. It is washed, smeared with sandai, decorated with flowers: food in a vessel is placed before it, lamps are waved, and the worshipper goes round it, and bows down his head, or prostrates himself before the image. In a temple larger bells are used than the small ones that are brought to such a place 'jewels are placed on the idol: and the offerings are on a larger scale Idols are carried in public procession in palanquins or cars. The lower classes saorifice animals before their gods and goddesses.

Domestic Life.—Of the daily domestic life of the people a tourist cannot see much. He may see a marriage or funeral procession. In the former he may notice how a bridegroom or bride is decorated the latter may shock him for a Hindu dead body is generally carried on a few pieces of bamboo lashed together: a thin cloth is thrown over it and the body is tied to the frame The Mahomedan bier is more decent, and resembles the Christian coffin. Some Hindus, however, carry the dead to the burial ground in a palanquin with great pomp. The higher castes cremate the dead: others bury them. Burial is also the custom of the Muslims, and the Parsis expose the dead in Towers of Silence.

#### Indian Names.

The personal name of most Hindus denotes a material object, colour, or quality, an animal, a relationship, or a deity. The uneducated man, who cannot correctly pronounce long Sanskrit words, is content to call his child, father, brother, uncle, or mother, or sister, as the case may be. This practice survives among the higher classes as well Appa Saheb, Anna Rao, Babaji, Bapu Lai, Bhai Shankar, Tatacharya, Jijibhai, are names of this description, with honorific titles added. It is possible that in early society the belief in the re-birth of departed kinsmen lent popularity to this practice. Nothing could be more natural than to call a man white, black, or red: gold or silver: gem, diamond, suby, pearl, or merely

a stone: small or tall, weak or strong. a lion, a suake, a parrot, or a dog: and to name a woman after a flower or a creeper. Thus, to take a few names from the epics, Pandu means white, and so does Arjuna: Krishna black: Bhima terrible. Nakula a mongoose. Shunaka a dog 'Shuka a parrot: Shringa a horn Among the names prevalent at the present day Hira is a diamond: Ratna or Ratan a jewel: Sonu or Chinna gold 'Velli or Belli, in the Dravidian languages, means white metal or silver. Men are often called after the days of the week on which they were born, and hence they bear the names of the seven heavenly bodies concerned. When they begin to assume the names of the Hindu deities, they practically

enter upon a new stage of civilication. It is doubtful whether the Animists over venture to assume the names of the dreaded spirits to assume by them. To pronounce the name worshipped by them. If the worshipped by them is not on human of a devil is to invite him to do harm human spirits sometimes bear the names of human beings the reason seems to be that they were originally human High-caste practices—The high caste High caste practices —The high caste Hindu, on the other hand, believes that the more of a delty is on his lips, the other the name of a delty is on his deliberation after his code and practice names his children after his c oddinally priman rately names his children after his gods and more merio his children after his good managed the second tunity of pronouncing the holy names as frequently as possible. These are also gonorous and picturesque. Shiva is happy Krishna is pervader Govinda is the cowherd Krishna Keshava has fine hair. Rama is a delighter Keshava has fine lawing on the primetal waters living being on the primetal waters. Instead is the Lord of Shiva's hosts. Subrained is the luminary that makes the day. Subrained is a brother of Ganesha. The as a star manya is a brother of light. The as a star turrow: Savitri a ray of light she of golden. Radha prosperity: Rukmini is she of golden. Bhama of the growing he art. Shiva and Vishnu has each got at least a thought. ornaments Bhama of the glowing heart.
Shiva and Vishnu has each got at least a thousand names, and they may be freely drawn sand names, and they may be a children upon and paraphrased in naming one s children upon and paraphrased in pantheon is as crowded. upou and paraphrused in naming one a children and the whole Hindu pantheon is as crowded when a mother loses several as it is large children, she begins to suspect that sorie evil children, she begins to suspect that some evil spirit has conspired against her and in order to make her off-apring unattractive to the powers of darkness, she gives them ugly names, such as Kurt, rubbish, or Ukirda, dunghill, or such as Kurt, rubbish, Women are named after Martoba, the mortal Clarge Rhegitathi Gode. such as Kurt, ruppish, or Ukirua, dungmin, or Martoba, the mortal Women are named after rivers, as Sarasyati, Ganga, Bhagirathi, Godsvari, or Kayeri, just as men are sometimes with, and counsels young and to choose a wife with such a name. called after mountains along counsels young men not to choose a wife with such a name, perhaps because a river is an emblem of devi-

perhaps because a river is an emblem of deviousness and inconstancy, as a hill is an emblem of stability But the names of rivers have not been discarded. The Burmans have a not been discarded, and is born on a Monday, rurious custom if a child is born on a monday, its name must begin with a guttural, on Thursday with a palatal, on Thursday with a lablal, on Saturday with a dental navas have made this fashion of calling oneself a servant of some gold exceedingly popular,

Raja, and the Baba, Lala, Sodii, Pandit, Raja, and the Burmese Maung are also honorilic.

Professional names.—Family names some Professional names.—ramily names sometimes denote a profession. in some cases they times denote a profession. in some cases they might have been conferred by the old rulers. Mahaimight have been conferred by the old rulers. Mahaimight have been conferred by the old in former names are the names of offices held in a flour times. Mehta, Kulkarni, Desnpande, Chilinavis, Dinisariavis are the names of offices held in former times. One family name may mean a flour seller, another a canc-geller, and a family name is ilquor-seller. To insert the father's name is between one's personal and the family name is a common practice in Western India. It is a common practice in Western India from a rare elsewhere when a family comes from a rare elsewhere the suffix 'Lar' or 'wallah' is added to the name of the place and it makes a cadded to the name of the place and it makes a ramily surname in Western India. Thus, we family surname in Western India. Thus, without these affixes we may have Bilavnaris, without these affixes we may have Bilavnaris, and Suratwellahs, or Malabaris and Bilimorias, as among Parsis.

Thus Vasudev Pandurang, and family name is Hindu, whose personal name is vasude, his father's name Pendurang, and family name lather's from the village of Chipiun, name in precedes the personal name. The colutions of Musalman names follows the same lines. on Saturday with a dental

Family names—when a personal name a importance, he adds to his personal name a family or caste name might be added to a Shudra's Brahman's name, varma to a Shudra's Brahman's name, observed in the case of Guosa to a Valshyas, and Dasa to a Shudra's Brahman's name, but the meaning of the first two titles, but the meaning of the first two has changed of servant, and the products Brahman cannot tother two has changed of the servant of some of the servant and Secular history. Their surnames frequency indicate a profession or a place, as in the case of Hindus in Western India. Batilpus Readstrance Contractor Cables wallsh. Readstrance Contractor Cables wallsh. in the case of linears in Western India. Dath wallah, Readymoney, Contractor, Saklatwallah, Adenwallah and others like them are tell-tale names.

In India there has nover been so marked a separation between what are now known as the Fine Arts, and those applied to industry as was the case in Europe during the nineteenth century. As, however, Industrial art forms the subject of a special article in this book, the term Indian Art will here be confined to Architecture, Sculpture and Painting

Historical—The degree of proficiency at-

Historical —The degree of proficiency attained in art by Indians prior to B O 250, can only be conjectured by their advancement in literature; and by the indirect evidences of indebtedness shown by the works of the historic period, to those which preceded them, or direct records of artistic work of an earlier date than B.C. 250 do not exist. The chief historic schools of architecture are as follows.—Name Dates. Locality of the best

Locality of the best Examples. Ellora, Ajanta,Kali, Sanchi Buddhist ..B C 250-A.D.750. ..A.D.1000— Jaina Ellora, Mount Abu, Palitana. 1300. Brahminical... A D. 500 to Ellora, Elephanta, Orissa, Bhuvanes-war, Dharwar. Umber, Somnathpur, the present day. Chalukyan ..A.D.1000-1200. Ballur.

Dravidian . A.D.1350— Ellora, Tanjore, Ma-1750. Pathan ..A.D.1200— dura, Tinnevelly, 1650. Delhi, Mandu, Jaunpore, Indo-Saracenic A D 1520— Lahore, Delhi Agra,

Buddhist Architecture is mainly exemplified by the rock-cut temples and monasteries found in Western India and in the Topes or sacred mounds The interior decorations, and external facades of the former, and the rails and gates surrounding the latter point unmistakably to their being derived from wooden structures of an earlier period. The characteristic features of these temples are horse-shoe openings in the facades to admit light, and collonades of pillars with richly ornamented caps in the interior halls. Jaina Architecture is found in its most highly developed form in the Dilwara temples at Mount Abu. The ground plan consists of a shrine for the god or saint; a porch, and an arcaded courtyard with niches for images. The characteristic of the style is grace and lightness, with decorative carving covering the whole interior, executed with great elaboration and detail. Constructional methods suggest that original types in wood have been copied in marble.

Brahminical, Chalukyan and Dravidian styles differ little in essential plan, all having a shrine for the god, preceded by pillared porches. The outer forms vary. The northern brahminical temples have a curved pyramidal roof to the shrines, which in the southern or Dravidian style are crowned by a horizontal system of storied towers, and each story, decreasing in size, is ornamental with a central cell and figures in high relief. The Chalukyan style is affected by its northern and southern neighbours, taking features from each without losing its own special characteristics of which the star-shaped plan of the shrine, with the five-fold bands of external ornament, is the principal feature. Pathan Architecture was introduced into India by the Mahomedan inva-

sion of the thirteenth century. At old Delhi are fine examples in the Kutub Mosque and Vinar. The characteristics of the style are severity of outline, which is sometimes combined with elaborate decoration due, it is stated, to the employment of Hindu craftsmen. The mosque and tombs at Ahmedabad already show Hindu influence; but purer examples are to be found at Jaunpore and Mandu Indo-Saracenic Architecture reached the climax of its development during the reigns of the Moghul Emperors Akbar, Jehangir and Shah Jahan. It eclipsed in richness of material and refinement of taste the building efforts of previous periods, its crowning example being the Taj Mahal at Agra. The buildings erected during the Adil Shahi dynasty at Bijapur at a slightly later dute, exhibit a certain Turkish influence, especially in the great tomb of Mahmoud. Though less refined and lacking the attraction of precious materials in their decoration, these splendid edifices are held in higher esteem by some critics than those of the Moghals, on account of their simplicity, grandeur and fine proportions. The era of great civil architecture in India was revived by the Mahomedan powers. Splendid palaces and fortesses were built at Madras, Delhi, Agra Fattelpore-Sikri and Bijapur, and the example thus set was copied by the Hindu princes at Jaipur, Udaipur and elsewhere in India. The application of great architectural treatment, unequalled in extent elsewhere, is to be seen in the Ghauts or steps enclosing lakes and on the banks of rivers. The most notable constructional contribution of the Mahomedans to Indian architecture was the introduction of the true arch and dome.

Sculpture.—The use of sculpture and painting in Isolated works of art was practicelly non-existent in India until modern times. One or two reliefs and certain gigantic figures may be quoted as exceptions, but taken generally it may be stated that these arts were employed as the decorative adjuncts of architecture. No civil statuary, such as is now understood by the term, was executed; for no contemporary portrait figures, or busts in marble, or bronze, have come down to us from these of Egypt, Greece and Rome. Sculpture has been used exclusively as the handmaid of religion and to this fact may be attributed the stereo typed forms to which it became bound. The lavish use of sculpture on Indian temples often exceeds good tasts, and mars the symmetry and dignity of their mass and outline, but for exuberance of imagination, industrious elaboration and vivid expression of movement, Indian sculpture is pernaps without its equal elsewhere in the world. The most impressive specimens are the earliest, found in the Buddhist and Brahminical cave temples of Ellora, Ajanta and Elephanta. The great Trimurthi in the last named of these temples ranks for mystery and expressive grandeur with the greatest masterpleces of art. The outstanding characteristics of Hindu sculpture are the power displayed in suggesting movement; the fine sense of decorative arrangements of line and mass; and an overpowering ingenuity in intricate design Mahomedan sculpture in India, though not exclusively confined to geometric forms as is that of the

more severe Arabian school, is restrained as compared with that of sery ' Hindus. Floral motifs are often used in the ornaments to tombs and palaces, but rarely in those of mosques Their geometric ornament shows great ingenuity and invention; and wonderful decorative use is made of Persian, Arabic and Urdu lettering in panels, and their The representation of human or animal figures is rarely to be met with Sculptured and modelled relief is, as a rule, kept very low; and is mainly confined to the decoration of mouldings, architraves, lintels, or the bands of ornament which relieve large exterior Buildings of purely Mahomedan wall spaces design and workmanship show greater restraint than those upon which Hindu workmen have been employed and are more satisfactory; but at Ahmedabad the two celebrated windows are striking examples of a happy combination of the two styles and Pattehpore Sikri is a magnificent example of the mixed style of Akbar.

Painting.—Much of the carved stonework upon ancient Indian buildings was as in ancient Greece and then decorated with colour, Lut the only paintings, in the modern accepta-tion of the term, now existing, which were executed prior to the Moghul period, are those upon the walls of the cave temples at Ajanta, Bagh, and in Ceylon These remarkable works were produced at intervals during the first 600 years of the Christian era. They exhibit all the finer characteristic of the best Indian sculpture, but with an added freedom of expression due to the more tractable vehicle employed. The Ajanta Cases remained hidden in the Deccan jungles for nearly twelve hundred years, until accidentally discovered in 1816 They are painted in a species of tempora; and when first brought to light were well preserved but they have greatly deteriorated owing to the well meant, but misguided action of copylists, and the neglect of the authorities The Nizam's Government have in recent years done a great deal to-wards the preservation and study of these mural paintings The second period of Indian painting owed its origin to the introduction of Persian artists by the Moghui Emperor Akbar, and the establishment of the indigenous Moghui school was due to the encouragement and fostering was due to the encouragement and restering care of his successors, Jehangir and Shah Jahan. Unlike the works of the Ajanta painters, which were designed upon a large scale, the pictures of the Moghul school were miniatures. They were executed in a species of opaque watercolour upon paper or vellum, resembling to some extent the illuminated missals produced by the monks in Europe during the middle ages Some of the finest of the earlier specimens in India are of a religious character; this phase of development being closely allied to the art of the caligraphist. As its range extended, a remarkable school of portrait painters arose notable for restrained but extremely accurate. drawing, keen insight into character, harmonious colour, fine decorative feeling, and extraordinary delicary and finish in the painting of detail. The artists of a Hindu off-shoot of this movement, known as the Rajout school, were less fully endowed with the technical and purely aesthetic qualities than were the Moghul pain-ters; but they brought to their work poetry and sentiment which are not to be found in that of

the Mahomedans The pictures of both branches the of the Moghul school, although highly decorative in character, were not intended for exhibition upon the walls of rooms, according to ment western practice, and, when not used as illustrations or decorations to manuscript books, sian, were pre-erved in portfolios. It is very significant that up to the best period of Moghul or painting, the reign of Jehangir, European ideas ulpin art, pictures, and prints were extensively patronised by the Emperor. This broad eclecticism of the Moghuls is in marked contrast to the the opinions of Mr Havell and his school of critics who have severely criticised the facilities of advanced training in Indian art schools and which Bombey in particular has adopted with marked success.

Modern Painting —As the telgn of Shah Jahan exhibits the high tide of artistic development in India, so the reign of his successor Aurangzeb marks the period of its rapid decline. The causes of this are attributable to the absence of encouragement by this Emperor, to his long periods of absence from the court at Delhi or Agra, entailed by the continuous wars he waged in his efforts to bring the whole of the Peninsula under his rule; and partly to the fact of the school of Monhul painting becoming stereotyped in its practice. Foreign designers, craftsmen who painters and had been attracted to India by the great works carried out by Akbar, Jehangir and Shah Jahan left the country, and their places were taken by no successors. The indigenous artists left to themselves in the isolated courts of small Indian princes, or collected in schools in remote districts, employed themselves mainly upon repeating the works of a previous age, instead of seeking new motifs for artistic treatment At the time when the British East India At the time when the Division laws and of Company ceased to be only a guild of merchants and became a great administrative power in 1757, very little vitality survived in the ancient art of the country. During the century of its administrative history between the hattle of Plassey and the Indian Mutiny, the "Company" was too fully occupied in fighting for its existence, extending its borders and setting the internal economy of its ever increasing territories, to be able to give much attention to conserving any remnant of artistic practice which had survived. Without any deliberate intention of introducing western art into the country. Greek and its derivative style of architecture were adopted for public and private buildings in Calcutta, Bombay and Madras because these were found to be more suitable for their purpose than buildings of indigenous pattern. The practical result was the same; for the Indian craftsmen employed upon their erection were confronted with styles upon their erection were confronted with styles affording no scope for the application of their traditional ornament and concerning which they had no knowledge or sympathy. As there were no sculptors in India capable of modelling or carving civil sculpture, the monuments to distinguish public servants were all imported from England; and the portraits, or other paintings which decorated the interior walls of the buildings, were furnished by European painters who visited India or by artists in England. Although a considerable amount of research work of a Voluntary nature was done by Archæwork of a Voluntary nature was done by Archæologists, no official interest was taken in artistic education until the Government of India was transferred to the British Crown fb 1859. In England itself, the first fifty years of the nineteenth century was a period of gross commercialism and artistic degradation, but with the advent of the International Exhibition of 1851 the eyes of the nation were opened to the value of art as applied to industry.

The Schools of Art then instituted throughout England were imitated in a timid and tentative manner in India, and were attached to the educational system, which had been previously modelled upon a definitely European basis. The work of the Schools of Art in regard to industrial art is referred to elsewhere, and as several of them have confined their activities almost exclusively to this branch of the subject it is sufficient to mention only the work of the Schools at Caloutta and Bombay in the present article. The Calcutta school, except for occasional experiments in the application of the graphic arts to lithography, engraving and stained glass, has become a school of painting and drawing. That at Bombay covers a wider field; for in addition to classes for modelling, painting and design it possesses a special school of architecture, and a range of technical workshops, in which instruction is given in the applied arts. It is in the principles underlying the instruction in painting that the schools at Calcutta and Bombay have taken almost diametrically opposite roads to reach the end they both have in view, namely, the revival of the art of painting in India by means of an indigenous school of Indian painters Mr. Havell, who several years ago was the Principal of the Calcutta School, dhe left India in 1907) banished from within its walls every vestige of European art, and claimed that the traditional art of India, in its old forms, is not dead but merely sleeping or smothered by the blanket of European culture laid upon it for the last 150 wars and needed but be released from of European culture and upon it for the last 150 years, and needed but to be released from this incubus to regain its pristine vigour. Well equipped with literary ability; backed by intense enthusiasm for the views he held, he imposed upon his students an exclusive and severe study of the Moghul and Rajput schools of variation. of painting. He was fortunate in finding or painting, the was intended in mining and equally enthusiastic friend in Mr. Abivandranath Tagore, an artist of imagination and fancy, combined with a serious devotion to his art. He with other Bengal painters, inspired by Mr. Havell's precepts founded, about thirty years ago, what has since become known as the Calcutta School of painting. In their early work the neutron of the become known as the Calcutta School of painting In their early work the painters of this school closely adhered to the conventions of Moghul and Rajput artists, whom they took as their models, and these early examples made a great impression upon all European critics who saw them. They were welcomed as the first sign of a genuine revival of Indian painting, based upon traditional lines, and if was conbased upon traditional lines, and it was confidently hoped that the movement would meet with the support it merited from Indians of all classes Interesting as many individual works of the school undoubtedly are the anticipations which greeted its inception have scarcely been fulfilled by the Calcutta school The painters themselves have never reached the high technical standard of the artists who produced the best works of the Moghul or Bajput schools, and, as time has passed, their outlook appears to have shifted, and, while stemming the flood of western influence, they appear to have drift ed into a backwater of Japanese conventions. The Indian public has failed to give the school the support it was hoped they would afford and the movement has had to depend for encouragement mainly upon Europeans in England and India

Bombay School of Art.—The attitude to-wards the development of art in modern India taken by its successive Principals Messrs Lock-wood Kipling, Griffiths, Greenwood, and Cecil Burns, was on wider lines than that favoured by Mr. Haveil In general the view this School of Art has taken is that with European literature dominating the system under which the educated classes in India are trained and with European ideas, and science permeating the professional commercial, industrial, and political life of the country, it is not possible for modern artists in India to work on purely archaic models, and that to copy these would be as unprofitable as it would be for the artists of Europe to harness themselves to the conven-tions of the Greek and Roman sculptors or to those of the mediaval painters; that with European pictures, often of inferior quality illustrating every educational text book, and sold in the shops of every large city, it is essential for the proper education of art students that they should have before them the masterpieces of European art; and that, with the wide adoption of European styles of architecture in India, it is necessary for a school of art to possess the best examples of ornament applicable to the great historic styles, for the purpose of study and refe-There are certain basic principles common to the technique of all great art, such as fine and accurate drawing in its widest sense, composition and design, and the science of colour harmony

Among the developments during Mr. Burns, administration were the founding of the Architectural School, the extension of drawing classes in the Government Schools, and the appointment of an Inspector of Drawing to inspect and report on the drawing classes in the schools A Pottery Department was also started and was abolished in 1926. Mr Burns retired in 1918 and was succeeded in 1919 by the present Director, Mr W.E. Gladstone Solomon, KIH, BC.

Mr Solomon entirely reorganised the courses of study The Life Classes which were organised at the end of 1919 have been pronounced by competent judges as well up to the level of the Life Classes of the European Schools of Art But proficiency in technique forms only one side of the present system of training, for even in Europe, too much of the study from Life is quite capable of negativing its own object. In India, where the decorative instinct is inherent, and where the possibilities of freehand drawing are still understood, the danger of overdoing the Life Class is even more palpable. So side by side with these realistic aids to study, and at the same period, a class of Indian Decorative Painting was inaugurated in the Bombay School of Art on a basis of scholarships

Bombay (Lord Lloyd). As this class specialises in Mural Painting it has long been popularly known as the Class of Mural Painting. This class has executed the decorations for many public and private buildings, and painted the ceiling and panels of a specially constructed Indian Room which was exhibited at Wembley in 1924, and found a purchaser in England A great deal of controversy, which has been characterised by its academic rather than its practical note, has centred round these new movements in art training in India but now movements in art training in India, but the Bombay School of Art has retained the patronage and support of the public and the increase in the number of its students (who now number about 600 in all sections of the School) has been continuous since it took its present line. It is significant that the wide-spread revival of public interest in Art in West ern India has synchronised with these activities

The School of Art has of late years enjoyed the patronage of successive Governors of Bombay and, largely due to the efforts of Sir Leslie Wilson, the Government of India inaugurated a competition of Indian Artists in 1927 for the decoration of wall spaces in the new buildings at New Delhi The result of the Competition was notified in October 1928, when five artists of Bombay, and the Bombay and Lahore Schools of Art were commissioned to paint Mural Decorations in the new Secretariat buildings The Bombay School undertook the decoration of Committee Room "A" (in the North Block) and the paintings, which were executed in oils on canvas, were finished, and successfully placed in position on the dome and walls by the middle of September These decorations were original compositions of life size figures, symbolising the main periods of Indian Art, and the different branches of the Fine and Applied Arts In April 1929, the Government of Bombay converted the Bombay School into a Department independent of the Director of Public Instruction, the Principal (Mr W. E Gladstone Solomon) being made Director. In October 1930 the latter organised an exhibition of the work of all Departments of this School of Art in India House, London The Exhibition was very well patronised by the public and extremely well received by the art critics and the Press Majesty the Queen Impress graciously patro nised the exhibition and selected several of the paintings displayed

While the Bombay School was engaged upon the work of mural decoration at New Delhi in 1928-1929, which is referred to above, a public competition for the selection of four Indian artists to proceed to England was announced by the Government of India The successful candidates were to study for a year at the Royal College of Art, South Kensington, after which they were to be employed on the mural decoration of the interior of India House, Aldwych The Bombay School was unable to compete, owing to its preoccupation with the New Delhi decorations, and four artists from Bengal were selected by a Committee appointed by the Government of India, which, though it included two representatives.

patronage of the Governor of inability to take part was not brought to the d Lloyd). As this class specialises notice of the Committee, and that therefore the result of the competition could not be represontative of all the Indian Provinces The four elected artists finished the decountive work which they had been engaged to execute at India House and returned to India in 1932. But in 1933 two of them were re-engaged to decorate the entrance hall of the building, in consequence of this considerable confroversy has arisen on the whole subject of the India Mouse mural paintings and their claim to be representative of India as a whole This opisode has thrown into stronger relief the differences on the subject of art in India between the Western and Eastern districts of the country, a noticeable diminution of the exclusionists art propaganda, and a tendency towards aligning art in Bengal with the position which Bombay has occupied in this matter for the lest two generations, is one of the salient symptoms of the present situation (1935) Another cause of public controvers, which was more local in character, had occurred near the end of 1932, when the Bombay Reorganisation Committee which had been appointed by the Bombay Government for purposes of retrenchment, advocated the closing down of the Bombay School of Art, the abolition of its buildings and the utilisation of the compound of the school for a hospital. The Architectural school was to be moved elsewhere. These diagonian recommendations created a great deal of public dissatisfaction, which expressed itself in public agitation, processions and a crowded inceting of protest After full exami-nation of this seed question, the Governor of Bombay, Sir Frederick Sykes, who had taken keen interest during his administration, in the welfare of the School, personally announced in a speech delivered at the School of Art on November 24, 1933, that the institution was to be maintained upon its present basis Since the satisfactory settlement of the question an important event deserves to be recorded. The India Society of London organised an Exhibition of Modern Indian Ait in London, which was opened by II H the Duchess of York at the New Burlington Gallenes on December 10, 1931. The most instructive feature of this Exhibition was that the representation of India was secured by means of Regional Committees which collected pictures and sculptures from their own districts the respective sections of the Exhibition devoted to Bombay and Bengal were compared, and the work from Western India received a most favourable welcome from most of the prominent art critics and journals in England The Regional Committee of Bombay under the patronage of Lord Brabourne, the Governor, and the Chairmanship of Sir Phiroze Sethna, and with Mr Kanaiyalal Vakilas its Hon Secretary, had selected a varied and fairly representative collection of paintings, sculpture, and architectural drawings. At the request of this Committee. the Government of Bombay deputed Mr Gladstone Solomon to supervise, arrange, and enta-logue the Bombay exhibits in London The whole enterprise was a successful demonstration of the aims and ideals of the Bombay School of Paint, ing, and since this Exhibition the long-standing two representatives from Bombay (who were not artists) has been criticised on the ground that several of the Bengal representatives were professional artists, that the Bombay School's leasert itself in sporadic outbursts hereafter

# Indian Architecture.

The architecture of India has proceeded on lines of its own, and its monuments are unique among those of the nations of the world. An ancient civilization, a natural bent on the part of the people towards religious fervour of the contemplative rather than of the fanatical sort, combined with the richness of the country in the sterner building materials—these are a few of the factors that contributed to making it what it was, while a sturing history gave it both variety and glamour. Indian architec-ture is a subject which at the best has been studied only imperfectly, and a really com-prehensive treatise on it has yet to be written The subject is a vast and varied one, and it may be such a treatise never will be written in the form of one work at any rate. The spirit of Indian art is foreign to the European and few can entirely understand it, While art criticism and analysis is a branch of study that the Indian has not as yet developed to its full extent Hitherto the best authority on the subject has been Fergusson, whose compendious work is that which will find most ready acceptance by the general reader. But Fergusson attempt-ed the nearly impossible task of covering the ground in one volume of moderate dimensions, and it is sometimes held that he was a man of too purely European a culture, albeit wide and eclectic, to admit of sufficient depth of insight in this particular direction Fergusmagnet in this particular direction regarders son's classification by races and religions is, however, the one that has been generally accepted hitherto. He asserts that there is no stone architecture in India of an earlier date than two and a half centuries before the Christ-ian era, and that "India owes the introduc-tion of the use of stone for architectural purposes, as she does that of Buddhism as a state religion, to the great Asoka, who reigned B.C. 272 to 286"

Buddhist Work.

first architectural period is Fergusson's then the Buddhist, of which the great tope at Sanchi with its famous Northern gateway is perhaps the most noted example. Then we have the Gandharan topes and monasteries. Perhaps the examples of Buddhist architecture of greatest interest and most ready access to the general student are to be found access to the general student are to be found in the Chaitya halls or rock-cut caves of Karlı, Ajanta, Nasik, Ellora, and Kanheri A point with relation to the Gandhara work may be alluded to in passing. This is the strong European tendency, variously recognized as Greek, to be observed in the details. The foliage seen in the capitals of columns bears strong resemblance to the Greek acanthus, while the sculptures have a distinct trace of Greek influence, particularly in the treatment. Greek influence, particularly in the treatment of drapery, but also of hair and facial expression From this it has been a fairly common assumption amongst some authorities that Indian art owed much of its best to European influence, an assumption that is strenuously combated by others as will be pointed out later.

The architecture of the Jains comes next in order. Of this rich and beautiful style the most noted examples are perhaps the Dilwara temples near Mount Abu, and the unique "Tower of Victory" at Chittore.

# Other Hindu Styles.

The Dravidian style is the generic title usually applied to the characteristic work of the Madras Presidency and the South of India. It is seen in many rock-out temples as at Eliora, where the remarkable "Kylas" is an instance of a temple cut out of the solid rock, complete, not only with respect to its interior (as in the case of mere caves) but also as to its exterior It is, as it were, a life-size model of a complete building or group of buildings, several hundred feet in length, not built, but sculptured in solid stone, ar undertaking of vast and, to our modern ideas, unprofitable industry The Pagoda of Tanjore, the temples at Srirangam, Chidambaram, Vellore, Vijayanagar, &c, and the palaces at Madura and Tanjore are among the best known avanuals of the state. the best known examples of the style

The writer finds some difficulty in following Fergusson's two next divisions of classification, "Chalukyan" ialukyan" of South-central India, "Northern of Indo-Aryan style" and the The differences and the similarities are apparently so intermixed and confusing that he is fain to fall back on the broad generic title of Hindu "--however unscientific he may thereby stand confessed. Amongst a vast number of Hindu temples the following may be mentioned as particularly worthy of study:—Those at Mukteswara and Bhuvaneswar in Orissa, at Khajuraho, Bindrabun, Udaipur, Benares, Gwalior, &c The palace of the Hindu Raja Man Singh at Gwalior is among the most beautiful architectural examples in India So also are the palaces of Amber, Datiya, Urcha, Dig and Udaipur.

#### Indo-Saracenic

Among all the periods and styles in India the characteristics of none are more easily recognizable than those of what is generally "Indo-Saracenic" which devecalled the loped after the Mahomedan conquest. Under the new influences now brought to bear on it the architecture of India took on a fresh lease of activity and underwent remarkable modifi-cations. The dome, not entirely an unknown cations. The dome, not enturely an unknown leature hitherto, became a special object of desture hitherto, necame a special object of development, while the arch, at no time a favourite constructional form of the Hindu builders, was now forced on their attention by the predilections of the ruling class The minaret also became a distinctive feature. The requirements of the new religion,—the recommendation of the new religion,—the region with its wide spaces to meet the pade. mosque with its wide spaces to meet the needs of organized congregational acts of worshipgave opportunities for broad and spacious treatments that had hitherto been to some extent denied. The Moslem hatred of idolatry set a tabu on the use of sculptured regresentations of animate objects in the adornment of the buildings, and led to the development of other decorative forms. Great ingenuity came to be displayed in the use of pattern and of geometrical and foliated ornament. This Moslem trait further turned the attention of the builders to a greater extent than before to proportion, scale and mass as means of giving beauty, mere richness of sculptured surface and the æsthetic and symbolic interest of detail being no longer to be depended on to the same degree

Foreign Influence.

There would appear to be a conflict between archeologists as to the extent of the effect on Indian art produced by foreign influence under the Mahomedans The extreme view on the one hand is to regard all the best of the art as having been due to foreign importation. The Gan-dharan sculptures with their Greek tendency, the development of new forms and modes of treatment to which allusion has been made, the similarities to be found between the Mahomedan buildings of India and those of North Africa and Europe, the introduction of the minaret and, above all, the historical evidences that exist of the presence in India of Europeans during Mogul times, are cited in support of the theory On the other hand those of the opposite school hold the foregoing view to be due to the prevailing European preconception that all light and leading must come by way of Rurope, and the best things in art by way of Greece. To them the Gandharan sculp-ture, instead of being the best, is the worst in India even because of its Greek tineture They find in the truly indigenous work beau ties and significances not to be seen in the Greeo-Bactrian sculptures, and point to those of Borobuder in Java, the work of Buddhist colonists from India, wonderfully preserved by reason of an immunity from destructive finances given by the insular position, as the best examples of the art extant.

is probable that a just estimate of the merits the controversy, with respect to sculpture it any rate, cannot be formed till time has obliterated some of the differences of taste

obliterated some or the that exist between East and West.

To the adherents of the newer school the between Indo-Mahomedan and Hindu buildings outweigh those and Western Mahomedan between Indian work, especially in the light of the dis-similarities between the latter. They admit the changes produced by the advent of Islam but contend that the art, though modified, yet remained in its essence what it had always been, indigenous Indian. The minaret, the dome, the arch, they contended, though developed under the Moslem influence, were yet, so far as their detailed treatment and crafts manship are concerned, rendered in a manner distinctively Indian. Fergusson is usually distinctively Indian. Fergusson is usually regarded as the leader of the former school while the latter and comparatively school has at present found an eager champion in Mr E B Havell, whose works, on the subject are recommended for study side by side with those of the former writer Mr Havell prac tically discards Fergusson's racial method of classification into styles in favour of a chrono architectural expression, though subject to tecture of these centres.

variations from the influences brought to best upon it and from the varied purposes to which it was applied

Agra and Delhi.

Agra and Delhi may be regarded as the principal centres of the Indo-Saracenic style—the former for the renowned Taj Mahal, for Akbar's deserted capital of Fatchpur Sikri, his tomb at Secundra, the Moti Musid and palace buildings at the Agra fort. At Delhi to hear the Fort we have the great Jumma Musild, the Fort, the tombs of Humayon, Suldar Jung, &c., and the unique Quth Minar Two other great contres may be mentioned, because in each there appeared certain strongly marked individualities that differentiated the varieties of the style there found from the variety seen at Delhi and Agra, as well as that of one from that to the other. These are Ahmedabad in Gujarat and Bljapur on the Dekhan, both in the Rombay Presidency.

Ahmedabad. At Ahmedabad with its neighbours Sirkhei and Champanir there seems to be less of a departure from the older Hindu forms, a tendency to adhere to the lintel and bracket rather than to have recourse to the arch, while the dome though constantly employed, was there never developed to its full extent as elsewhere, or carried to its logical structural conclusion. The Ahmedanad work is probably most famous for the extraordinary beauty of its stone "jail" or plerced lattice-work, as in the palm tree

wundows of the Sidi Sayyld Musild.

Bijapur. The characteristics of the Bijapur variety of the style are equally striking. They are perhaps more distinctively Mahomedan than those of the Ahmedabad buildings in that here the dome is developed to a remarkable degree, indeed the tomb of Mahmud—the well-known "Gol Gumbaz"—is cited as shewing the greatest space of floor in any building in the world roofed by a single dome, not even excepting the Pantheon. The lintel also was excepting the Pantheon The lintel also was here practically discarded in favour of the arch. The Bijapur style shows a bold masculine quality and a largeness of structural concep-tion that is unequalled elsewhere in India though in richness and delicacy it does not attempt to rival the work of the further North. In this we recognize among other influences that of the prevaling material, the hard uncompromising Dekhan basalt. In a similar manner the characteristics of the Ahmedabad work with its greater richness of ornamenta-tion are bound up with the nature of the Gujarat froestone, while at Delhi and Agra the free choice of materials available—the local red and while sandstones, combined with access logical review of what he regards to a greater to marble and other more costly materials—extent than did his famous precursor as being was no doubt largely responsible for the many one continuous homogeneous Indian mode of easily recognizable characteristics of the archi-

### II. MODERN.

divides itself sharply into two classes. There spread their influence, chiefly, in the case of is first that of the indigenous Indian "Master architecture, through the medium of the Debuilder" to be found chiefly in the Native partment of Public Works. The work of that States, particularly those in Rajputana department has been much animadverted Second there is that of British India, or of upon as being all that building should not be, all those parts of the peninsula wherever but, considering it has been produced by men

The modern architectural work of India Western ideas and methods have most strongly

of whom it was admittedly not the metier, and who were necessarily contending with lack of expert training on the one hand and with departmental methods on the other, it must be conceded that it can shew many notable buildings. Of recent years there has been a tendency on the part of professional architects to turn their attention to India, and a number of these has even been drafted into the service of Government as the result of a policy initiated in Lord Curzon's Viceroyalty. In time, therefore, and with the growth of the influence of these men, such of the reproach against the building of the Fritish in India as was just and was not merely thoughtlessly maintained as a corollary to the popular jape against everything official, may gradually be removed. If this is so as to Government work progress should be even more assured in the freer atmosphere outside of official life. Already in certain of the greater cities, where the trained modern architect has established himself, in private practice, there are signs that his influence is beginning to be felt. He still complains, however, that the general public of India needs much educating up to a recognition of his value, both in a pecuniary sense and otherwise

To the work of the indigenous "masterbuilder" public attention has of recent years been drawn with some insistence, and the auggestion has been present that efforts should be directed towards devising means for the preservation of what is pointed out—and now universally acknowledged—to be a remarkable of "ilving art," but which is threatened with gradual extinction by reason of the spread of Western ideals and fashions. The matter assumed some years ago the form of a mild controversy centring round the question of the then much discussed project of the Government of India's new capital at Delhi It was urged that this project should be utilised to give the required impetus to Indian art rather than that it should be made a means of fostering European art which needed no such encouragement at India's expense. The advocates of this view appear for the most part to have been adherents of the "indigenous Indian" school agnerents of the "indigenous Indian" school of archeologists already mentioned, and to have based their ideas on their own reading of the past. They still muster a considerable following not only amongst the artistic public of England and India, but even within the Government services. Their opponents, holding what appears to be the more official view both as to appears to be the more official view both. as to archaelogy and art, have pointed to the "death" of all the arts of the past in other countries as an indication of a natural law, and deprecate as waste of energy all efforts to resist this law, or to institute what they have termed "another futile revival"! The British in India, they contend, should do as did the ancient Romans in every country on which they planted their conquering foot As those were wont to replace indigenous art with that of Rome, so they is a country on which they planted their conquering foot as they are the country of conquery representatives. should we set our seal of conquest permanently on India by the erection of examples of the best of British art. This is the view which, as we have indicated, appears to have obtained for the moment the more influential hearing, and the task of designing and directing the construction

of the principal buildings in the new Capital was accordingly entructed jointly to two famous British architects, neither of whom can be unduly influenced by either past or recent architectural practice so far as ladis is concerned The building of New Delhi is perhaps too recent an event for the practice of a definite results. Delhi is perhaps too recent an event for the passing of a definite verdict. The work of Sir Edwin Lutyens and Sir Herbert Baker abides the judgment of posterity. If that work has had its severe critics, it has also received the commendation of many Tre cream domes set on tall bases, rise from the centre of the Secretariat buildings, and surmounted by cupolas have reminded some of Bramarte's work in Rome, or the Pantheon, or Wren's dome of St Paul's. Below there are the semi-circular entrances resembling Moghul door-ways, the rows of comparatively small windows, some filled with pierced sandstone screens somewhat distract the eye, and seem to mar the effect of sturdiness prevailing throughout. The Secretariats were meant no doubt to usher the visitor to New Delhi to the "piece de resistance" of the architectural composition, the Viceroy's House Standing where it does this building is intended to dominate and necessarily arrests the gaze of the visitor, while its massive end baywith stepped entablature capped by saucered fountains are said to give the architectural eye a feeling of safety against spreading. This feeling of security continues as the spectator's gaze of security continues as the speciator's gaze travels down the unusual design of the metalled dome to the solid projecting bays that contain the statues of King George V and Queen Mary, which complete the composition Some think that the colour scheme avoids the "glaring disunity" in Aloghul buildings when the white lummous marble was used with similar red sandstone, for here the two sandstones, red and cream are blended and co-ordinated With regard to the interior decorations of New Delhi. regard to the interior decorations of New Delhi, strenuous efforts were made by those who believed in the enterprise as a point of focus for the revival of Indian art to obtain for the Indian art schools and artists commissions to carry out the Mural paintings required in the new buildings. After a great deal of public agitation on this subject in Bombay some commissions of this kind were given by the missions of this kind were given by the Government of India, based on the results of a public competition. But in spite of the indubitable success of many of the paintings, and the proof furnished thereby of the Indian artist's capacities for this kind of work, nothing further has been accomplished in the matter since the end of 1929

The controversy of East and West, however vital to the interests of the country's architecture, is too purely technical for its merits to be estimated by the general reader or discussed here. Its chief claim on our attention has in the fact that it affords an added interest to the tourist, who may see the fruits of both schools of thought in the modern bridings of British India as well as examples of the "master builders" work in nearly every native town and bazaar The town of Lachkar in Gwalior State may be cited as peculiarly nich instances of picturesque modern Indian street architecture, while at Jaipur, Udaipur, Benares, etc., this class of work may be studied in many different forms both civil and religious

# Industrial Arts.

The ancient industrial arts of India formed two distinct groups. The first included those allied to, and dependent upon, architecture; the second comprise those applied to articles devoted to religious ritual; military weapons and trappings, domestic accessories and to personal

ndornment.

The articles of the first group were intended for some fixed and definite position, and the style of their design and the character of their workmanship were dictated by that of the building with which they were incorporated. Those of the second group were movable, and the range of their design was less constricted and their workmanship was more varied. Examples of work in both groups are so numerous, and the arts comprise such a diversity of application, that only a cursory survey can be attempted within the limits of a short review. Although the design and treatment differ in the two groups, the materials used were often the same. These materials cover a very wide range but space only permits of reference to work applied to the four materials upon which the Indian craftsman's skill has been most extensively displayed. These are stone, wood,

etal and textiles Before dealing separately with each of these materials a few words upon the principal Indian styles are necessary. The two distinctive styles are Hindu and Mahomedan The former may be termed indigenous, dating as it does from remote antiquity, the latter was a variation of the great Arabian style, which was brought into India in the fourteenth century, and has since developed features essentially Indian in character. The art of both Hindus and Mahomedans is based upon religion and the requirements of religious ritual. The obvious expression of this is shown in the different motifs used for their ornament. In Hindu art all natural forms are accepted and employed for decorative purposes; but in that of the Mahomedans, nearly all natural forms are rejected and forbidden. The basis of Mahomedan decoration is therefore mainly geometrical. In each of them, racial characteristics are stukingly exhibited. The keynote of Hindu work is exuberance, imagination and poetry; that of Mahomedan rationage intellect and good tasts. Mahomedan, reticence, intellect and good taste The Hindus are lavish, and often undiscriminating in their employment of ornament, the Mahomedans use more restraint. In fact the two styles may be compared, without straining the analogy, to the Gothic and classic styles in Europe. In both styles the fecundity of ideas and invention in design are marvellous, and the craftsmanship often reaches a very high standard Hindu art had been subjected throughout the ages to many foreign influences. but the artistic instincts of the people have proved so conservative that, whether these alien ideas came from the east or the west, they have often been absorbed, and are now stamped with a definite Indian character Recognition this fact should relieve the anxiety of those critics who fear that the penetration of Western art and culture into India at the present time will eventually rob Indian art of nts national character.

Stone Work.—Carved stone work is the principal form of decoration employed in Hindu temples. In variety and scope it range, from the massive figures in the Buddhist and Brahminical Cave Temples, and the detached sculpture of the temples of Southern India, to the delicately incised reliefs and elaborately fretted ornament of the Jain temples at Mount Abu. A curious fact in relation to Hindu work is that priority of date appears to have no relation to artistic development. It is not possible to trace, as in the case of Greek, Roman and Mediaval craftwork, the regular progressive steps from art in its primitive state to its culminating point and its subsequent decay. Styles in India seem to spring into existence fully developed, the earlier examples often exhibiting finer craftsmanship than those of a later date There can be little doubt that stone carving in India was simply the application of the wood carvers' art to another material The treatment of stone by the Hindu craftsmen, even in the constructive principles of their buildings, bears a closer resemblance to the practice of the wood-worker than to that of the stone mason The earlier wooden examples from which the stone buildings and their decorations were derived have long since disappeared, but their influence is apparent. The keynote of Hindu design is rhythmic rather than symmetrical; design is rhythinic rather than symmetrical; that of their craftsmanship, vigour rather than refinement. In the carving of the human figure and of animals great power of expressing action is shown, and this spontaneous feeling is preserved despite the greatest elaboration and detail. The industry displayed is amazing, no amount of labour appears to have daunted the Hindu craftsmen in carrying out their large and intreate schemes of decontion. huge and intricate schemes of decoration.

The stone carving on Mahomedan buildings except where Hindu carvers have been allowed a free hand, is much more restrained than that on Hindu temples The fact that geometrical forms were almost exclusively used, dictated lower relief and greater refinement in the carving, while the innate good taste of the designers prompted them to concentrate the ornament upon certain prominent features, where its effect was heightened by the simplicity of the rest of the building. The invention displayed in working out geometrical patterns for work screens, inlay, and other ornamental details appears to be inexhaustible; while won-derful decorative use has been made of Arabic and Persian lettering in panels and their fram-To obtain a rich effect the Hindus relied upon the play of light and shade upon broken surfaces, the Mahomedans to attain the same end used precious materials; veneering the surfaces of their buildings with polished marble which they decorated with patterns of mosaic composed of lade, agate, only and other costly stones. Although the art of inlaying and working in hard stones was of Italian origin, it proved to be one eminently suited to the genius of the Indian craftsman; and many wonderful examples of their skill in the form of book rests, tables, thrones, footstools, vases and sword handles are extant to show the height of proficiency they attained. The treatment of precious stones by Indian jewellers may here be referred to. Sir George Birdwood states that "the Indian jeweller thinks of producing the sumptuous, imposing effect of dazzling variety of rich and brilliant colours and nothing of the purity of his gems." This is true in a general sense and "full many a gem of purest ray serene" was utterly runed by crude cutting and plercing But although as early as the sixteenth and seventeenth centuries diamonds and precious stones from the Indian mines were taken to Europe to be cut, many of the finest jewels found their way back to the treasure houses of Indian princes. Sir G. Watt has divided Indian stone work into three great stages or types, viz (1) from the excavation of Cave Temples and the construction of Buddhist topes, (2) the building of Hindu Chalakyan and Jain Temples, (3) the Pathan and Moghul Mosques, tombs and palaces It is interesting to note that the Schools of Art in India have given attention to this industry. For instance the Bombay School of Art has to its credit a number of public buildings adorned by means of its student stone-cutters

Wood Work —With a fine range of tim-bers suitable for the purpose, wood has played a great part in the construction and decoration of Indian buildings Unfortunately, much of the ancient wood work has been destroyed by the action of the climate and the teeming insectivorous life of India; and that which escaped these enemies was wiped out by fire and the sword It is therefore only possible to con-jecture the height of artistic development these buildings and their decorations displayed by the copies in stone which have been preserved Few if any examples of a date earlier than the sixteenth century are to be found Many of these, and specimens of a later date to be seen in towns and cities throughout the country, are masterpieces of design and craftsmanship The carved timber fronts and inner courtyards of houses in Ahmedabad, Nasik, and other parts of Western India are notable for their picturesqueness and beauty the structural beams, the overhanging balconies, with their screens and supporting brackets, being carved in a manner which unites richness of effect with good taste and propriety Of furniture, as the term is now understood, few examples were in use in India before Europeans introduced their own fashions. These were confined to small tables and stools, book rests, clothes chests and screens, the designs of which conformed somewhat closely to the architectural style of the period. Many of these were decorated with inlays of coloured woods, ivory and metal, while in some cases the wooden basis was entirely plated with copper, brass or silver In Southern India, where close grained sandalwood is grown, jewel cases and boxes are enriched with carving executed with the attention to detail and the finish generally associated with the carving of ivory Coloured lac was freely used to decorate many articles of furniture, especially those turned on the lathe, and rich colour effects were obtained in this, perhaps the most distinctive and typically Indian development of decoration as applied to wood work Teak, shisham, deothar, sandalwood ebony, walnut, jun nim and Madras red wood are among the chief woods used in India for ornamental work.

Metal Work — With the exception of weav-g, the metal working industry employed ing, the metal working industry employed and still employs the greatest number of artistic craftsmen in India Copper and brass have always been the two metals most widely used always been the two metals most widely used for domestic purposes by Mahomedans and Hindus. The shapes of many of these humble vessels are among the most beautiful to be found in the country. They exhibit that sense of variety and touch of personality which are only given by the work of the human hand; and the shapes are those which grow naturally from the working of the material with the simplest limplements. In the technical treatment of brass and copper Indian craftsmen have shown a taste and skill unsurpassed by those of other a taste and skill unsurpassed by those of other nations, except in the department of fine casting In this, and in the working of gold and silver, a higher standard of technical and con-structive exactness has been reached by the metal workers of Europe and Japan It may be taken as an axiom that the more beautiful the shape of an article is, and this especially applies to metal work, the less exists for the decoration of its surface less need equally true that the highest test of craftsmanship is the production of a perfect article with out any decoration. The reason being that the slightest technical fault is apparent on a plain surface, but can be hidden or disguised of one which is covered with ornament. The one which is covered with ornament. The goldsmiths and silversmiths of India were extremely skilful and industrious, but judged by this test their works often exhibit a lack of care and exactness in the structural portion and a completely satisfactory example of perfectly plain work from the hands of the gold and silversmiths of India templa to be part with sliversmiths of India is rarely to be met with Much of the excessive and often mappropriate ornamentation of the articles that they produced owed its application as much to the necessity of hiding defective construction as it did to any purely decorative purpose For many generations, ornaments of gold and silver were regarded in the light of portable wealth, a practice which naturally made for massiveness These solid ornaments are most effective and picturesque; and, despite an enormous output of elaborate and delicate work from their bands, the most valuable contribution of the Indian metal workers to the sum tota of man's artistic use of the precious metals will probably be found to lie in a certain barbaric note which distinguishes these pieces—a note not present in the craft work of other countries In the design of Hindu gold and silver ornaments, religious symbols have been extensively used. The ornaments which bedeck the early sculptured figures, and those depicted in the paintings at the Cave Temples of Ajanta are precisely the same in design and use as similar articles made at the present time, thus affording a striking evidence of the inherent conservatism of the Hindu people and its effect upon an in-dustrial art that makes a closer personal appeal than any other.

Textiles.—The textile industry is the widest in extent in India and is that in which her craftsmen have shown their highest achievements Other countries, east and west of India have produced work equal at least in stone, wood, and metal; but none has ever matched that of her weavers in cotton and wool, or excelled them in the weaving of silken

fabrics. Some of the products of the looms of Bengal are marvels of technical skill and perfect taste, while the plum bloom quality of the old Cashmere shawls is an artistic achievement which places them in a class by themselves. Weaving being essentially a process of repeti-tion, was the first to which machinery was applied, and modern science has brought power loom weaving to such a state of perfection that filaments of a substance finer even than those of Dacca, which astonished our ancestors, are now produced in the milis of Lancashire. for beauty of surface and variety of texture no machine-made fabrics have ever equalicd the finest hardwork of the weavers of India Many of the most beautiful varieties of Indian textile work have disappeared, killed by the com-petition of the power icom. In other branches of art as applied to textiles India does not hold so pre-eminent a position as in that of weaving The printed silks and callcoss of the seventeenth and eighteenth centuries deservedly held a high place in the estimation of Western nations, whose craftsmen learnt many valuable lessons from the technical skill, and artistic taste they display Nothing approaching the tapestries made in Europe in the middle ages has been produced in India. The nearest approach to these is in carpets and rugs. This art was introduced from Persia, but Indian craftsmen have never succeeded in equalling the finest work of their instructors either in colour or design.

Modern Conditions.—In the foregoing ketch of the ancient industrial art of India, as applied to the four principal materials employed only a general indication of its more striking characteristics has been possible. A volume would be required to give a detailed description of say one of them, and would leave many other minor arts to be considered. All these branches of art came into existence, were developed and flourished in India when social and economic conditions were vastly different from those of the present day. Like similar artistic crafts carried on in Europe up to the end of the eighteenth century, they were executed by hand labour. The processes involved had not been discovered by scientific inquiry, such as is now understood by the phrase, but were the outcome of generations of slowly built up experience. We now come to the effect upon them of the changed conditions which have revolutionised industrial art in Europe during the last century.

The invention of the steam engine, and the application of mechanical power and scientific research to industry in Europe, mark the dividing line between ancient and modern industrial art. Not only on its technical side is this so, but the effect of these changes has been to alter the character of the work itself and the spirit which animated the craftsmen. In place of the ancient ideal of variety in design and treatment, which meant a limited output, the modern one of uniformity and unlimited output has been substituted. The capitalist has displaced the master craftsman, the organised factory, the small workshop; specialisation and division of labour have taken the place of general proficiency among the artisans, the function of the designer has been separated from that of the craftsman, local markets have

been extended to serve the whole world; and the skilled handleraftsman has, in a great measure, become a machine-minder It took measure, become a machine-minder It took about one hundred years of gradual change for the craftsmen of Europe fully to adjust themselves to these altered conditions: and during the greater portion of that period India protected by the difficulties of transport, contimed its immemorial practice. Fifty years ago this protective harrier was removed by the opening of the Suer Canal, and the craftsmen of India have since been struggling to avoid the same fate which overtook those of Europe half a century before. With less time to adapt themselves to the changed conditions the Indian craftsmen have had to meet the the indian craitmen have had to meet the competition of European rivals aiready fully equipped with new and unknown tools. Even before this period of intense competition, observers interested in Indian craftwork had noticed evidences of its deterioration. The falling off, both in design and workmanship was attributed to the conservative practice. of the craftsmen; to the gradual loss of foreign markets, and to the long period of internal disorder which had deprived them of both the natronage of the rulers of an earlier age and the stimulating contact with foreign craftsmen who had previously been attracted to the splendid courts at Delhi and Agra During the same period, an even greater degradation in design had overtaken the craftwork of Europe. This was due to entirely different causes namely, to the introduction of machinery. Attention had been so concentrated upon speedy producorganisation that beauty of design had been almost entirely neglected. This was so foreibly demonstrated at the International Exhibition of 1851 that efforts were at once made to bring art and industry together once more. Schools of Art and Management were founded throughout. of Art and Museums were founded throughout England and the same system was copied in a tentative and timid fashion in India function of these institutions was accurately estimated in England, where the artistic in-dustries were already highly organised and were commercially successful, and whose products were to be found in every market of the world Their business was to assist these industries by training a body of efficient designers capable of furnishing the factories with suitable designs, new or old, and in any style, to satisfy the requirements of customers in any country. It was never supposed for an instant that a School of Art could lead an industry. In India their function was as completely misunderstood as were the causes of the depression in Indian craftwork. The schools were not only expected to lead the industries which were living, but to revive those which were moribund, and resurrect those which were dead In the report of the Indian Industrial Commission the need for some State-aided system of industrial and commercial organisation of the industrial arts with an expectation  panded scheme of technical and artistic instruction for the craftsmen has been recognised. If, assistance and encouragement are given by the Imperial and \ocal Governments to the Indian craftsmen industrial art in India will quickly emerge from the cloud of depression, which has hung over it for a century past into the sunlight of prosperity.

# Archæology.

The aucient monuments of India are as varied as they are numerous. Until a few years ago, the earliest known were the brick and stone erections of the Maurya period, a group of mounds at Lauriya Naudangarh, illustrative of the Vedic funeral customs and assignable roughly to the 7th or 8th century BC, and some rough stone walls at the angient city of Rajagriha of about walls at the ancient city of Rajagriha of about the same period. The absence of structures of an earlier period was then supposed to be due to the fact that all previous architecture had been of wood and had completely perished. The recent excavations, however, at Mohenjo-daro, in Sind and at Harappa in the Punjab, have completely revolutionised ideas on this subject and proved that as far back as the 3rd or 4th millennium B C, and probably much earlier still, India was in possession of a highly developed India was in possession of a highly developed civilization with large and populous cities, well built houses, temples and public buildings of brick and many other amenities enjoyed at that period by the peoples of Mesopotamia and Egypt Both at Mohenjo-daro and Harappa there are the remains of some 5 or 6 cities superimposed one upon the ruins of another

The structures that have so far been exposed at Mohenjo-daro belong to the three latest cities Those of the third or earliest are on the site the best in style, those of the first the poorest Most of the structures are dwelling houses or shops, but there are others which appear to have been temples and one—of particularly massive proportions—is a large bath, surrounded by fenestrated galleries and halls. All were built of well burnt brick and most of them were of two or more storeys with staircases giving access to the upper rooms. In and around the ruins have been found many minor antiquities including gold and silver jewellery, engraved seals of stone and ivory and paste copper implements and vessels, terracotta figurines and toys, shell ornaments and potteries both painted and plain.

discoveries establish the existence in Sind and the Punjab during the 4th and 3rd millennia BC of a highly developed city life and the presence, in many of the houses, of wells and bathrooms as well as an elaborate dramage system betoken a social condition of the citizens at least equal to that found in Sumer and superior to that prevailing in contemporary Baby lonia and Egypt. The inhabitants of these lonia and Egypt. The inhabitants of these cities lived largely no doubt by agriculture and It is a point of interest that the specimens of wheat found at Mohenjo-daro resemble the common variety grown in the Punjab to-day Besides bread, their food appears to have included beef, mutton, and pork, the fiesh of tortoises, turties and gharial, fresh fish from the Indus and dried fish from the sea coast. Among their domesticated animals were the humped their domesticated animals were the humped Indian bull, the buffalo, a short horned bull, the sheep, pig, dog and elephant. Besides gold and silver they used copper, tin, bronze and lead; they were familiar with the arts of spinning and weaving and with the cultivation of attention and attentions high domestic and attentions of the cultivation of attentions of the cultivations. vation of cotton and had attained a high degree Century A.D. All these are of stone, but there of proficiency in the jeweller's and potter's arts is one of iron also. It is near the Quith Minar

That they possessed a well developed system of writing is evidenced by the discovery of over a thousand tablets engraved with well-executed animal devices and pictographic legends in an unknown script. The method of disposal of the dead at Mohemo-daro is uncertain but at Harappa two types of burnl have been met with, namely, complete burials along with funerary pottery, and "pot burials" Only 27 of the latter have been examined and these were found to contain skulls and human bones and are seemingly fractional burials

This Indus Valley culture has now been traced as far as Rupar in the Ambala District, relatively close to the watershed of the and Jumna and it is therefore highly improbable that this civilization was confined to Indus Valley and there can hardly be any reasonable doubt that future researches will will trace it into the valley of the Ganges Of the long period of more than 2,000 years that separates the pre-historic morreferred to above from the historic monuments period of India, little or nothing is yet known but there is every hope that this gap in our know-ledge may be filled in by further excavations From the time of the Mauryas, 2 e, 3rd century BC, the history of architecture and the formative arts of India is clear and can be traced with relative precision. The financial stringency caused by the world economic depression caused almost the suspension of excavation in these

Pillars —The Monumental monuments which have come down to us from the Maurya period, include, besides the caves to be referred to below, the wooden palisade (4th century B C) which surrounded the ancient city of Patali-putra (modern Patua), and of which a large section has been exposed, the rock and pillar educts of Asoka (Ofrea 250 BC), the remains of a large pillared hall constructed by the same emperor at Pataliputra, a number of brick stup as and a monolithic rail which originally surmounted an Asoka stupa at Sarnath near Benares. Altogether thirteen pillars of Asoka are known besides the Elephant capital of a 14th at Sankısa and a fragment of a 15th at Benares. Ten of them bear his inscriptions Of these the Lauriya-Nandangarh column in the Champaran District, Tirhut, is practically uninjured The capital of each column, like the shaft, was monolithic, and comprised three members, viz, a Persepolitan bell, abacus, and crowning sculpture in the round. By far the best capital of Asoka's time was that ex-humed at Samath near Benares. The four lions standing back to back on the abacus are carved with extraordinary precision and accuracy, and originally supported a wheel symbolizing the law of piety preached by the Buddha Several pieces of this wheel were found and are now preserved in the Archeological Museum at Sarnath Of the post-Asokan period one pillar (B.C 150) stands to the north-east of Besnagar in the Gwallor State, another in front of the cave of Karlı (A D 70), and a third at Eran in Central Provinces belonging to the 5th

Coves—Of the med exeastions which are one of the wonders of India, nine-teaths belong to Western India. The most important groups of cares are situated in Bhain, lieden Karli, Kanherl, Junnar, and Sack in the Bornbay covered are those of Barabar and Nagarjunl melusion and to show that all the bronze which were excavated by Asoka and his grandnages discovered at Nalanda were the work
local metal-casters

Topes.—Stupus, known as dagabas in Ceylon

Pitalkhora and care No. 9 at Ajanta and and commonly called Topes in North India, No. 19 at Nasik They have been assigned were constructed either for the safe custody to 200 BC by Fergusson and Dr. Burgess of relies hadden in a chamber often near the But there is good reason to suppose from base or to mark the scope of notable events in Sir John Marshall's recent researches and Buddhist or Jama legends. Though we know from epigraphic considerations that they are that the ancient Jainas built stupes, no specimen considerably more modern. The Buddhist caves of Jaina stupas is now extant A notable are of two types—the chargus or chapel cave structure of this kind which existed until recent and wharas or monasteries for the residence of monks The first are with raulted roofs and horse-shoe shaped windows over the entrance number of Jaina sculptures now deposited in and have interiors consisting of a nave and side aisles with a small stupa at the innoccircular end. They are thus remarkably similar to Christian basilicas The second class consist of a hall surrounded by a number of cells. In the later rehards there was a sanctum in the centre of the back wall containing a large image of Buddha Hardly a chartya is found without one or more wharas adjoining it. Of the Hindu cave temples that at Elephanta near Bombay is perhaps the most frequented It is dedicated to Siya and is not earlier than the 7th century A.D. But by far the most renowned cave-temple of the Rindus is that known as Kallasa at Ellora. half the present dimensions, was apparently the Hindus is that known as Kaliasa at Ellora, erected by Asoka at the same time as his lion- It is on the model of a complete structural crowned pillar near the south gate, but as temple but carved out of solid rock. It also is Rashtrakuta king, Krishna 1, (A D 768), who may still be seen in the paintings in the callings of the upper porch of the main shrine Of the Jaina caves the earliest are at Khanda. in Indra Sahha at Ellora; and those of the latest period, at Ankar in Nasik The cerlings of many of these caves were once adorned with fresco paintangs. Perhaps, the best preserved among these are those at Ajanta, which were exe-cuted at various periods between 350-650 A.D and have elicited high praise as works of art Copies were first made by Major Gill, but most of them perished by fire at the Crystal Palace in 1866 The lost ones were again copied, by John Griffiths of the Arts School, Bombay, half of whose work was similarly destroyed by a fire at South Kensington. They were last copied by Lady Herringham during 1909-11 Her pictures, which are in full scale, are at present exhibited at the Indian Section of the Victoria and Albert Museum, South Kensington, and have been reproduced in a volume brought out by the India Society Another group of caves where equally interesting though less well preserved paintings exist is found at Bagh in Gwalior State. These caves form the subject of a monograph issued by the India Society.

Gandhara Monuments -On the north-west trontier of India, anciently known as Gandhara, are found a class of remains, runed monasteries and buried stupus, among which we notice for the first time representations of Buddha and the Buddhist pantheon. The free use of Corinthian capitals, friezes of nude Erotes bearing a long garland, winged Atlantes without number, and a host of individual motifs clearly establish the a nost of individual movin clearly establish the influence of Hellenistic art. The mound at Peshawar, locally known as Shah-ii-ki-Dheri, which was explored in 1909, brought to light several interesting sculptures of this school together with a reliquary casket, the most remarkable bronze object of the Gandhara period. The inscription on the casket left no doubt as to the mound being the stupe raised over a portion of the body relics of Buddha by the Indo Scythian king Kanlshka. They were presented by Lord Minto's Government to the Buddhists of Burma and are now enshrined at Mandelly. To about the same are belong the Mandalay. To about the same age belong the stupes at Manikyala in the Punjab opened by Ranjit Singh's French Generals, Ventura and Court, in 1830 Some of them contained coins of Kanishka There was brought to light at Taylla during the winter of 1932-33 what proved to be the largest monastery so tar unearthed in north-west India In it there was an inscription dated in the year 134 of an unspecified era and roughly corresponding with the year 76 A D The record is regarded as important because of the assistance it gives in dating Gandhara sculptures in various parts

Structural Temples —Of this class the earliest examples are the Varaha temple at Deogarh, District Jhansi, another temple at Sanchi, the brick temples at Bhitargaon in the

dedicated to Siva and was excavated by the temples at Athole in Bijapur, the latter of which cannot be later than the eighth century AD The only common characteristic is flat roofs without spires of any kind. In other respects they are entirely different and already here we mark the beginning of the two styles, Indo-Aryan and Dravidian, whose differences become more and more pronounced from the 7th century onwards in the Indo-Aryan style, the most promunent ones tend to the perpendicular, and in the Dravidian to the horizontal The salient feature of the former again is the curvilinear steeple, and of the latter, the pyramidal tower. The most notable examples of the first kind are to be found among the temples of Bhubaneswar in Orissa, Khajuraho in Bundelkhand, Osia in Jodhpur, and Dilwara on Mount Abu One of the best known groups in the Dravidish style is that of the Mamallapuram Raths, or 'Seven Pagodas,' on the seashore to the south of Madras They are each hewn out of a block of granite, and are rather models of temples They are the earliest examples of than raths typical Dravidian architecture, and belong to the 7th century To the same age has to be assigned the temple of Kailasanath at Conjecveram, and to the following century some of the temples at Aihole and Pattadkal of the Bijapur District, Bombay Presidency, and the mono-lithic temple of Kallasa at Ellora, referred to above Of the later Dravidian style the great temple at Tanjore and the Srirangam temple near Trichmopoly are the best examples

> Intermediate between these two main styles comes the architecture of the Deccan, called Chalukyan by Fergusson In this style the plan becomes polygonal and star-shaped instead of quadrangular; and the high-storeyed spire is converted into a low pyramid in which the horizontal treatment of the Dravidan is combined with the perpendicular of the Indo-Aryan Some fine examples of this type exist at Dambal, Ratthali, Tilhwalli and Hangal in Dharwar, Bombay Presidency, and at Ittaga and Warangal in Nizam's Dominions But it is in Mysore among the temples at Hallebid Belur, and Somnathpur that the style is found in its full perfection.

Inscriptions.—We now come to inscriptions, of which numbers have been brought to light in India They have been engraved on varieties of materials, but principally on stone and copper The earliest of these are found incised in two distinct kinds of slphabet, known as Brahm: and Kharoshth:, the latter being confined to the north-west of India The Brahmi was read from left to right, and from it have been evolved all the modern vernacular scripts of India. The Kharoshthi was written from right to left, and was a modified form of the ancient Aramaic alphabet introduced into the Punjab during the period of the Persian domination in the 5th century B.O. It was prevalent up to the 4th century A.D., and was supplanted by the Brahmi. The earliest dateable inscriptions are the celebrated edicts of Asoka to which a reference has been made above. One group of district of Cawnpore and the temples at Tigowa, these has been engraved on rocks, and an-Nachna, Eran and Bhumara all of which belong to other on pillars. They have been found from the Gupta period and a later one at Tigowa in the Central Provinces. In South India we have to Nighva in the Nepal Tarai, from Girnar in two more examples viz. Lad Khan and Durga Kathiswar to Dhauli in Orissa, from Kalsi in the

Lower Himalayas to Siddapur in Mysore, show ing by the way the vast extent of territory held by him. The reference in his Rock Edicts to the five contemporary Greek Princes, Antiochus II. of Syria, Ptolemy Philadelphus, and so forth is exceedingly interesting, and fixes B C. 269 as the date of his coronation. His Rumanudei pillar insemption, again, discovered in Nepal Tarai, now settles, beyond all doubt, the birth-place of Buddha which was for long disputed. Another noteworthy record is the inscription of the Besnagar pillar. The pillar had been known for a long time but Sir John Marshall was the first to notice the inscription on it. It records the erection of this column, which was a Garuda pillar, in honour of the god Vasudeva by one Heliodoros, son of Dion who is described as an envoy of King Antial kidas of Taxila. Heliodoros is herein called a Bhagavata, which shows that though a Greek he had become a Hindu and presumably a Another inscription worth noticing and especially in this connection is that of Cave No 10 at Nasik. The donor of this cave, Ushavadata, who calk himself a Saka and was thus an Indo-Sovthian, is therein spoken of as having granted three hundred thousand kine and sixteen villages to gods and Brahmans and as having annually fed one hundred thou sand Brahmans Here is another instance of a foreigner having embraced Hinduism Thus for the political, social, economical and religious netory of India at the different periods the cariptions are invaluable records, and are the only light but for which we are forlorn and

Saracenic Architecture — This begins in indus with the 18th century after the permanent occupation of the Muhammadans Their first mosques were constructed of the materials of Hindu and Jaiua temples, and sometimes with comparatively slight alterations. The mosque called Arhat-din-La-hompra at Ajmer and that near the Qutb Minar are instances of this kind. The Muhammadan architecture of ludia varied at different periods and under the various dynasties, imperial and local. The early Pathan architecture of Delhi was massive and at the same time was characterised by elaborate richness of ornamentation. The Qutb Minar and tombs of Altamsh and Ala-nd-din Khilji are typical examples Of the Sharqu style we have three mosques in Jaunpur with At Mandu in the Dhar State, a several tombs third form of Saracenic architecture sprang up, and we have here the Jami Masjid, Hoshang's tomb, Jahaz Mahal and Hundola Mahal as the most notable instances of the secular and eccirsiastical styles of the Malwa Pathans The Muhammadans of Bengal again developed their own style, and Pandua, Malda, and Gaur teem with the rules of the buildings of this type, the important of which are the Adina Masjid of Sikandar Shak, the Eklakhi mosque, Kadam Rasul Masjid, and so forth. The Bahmani Rasul Maqid, and so forth. The Bahmani dynasty of Gulbarga and Bidar were also great builders, and adorned their capitals with important buildings The most striking of these is the great mosque of Gulbarga, which differs from all mosques in India in having the whole central area covered over so that what in others

which the Saracenic architecture assumed," says Fergusson, "that of Ahmedabad may probably be considered to be the most elegant." It is notable for its carved stone work; and the work of the perforated stone windows in Sidi Sayyid's mosque, the carved niches of the mnars of many other mosques, the sculptured Mihrabs and domed and panelled roofs is so exquisite that it will rival anything of the sort executed elsewhere at any period. No other style is so essentially Hindu. In complete contests with this was the form trast with this was the form of architecture employed by the Adil Shahi dynasty of Bijapur. There is here relatively little trace of Hindu forms or details. The principal buildings now left at Bijapur are the Jami Masjid, Gagan Mahal, Mihtar Mahal, Ibrahim Rauza and mosque and the Gol Gumbaz. Like their predecessors, the Pathans of Delhi, the Moghuls were a great building race. Their exple first were a great building race. Their style first negan to evolve itself during the reign of Akbar in a combination of Hindu and Muhammadan features Noteworthy among the emperor's buildings are the tomb of Humayun, and the palaces at Fatehpur Sikri and Agra. Of Jehangir's time his mosque at Lahore and the tomb of Itimad-ud-daula are the most typical structures. "The force and originality of the structures. The lores and originally of one style gave way under Shah Jahan to a delicate elegance and refinement of detail." And it was during his reign that the most splendid of the Moghul tombs, the Tai Mahal at Agra, the tomb of his wife Mumtaz Mahal, was constructed. The Moti Masid in Agra Fort is another surpassingly pure and elegant monument of his time.

Archeological Department —As the archeological monuments of India must attract the attention of all intelligent visitors, they would naturally feel desirous to know something of the Archeological Department. The work of this Department is primarily two-fold, con-servation, and research and exploration. None but spasmodic efforts appear to have been made by Government in these directions till 1870 when they established the Archeological Survey of India and entrusted it to General (afterwards our) Alexander Cunungham, who was also the first Director-General of Archaelogy. The next advance was the initiation of the local Surveys in Bombay and Madras three years after. The work of these Surveys, however, was restricted to antiquarian research and descriptions of the contraction of the test of conserver. tion of monuments, and the task of conserving old buildings was left to the fictul efforts of the local Governments, often without expert guid-ance or control. It was only in 1878 that the Government of India under Lord Lytton awoke to this deplorable condition, and sanctioned a sum of 3% lakhs to the repair of monuments in United Provinces, and soon after appointed a conservator, Major Cole, who did useful work for three years Then a reaction set in, and his post and that of the Director-General were abolished. The first systematic step towards recognising official responsibility in conservation matters was taken by Lord Curzon's Government, who established seven of the eight Archæolopical Circles that now obtain, placed them on a perma-nent footing and united them together under the control of a Director-General, provision being would be an open court is here roofed by sixty-three small domes "Of the various forms of imperial funds, when necessary. The Ancient

Monuments Preservation Act was passed for the protection of historic monuments and relica especially in private possession and also for State control over the excavation of oncient sites and traffic in antiquities. Under the direction of Sir John Marshall, Kt, Ol.E. late Director-General of Archeology, a comprehensive and systematic campaign of repair and excavation has been prosecuted, and the result of it is manifest in the present altered conditions of many old and historic buildings and in the scientific excavation of buried sites such as Tayla, Patali-putra, Sanchi in the Bhopal State, Sarnath near Benares, Nalanda in Bihar, Pharapur in Bengal and Nagarjunikonda in Madras and in the Indus Valley at Harappa in the Punjab and Mohenjodaro in Sind. Of all these works those of most general interest are the Mohenjo-daro excavations, for here the Archeological Department have unearthed remains of prehistoric cities dating back to 3000 B C and further. The Archeological Survey has devoted considerable attention to the organization and development of museums as centres of research and education It maintains

the archeological section of the Indian Museum at Calcutta, small museums at the Taj, and at the Forts at Agra, Delhi and Lahore, the Central Asian Antiquities Museum at New Delhi and has erected local museums at the excavated sites of Taxila, Sarnath, Nalanda, Mohanjo-daro and Harappa with the object of keeping the small movable antiquities recovered at these sites in close association with the structural remains to which they belong, so that they may be studied amid their natural surroundings and not lose focus and meaning by being transported to some distant place.

The epigraphical material dealt with by the Archeological Survey has enabled the history and chronology of the various dynasties of India to be established on a firmer basis and in greater detail. The "Epigraphia Indica" is now in the 21st volume, a revised edition of the Asoka inscriptions has been recently published while the companion volume of post Asokan Brahmi inscriptions is under preparation. A volume of non-Asokan Kharoshthi inscriptions was

published two years ago

# Indian Time.

For many years Indian time was in a state of chaotic confusion. What was called Madras or Railway time was kept on all the railways and each great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed to the Local Governments, and through them to all local bodies, a long letter which reviewed the situation and made suggestions for the future. The essential points in this letter are indicated below

"In India we have already a standard time, which is very generally, though by no means universally, recognised. It is the Aladras local time, which is kept on all railway and telegraph lines throughout India and which is 6h. 21m. 10s. in advance of Greenwich Similarly, Rangoon local time is used upon the railways and telegraphs of Burma, and is 6h. 24m 47s. ahead of Greenwich. But neither of these standards bears a simple and easily remembered relation to Greenwich time.

"The Government of India have several times been addressed by Scientific Societies, both in india and in England, and urged to fall into line with the rest of the civilised world. And now the Royal Society has once more returned to the attack. The Committee of that Society which advises the Government of India upon matters connected with its observatories, writes—'The Committee think that a change from Madras time to that corresponding to a longitude exactly 5½ hours east of Greenwich would be an improvement upon the existing arrangements; but that for international scientific purposes the hourly zone system, making the time 5 hours in advance of Greenwich in the west, and 6 hours in advance in the east of India would be preferable."

"Now if India were connected with Europe by a continuous series of civilised nations with their continuous railway systems all of which had adopted the European hour-zone system, it would be imperative upon India to conform and to adopt the second suggestion But as she is not, and as she is as much isolated by uncivilised States as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated colonies and to adopt the first suggestion.

"It is believed that this will be the better solution. There are obvious objections to drawing an arbitrary line right across the richest and most populous portions of India, and so as to bisect all the main lines of communication, and keeping times differing by an hour on opposite sides of that line. India has become accustomed to a uniform standard in the Madras time of the railways; and the substitu-tion for it of a double standard would appear to be a retrograde step; while it would, in all probability, be strongly opposed by the railway authorities. Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike, and it is certain that the double standard would puzzle the latter greatly; while by emphasising the fact that railway differed from local time, it might postpone or even altogether prevent the acceptance of the former instead of the latter by people generally over a large part of India. The one great advantage which the second possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour: whereas under the latter it will even exceed an hour in the extreme cases of Karachi and Quetta. But this inconvenience is believed to be smaller than that of keeping two different times on the Indian system of railways and telegraphs.

"It is proposed, therefore, to put on ill the rallway and telegraph clocks in India by Sin. 50s. They would then represent a time 64 hours taster than that of Greenwich, which would be known as Indian Standard Time and the difference between standard and local time at the places mentioned below would be the difficult to profit times a recognition of the profit ing minutes, and F and S. mething that the bouillement, the register of the profit ing minutes, and F and S. mething that the bouillement, the register of the three of or behind local, he yellows for it is the feet there is the true of the place.

"This standard time would be as much as 51; and 55 minutes behind local time at Mandal sy and Rangoon, respectively, and since the religion system of Burma is not connected with that of avisers of Burian is not connected with time of live own, mandly, Rangoon local time, it is not suggested that Indian Standard Time should be adopted in Burian It is proposed, however, that in stead of using Rangoon Standard Time as it present, which is 6h 2 jm 47s, in advance of Greenwich, a Burma Standard Time should be adopted on all the Burmese rallways and telegraphs, which would be one hour in advance of Indian Standard Time, or 64 hours aliend of Greenwich time, and would corre-pond with 97° 30' Is longitude. The change would bring tradeutta time; but in liotality local time is Burma time into simple relation both with retained only in the clock which are maintained by the Mouldigality and in the catable hours (among other things) simplify telegraphic communication with other countries.

"Standard Clines III than has been foreighter gall way cand tel graphs for the whole of the falesa l'impire. It's remeral adoption for r't perpose, while eminently relatable to a matter which must be left to the focal community in each care."

# Coinage, Weights and Measures.

As the currency of India is based upon the rupee, statements with regard to money are rupee, statements with regard to money are generally expressed in rupees, nor has it been found possible in all cases to add a conversion into sterling. Down to about 1873 the gold value of the rupee (containing 165 grains of pure silver) was approximately equal to 2s., or one-tenth of a £, and for that period it is easy to convert rupees into sterling by striking off the final cipher (Rs 1,000—£100). But after 1873, owing to the depreciation of silver as compared with gold throughout the world, there came a serious and progressive fall in the there came a serious and progressive fall in the exchange, until at one time the gold value of the rupee dropped as low as 1s In order to provide a remedy for the heavy loss caused to the Government of Indla in respect of its gold-payments to be made in England, and also to relieve foreign trade and finance from the inconvenience due to constant and un-foreseen fluctuations in exchange, it was re-solved in 1893 to close the mints to the free coinage of sliver, and thus force up the value of the rupee by restricting the circulation. The intention was to raise the exchange value of the rupee to 1s. 4d, and then introduce a gold standard at the rate of Rs. 15—\$1 From 1899 onwards the value of the rupee was manufactured with instantants. maintained, with insignificant fluctuations, at the proposed rate of is. 4d until February 1920 when the recommendation of the Committee appointed in the previous year that the rupee should be linked with gold and not with sterling at 2s. instead of 1s. 4d. was adopted This was followed by great fluctuations (See article on Currency System).

Notation.—Another matter in connection with the expression of money statements in terms of rupees requires to be explained The method of numerical notation in India differs from that which prevails throughout Europe. Large numbers are not punctuated in hundreds of thousands and millions, but in lakes and crores. A lake is one hundred thousand (written out as 1,00,000), and a crore is one hundred lakes or ten millions (written out as 1,00,00,000). Consequently, according to the exchange value of the rupee, a lakh of rupees (Rs. 1.00,000) may be read as the equivalent of £10,000 before 1879, and as the equivalent of (about) £0,667 after 1899, while a crore of rupees (Rs. 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 1878, and as the equivalent of (about) £666,667 after 1899. With the rupes at 1s 6d a lake is equivalent to £7,500 and a crore is equivament to £750,000.

Coinage —Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both Indians and Europeans. The anna was formerly reckoned as 11d, it may now be considered as exactly corresponding to 1d. The anna is again sub-divided into 12 pies

n'th immense variations in the weight of units

The scale used generally throughout Northern India, and less commonly in Madras and Bombay, may be thus expressed one maund = 40 seers, one seer=16 chitaks or 80 tolas. The actual weight of a seer varies greatly from district to district, and even from village to village, but in the standard system the tola is 180 grains Troy (the exact weight of the rupee), and the seer thus weighs 2 057 lb, and the maund 82 28 lb. The standard is used in official reports.

Retail -For calculating retail prices, universal custom in India is to express them in terms of seeis to the rupee. Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quantity to be obtained for the same amount of money In other words, prices in India are quantity prices, not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight perplexing to an English reader. It may, however, be mentioned that quantity prices are not altogether unknown in England, especially at small shops where pennyworths of many groceries can be bought Eggs, likewise, are commonly sold at a varying number for the shilling. If it be desired to convert quantity prices from Indian into English denominations without having recourse to money prices (which would often be misleading), the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb., and that the value of the rupes remains constant at 1s 4d, 1 seers are the seer of the seers are the s

of the rupes remains constant at 18 4d, 1 seer per rupes—(about) 8 lb for 2s, 2 seers per rupes—(about) 6 lb for 2s, and so on.

The name of the unit for aquare measurement in India generally is the bigha, which varies greatly in different parts of the country. But areas have been expressed in this work

elther in square miles or in acres.

Proposed Reforms—Indian weights and measures have never been settled upon an organised basis suitable for commerce and the characteristic of the modern age. They vary from town to town and village to village in a way that could only work satisfactorily so long as the dealings of towns and villages were self-contained and before roads and railwere seir-contained and before roads and rail-ways opened up trade between one and the other. It is pointed out that in England a hogshead of wine contains 63 gallons and a hogshead of beer only 54 gallons; that a bushel of corn weighs 46 lbs in Sunderland and 240 lbs. in Cornwall; that the English stone weight represents 14 lbs. in popular estimation, but only 5 lbs, if we are weighing glass, and eight for meat, but 6 lbs. for cheese. Similar instances are multiplied in India by at least instances are multiplied in India by at least as many times as India is bigger than England. If we take, for instance, the maund denomination of weight common all over India, we shall find that in a given city there are nearly as many maunds as there are articles. The anna is again sub-divided into 12 pies to weigh. If we consider the maund as ba-Weights—The various systems of weights tween district and district the state of affairs used in India combine uniformity of scale is worse. Thus in the United Provinces alone. the maund of sugar weighs 481 seers 12

Caynpore, 40 in Muttra, 72} in Gorakhpur, 40 in Agra, 50 in Moradabad, 43} in Saharanpur, 50 in Barelly, 46 in Pyzabad, 48} in Shahschanpur, 51 in Goshangunze. The maund varies throughout all India from the Bengal or railway maund of 82-2/7 lbs. to the Factory maund of 74 lbs. 10 oz. 11 drs., the Bombay maund of 28 lbs., which apparently answers to the Forest Department maund in use at the Fuel Depot, and the Madras maund, which some authorities estimate at 25 lbs. and others at 24 lbs. and so on.

Committees of Inquiry.—These are merely typical instances which are multiplied indefi There are variations of every detail of weights and measures in every part of Iudia The losses to trade arising from the confusion and the trouble which this state of things causes are heavy. Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform. The Supreme and Provincial Governments have made various attempts during 40 years past to solve the problem of universal units of weights and measures and commerce and trade have agitated about the question for the past century. The Indian railways and Government departments adopted a standard tola (180 grains), seer (80 tolas) and maund (40 seers) and it was hoped that this would act as a successful "lead" which would gradually be followed by trade throughout the empire, but the expectation has not been realised.

The Government of India considered the waole question in consultation with the prowincal Governments in 1890-1894 and various special steps have at different times been taken in different parts of India. The Government of Bombay appointed a committee in 1911 to make proposals for reform for the m 1911 to make proposals for reform for the Bombay Presidency. Their final report has not been published, but they presented in 1912 an ad interim report which has been issued for public discussion. In brief, it points out the practical impossibility of proceeding by compulsory measures affecting the whole of India The Computer stated that we the of India The Committee stated that over the greater part of the Bombay Presidency a standard of weights and measures would be heartily welcome by the people that legislation compulsorily They thought applied over large areas subject to many diverse conditions of trade and social life would not result in branging about the desired reform so successfully as a "lead" supplied by local legislation based on practical experience. The want based on practical experience. The want of coherence, savoir faire, or the means of cooperation among the people at large pointed to this conclusion. The Committee pointed out that a good example of the results that will follow a good lead is apparent in the East Khandesh District of the Presidency, where the District Officer, Mr Simcox, gradually, during the course of three years, induced the people to adopt throughout the district unform which the district unforms which the district uniform which the district uniform which the district uniform which we will be districted as a part of the presidency. form weights and measures, the unit of weight in this case being a tola of 180 grams. But the committee abstained from recommending that the same weights and measures should But be adopted over the whole Presidency, pre-ferring that a new system started in any area should be as nearly as possible similar to the take such legislation, but at present they conhest system already prevailing there.

Committee of 1913.—The whole problem was again brought under special consideration by the Government of India in October, 1918, when the following committee was appointed to inquire into the entire subject anew .-

Mr. C. A. Sliberrard (*President*). Mr. A. Y. G. Campbell. Mr. Rustomji Fardoonji

This Committee reported, in August 1915, in favour of a uniform system of weights to be adopted in India based on the 180 grain tola The report says:—Of all such systems there is no doubt that the most widespread and best known is that known as the Bengal or Indian Railway weights. The introduction of this system involves a more or less considerable change of system in parts of the United Provinces (Gorakhpur, Barelly and neighbouring of the Punjab (rural portions of Amritsar and neighbouring districts), of Bombay (South Bombay, Bombay city and Gujarat), and the North-West Frontier Province. Burma has at present a separate system of its own which the committee think it should be permitted to retain The systems recommended are -

Government Action.—The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they again; for the present and subject to the restrictions imposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think advisable to standardise dry and liquid measures of capacity within their provinces Similarly, they announced their decision not to adopt all-India standards of length or area.

As regards weights they decided in favour of the standard mentioned under the heading "Weights", near the commencement of this article, this having been recommended by a majority of the Weights and Measures Committee and having received the unanimous support of the Local Govern-ments. At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that "if subsequently, opinion develops strongly in favour of sider that any such step would be premature,

# The Peoples of India.

It is essential to bear in mind, when dealing with the people of India, that it is a continent intermixture, in varying proportions, of the Indorather than a country. Nowhere is the complex Aryan and Dravidian types. The head-form is character of Indians more clearly exemplified than in the physical type of its inhabitants No one would confuse the main types, such as varies from lightish brown to black; the nose ranges from medium to broad, being always the light of the properties of the properties of the people of India, that it is a continent intermixture, in varying proportions, of the Indorather than a country. Gurkhas, Pathans, Sikhs, Rajputs, Burmans, Nagas, Tamils, etc., nor does it take long to carry the differentiation much farther. The typical inhabitants of India—the Dravidians—differ altogether from those of Northern Asia, and more nearly resemble the tribes of Malaya, Sumatra and Madagascar. Whatever may be their origin, it is certain that they have settled in the country for countless ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by successive hordes of invaders, including Aryans, Scythians, Pathans and Moghals, and in the North-East by Mongoloid tribes allied to those of Burma, which is India only in a modern political sense Between these foreign elements and the pure Dravidians is borderland where the contiguous races have intermingled.

The people of the Indian Empire are divided by Sir Henry Risley (Caste, Tribe and Race, Indian Census Report, 1901; the Gazetteer of India, Ethnology and Caste, Volume I, Chapter 6) into seven main physical types. There would be eight if the Andamanese were included, but this tank group of Negretor may be discovered. this tiny group of Negritos may be disregarded.

The Turko-Iranian, represented by the Baloch, Brahm and Afghans of Baluchistan and the North-West Frontier Province. Probably formed by a fusion of Turkland Persian elements. in which the former predominate Stature above mean; complexion fair, eyes mostly dark but occasionally grey; hair on face plentiful; head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The Indo-Aryan occupying the Punjab, Rajputana, and Kashmir, and having as its characteristic members the Rajputs, Khattris, and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India The stature is mostly tall, complexion fair; eyes dark; hair on face plentiful, head long; nose narrow, and prominent but not specially long.

The Scytho-Dravidian, comprising the Maratha Brahmans, the Kunbis, and the Coorgs of Western India. Probably formed by a mixture of Scythian and Dravidian elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, & greater length of head, a higher nasal index, a shorter nose, and a lewer orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight; in the lower Dravidian elements are more pronounced.

The Aryo-Dravidian or Hindustani, found in the United Provinces, in parts of Rajputana and in Bihar and represented in its up-

broader than among the Indo-Aryans, the stature is lower than in the latter group and usually below the average according to the scale. The higher representatives of this type approach the Indo-Aryans, while the lower members are in many respects not very far removed from the Dravidians type is essentially a The mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian The distinctive feature of the type, the character which gives the real clue to its origin and stamps the Aryo Dravidian as racially different from the Indo-Aryan is to be found in the proportions of the nose

The Mongolo-Dravidian, or Bengali type of Lower Bengal and Orissa, comprising the Bengal Brahmins and Kayasthas, the Maho-medans of Eastern Rengal, and other groups peculiar to this part of India Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad, complexion dark; hair on face usually plentiful; stature medium, nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Himalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa; the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal.

The Mongoloid type of the Himalayas, Nepal, Assam, and Burma, represented by the Kanets of Lahul and Kulu; the Lepchas of Darjeeling and Sikkim the Limbus, Murms and Gurungs of Nepal; the Bodo of Assam; and the Burmese. The head is broad : complexion dark, with a yellow tinge; hair on face scanty; stature short or below average; nose fine to broad, face characteristically flat, oyelds often oblique.

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chota Nagpur Its most characteristic representatives are the Paniyans of Malabar and the Santals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Scythlan, and Mongo-loid elements. In typical specimens the stature is short or below mean, the complexion very dark, approaching black, hair plentiful with an occasional tendency to curl, eyes dark, head long nove very broad, sometimes depressed at the root, but not so as to make the face appear flat. This race, the most primitive of the Indian types, occupies the oldest geological formation in India, the medley of forest clad ranges, terraced putava and in Bihar and represented in its up-plateau, and undulating plains which stretch per strata by the Hindustam Brahman and in its roughly speaking, from the Vindhyas to Care

Comorin. On the cast and the wett of the deposit which is here treated as Pracician there peninsular area the domain of the Dravidian is typical characteristics tend to thin et i disapconterminous with the Ghata, while further north pear, but each runner them true and the original it reaches on one side to the Araxilis, and on the other to the Rajmahul Hill: Where the original characteristics have been unchanned by contact with Indo-Aryan or Mongoloid people, and the short on an ether arraphing type. They the type is remarkably uniform and distinctive Labour is the birthright of the pure Dravidian whether hoding ter in Assum, the Durry of Ceylon, cutting rice in the swamps of Lastern Bengal or doing servenger's work in the streets of Calcutta, Rangoon and Singapore, he is of the people had under me an episocial's recognizable at a glance by his black skin, his change, he would certainly be unable to any at squat figure, and the negro-like proportion of what particular state in his process the transhis nose. of infants in India.

Owing to the custom of early marriage, cohabitation and child-birth commonly take place before the woman is physically mature and this, combined with the primitive and insanitary methods of midwifery, seriously affects the health and vitality of the mother and through her of the child If the child survives the prenatal and natal chances of congenital debility and the risks of child-birth, it is exposed to the dangers of death in the early months of life dangers of death in the early months of me from diarrhea or dysentery. According to the Executive Health Officer of Bombay city, by far the greater number of infantile deaths are due to infantile debility and malformation, including premature birth, respiratory diseases coming next, then convulsions, then diarrhea and enterities

Sex Ratio — The figures of the population of India by seves, as recorded by the latest census, show a further continuation of the steady tribes, however, the number of the proportion of females to make that are approximately equal

Special causes contribute to the high mortality has been going on since the beginning of this infants in India. tensite of the population of India as compared to that of most European countries The female infant is definitely better equipped by nature for survival than the male, but in India the advantage she has at birth is probably neutralised in infancy by comparative neglect and in adolescence by the strain of bearing children too early and too often A good deal of recent work on sex ratios has tended to the view that an increase in masculinity is an indi-cation of declining population, but this is not the case in India as a whole The all-India ratio is 901 females per 1,000 males for Muslims and 951 females per 1,000 males for Hindus The only provinces in which there is actually an excess of women over men are Madras and Bihar and Orissa, though the Central Provinces can be added if Berar be excluded Where females are in excess, the excess is still most marked in the lower castes and does not always extend to the higher Among the aboriginal tribes, however, the numbers of the two seles

The necessity of a common medium of con-I central India versation and intercourse, which has given rise languages may be scientifically distinct; but to bi-lingualism and the consequent displace-this is not the popular view. There is a common ment of tribal languages, has formed the subject element in the main languages of northern and of a considerable amount of discussion and central India which renders their speakers, with-suggestion during the last decade and a good out any great conscious change in their speech, deal has been written on the possibility of a mutually intelligible to one another, and this lingua franca for India of Eastern and Western Hindi considerably a lingua franca over a large part of India exceed in number the strength of any other individual language in India, and if we add to these two languages Bihari and Rajasthani, main heads—insanity, deaf-mutism, blindness which so resemble Hindi as to be frequently read leprosy. The appended statement shows turned under that name in the census schedules, the number of persons suffering from each we get well over 100 millions of speakers of infirmity at each of the last six censuses and the record of the propulation of the strength of the record 
In their pure forms these four The combined speakers common basis already forms an approach to

tongues which have some considerable affinities; proportion per hundred thousand of the popula-and cover a very large area of northern and tion:—

There had been a continuous decline in the total number as well as in the proportion of persons recorded as afflicted up to 1901. This fall has been ascribed partly to a progressive improvement in the accuracy of the diagnosis and partly to an actual decrease in the prevalence of the infirmities, owing to the improvement in the material condition of the people to better sanitation and (especially in the case of blindacas) to the increasing number of cures effected with the aid of modern medical and surgical science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe famines must have been a considerable factor in the decline shown at that census, but the method of compilation adopted in 1901 and in the previous census was defective, and, certainly in 1901. many of the persons afflicted must have escaped notice in the course of tabulation Compared with the year 1891, there was a slight decrease in the total number of persons recorded as ifflicted in 1911, the pro-portion per hundred thousand persons falling from 315 to 267. The increase in ratio as well is in numbers since then is attributed to increased accuracy of chimicration

Occupation -It is well I nown fact that the majority of the people in India ire on agricul-ture. The latest census puts down the number of these engaged in the exploitation of animals and regulation at 102,300,000, while those engaged in industry number 15,400,000. Thus about 67 per each of the country's workers are employed in the former and 10 per cent, in the latter. This doce not have in the litter. This does not, however, mean that elithe 103 millions are land-owners. Rights in land in India are complicated and involved to a degree, ineredible to persons familiar only with the simpler tenures of nestern Europe

Between the man who cultivates fland and the man who nominally owns it there are often a number of intermediate holders of some interest or other in the produce of the land If a com-parison is made between the area of land under crops and the number of agriculturists actually engaged in cultivation in British India, it is that for each agriculturist there are 2 9 acres of cropped land of which 0 65 of an acre is irrigated. The cultivation of special crops occupies under two per cent of the populations concerned in pasture and agriculture, the greater part of whom are engaged in the production of tea lovestry employs fewer than special *cultivation* 

In recent years there has been an increase in the number of people living on the production and transmission of physical force, that is, heat, light, electricity, motive power, etc. Silk spinning and weaving, manufacture of chemical products, and the manufacture of tobacco have proved more popular than before Transport by road has attracted more men, while the use of water for internal transport has decreased, harbours being used more freely for external transport by sea About five million persons are engaged in organiced industry

It is not worthy that less than one million people, who man, the army, the Navy, the air force, the police, the services, etc., manage the administration of this vast country, in other words, 350 odd millions are ruled by one

nullion servants of the state
There has of late been increasing unemployment, especially among the educated classes,
An attempt to inclide these in the last census has not met with success, but it is significant that graduates of Madras University join the police department on Rs 10 per measem and are held fortunate in getting even that.

# The History of India in Outline.

No history of India can be proportionate: and the briefest summary must suffer from the same defect. Even a wholesale acceptance as history of mythology, tradition, and folklore will not make good, though it makes picturesque, the many gaps that exist in the early history of India and, though the labours of modern geographers and archeologists have been amizingly fruitul, it cannot be expected that these gaps will ever be filled to any appreciable extent Approximate accuracy in chronology and an outline of dynastic facts are all that the student can look for up to the time of Alexander, though the briefest excursion into the by-ways of history will reveal to him many alluring and mysterious fields for speculation There are, for example, to this day castes that believe they sprang originally from the lons of a being who landed "from an impossible boat on the shores of a highly improbable sea "; and the great epic poems contain plentiful state-ments equally difficult of reconciliation with modern notions of history as a science. But from the Jataka stories and the Puranas, much valuable information is to be obtained, and, for the benefit of those unable to go to these and other original sources, it has been distilled by a number of writers.

The orthodox Hindu begins the political history of India more than 3,000 years before Christ, with the war waged on the banks of the Jumna between the sons of Kuru and the sons of Pandu. Recent excavations by the Archæological Department in the Indus Valley at Harappa in the Punjab, but more particularly at Mohenjo Daro in Sind, carry us back even further. They have uncovered sites of cities bearing the marks and containing the relics of a high civilisation stated by the Department to be Sumerian The excavations are proceeding under special direction and have excited the greatest interest in scientific circles throughout the world, but the general critic omits several of those remote centuries and takes 600 BC, or thereabouts as his starting point. At that time much of the country was covered with forest, but the Aryan races, who had entered India from the north, had established in parts a form of civiliza-tion far superior to that of the aboriginal savages and to this day there survive cities, like Benares, founded by those invaders. In like manner the Dravidian invaders from an unknown land, who overran the Deccan and the Southern who overran the Deccan and the Southern part of the Peninsula, crushed the aborigmes, and at a much later period, were themselves subdued by the Aryan's Of these two civilizing forces, the Aryan is the better known, and of the Aryan kingdoms the first of which there 18 authentic record is that of Magadha, or Bihar, on the Ganges. It was in, or near, this powerful kingdom that Jainism and Buddhism had their origin, and the fifth King of Magadha, Bimbisara by name, was the friend and patron of Gautama Buddha The King mentioned Was a contemporary of Derive automatical was a contemporary of Darlus, authorat of Persia (521 to 485 B.C.) who annexed the Indus valley and formed from his conquest an Indian satrapy which paid as tribute the equivalent of about one million sterling. De'Alexander the Great

That great soldier had crossed the Hindu Kuch in the previous year and had captured Aornos, on the Upper Indus In the spring of 826 he crossed the river at Ohind, received the submission of the King of Taxila, and marched against Porus who ruled the fertile country between the rivers Hydaspes (Jhelum) and Akesines (Chenab). The Macedonian carried all before him, defeating Porus at the battle of the Hydaspes, and crossing the Chenab and Ravi. But at the River Hyphasis (Bias) his weary troops mutified, and Alexander was forced to turn back and retire to the Jhelum where a fleet to sail down the rivers to the sea was nearly ready. The wonderful story of Alexander's march through Mekran and Persia to Babylon, and of the voyage of Nearchus in the previous year and had captured Aornos, to Babylon, and of the voyage of Nearchus up the Persian Gulf is the chimax to the narrative of the lavasion but is not part of the history of India. Alexander had stayed nineteen months in India and left behind him officers to carry on the Government of the kingdoms he had conquered. but his death at Babylon, in 323, destroyed the fruits of what has to be regarded as nothing but a brilliant raid, and within two years his successors were obliged to leave the fruits of the successors. to leave the Indian provinces, heavily scarred by war but not hellenized.

The leader of the revolt against Alexander's generals was a young Hindu, Chandragupta, who was an illegitimate member of the Royal Who was an illegitimate member of the Royal Family of Magadha. He dethroned the ruler of that kingdom, and became so powerful that he is said to have been able to place 600,000 troops in the field against Seleucus, to whom Babylon had passed on the death of Alexander. This was too formidable an opposition to be faced, and a treaty of peace was concluded between the Syrian and Indian monarchs which left the latter the first paramount Sovereign of India (321 B.C) with his capital at Patalpoutra, the modern Patna and capital at Pataliputra, the modern Patna and Bankipore of Chandragupta's court and administration a very full account is preserved in the fragments that remain of the history compiled by Megasthenes, the ambassador sent to India by Seleucus His memorable reign ended in 297 B C. when he was succeeded by his son Bindusara, who in his turn was succeeded by Asoka (269—231 B.C.) who recorded the events of his reign in numerous inscriptions. This king, in an unusually bloody war, added to his dominions the kingdom of Kalinga (the Northern Circars) and then becoming a convert to Buddhism, resolved for the Inture to abstain from conquest by force of arms. The consequences of the conversion of Asoka were amazing. He was not capital at Pataliputra, the modern Patna and version of Asoka were amazing. He was not intolerant of other religions, and did not endeavour to force his creed on his "children". But he initiated measures for the propagation of his doctrine with the result that "Buddhism" which had hitherto been a merely local rect in the valley of the Ganges, was transformed into one of the greatest religious of the world—the an Indian satrapy which paid as tribute the greatest, probably, it measured by the number squivalent of about one million sterling. De- of adherents This is Asoka's claim to be retailed history, however, does not become pos- membered, this it is which makes his regn still until the invasion of Alexander in 326 B C an epoch, not only in the history of India, but

edicts reveal him as a great king as well as a great missionary, and it is to be hoped that the excavations now being carried on in the ruins of his palace may throw yet more light on his character and times. On his death the Maurys fell to pieces. Even during his kıngdom reign there had been signs of new forces at work on the horderland of India; where the independent kingdoms of Bactria and Parthia had been formed, and subsequent to it there were frequent Greek raids into India The Greeks frequent Greek raids into India The Greeks in Bactria, however, could not withstand the overwhelming force of the westward migration

The first of these Yuch-chi kings to annex a part of India was Kadphises II (A.D 85-125), who had been defeated in a war with China, but crossed the Indus and consolidated his power eastward as far as Benares. His son Kanl-hla (whose date is much disputed) left a name which to Buddhists stands second only to that of Afoka. He greatly extended the boundaries of his empire in the North, and made Pe-hawar his capital. Under him the power of the Kushan clan of the Yuch-chi reached its renith and did not begin to decay until the end of the second century, concurrently with the rise in middle India of the Andhra dynasty which constructed the Amaravati stupa. "one of the most claborate and precious monuments of picty over raised by man.

## The Gupta Dynasty.

Early in the fourth century there arose, at l'atalipatra, the Gupta dynasty which proved of great importance. Its founder was a local chief, his son Samudragupta, who ruled for some fifty scars from A D 326, was a Ling of the printest distinction. His alm of subduing all India was not indeed fulfilled but he was abl to exact tribute from the kingdoms of the South and even from Ceylon, and, in addition to being a warrior, he was a patron of the

in that of the world" The wording of his death in 648 his throne was usurped by a Minister, whose treacherous conduct towards an embassy from China was quickly avenged, and the kingdom so laboriously established lapsed into a state of internecine strife which lasted for a century and a balf.

# The Andhras and Ralputs.

In the meantime in Southern India the Andhras had attained to great prosperity and carried on a considerable trade with Greece, Egypt and Rome, as well as with the East. Their domination ended in the fifth century overwhelming force of the westward first central AD and a number of new dynasties, of which of the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which, in the first central AD and a number of new dynasties, of which the Yuch-chi horde, which is the Yuch-chi horde, which for the Chalukyas, who for two centuries re-mained the most important Deccan dynasty, one branch uniting with the Cholas But the fortunes of the Southern dynasties are so involved, and in many cases so little known; that to recount them briefly is impossible. Few names of note stand out from the record except those of Vikramaditya (11th century) and a few of the later Hindu rulers who made a stand against the growing power of Islam; of the rise of which an account is given below. In fact the history of mediaval India is singularly devoid of unity. Northern India was in a state of chaos from about 650 to 950 A.D. not unlike that which prevailed in Europe of that time, and materials for the history of these centuries are very scanty. In the absence of any powerful rulers the jungle began to gain back what had been wrested from it: ancient capitals fell into ruins from which in some cases they have not even yet been disturbed, and the aborigines and various foreign tribes began to assert thomselves so success-fully that the Aryan element was chiefly con-fined to the Doab and the Eastern Punjab It is not therefore so much for the political as for the religious and social history of this anarchical period that one must look. And the greatest event—if a slow process may be called an event—of the middle ages was the tranart- and of bine rit literature. The rule of sition from tribe to caste, the final disappeararts and of Sanei in interactive. The rule of sition from tribe to cased, the man disappearhis son, Chandragupta, was equally distinance of the old four-fold division of Brahmans;

With the end of the period of anarchy, the political history of India centres round the Rajputs. One clan founded the kingdom of Gujarat, another held Malwa, another (the Chauhans) founded a kingdom of which Ajmer was the capital, and so on. Kanauj fell into the hands of the Rathors (circ 1040 A D.) and the dynasty then founded by that branch of the Gaharwars of Benares became one of the most famous in India Later in the same century the Chauhans were united, and by 1163 one of them could boast that he had conquered all the country from the Vindhyas to the quered all the country from the Vindhyas to the Himalayas, including Delhi already a fortress a hundred years old The sen of this conqueror was Prithwi Raj, the champion of the Hindus against the Mahomedans With his death in battle (1192) ends the golden age of the new envirzation that had been evolved out of chaos; and of the greatness of that age there is a splendid memorial in the temples and forts of the Rajput states and in the two great philosophical systems of Sankaracharya (minth century) and Ramanuja (twelfth cen-tury) The triumph of Hinduism had been achieved, it must be added, at the expense of Buddhism, which survived only in Magadha at the time of the Mahomedan conquest and speedily disappeared there before the new faith.

## Mahomedan India.

The wave of Mahomedan invaders that eventually swept over the country first touched india, in Sind less than a hundred years after the death of the Prophet in 632. But the But the the death of the Prophet in 632 but the first real contact was in the tenth-century when a Turkish slave of a Persuan ruler found-ed a kingdom at Ghazni, between Kabul and Kandahar. A descendant of his Mahmud (967-1030) made repeated raids into the heart of India, capturing places so far apart as Multan, Kanauj, Gwalior, and Somnath in Kathiawar, but permanently occupying only a part of the Punjab. Enduring Mahomedan rule was not established until the end of the twelfth century, by which time, from the little territory of Ghor, there had arisen one Mahomed Ghori capable of carving out a kingdom stretching from Peshawar to the Bay of Bengal. Prithwi Raj, the Chauhan ruler of Delhi and Ajmer, made a brave stand against, and once defeated, one of the armies of this ruler, but was himself defeated in the following year. Máhomed Ghori was murdered at Lahore (1206) and his vast kingdom, which had been governed by satraps, was split up into what were practically independent sovereigntles. Of these satraps, Qutb-ud-din, the slave ruler of Delhi and Lahore, was the most famous, and is remembered by the great mosque he built near the modern Delhi. Between his rule and that of the Mughals, which began in 1526, only a few of the many Kings who governed and fought and built beautiful buildings, stand out with distinction. One of these was Ala-ud-dn (1296-1316), whose many expeditions to the south much weakened the Hindu Kings, and who proved himself to be a canable administrator. Another was Firoz capable administrator. Another was Firoz Agra, and the palace and fortress of Lahore. Shah, of the house of Tughlaq, whose administration was in many respects admirable, but pled with wars in the Deccan, but found time which ended, on his abdication, in confusion, to make his court of incredible magnificence

The Mahomedan dynastles that had ruled in capital other than Delhi up to this date were of comparative unimportance, though some great men appeared among them Gujarat, for example, Ahmad Shah, the founder of Ahmcdabad, showed himself a good ruler and builder as well as a good soldier, though his grandson, Mahmud Shah Begara, was a greater ruler—acquiring fame at sea as well as on land In the South various kings of the Bahmani dynasty made names for themselves especially in the long wars they waged on the new Hindu kingdom that had arisen which had its capital at Vijayanagar. Of importance also was Adil Khan, a Turk, who founded (1490) the Bijapur dynasty of Adil Shahis. It was one of his successors who crushed the Vijayanagar dynasty, and built the great mosque for which Bijapur is famous.

# The Mughai Empire.

As one draws near to modern times it becomes impossible to present anything like a coherent and consecutive account of the growth of India as a whole Detached threads in the story have to be picked up one by one and fol-lowed to their ending, and although the sixteenth century saw the first European settlements in India, it will be convenient here to continue the narrative of Mahomedan India almost to the end of the Mughal Empire How Babar gained Delhi has already been told. His son. Humayun, greatly extended his kingdom, but was eventually defeated (1540) and driven into exile by Sher Khan, an Aighan of great capabilities, whose short reign ended in 1545, The Sur dynasty thus founded by Sher Khan lasted another ten years when Humayun having snatched Kabul from one of his brothers, was strong chough to win back part of his old king-dom. When Humay an died (1556) his eldest son, Akbar, was only 13 years old and was confronted by many rivals Nor was Akbar well served, but his career of conquest was almost uninterrupted and by 1594 the whole of India North of the Nerbudda had bowed to his North of the Nerbudda had bowed to his authority and he subsequently entered the Deccan and captured Ahmednagar. This great ruler, who was as remarkable for his religious tolerance as for his military prowess, died in 1605, leaving behind him a record that has been surpassed by few. His son, Jehangir, who married the Persian lady Nur Jahan, ruled until 1627, bequeathing to an admiring posterity some notable buildings—the tomb of his father at Sikandra, part of the palace of Agra, and the palace and fortress of Lahore. His son, Shahjahan, was for many years occuall tombe, the Tay Mahal, as well as the fort, palace and Juma Masud at Delhi The quarrels of his sons led to the deposition of Shanjahan by one of them, Aurangaeb, in 1658. This Emperor's rule was one of constant intrigue and fighting in every direction, the most important of his wars being a twenty-five vears' struggle against the Marathas of the Decean who, under the leadership of Shivaji, became a very powerful faction in Indian politics. His bigoted attitude towards Aurangreb all the more made Hindulem anxious to establish his Empire on a firm basis in the south, but he was unable to hold his many conquests and on his death (1707) the could not be held together. Internal disorder and Maratha encroachments continued during the relans of his successors, and in 1739 a fresh danger appeared in the person of Nadir Shah, the Person conqueror, who carried all before him. On his withdrawal, leaving Mahomed Shah, on the throne, the old intrigues recommended only after Portuguese and Dutch sea fight off Swally (Suvali) in 1612. The first factory, at Surat, was for many years the most important English foothold in the East. Its establishment was followed by other most of the opportunity offered to them by pupper rulers at Delhi and by almost universal discord throughout what had been the living for the search years of British enterprise in India the cession of Bombay (1661) as part of the dower of Catherine of Braganza stands out as a land-mark it also illustrates the weak-citorism in page at Table.

and to build the most famous and beautiful of wars between 1795 and 1811 England took all Holland's Eastern possessions, and the Dutch have left in India but few traces of their civilisation and of the once powerful East India Company of the Netherlands.

The first English attempts to reach India date from 1496 when Cabot tried to find the North-West passage, and these attempts were repeated all through the sixteenth century. The first Englishman to land in India is said to have been one Thomas Stephens (1579) who was followed by a number of merchant adventurers, but trade between the two countries really dates from 1600 when Elizabeth incorporated the East India Company which had been formed in London. Factories in India which Empre Three is little to add to the last and-mark it also linearies the weak-index of Talomedan India Emperors contains of the Portuguese at that date, since in clareren in rums at Delhi up to the middle of it cuts the King of England methods to proceed the 19th centure, but their territory and power hallong since desappeared, being swallowed up to the 19th centure, but their territory and power hallong since desappeared, being swallowed up to the 19th centure, but their territory and power hallong since the Portuguese at that date, since in classification in the Line of England in the England

Attempts to compete with the English were made of course. But the schemes of the Emperor Charles VI to secure a share of the Indian trade were not much more successful Indian trade were not much more successful than those made by Scotland, Denmark, Sweden, and Russia. By the French, who founded Pondicherry and Chandernagore towards the end of the 17th century, much more was achieved, as will be seen from the following outlines of the development of following outline of the development of British rule.

### The French Wars

When war broke out between England and France in 1744, the French had acquired a strong position in Southern India, which had become independent of Delhi and was divided nto three large States—Hyderabad, Tanjore, and Mysore—and a number of petty states under local chieftains. In the affairs of these States Dupleix, when Governor of Pondicherry, had intervened with success, and when Madras was captured by a French squadron, under La Bourdonnais (1748) Dupleix wished to hand it over to the Nawab of Arcot—a deputy of the Nizam's who-ruled in the Carnatic. The French, however, kept Madras, repelling an attack by the disappointed Nawab as well as the British attempts to recapture it. The treaty of Aix-la-Chapelle restored Madras to the English. The fighting had shown the Indian powers the value of European troops, and this was again shown in the next French war (1750-54) when Clive achieved enduring fame by his capture and subsequent defence of Arcot. This war arose from Dupleix supporting candidates for the disputed successions at Arcot and Hyderabad while the English at Madras put forward their own nominees. One of Dupleix's officers, the Marquis of the Nisam to take interinto three large States-Hyderabad, Tanjore, English at Madras put forward their own nominees One of Dupleix's officers, the Marquis de Bussy, persuaded the Nizam to take into his pay the army which had established his power, and in return the Northern Circars, between Oriesa and Madras, was granted to the French. This territory, however, was captured by the English in the seven years' war (1756-63). Dupleix had by then been recalled to France. Lally, who had been sent to drive the English out of India, captured Fort St. David and invested Madras. But the victory which Colonel (Sir Eyre) Coote won at Wandiwash (1760) and the surrender of Pondicherry and Gingee put an end to the French ambitions of Empire in Southern India, Pondicherry passed more than once from the Pondicherry passed more than once from the one nation to the other before settling down to its present existence as a French colony in miniature.

long list of its servants, from Oxenden and Aungler to Hastings and Raffies, contains should surrender a refugee and should cease many names of men who proved themselves good rulers and far-sighted statesmen, the finest Empire-builders the world has building fortifications. They refused and he marched against them with a large army. Some of the English took to their ships and made off down the river, the rest surrendered and were cast into the sail known as the "Black Hole." From this small and strling room 23 persons, out of 146, came out alive the next day. Clive who was at Madras, immediately sailed for Calcutta with Admirul Wotsne's avaidant Tanatawad the town Watson's squadron, recaptured the town (1757), and, as war with the French had been (1757), and, as war with the French had been proclaimed, proceeded to take Chandernagore The Nawab Siraj-ud-Daula then took the side of the French, and Clive, putting forward Mir Jainr as candidate for the Nawab's throne, marched out with an army consisting of 900 Europeans 2,000 sepoys and 8 pieces of artillery against the Nawab's host of over 50,000. The result was the historic battle of Plassey (June 28) in which Clive, after hesitating on the course to be pursued, routed the Nawab. Mir Jaiar was put on the throne at Murshidabad, and the price of this honour was put at £2,340,000 in addition to the grant to the Company of the land round Calcutta was put at £2,840,000 in addition to the grant to the Company of the land round Calcutta now known as the District of the twenty-four Parganas. In the year after Plassey, Clive was appointed Governor of Bengal and in that capacity sent troops against the French in Madras and in person led a force against the Oudh army that was threatening Mir Jafar, in each case with success From 1760 to 1765 Clive was in England. During his absence the Council at Calcutta deposed Mir Jafar and, for a price, put Mir Kasim in his place. This ruler moved his capital to Monghyr, organized an army, and began to intrigue with the Nawab Wazir of Ondh. He soon found, in a dispute over customs dues, an opportunity of quarrelling with the English and the first shots fired by his followers were the signal for a general rising in Bengal. About 200 Englishmen and a number of sepoys were massacred, but his tramed regiments were defeated at Gheria and Oodeynullah, and Mir Kasim sought protection from the Nawab of Ordb. But in 1784 after qualling a selection of the content of the latter that the protection from the Nawab of Ordb. But in 1784 after qualling a selection of the content of the latter that the protection from the Nawab of Ordb. But in 1784 after qualling a selection of the latter of the la Mir Kasım sought protection from the Nawab of Oudh But in 1784, after quelling a sepoy mutiny in his own camp by blowing 24 ring-leaders from the guns, Major (Sir Hector) Munro defeated the joint ferces of Shah Alam, the Mughel Emparer and the Nawab of Oudh the Mughal Emperor, and the Nawab of Oudh in the battle of Buxar. In 1765 Chve (now Baron Chve of Plassey) returned as Governor, "Two landmarks stand out in his policy. First, "Two landmarks stand out in his policy. First, he sought the substance, although not the name, of territorial power, under the fiction of a grant from the Mughal Emperor. Second, he desired to jurify the Company's generateeing a reasonable pay from honest sources. In neither respect were his plans carried out by his immediate successors. But our efforts towards a sound administration date from this second Governorship of Clive as our military supremacy dates from his vic-Battle of Plassey.

Battle of Plassey.

While the English were fighting the third French war in the South they became involved in grave difficulties in Bengal, where Siray-ud-Daula had acceded to power. The head-quarters of the English at Calcutta were in the Nawab The performance of his seservice, was holly opposed but ciried out, fainistrative Civil Service. This system was Ho died in 1771 by his own hand, the House of Commons having in the previous year center of the little of the

### Warren Hastings.

The dual system of government that Clive had set up proved a failure and Warren Hastings Shore (Lord Tell mounth), an experience was appointed Governor, in 1772, to carry out Civil Servant, tuce ded I and Conwellia, and, the reforms settled by the Court of Directors in 1708, was followed by I and Welli des, the which were to give them the entire care; irlend of Pitt, who a projects were to change and administration of the revenues. Thus, the man of India. Hastings had to undertake the administrative organization of India, and, in spite of the factions attitude of Philip Francia, with whom he fought a duck and of other members of his Coun cil, he reorganized the civil service, reformed the system of revenue collection, creatly im-proved the financial position of the Company, proved the financial position of the Company, scheme of definitively ending It neb scheme, and created courts of justice and some tembranes of a police force. From 1772 to 1771 he great Indian confederacy. He start d by obverse Governor of Bengal, and from 1771 to 1775 taking from the Navah of Oudh the cresion of was the first Governor-General, nominated under an Act of Parliament passed in the previous year. His financial reforms, and the previous of the British reforms, and the previous year. His financial reforms, and the British reforms the financial reforms the Baratha as acts of oppression and formed, together with his action in the trial of Nuncomar for forgety, the basis of his seven years' trial before the House of Hartish and the Princh, embrach on the fourth Mayore interested in longer than the land of Nuncomar for forgety, the Part of Myson, the Curntle and the Circult and the Christish of Taplore provides which ended in a verdict of not guilty on all the charges. But there is much more for which his administration is justly famous, the previous the Maratha powers—the Proposition of Taplore has a financial reforms the history, he constituting the Maratha powers—the Proposition of Taplore has a financial reforms the history, he constituting the Maratha powers—the Proposition of Taplore has a financial reforms the history, he constituting the Maratha powers—the Proposition of Taplore has a financial reforms the history, he constituting the Madasa Prosition of Taplore regulation of Baratha for Maratha powers—the Proposition of Taplore has a financial reform the history the Curtish of Maratha wars (1976-18) of the Maratha war (1804, of Maratha history, he constituting the Madasa Prosition of Taplore has a financial reform the history in the financial reforms the history in the financial reforms the history in the fi he was the first Governor-General, nominated intgo truets of territory to feu of prompt, the Peshwa at Poons, and the Bengal troops that he sent over made amends, by the conquest of Gujrat and the capture of Gwallor, for the disgrace of Wadgaon where the Marathas overpowered a Bombay army. In the South—where interference from Madras had already led (1709) to what is known as the first Mysore war, a disastrous campaign against llyder All and the Nizam—he found the Madras Govern-ment again in conflict with those two poten-tates. The Nizam he won over by diplomacy, but against Hyder Ali he had to despatch a Lough army under Sir Byre Coote. Hyder Ali died in 1782 and two years later a troaty was made with his son Tipu. It was in those acts of intervention in distant provinces that Hastings showed to best advantage as a great and courageous man, cautious, but swift in and coungeous man, cautious, but switt in action when required. He was succeeded after an interregnum, by Lord Cornwallis (1786-93) who built on the foundations of civil administration laid by Hastings, by entrusting criminal jurisdiction to Europeans and esfriming an Appellate Court of Criminal who found himself obliged almost at once to Judicature at Calcutta. In the Civil Service declare war on the Gurkhas of Nepal, who had he separated the functions of the District Col- been encroaching on British territory. After lector and Judge and organized the "writers" limital reverses, the English, under General

cond task, the purification of the Company's and "merchants" of the Company into an adsured him, though admitting that he did render, duction, on orders from Ludand, of the Pre"great and meritorious services to his country," manent Settlement in Benefit (See article

# Lord Wellesles's Polics.

The I reach in general, and "the Corstean" in particular, were the enemy most to be dreaded for a few years tofore foul Wellsby took up his duties in India, and he form d the and Laswari Later operations, such as Colo-nel Monson's retreat through Central India, were less fortunate. The great acquisitions of territory made under Lord Welleski proved so expensive that the Court of Director, be-coming impatient, sent out Lord Commalis a second time to make peace at any price. He, however, died soon after his arrival in Indus and Sir George Barlow carried on the govern ment (1805-7) until the arrival of a stronger ruler, Loid Minto. He managed to keep the peace in India for six years, and to add to Bri-tish dominions by the conquest of Java and Mauritius His foreign policy was marked by another new departure, in ismuch as he opened relations with the Punjab, Persta, and Agehrnistan, and concluded a treaty with Ranget Singh, at Lahore, which made that Sikh ruler the loyal ally of the British for life.

The successor of Lord Minto was Lord Meira

Ochteriony, were successful and the Treaty of Sagauli (1816) was drawn up which defines British relations with Nepal to the present day For this success Lord Moira was made Marquis of Hastings. In the same year he made preparations for the last Maratha war (1817-18) which was made necessary by the lawless conduct of the Pindaris, gangs of Pathan or Rohills origin, whose chief patrons were the rulers of Native States The large number of 120,000 that he collected for this purpose destroyed the Pindaris, annexed the dominions of the rebellious Peshwa of Poona, protected the Rajput States; made Sindha enter upon a new treaty, and compelled Holkar to give up part of his territory. Thus Lord Hastings established the British power more firmly than ever, and when he resigned, in 1823, all the Native States outside the Punjab had become parts of the political system and British interests were permanently secured from the Persian Gulf to Singapore. Lord Amberst followed Lord Hastings, and his five years' rule (1823-28) are memorable for the first Burmese war and the capture of Bharatpur. The former operation was undertaken owing to the insolent demands and raids of the Burmese, and resulted in the Burmese ceding Assam, Aracan, and the coast of Marlaban and their claims to the lower provinces. The capture of Bharatpur by Lord Combernere (1826) wiped out the repulse which General Lake had received there twenty years earlier. A disputed succession on this occasion led to the British intervention.

# Social Reform.

A former Governor of Madras, Lord William Bentinck, was the next Governor-General His epitaph by Macaulay, says. "He abolished cruel rites; he effaced humilating distinctions; he gave liberty to the expression of public opinion; his constant study was to elevate the intellectual and moral character of the nations committed to his charge"

Some of his financial reforms, forced on him from England, and his widening of the gates by which educated Indians could enter the service of the Company, were most unpopular at the time, but were eclipsed by the acts he took for the abolition of Sati, or widow-burning; and the suppression—with the help of Captam Sleeman—of the professional Fereditary assassins known as Thay: In 1832 he annexed Cachar, and, two years later, Coorg The incompetence of the ruler of Mysore forced him to take that State also under British administration—where it remained until 1831 His rule was marked in other ways by the despatch of the first steamship that made the passage from Bombay to Suez, and by his settlement of the long educational controversy in favour of the advocates of instruction in English and the vernaculars. Lord William Bentinek left India (1835) with his programme of reforms unfinished. The new Charter Act of 1833 had brought to a close the commercial business of the Company and emphasized their position as rulers of an Indian Empire in trust for the Crown By it the whole administration, as well

as the legislation of the country, was placed in the hands of the Governor-General in Council, and authority was given to create a Presidency of Agra Before his retirement Bentinck assumed the statutory title of Governor-General of India (1834), thus marking the progress of consolidation since Warren Hastings in 1774 became the first Governor-General of Fort William Sir Charles Metcalfe, being senior member of Council, succeeded Lord William Bentinck, and during his short tenure of office carried into execution his predecessor's measures for giving entire liberty to the press.

# Afghan Wars.

With the appointment of Lord Auckland as Governor-General (1836-42) there began a new era of war and conquest Before leaving London he announced that he looked with ex-ultation to the prospect of "promoting educa-tion and knowledge, and of extending the blessings of good Government and happiness to milions in India; "but his administration was sufficient for development and implement the milions of the production of almost excursively comprised in a fatal expedi-tion to Afghanistan, which dragged in its train the annexation of Sind, the Sikh wars, and the inclusion of Baluchistan in the protectorate of India The first Afghan war was under-taken partly to counter the Russian advance in Central Asia and partly to place on the throne at Kabul the dethroned ruler Shah Shuja in place of Dost Mahomed. The latter object was easily attained (1889) and for two years Afghanistan remained in the military occupation of the British. In 1841 Sir Alexander Burnes was assassinated in Kabul and Sir William Macnaghten suffered the same fate in an interview with the son of Dogt Mahomed The British Commander in Kabul. Gen. Elphinstone, was old and feeble, and after two months' delay he led his army of 4,500 and 12,000 camp followers back towards India in the depth of winter Between Kabul and Jallalabad the whole force perished, either at the hands of the Afghans or from cold, and at the hands of the Afghans or from cold, and Dr Brydon was the only survivor who reached the latter city. Lord Ellenborough succeeded Lord Auckland and was persuaded to send an army of retribution to relieve Jalialabad. One force under Gen Pollock relieved Jalialabad and marched on Kabul, while Gen Rott, advancing from Kandahar, captured Ghazni and joined Pollock at Kabul (1842) The bazoar at Kabul was blown up, the prisoners rescued, and the army returned to India leaving Dost Mahomed to take undisputed possession of his throne The drama ended with a bombastic proclamation from Lord with a bombastic proclamation from Lord Ellenborough and the parade through the Punjab of the (spurious) gates of Somnath taken from the tomb of Mahmud of Ghazni.

## Sikh Wars.

Lord Kilenborough's other wars—the conquest of Sind by Sir Charles Napier and the suppression of an outbreak in Gwalior—were followed by his receil, and the appointment of Sir Henry (1st Lord) Hardinge to be Governor-General A soldier Governor-General was not unacceptable for it was felt that a tria

Europeans The arrival of right guns made Finally, in education he laid down the lines it possible to advance the batterles on 8 sptemfrontier outposts which were brilliantly defeated. Manipur was occupied by British troops and the government of the State was renganised under a Political Agent. Lord Lansdowne's term of office was distinguished. by several other events such as the passing of the Parliamentary Act (Lord Cross's Act, 1892), which increased the size of the Legislative Councils as well as the number of nonofficials in them. legislation aimed at social and domestic reform among the Hindus and the closing of the Indian Mints to the free coinage of silver (1898).

## Frontier Campaigns.

Lord Elgin, who succeeded Lord Lansdowne in 1894, was confronted at the outset with a deficit of Rs 24 crores, due to the fall m exchange (In 1895 the rupes fell as low as 1s. 1d.) To meet this the old five per cent im port duties were reimposed on a number of commodities, but not on cotton goods: and within the year the duty was extended to piece-goods, but not to yarn The re-organisation of the Army, which involved the abolition of the old system of Presidency Armies, had hardly been carried out when a number of risings occurred along the North-West Frontier. In 1895 the British Agent in Chitral—which had come under British influence two years previously when Sir H. M Durand had demarcaviously when Sir H. M. Durand had demarcated the southern and eastern boundaries of Afghanistan—was besieged and had to be rescued by an expeditionary force. Two years after the Wazirs, Swatis, and Mohmands attacked the British positions in Malakand, and the Afridis closed the Khyber Pass. Peace was only established after a prolonged campaign (the Tirah campaign) in which 40,000 troops were employed, and over 1,000 officers and men-had been lost. This was in itself a heavy burden on the finances of India. heavy burden on the finances of India, which was increased by the serious and widespread famine of 1896-97 and by the appearance in India of bulonic plague. The methods taken to prevent the spread of that disease led, in Bombay, to noting, and elsewhere to the appearance in the vernacular press of seditious articles which made it necessary to make more stringent the law dealing with such writings.

### Lord Curzon's Viceroyalty.

With famme and plague Lord Curzon also, who succeeded Lord Elgin in 1899, had to deal In 1901 the cycle of bad harvests came to an end; but plague increased, and in 1904 deaths from it were returned at over one million. Of the many problems to which Lord Curzon directed his attention, only a few can be mentioned here: some indeed claim that his greatest work in India was not to be found in any one department but was in fact the general gearing up of the administration which he achieved by his uncersing energy and personal example of strenuous work. He had at once to turn his attention to the North-West Frontier. The British garrisons beyond our boundary were gradually withdrawn and replaced by tribal levies, and British forces were contentrated in British territory behind them as , a support

grace to British arms led to several attacks on the arms traffic and work on strategic railways was pushed forward. The fact that in seven years he only spent a quarter of a million upon repressive measures and only found it necessary to institute one blockade (against the Malisud Waziris) is the justification of this policy of compromise between the Lawrence and Forward schools of thought In 1901 the transwaru schools of thought in 1991 the transIndus districts of the Punjab were separated
from that Province, and together with the political charges of the Malakand, the Khyber,
Kurram, Tochi, and Wana were formed into
the new North-West Frontier Province, under
a Chief Commissioner directly responsible to
the Government of India That year also
witnessed the death of Abdur Rahman, the
Amir of Afghaniston, and the establishment Amir of Afghanistan, and the establishment of an understanding with his successor Habibullah. In 1904 the attitude of the Dalai Lama of Tibet being pro-Russian and anti-British, it became necessary to send an expedition to Lhasa under Colonei (Sir Francis) Younghus-The Dalai Lama abdicated and a treaty was concluded with his successor

> In his first year of office Lord Curzon passed the Act which, in accordance with the recom-mendations of the Fowler Commission, practically fixed the value of the rupee at 1s. 4d, and in 1900 a Gold Reserve fund was created. The educational reforms that marked this Viceroyalty are dealt with elsewhere: chief among them was the Act of 1904 reorganising the governing bodies of Indian Universities Under the head of agrarian reform must be mentioned the Punjab Land Alienation Act, designed to free the cultivators of the soil from the clutches of money-lenders, and the insti-tution of Agricultural banks. The efficiency of the Army was increased (Lord Kitchener was Commander-in-Chief) by the re-armament of the Indian Army, the strengthening of the artillery, and the reorganisation of the transport service. In his relations with the Feudr-tory Chiefs, Lord Curzon emphasized their position as partners in administration, and re founded the Imperial Cadet Corps to give a military education to the sons of ruling and aristocratic families In 1902 the British Government obtained from the Nizam a per-petual lease of the Assigned Districts of Berar m return for an annual payment of 25 lakhs. The accession of King Edward VII was proclaimed in a splendid Durbar on January 1, 1903. In 1904. Lord Curzon returned to England for a few months, but was re-appointed to a second term of office, Lord Ampthill, Governor of Madras, having acted as Vicerov during his absence. The chief act of this second term was the partition of Bengal and the creation of a new Province of Eastern Bengal and Assam—a reform, designed to remove the systematic neglect of the trans-Gangetic areas of Bengal, which evoked bitter and prolonged criticism In 1905 Lord Curzon resigned, being unable to accept the proposals of Lord Ritchener for the re-adjustment of relations between the Army headquaters and the Miltary Department of the Government, and being unable to obtain the support of the Home Government Lord Curzon was succeeded by evies, and British forces were con-British territory behind them as An attempt was made to check Lord Minto succeeded, for the unrest which

ad long been noticed developed in one irretion into open sedition.

Outside Bengalattempts to quell the disaffecion by the ordinary law were fairly successful but scarcely any province was free from dis-rder of some kind and, though recourse was and to the deportation of persons without reason ssigned under an Act of 1818, special Acta and to be passed to meet the situation, enz n Explosives Act, a Provention of Seditions deetings Act, and a Criminal Law Amendment let which provides for a magisterial inquiry a private and a trial before three judges of the Ligh Court without a jury Concurrently with hese logislative measures stops were taken to xtend representative institutions, In 1907 Hindu and a Mahomedan were appointed to he Secretary of State's Council, and in 1909. Hindu was appointed for the first time to the Viceroy's Council. The Indian Councils Act of 1909 carried this policy farther by reconstinting the legislative councils and conferring the them wider powers of discussion. The recentive councils of Madras and Bomlay were enlarged by the addition of an Indian nember

As regards foreign policy, Lord Minto's Vicerovalcy was distinguished by the conclusion (1907) between Great Britain and Russia of an agreement on questions likely to disturb the friendly relations of the two countries in issa generally, and in Persia, Afghanistan and libet in particular. Two expeditions had to so undertaken on the North-West Frontier, painst the Zakka Khels and the Mohmands, and ships of the East Indies Squadron were requently engaged off Miskat and in the Persian Gulf in openations designed to check the raffic in arms through Persia and Mokran to the frontier of India.

# Visit of the King and Queen.

Sir Charles (Lord) Hardinge was appointed to meeced Lord Minto in 1910. His first year in adia was marked by the visit to India of the King Emperor and the Queen, who arrived at Bombay on December 2, 1911. From there key proceeded to Delhi where, in the most nagnificent durbar ever held in India, the corolation was proclaimed and various boons, including an annual grant of 50 lakhs for popular ducation, were announced. At the same cerenony His Majesty announced the transfer of the apital of India from Calcutta to Delhi; the cumon of the two Bengals under a Governoran-Council, the formation of a new Licutanant-Jovernorship for Behar, Chota Nagpur and Drissa and the restoration of Assam to the harge of a Chief Commissioner.

In August, 1913, the demolition of a lavatory attached to a mosque in Cawapore was made the eccasion of an agitation among Indian Mahomelans and a riot in Cawapore led to heavy loss if life Of those present at the rict, 106 were not on trial but subsequently released by the vicercy hefore the case reached the Sessions, and His Excellency was able to settle the nosque difficulty by a compromise that was acceptable to the local and other Mahomedans,

'Still more serious trouble occurred in September, 1914, when a riot at Budge-Budge among a number of Sikh emigrants returned from Canada gave a foretaste of the recolutionary plans entertained by those men. The fequel, recolled in two conspiracy trials at Labore, showed that the "Ghadr" conspiracy was widespread and had been consistently encouraged by Germany.

### India after the War.

Post-war India has a strange and baffling history. In 1919 Englishmen troubled little about affairs in the East' they were engrossed by the settlement of peace and the refusal of the United States either to ratify the Treaty of Versaliles or to join the League of Nations. In 1930, however, the eyes not only of the British Empire but of the entire world were set upon India, when Mr. Gandhi and his followers for the second time attempted to make the non-co-operation movement effective

Ideas rule the world. India had participated in the "war to end war" It was a war waged in defence of Belgium and it ended in a peace ostensibly proclaiming the sanctity of national aspirations throughout the world. Tor the sake of nationalism the structure of Europe had been broken into fregments. What then was to be India's share in the spoils of peace? The Montagu-Chelmsford Reforms did not satisfy extremist opinion. They were the result of an agreed policy at home, and an agreed policy meant concessions to reactionary opinion.

The Montagu-Chelmsford Reforms worked, and in some Provinces they worked well. Because they worked well, it was never possible to withhold reforms. Because experience revealed their shortcomings, it was imperitive that greater reforms should be made Lord Morley and Lord Minto expressly denied that their reforms allowed Parliamentary institutions yet the logical conclusion of these reforms was the Montagu-Chelmsford Report, which definitely established Parliamentary institutions, and that report prepared the way to Dominion Status Ten years after the war we find the Vicercy and Mr. Gandhi working by different methods for the same end

Yet to one living through those fevered years the issues were not always clear Mahomedan and Hindu aspirations did not always coincide. The evil mischances that persuaded Turkey to associate with the Central Powers in the European War sorely tried Mahomedan loyalty. The Khilafablst movement assumed great proportions, and the consequence was war; for King Amanullah, who had just ascended the throne of the led to heavy loss the rict, 106 were the r

himself a few hours later. It was not until General Nadir Khan was elected King in the summer of 1929 that peace came to the unhappy land; but the keenness with which India followed the progress of the revolution showed how closely were the fortunes of the two countries associated.

The appointment of Lord Reading to be Viceroy in 1921 was a landmark in Indian history. Throughout his tenure of office there was opposition and disorder The Duke of Connaught came to open the new council, and the Swarzjist did their utmost to boycott the visit. The Prince of Wales came a year later on a non-political visit, but his arrival in Bombay was the signal for severe rioting.

Mr. Gandhi's weapons of attack were boycott and the wearing of Khaddar. Khaddar, as an Indian cloth, weakened the importation of foreign cloth. The boycott was directed not foreign cloth only against British goods, but against the entire machinery of Government In 1923 Lord Reading's certification doubled the Salt-Tax. thus showing that the Legislative Assembly had no real control over finance. The responsibilities of the Assembly were few Since the Government could override its decisions, its decisions became irresponsible In the Provinces, however, there was less irresponsibility, and consequently the members of the Legislative Councils were often the allies of Government But it took time for Indian opinion to realise that the Legislative Councils, however imperfect, were the instruments of order and good govern-Some years later, the boycott broke Mr. O. R. Das, one of Mr Gandhi's chief lieutenants, decided to associate with the Legislature—ostensibly to destroy the reforms, but actually because he and many others had grown tired of a policy of mere negation The downfall of non-co-operation was further signalled by the election of a great Swarajist, Mr V. J Patel, to be President of the Legislative Assembly—an office which he held until the summer of 1930

When Lord Irwin succeeded Lord Reading in 1926, the prospects of peace improved It was ordained by Statute that a Commission should examine the Indian Reforms within ten years of the inception of the Government of India Act. In 1927 both the British Government and the Government of India agreed that the Commission should be appointed as early as possible. Accordingly, in the autumn, it was announced that Sir John Simon and other members of Parlament should be members of a new Statutory Commission. Their appointment was the occasion of a new outburst Neither Mr Gandhi's followers nor the moderates. Would support the Commission. It was to be boycotted from the start. The chief complaint was that all the members of the Commission were Europeans. The Congress party, and even the moderates, demanded in its place a Round Table Conference and the promise, if not the immediate offer, of Dominion Status. The boycott, however, was not very effective. One by one the Provincial Councils decided to cooperate with the Simon Commission, the Legislative Assembly, almost alone among the Legislatures, stood consistently for boycott. Yet it is significant that before the Simon Commission had published its report, the Viceroy not only appounced that the goal of Government in India.

was Dominion Status, but invited representatives of India to a Round Table Conference in London he stood where the moderates and half the Congress had stood two years before. Meanwhile, Congress became still more extremist In January 1929, Mr. Gandhi announced that if India was not given Dominion Status within a year, he would lead the campaign for Independence. He kept his word, and the Lahore Congress of December 1929, under the guidance of Pandit Tawharlal Nehru rather than Mr Gandhi, voted in favour of Independence.

The new struggle began in earnest in March, 1930 Mr Gandhi first decided to break the Salt Laws He made an imposing march from Ahmedabad to the coast, where he ceremoniously manufactured salt that could not be taxed Non-co-operation was in full swing. For a short time Bombay was virtually a Congress City There were numerous arrests

The Statutory Commission meanwhile published its report, but it met with violent criticism in India. A new scheme to consult Indian opinion on constitutional reforms was evolved in the shape of a Round Table. Conference to which representatives of British India, the Indian States and the British parties were invited. The Princes, at first, assumed the lead. They stood for a Federal Government in which the States and British India should be partners. At once the extremists, who had intended to ignore the Conference, showed the keenest concern. The Conference, despite all evil prognostications, represented the voice of India.

In February 1931 the Round Table Conference delegates returned to India on the understanding that there was to be a second Round Table Conference in London, but that meanwhile certain problems, such as that of separate communal electorates, were to be worked out among themselves in India. The first thing they did on their return was to attempt to persuade Congress to call off the Civil Disobedience Movement and participate in the Conference Congress, however, were in bitter mood, many local committees even did their best to prevent the decennial census in February from being an accurate index to the state of the population There were a number of feverish conferences between Lord Irwin, Mr Gandhi, and Sir Tej Bahadur Sapru Mr Gandhi and other pro-minent Congress leaders were released from prison specially to confer with Government officials and the conferences were conducted in The upshot a friendly and informal fashion was the signing of the Irwin-Gandhi Pact at Delhi in March which provided on the one hand for Congress to call off the civil disobedience movement, the no-tax campaign, the boycott of British goods, and other cognate activities, and on the other hand for Government to extend an amnesty to political prisoners, to permit the manufacture of salt on the coast, and make a number of similar concessions

When in April Lord Willingdon arrived in India to take up his duties as Viceroy and Governor-General, Lord Irwin left the country amid many tributes to his statesmanship. Lord Willingdon's first few months were spent in preparing the way for the second Round Table Conference, the opening of which was fixed for

began to be adopted by almost all European countries which imposed exchange and quota restrictions on foreign imports. As a result of this Indian exports to Italy, Germany, Roumania and Turkey suffered a great deal

Nevertheless Indus turned the corner and at the time of writing seems within sight of economic revival, if not prosperity. The budget for 1934-35 actually showed a surplus after allowing for the full restoration of salary cuts in the income-tax and a slight re-luction rates

the Congress which had quarrelled with the parent body on the Communal Award Various causes have been suggested for their success, the most important of which was the wave of sentimental loyalty to an institution which had and demanding a number of changes given up its harren programme and—following the removal of the Government ban—resumed its normal functions

1931 after three and a half years of naction | and treaty rights

and avoidance of cut-throat competition—an Air Gandin announced his decision to leave agreement which was later ratified by the Indian that body, with a view partly to enable it legislature to function, independently and unobessed to function. The good will engendered by this (I. es-Mod) by his personality and partity to devoting his part was followed up and in Indo-British trade are concluded at 1934. The operation of this and the Orthur. Agreements heiped Indian commerce and industry by facilitating the exchange of commodities and merchandise between India and Britain and other parts of the Empire. A policy of economic nationalism began to be adopted by almost all European committee.

The year witnessed a keen and bitter con-troversy over the Communal Award, Hindu protesting it was unjust and Muslims insisting on retaining it Between the two, the Congress chose to remain This neutral displeased both, and a section of Hindu Congressmen formed a separate party and ceaselessly strove to upset the Award

Another outstanding feature was the publication of the report of the Joint Parliamentary Committee which examined British and Indian witnesses (officials and non-officials) on the Government's proposals contained in the White Politically, 1934-35 was a year of peace Mr Gandhi yielded to the insistent demands of peace followers and formally called off civil Bill which, at the time of writing, is being disobedience which had been dead for months discussed by the House of Commons in Committee the account of this negative policy matter Both the Committee's report and the Congressmen revived the old Swaraj Party. They contested the elections to the Assembly and scored signal success, winning 45 seats. Their triumph is all the more striking because of the scheme to get the best out of it and to the rivalry between them and another wing of the Congress which had quarrelled with the political reform

The Indian Princes created some surprise by refusing to accept the proposals as they stood of public opinion regarded their decisions as a withdrawal from the proposed federation, but the Princes regulated this interpretation and protested that they only asked for changes.

The Indian National Congress met in October which would safeguard their status, privileges and treative making a number of rhanges. A section of public opinion regarded their decisions as a withdrawal from the proposed federation, but the Princes regulated this interpretation and protested that they only asked for changes which would safeguard their status, privileges and treative making the proposed federation.

# The Government of India.

of Indiarcpresents the slow evolution from conditions established to meet trading requirements On September 24, 1599, a few years before the deaths of Oucen Elizabeth and Albar, the merchants of London formed an association for the nurpose of establishing direct trade with the East and were granted a charter of incorporation. The Government of this Company in England was vested in a Governor with a General Court of Proprictors and a Court of Direc-The factori s and affairs of the Company on the Lest and West Coasts of India, and in Bencal, were administered at each of the principal settlements of Madras (Fort St George), Bombay and Calcutta (Fort William), Les President of Governor and a Council conricting of the senior remants of the Company. The three "Presidencies" were independent of each other and subordinate only to the Directors in England.

### Territorial Responsibility Assumed.

The collapse of government in India consequent on the dreay of Mozhul power and the intelegrant of the French on the East Coast forced the officers of the Company to assume terri-torial responsibility in spite of their own de-E.r. s and the insistent orders of the Directors Step by step the Company became first the government by mutually independent and un-mildy councils of the merchants at the Presi-racy towns gave rise to grave abuses. Par-lament intervented, and under the Regulating Act of 1773, a Governor-General and four recording were appointed to administer the Preddency of Fort William (Benzal), and the supremers of that Presidency over Liadras and Boxhar was for the first time established The subordinate Presidencies were forbidden to wice war or male treaties viction the pre-vious concent of the Governor-General of Bright in Council, except in cases of imminent new rity. Pitt's Act of 1784, which established the Borrd of Control in England, vested the admini-ration of each of the three Presidenclasma Governor and three councillors, includ-

The impulse which drove the British to India and it became a political and administrative was not conquest but trade. The Government body holding its territories in trust for the Crown. The same Act vested the direction of the entire civil and military administration and sole power of legislation in the Governor-General-in-Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments.

After the Mutiny, there was passed, in 1858, an
Act transferring the Government of India from the Company to the Crown. This Act made no important change in the administration in India, but the Governor-General, as represent-ing the Crown, became known as the Viceroy. The Governor-General is the sole representative of the Crown in India; he is assisted by a Council, composed of high officials, each of whom is responsible for a special department of the administration

## Functions of Government.

The functions of the Government in India are perhaps the most extensive of any great administration in the world. It claums a share in the produce of the land and in the Punjab and Bombay it has restricted the alienation of land from agriculturists to non-agricultur-ists. It undertakes the management of landed estates where the proprietor is disqualified. In times of famine it undertakes relief work and other remedial measures on a great scale. dominart, then the paramount power in India. It manages a vast forest property and is the in the countries the system of principal manufacturer of salt and oplum rovement by mutually independent and up. It owns the bulk of the railways of the country, and directly manages a considerable portion of them; it has constructed and maintains most of the important irrigation works; it owns and manages the post and telegraph systems, it has the monopoly of the Note issue, and it alone can set the mints in motion. It lends money to municipalities, rural boards, It lends money to municipalities, rural boards, and agriculturists and occasionally to owners of historic estates. It controls the sale of liquor and intoxicating drugs and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate characterine Government has also close relations with the Indian States which collectively cover more than one-third of the whole area of Indian demonstrate more than one-fifth of its population. ing the Commander-in-Chief of the Presidence Army. The control of the Governor-lation. The distribution of these great functions it was somewhat extended, as it was exampled to the Charter Act of 1793. For the Charter Act of 1823 the Company was definitely regulated by the Reform Act of 1919.

# THE REFORMS OF 1919.

Great charges here rade in the system of (Lord Chelmsford), the results of which were constituted in the first test of the foreign of the foreign of the foreign of the spring of 1918.

The recommendations in this report were supplemented by those of two Committees which toured in India in the winter of 1918-19, and which is need their Reports in the spring of 1919. It is in the results of which is need to the spring of 1919. It is in the confidence of the foreign of 1919. It is in the first of 1917-16 by the Secretary of the foreign of the

modification of the system of administration of Indian affairs in the United Kingdom, and issued their Report while the Government of India Bill was under examination by a Joint Select Committee of both Houses of Parliament. The Joint Select Committee in their turn issued an exhaustive Report on the Bill, which was passed in a form practically identical with that recommended by the Joint Committee, and received the Royal Assent on the 23rd December 1919.

The Divisions—British India for administrative purposes is divided into 15 provinces, each with its separate Local Government or administration. In ten of the provinces—the three Presidencies of Madras, Bombay and Bengal, the United Provinces of Agra and Oudh, the Punjab, Bihar and Orissa the Central Provinces, Rurma, Assam and the North West Frontier Province—the Local Government consists of a Governor, an Executive Council of not more than four members, and two or more Ministers Burma, which was excluded from the original scheme, was brought into line with it in 1922 An Act of Parliament was passed, constituting Burma a Governor's Province, with a Governor, an Executive Council and Ministers and a Legislative Council elected on a very democratic franchise, which gave the vote to women The remaining provinces were then, inclusive of the N W Frontier Province, who are technically mere agents of the Central Government of India. No change was made by the Act of 1919 in the system of administration in these six minor provinces but the Frontier Province was, after the Burma piecedent, made a Major Province in 1982

Dyarchy—In ten nine provinces the executive Government is a dual organism which owes its unity to the Governor. One half of the organism consists of the Governor and his executive Council, all of whom are appointed by the King. This body is responsible for the administration of those subjects which are "reserved" The other half of the executive organism is the Governor acting with the advice of Ministers who are appointed by him, hold office during his pleasure, and must be elected members of the Provincial Legislative Council. To the Governor acting with Ministers is entrusted the administration of "transferred" subjects.

The Object—The framers of the Act of 1919 had a twofold object in view. Their primary object was to devise a plan which would render possible the introduction by successive stages of a system of responsible government in British India in modification of the previous system under which the Governments in India both central and provincial, received their mandates from the British Parliament acting through the Secretary of State for India, the Cabinet Minister responsible to Parliament for the administration of Indian affairs.

The Provinces—Starting from the premise that it was in the provinces that the first substantial steps must be taken towards the development of a system of responsible government the framers of the Act of 1919 provided

for a statutory demarcation of the functions to be exercised by the Government of India and the Provincial Governments respectively, in their administrative capacity. No attempt was made in this connection to limit the field open to the Indian Legislature, which still retains a concurrent (though not an overriding) power of legislation for the affairs of the provinces in general and of individual provinces; but the rules under the Act provide specifically for the exercise of this right in certain specified provincial matters, and the theory upon which the Act proceeds assumes that a convention will be established and rigorously observed which will confine intervention by the Indian Legislature in provincial affairs to matters so specified.

Finance.—The "revenues of India"—or, rather, their sources—are definitely divided between the Central and Provincial Governments; the Provincial Governments have now almost complete control over the administration of their "allocated" revenues, they have power to supplement them by raising loans on the security of these revenues, and their right, subject in certain cases to the Governor-General's sanction, to initiate new taxation measures is formally recognised.

It was found impossible to devise any scheme of allocation of revenues between the Central and Provincial Governments which did not leave the former with a deficit. This deficit is to be met in part by an annual contribution from seven of the eight Governors' provinces, the province of Bihar and Orissa, owing to the comparative exiguousness and inelasticity of its own revenues, having been exempted from this contribution. The aggregate sum thus due from the provinced to the Government of India at the outset was Rs 983 lakhs, of which Madras contributed Rs. 348 lakhs, the United Provinces Rs 240 lakhs, the Punjab Rs 175 lakhs, and the other four provinces sums ranging from Rs 15 lakhs to Rs. 64 lakhs. The annual contribution was into case to be subject to increase in the future and if reduction of the aggregate were found possible by the Government of India, reductions were to be made in fixed proportions from the quota of the several provinces. The Provincial contributions were gradually foregone and finally extinguished by the Government of India in the years of its successive annual prosperity Budgets before the commencement of the world wide economic depression in 1929

Responsibility—The first steps towards responsibility were to transform the Provincial Legislative Council into a body of sufficient size and with a sufficiently large elected majority (which the Act fixes at 70 per cent as a minimum) to represent adequately public opinion in the province, and to create an electorate. The first franchise rules gave the vote to about 5,000,000 of the adult malo population, and have enabled the Legislative Council of any "Governor's province" to extend to the franchise women

# POWERS OF PROVINCIAL LEGISLATIVE COUNCILS.

In origin the legislative authority in British dia was a meeting of the Governor-India was a meeting of the Governor-General (or, in the case of the Presidencies of Madras and Bombay, of the Governor) with his Executive Council, "for the purpose of legislation" When met for this purpose there were added to the Executive Council certain "additional members," at first very few in number, and those few all nominated by the . Governor-General or the Governor, as the case might be. A Council so constituted had originally no powers or duties beyond those immediately arising out of the discussion of the particular legislative measure which at the time was engaging its attention, and its functions were confined strictly to the discussion and enactment of legislative measures In course of time the number of "additional" members, and the proportion of these who were non-official Indus, were steadily increased, the principle of election was gradually substituted for nomination as the means of selecting non-official members, and the functions of the Councils were extended so as to include the right of interpellation, of the discussion of matters of general public interest, and of criticising and discussing the budget proposals of the Executive Government This extension of the powers of the Councils was in the main the result of the "Morley-Minto Act" of 1909. The Indian Councils Act of 1892 had given power to discuss the budget but not to divide the Council upon it Lord Morley's Act went further and provided that notwithstanding the terms of the Indian Councils Act of 1861 which had restricted the powers of all Councils to the discussion of legislative measures, the Local Government might make rules authorising the discussion of the annual financial statement, of any matter of general public interest, and the asking of ques-tions under such conditions and restrictions as might be imposed by the rules, and these rules recognised the right of the Councils to vote on motions thus submitted for their discussion. The other results of the Act of 1909 were definitely to recognise the principle of election. as the means of selecting non-official members of all Councils (although the method adopted was mainly that of indirect election), a considerable increase in the number of both non-official and official members, and the setting up in every province of a non-official (though not, save in one province, an elected) majority. A further important, though indirect, result of the Morley-Minto Act was the appointment of an Indian member to the Executive Council of the Governor-General and to such Provincial Executive Councils as were then in existence and subsequently created.

Old System —But although the Legalative Councils (which, originally created in two provinces only in addition to the Governor-General's Legislative Council, existed in 1919 in nine provinces) had steadily acquired a more and more representative character and a large share of the normal functions of a legislative assembly as generally understood, they still remained in theory up to the passing of the Act of 1919 mere accretions to the Executive Government of the provinces to the purp advising on, and

enacting, legislation. It is true that the nonofficial element in the Provincial Councils as
constituted by Lord Morley's Act of 1909 had
acquired a considerable measure of control over
legislation, in view of the fact that in most provinces that Act and the rules framed under it
placed the non-official members in a slight
majority over their official colleagues, but for
various reasons this control even in the sphere
of legislation, can hardly be described as definite
popular control, and over matters outside the
legislative sphere the Councils had no controlling voice at all.

The Changes—The most important changes made by the Act of 1919 in the powers of the Provincial Councils were—

- (i) the power to vote (and consequently to withhold) supplies;
- (:i) a greatly enhanced freedom of initiation in the matter of legislation; and
- (iii) power to frame their own rules of procedure in matters of detail, subject to the Governor's concurrence

A further right which the Councils will acquire after four years from the time of their commencement is the right to elect their own President, At the outset the President is nominated by the Governor, but from the start every Council has an elected Deputy President. The Governor (who formerly was exofice President of his Legislative Council) no longer has any direct connection with its proceedings. The first-named of these newly acquired powers is of sufficient importance to require a detailed explanation of its scope, which can best be given in the terms of the Act itself (section 72D).

72D --(1) The provisions contained in this section shall have effect with respect to business and procedure in governors' legislative councils.

(2) The estimated annual expenditure and revenue of the province shall be laid in the form of a statement before the council in each year and the I roposals of the local government for the appropriation of provincial revenues and other moneys in any year shall be submitted to the vote of the council in the form of demands for grants. The council may assent, or refuse its assent, to a demand, or may reduce the amount therein referred to either by a reduction of the whole grant or by the omission or reduction of any of the items of expenditure of which the grant is composed:—

Provided that—

(a) the local government shall have power, in relation to any such demand, to act as if it had been assented to, notwithstanding the withholding of such assent or the reduction of the amount therein referred to, if the demand relates to a reserved subject, and the governor certifies that the expenditure provided for by the demand is essential to the discharge of his responsibility for the subject; and

(b) the governor shall have power in cases of emergency to authorise such expenditure as may be in his opinion necessary for the safety or tranquility of the province, or for the carrying

on of any department; and

- (c) no proposal for the appropriation of any such revenues or other moneys for any purpose shall be made except on the recommendation of the governor communicated to the council.
- (3) Nothing in the foregoing sub-section shall require proposals to be submitted to the council relating to the following heads of expenditure:—
- (i) Contributions payable by the local government to the Governor-General in Council, and
- (11) Interest and sinking furd charges on loans; and
- (til) Expenditure of which the amount is prescribed by or under any law, and
- (w) Salaries and pensions of persons appointcd by or with the approval of His Majesty or by the Secretary of State in Council and
- (v) Salaries of judges of the high court of the province and of the advocate-general

If any question arises whether any proposed appropriation of moneys does or does not relate to the above heads of expenditure, the decision of the governor shall be final.

Executive and Legislature —In the light of these facts it is now possible to explain more exactly the relationship between the provincial executive and the provincial legislature. The dual character of the former has already been mentioned, and the corresponding bifurcation of provincial subjects into "reserved" and "transferred" categories. The rules under the act prescribe a list of 20 subjects which are transferred to the administration of the Governor acting with Ministers, the more important of which are Local Self-Government, Medical Administration, Public Health, Education (with certain reserved" subjects comprise all those in the list of "provincial" (as distinct from "central") subjects which are not transferred.

Machinery.—No change was made by the Act of 1919 in the machinery and methods of administration by the Governor in Council decisions are taken at the Council Board, as before, by a majority vote, and the Governor is entitled, as before, to overrule such a vote in certain specified circumstances if he disagrees For such decisions the Governor in Council remains, as before, responsible to the Secretary of State and Parliament, and on questions of legislation and supply he has the power of enforcing them despite opposition by a majority of the Legislative Council But, the whole spirit of the Act and the existence of a large non-official elected majority in every Provincial Legislative Council is an important factor in determining the policy to be pursued by the official half of the Government in its administration of reserved subjects. A further and not less important factor is the existence in the Government, side by side with the Executive Council, of two or more Ministers appointed from the elected members of the legislature, who, though they are not charged by law with, and in fact are legally absolved from, any responsibility-for decisions on matters outside the transferred sphere, will necessarily be able, and in fact are expected, to make their opinions felt by their colleagues in the Executive Council. But these factors, while they will doubtless lend to

constant endeavour on the part of the official half of the Government to accommodate its policy to the wishes of its ministerial colleagues and of the majority of the legislature, and to avoid situations which involve resort to the enforcement of its decisions in the face of popular opposition, are not intended to obscure the responsibility to Parliament in the last resort of the Governor in Council for the administration of reserved subjects and the right of Ilis Majesty's Government, and of the Secretary of State as a member thereof, to lay down and require the observance of any principles which they regard as having the support of Parliament and in the last resort of the lightish electorate.

Transfer of Control.—With regard to tranforred subjects the position is very different Here there has been an actual transfer of control from the British elector and the British Parliament to the elector and the legislative Council in the Indian province. The provincial subjects of administration are grouped into portfolios, and just as each member of the Executive Council has charge of a portfolio consisting of a specified list of "reserved" subjects or "departments," so each Minister is directly rezponsible for the administration of those parti-oular transferred "departments" which are included in his portfolio. But his responsibility lies, not, as in the case of a member of the Exccutive Council, to the Government of India, the Secretary of State and Parliament, but to the Provincial Legislative Council of which he is an elected member and from which he is selected by the Governor as commanding or likely to command the support of the insjority He holds office during the Goverof that body nor's pleasure, but his retention of office is contingent on his ability to retain the confidence not only of the Governor, but also of the Legislative Council, upon whose vole he is directly dependent for his salary Further, the control of the Legislative Council over transferred subjects, both as regards supplies and legislation, is almost entirely free from the restrictions just noticed which necessarily quality its con-trol over the "reserved" subjects. It is thus within the power of the Provincial Council to insist on the pursuit of a policy of its own choice in the administration of transferred subjects by withdrawing its confidence from a Minister who departs from that policy and bestowing it only on a successor who will follow its mandate and this power is dependent on the provincial elector in virtue of his freedom to control the composition of the Legislative Council by the use which he makes of his vote No doubt this statement requires some quali-fication before it can be accepted as literally accurate, for, technically, the authority charged with the administration of transferred subjects is "the Governor acting with Ministers appointed under this Act," not the Ministers acting on their own initiative, and, further the Governor, who is not, of course, subject to removal from office by the Legislative Council, is charged personally with responsibility for the peace and tranquillity of his province, and would be entitled, and indeed bound, to recommend the removal of a department from the transferred list if he found the legislature bent on pursuing a policy in its administration which, in his judgment, was incompatible

with the maintenance of peace and tranquillity; yet the powers of control vested in the Legisis the powers of the transferred sphere are undoubtedly great, and it was the opinion at all events of the Joint Select Committee that legislature and Ministers should be allowed legislature and Limisters should be accepted to exercise them with the greatest possible freedom. "If after hearing all the arguments," historis should the Committee, "Ministers should be a committee, "Minister observed the Committee, "Ministers should "decide not to adopt his advice, then in the "opinion of the Committee the Governor should "ordinarily allow Ministers to have their way, fixing the responsibility upon them, even if "it may subsequently be necessary for him to "vote any particular piece of legislation It
"is not possible but that in India, as in all other
"countries, mistakes will be made by Ministers
acting with the approval of a majority of the "Legislative Council, but there is no way of "learning except through experience and "the realisation of responsibility."

Provision of Funds—The terms of the Act leave the apportionment of the provincial revenues between the two halves of the executive for the financing of reserved and transferred subjects respectively to be settled by rules, merely providing that rules may be made " for "the allocation of revenues or moneys for the "purpose of such 'administration' 10, the "administration of transferred subjects by the "Governor acting with Ministers". Probably the best description available of the method adopted by the rules for the settlement of this matter is the recommendation of the Joint Select Committee whose proposals have been followed with one modification only to enable the Governor to revoke at any time, at the desire of his Council and Ministers an "order of allocation" or to modify it in accordance with their joint wishes. The passage is as follows

," The Committee have given much attention to the difficult question of the principle on which the provincial revenues and balances should be distributed between the two sides of the provincial governments. They are confident that the problem can readily be solved They by the simple process of common sense and reasonable give-and-take, but they are aware that this question might, in certain circumstances, become the cause of much friction in the provincial government, and they

THE CENTRAL

The structural changes made by the Act of 1919 in the system of government outside the "Governors' provinces" are of compara-tively minor scope, though the spirit of the Act requires, as has already been shown, considerable modification of the relation-hip hitherto subsisting between the Provincial Governments on the one hand and the Govern-

are of opinion that the rules governing the allocation of these revenues and balances should be framed so as to make the existence of such friction impossible They advise that, if the Governor, in the course of preparing either his first or any subsequent budget, find that there is likely to be a serious or protracted difference of opinion between the Executive Council and his Ministers on this subject he should be empowered at once to make an allocation of revenue and balances between the reserved and transferred subjects which should continue for at least the whole life of the existing Legislative Council. The Committee do not endorse the suggestion that cer-tain sources of revenue should be allocated to reserved and certain sources to transferred subjects, but they recommend that the Governor should allocate a definite proportion of the revenue, say, by way of illustration, two-thirds to reserved and one-third to transferred subjects, and similarly a proportion, though not necessarily the same fraction of the balances. If the Governor desires assistances is the content of the content that the content of the content o ance in making the allocation, he should be allowed at his discretion to refer the question to be decided to such authority as the Gover-nor-General shall appoint. Further, the Committee are of opinion that it should be laid down from the first that, until an agreement which both sides of the Government will equally support has been reached, or until an allocation has been made by the Governor, the total provisions of the different expenditure heads in the budget of the province for the preceding financial year shall hold good.

"The Committee desire that the relation of the two sides of the Government in this matter as in all others, should be of such mutual sympathy that each will be able to assist and influence for the common good the work of the other, but not to exercise control over it. The budget should not be capable of being used as a means for enabling Ministers or a majority of the Legislative Council to direct the policy of reserved subjects; but on the other hand the Executive Council should be helpful to Ministers in their desire to develop the departments entrusted to their care On the Governor personally will devolve the tark of holding the balance between the legitimate needs of both sets of his advisers."

#### GOVERNMENT.

ture It has already been observed that this body was, in origin, like all other legislative bodies in India, the Governor-General's Executive Council with the addition of certain "additional members" appointed to assist the Executive Council in the formulation of legislation. Despite the standard growth in the formulation of the council in the formulation of the council of the formulation of the council of t legislation Despite its steady growth in size and influence, and despite the introduction Governments on the one hand and the Government of India and the Secretary of State in Council on the other. The only concrete changes made in the constitution of the Central Government are the removal of the statutory bar to the appointment of more than six members over the members proper, e.s., the Executive Council of the Governor-General's Executive Council of the Act of 1919. That Act, however, has entirely remodelled the "Indian Legislature," the Council are now Indians), and the reconstitution in a much more enlarged representative and influence, and despite the introduction of the elective system, the existence of "additional members," who of course under Lord Morley's Act greatly preponderated in numbers over the members proper, e.s., the Executive Council of the Act of 1919. That Act, however, has entirely remodelled the "Indian Legislature," the Council of the elective system, the existence of "additional members," who of course under Lord Morley's Act greatly preponderated in numbers over the members proper, e.s., the Executive Council the Act of 1919. That Act, however, has entirely remodelled the "Indian Legislature," Legislature, and influence, and despite the introduction of the elective system, the existence of "additional members," who of course under Lord Morley's Act greatly preponderated in numbers over the members proper, e.s., the Executive Council the Act of 1919. That Act, however, has entirely remodelled the "Indian Legislature," Legislature, and influence, and despite the introduction of the elective system, the existence of "additional members," who of course under Lord Morley's Act greatly preponderated in numbers over the members proper, e.s., the Executive Council in a Governor's province the Act of 1919. That Act, however, has entirely remodelled the "Indian Legislature," and indianal members of the elective system, the existence of council members, and indianal members of council members of co ns are specifically withheld by the terms of the Act. It consists of two Chambers The "Council of State" contains 60 members, of whom 34 are clicted (including one member to represent Berar, who, though technically nominated, is nominated as the result of elections held in Berar) and 26 nominated, of whom not more than 20 may be officials "Legi-lative Assembly" consists of 3nc "Logi-lative οſ 145 members, of whom 105 are elected (including in the case of the Council of State, one Berge member who, though actually elected, an technicily a nominee) Of the 40 nominated members, not fewer than one third are The members, required to be non-officialof the Governor-General's L-centive Council are and where ol not ex-officio Chamber, but each of them has to be appointed a member of one or other Chamber and can vote only in the Chamber of which he is a member. Any member of the Jaccutive Council may, however, speak in either Chamber The President of the Upper Chamber is a nominee of the Governor-General, as also, for the four years after the constitution of the Chamber, was the President of the Legislative Ascenibly. But after that period the Lover Chamber elected its own President, and it elected it-own Deputy-President from the out-cl The normal lifetime of each Council or State is ive years, and of each Legistive As-embly three years, but either Chamber, or both simulinnously, may be dir-olved at any time by the Governor-General

Election —The method of election for both Chambers is direct, and although the number of electors is considerably smaller than for the Provincial Councils, it is a great advance on the very restricted and for the most part indirect franchise established under the Act of 1909 for the unicameral central legislature which no longer exists. Generally speaking, the electoral scheme for the Lower Chamber is on the same model as that for the Provincual Councils already described except that. firmly, the property qualification for voters (and consequently for (andidates) is higher in order to obtain manageable constituencies, and past service with the colours is not per se a qualification for the franchi-c, and secondly. that the constituencies necessarily cover a considerably larger area than constituencies for the Provincial Council The distribution of scats in both Chambers, and the arrangement of constituencies, are on a provincial basis; that is a fixed number of the clective seats in each Chamber is assigned to representatives of each province, and these representatives are elected by constituencies covering an assigned area of the province.

The following table shows the allotment of

the elective seats:-

	Leg Ae	islative sembly.	Council of State.

				-

Since the area which returns perhaps 80 members to a Provincial Council is the came ne the area which returns pechaps 12 members to the Iselfative Arembly—namely, the entire province in each care—it follors that on the direct election system this area muct be split into con thurneles which are much lurger than the constituencies for the local Councils, and just as it is penerally correct to eas that the normal area unit for the rural con-tituencies for the latter which are arranged on a territorial basis is the di trict, it may be said that the normal area unit in the care of the Legislative As embly is the Divi ion (the technic caltern for the administrative group of districts

controlled by a Divisional Commistoner). The Franchise.—The rever-i result of the Arch franchise arrangements under the Act is thus that there is in each prosince a looly of electors qualific I to vote for, and stand for election to, the Provincial Council, and that a relacted number of the exoters are qualified to note for and stand for election to there seals in the Legislative As embly which are assigned to the province. The qualifications for caudidature for the Teprintive Assembly are the tame in eich province, mulatir matancies, as for exadiduture for the Proxincial Connell, except that in all provinces, so long ry the candidate can show that he re ides comewhere within the province, no clo er connection with his particular constituency is invicted upon.

The franchise for the Council of State differs in character from that for the Proxincled Council and the Legislative Assembly. The concern of the framers of the Act and rules was to scenre for the membership of this body a character as closely as possible approximating to a "Senate of Elder Statesmen" and thus to constitute a body capable of performing the function of a true revising Chamber. With this object, in addition and as an alternative to a property qualification—adopted as a rough and ready method of enfranchising only persons with a stake in the country—the rules admit as qualifications certain personal attribute: which are likely to connote the possession of some past administrative experience or a high standard of intellectual attainment Examples of these qualifications are part membership of either Chamber of the Legislature as now constituted, or of its predece-aor, or of the Provincial Council the holding of high office in local bodies (district boards, municipalities and corporations), membership of the governing hodies of Universities, and the holding of titles conferred in recognition of Indian classical learning and literature

Powers -The powers and duties of the Indian legislature differ but little in character within the "central" sphere from those of the provincial Councils within their provincial sphere, and it has acquired the same right of voting supplies for the Central Government But as no direct attempt has yet been made to Introduce responsible government at the centre, the step in that direction having been avowedly confined to the provinces and as consequently the Executive Government of India remains egally responsible as a whole for the proper fulfil-

ment of its charge to the Secretary of State and General in his relationship with the Indian Parliament, it follows that the powers conferred Legislature, less restricted in their operation on provincial Governors to disregard an adverse than in the provinces; that is to say, they vote of the Legislative Council on legislation or cover the whole field and are not comined in supplies are, as conferred on the Governor their application to categories of subjects.

THE INDIA OFFICE.

the administration of Indian affairs. Slight alterations have been effected in the alterations have been effected in the British revenues the salaries of the Secretary of number and tenure of office of the members State and of the Parliamentary Under Secretary, of the Secretary of State's Council, and some and that portion of the cost of salaries of India relaxations have been made in the statutory Office staff and general maintenance which is relaxations have been made in the statutory office staff and general maintenance which is considered attribute the transfer of the secretary of the statutory of the statutory of the statutory of the secretary of the sec relaxations have been made in the statutory Office staff and general maintenance which is rigidity which formerly bound their procedure attributable to the exercise of its administrative and that of the Office in general. But provide as distinct from purely agency functions slows now exist which will undoubtedly as time! In due course the apportionment to goes on have a material effect on the activities of the Office as it is now constituted A High Commissioner for India has been appointed for the purpose of taking over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative super-vision and control. The process of separation of staff and functions for the purpose of this transfer will necessarily be somewhat slow, but a substantial beginning has been made by handing over to the direct control of the High Commissioner the large departments which are concerned with the ordering and supply of stores and stationery in England for Government use in India, with the payment of pensions to retired members of Indian services resident in

The Governor-General and the "Executive" members of his Council are appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it at five years There are seven Executive Mem-bers of Council. These Members hold respec-tively the portfolios of Education, Health and Land : Home . Finance . Commerce & Railways . Industries and Labour . Law The Viceroy acts as his own member in charge of Foreign affairs Railways are administered by a Chief Commissioner with the assistance of a Railway Board; and are for administrative purposes grouped under the ægis of the Railways Department The Commander-in-Chief may also be and in practice always is, an "Ordinary" memin practice always is, an "Ordinary" mem-ber of the Council He holds charge of the Bombay and Bengal become "extraordinary" members if the Council meets within their Presidenotes. The Council may assemble at any place in India which the Governor-General appoints In practice it meets only in Delhi and Simla except for a meeting or two in Calcutta after Christmas, when the Viceroy is usually in residence in the Bengal Capital

In regard to his own Department each Member of Council is largely in the position of a Minister of State, and has the final voice in ordinary departmental matters. But any question of special importance, and any matter in which it is proposed to over-rule the views of a Local Government, must ordinarily be referred to the Viceroys. Any matter originating in one department which also affects enother must be referred to the latter, and in the event of the Department. ments not being able to agree, the case is re-

The Act makes no structural changes the United Kingdom, and with the assistance of in the part played by the India Office in Indian students in England. Concurrently with this change, it is now possible to defray from British revenues the salaries of the Secretary of

> In due course the apportionment to British estimates will be the cost of the India Office as it exists after the transfer of functions to the High Commissioner has been completely effected, then the salaries of the High Commissioner and his staff will be the only expenses in the United Kingdom chargeable to Indian revenues. Until that time arrives, however, an estimate was the only basis for settlement, and for five years from 1920-21, the cost of the India Office payable from British revenues has been fixed at 136,5001, which includes the salaries of the Secretary of State and of the Parliamentary Under Secretary, and a contribution of 40,000l., which has for some years been made by the Treasury towards Indian expenditure, as the result of the recommendations of the Welby Commission

PERSONNEL AND PROCEDURE. ferred to the Viceroy. The Members of Council meet periodically as a Cabmet-ordinarily once or twice a week-to discuss questions which the Viceroy desires to put before them, or which a member who has been over-ruled by the Viceroy has asked to be referred to Council If there is a difference of opinion in the Council the decision of the majority ordinarily prevails, but the Viceroy can over-rule a majority if he considers that the matter is of such graye importauce as to justify such a step. Each depart-mental office is in the subordinate charge of a Secretary, whose position corresponds yery much to that of a permanent Under-Secretary of State in the United Kingdom, but with these differences—that the Secretary is present though does not speak, at Council meetings at which cases under his cognisance are discussed: that he attends on the Viceroy, usually once a week, and discusses with him usually once a week, and discusses with him all matters of importance arising in his Department; that he has the right of bringing to the Viceroy's special notice any case in which he considers that the Viceroy's concurrence should be obtained to action proposed by the Departmental Member of Council, and that his tenure of office is usually limited to three years. The Secretaries have under them Deputy, Under and Assistant Secretaries, together with the ordinary clerical establishments. The Secretaries and Under-Secretaries are often, though by no means Secretaries are often, though by no means exclusively, members of the Indian Civil Service The Government of India has no Civil Service of its own as distinct from that of the Provincial Governments, and officers serving under the Government of India are borrowed from the Provinces, or, in the case of Specialist recruited direct by contract.

Bihar

# The Bombay Fresidency.

an area of 8,104 square miles and a population of 2,443,007. There are no States in political relations with the Government of Bombay, as they are all not under the Government of India

The Presidency embraces a wide diversity of soil, climate and people. In the Presidency Proper are the rich plains of Gujarat, watered by the Norbudda and the Tapti, whose fertility is so marked that it has long been known as the Garden of India South of Bombay City the province is divided into two sections by the Western Ghats, a range of hills running parallel to the coast Above Ghats are the Decean Districts, south of these come the Karnatic Cutho and add of the Ghata are the On the sea side of the Ghats is the Konkan, a rice-growing tract, intercepted by creeks which make communication difficult. Then in the far north is Sind, totally different from the Presidency Proper, a land of wide and monotonous desert except where irrigation from the Indus has brought abounding fertility. It is proposed to constitute Sind into a separate province with the coming reforms.

## The People.

The population varies as markedly as soil and In Sind Mahomedans predominate. Gujarat has remained true to Hinduism although long under the dominion of powerful Mahomedan kings. Here there is an amplitude of caste divisions, and a people, who although softened by prosperity, are amongst the keenest trading races in the world The Deccan peasant has been seasoned by adversity; the saying goes that the Deccan expects a famine one year in every three, and gets it, the population is much more homogeneous than in Gujarat, and thirty per cent are Mahrattas. The Karnatic is the land of the Lingayets, a Hindu reforming sect of the twelfth century and in the Kornton them. of the twelfth century, and in the Konkan there is a large proportion of Christians Four main languages are spoken, Sindi, Gujarati, Marathi and Kanarese, with Urdu a rough lingua franca where English has not penetrated. The main castes and tribes number five hundred

#### Industries.

The principal industry is agriculture, which supports sixty-four per cent of the population. In sind the soils are wholly alluvial, and under the influence of irrigation produce yearly increasing crops of wheat and cotton. In Gujarat they are of two classes, the black cottons the finest in India, and alluvial, and cottons the finest in India, and alluvial, and cottons the finest in India. which under careful cultivation in Ahmedabad and Kaira makes splended garden land. The dominant soil characteristic of the Deccan is

The Bombay Presidency stretches along the wast coast of India, from Sind in the North to Kanara in the South It has an area of 123,623 square miles and a population of 23,040,506 Geographically included in the Presidency but under the Government of India is the first class Native State of Baroda, with an area of 8,104 square miles and a population of 2,443,007. There are no States in politically included in the square miles and a population of 2,443,007. There are no States in politically included in the square miles and a population are no great perennial rivers suitable for important properties of Baroda, with a square miles and a population and the harvest is largely dependent of 2,443,007. There are no States in politically square miles are no great perennial rivers suitable for important perennial rivers and a population of Baroda, will irrigation. A chain of irrigation works. well irrigation A chain of irrigation works, consisting of cample led from great reservoirs in the region of unfailing rainfall in the Ghats, is gradually bring completed, and this will ulti-mately make the Decem immune to revious drought. More than any other part of India the Presidency has been recoursed by familia The crits have not been unmixed, and plague. for tribulation has made the people more selfreliant, and the rise in the values of all produce, synchronising with a certain development of industry, has induced a considerable rise in the standard of living. The land is held on what Is known as the rectwari tenure, that is to say, each cultis stor holds his land direct from Government under a moderate assessment, and as long as he pays this assessment he counct be disrossessed.

## Manufactures.

Whilst agriculture is the principal industry, others have no inconsiderable pince. The mineral wealth of the Presidency is small and is confined to building stone, sait extracted from the sea, and a little manganese But the handlerafts are uldely distri-buted. The handloom weavers produce bright-coloured saris, and to a diminishing extent the exquisite kincobs of Ahmedabad and Surat Bombay silverware has a place of its own, as well as the brass work of Poona and Nasil. But the tendency is to submerge the indigenous handlerafts beneath industry organised on modern lines Bomba) is the great centre in India of the textile trade. This is chiefly found in the headquarter city, Bombay

Number of Looms in Bombay Island. 73.209 Number of Spindles in Bombay Island 33,00,685 Number of hands employed in the

.. 31,68,106 Number of Looms in the Bombay Presidency (excluding Bombay

Island)..

60,322

Great impetus has been given to Bombayindustries by the provision of electric power generated fifty miles away on the Ghats, and the year 1919 witnessed a phenomenal flotation of new industrial companies of almost every description.

The situation of Bombay on the western sea-board in touch at once with the principal markets of India and the markets of the West has given Bombay an immense sea-borne trade. The older ports, Surat, Broach, Cambay and Mandvie, were famous in the ancient days, and their bold and hardy mariners carried Indian commerce to the Persian Gulf and the coasts of Africa. But the opening and the coasts of Africa. But the opening of the Suez Canal and the increasing size of ocean steamers have tended to concentrate it in modern ports with deep water anchorages, and the sea-borne trade of the Presidency is now concentrated at Bombay and Karachi, although attempts are being made to develop Mormugao in Portuguese territory into an outlet for the trade of the Southern Mahratta Country, and Port Okha as a port of considerable importance for Kathiawar and Guiarat

#### Administration.

The Presidency is administered by a Governor and an Executive Council of two members. with the assistance of two Ministers. The exact change made in the functions of the Provincial Governments is indicated in the section on the Provincial Governments (q v) where a description is given of the division of the administration into two branches, the Reserved Subjects, administered by the Governor and his Council and the Transferred Subjects, administered by the Governor and his Ministers, the whole Government commonly meeting and acting as one. In another part of that section the division between Reserved This new and Transferred subjects is shown form of administration under the Reform Act of 1919 came into operation in January 1921. All papers relating to public service business reach Government through the Secretariat, divided Into seven main departments, each under a Secretary (a) Finance. (b) Revenue. (c) Home and Ecclesiastical (d) Political and reforms. (e) General and Educational; (f) Legal; (g) Public Works The senior of the Civilian Secretaries is entitled the Chief Secretary. The Government is in Bombay from November to the end of May; and in Poons from June to November, but the Secretariat is always in Bombay, Under the Governor-in-Council the Presidency is administered by four Commissioners Commissioner in Sind has considerable inde-pendent powers In the Presidency Proper there are Commissioners for the Northern Division, with hendquarters at Ahmedabad, the Central Division at Poons; and the Southern Division at Belgaum. Each district is under a Collector, usually a Covenanted Civillan, who has under him one or more Civilians as Assistant Collectors, and one or more Deputy Collectors. A collectorate contains on an average from eight to ten talukas, each consisting of from one to two hundred villages, and local taxes. The tendency of recent years have whose whole revenues belong to the Stote. been to increase the elective and reduce the romanne village officers are the patel, who as the inated element, to allow these bodies to elect the inated element, to allow these bodies to elect the inated element.

head of the village both for revenue and police purpose; the talati or kulkarni, clerk and accountant; the messenger and the watchman. Over each Taluka or group of villages is the mamlatdar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukas The Collector and Magistrate is over the whole District The Commissioners exercise general control over the Districts in their Divisions.

#### Justice.

The administration of justice is entrusted to the High Court sitting in Bombay, and comprising a Chief Justice, who is a barrister, and nine puisne judges, either Civilians, Barristers, or Indian lawyers In Sind the Court of the Judicial Commissioner (The Judicial Commissioner (T cial Commissioner and three Additional Judicial Commissioners) is the highest court of civil and criminal appeal. The importance of Karachi and Sind has, The growing however. necessitated the raising of the status of the Judicial Commissioner's Court and the passing of the Sind Courts Act in August 1926, which contemplates the creation of a Chief Court for Sind with a Chief Judge and three or more Puisne Judges The Act, however, has not yet here put into effect owners. been put into effect owing to financial difficulties. Of the lower civil courts the court of the first Instance is that of the Subordinate Judge recruited from the ranks of the local lawyers. The Court of first appeal is that of the District or Assistant Judge, or of a first class subordinate judge with special powers District and Assistant Judges are Indian Civilians,or members of the Provincial Service or the Bar In cases exceeding Rs 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge and from the decision of the Listrict Judge In all original suits lies to the High Court District and Assistant Judges exercise criminal jurisdiction throughout the Presidency but original criminal work is chiefly disposed of by the Executive District Officers and Resident and City Magistrates Capital sentences are subject to confirmation by the high Court In some of the principal cities Special Magistrates exercise summary jurisdiction (Bombay has six Presidency Magistrates, as well as Honorary Magistrates exercising the functions of English Justices of the Peace) and a Court of Small Causes, corresponding to the English County Courts

#### Local Government.

Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former exercising authority over a District or a Taluka, and the latter over a city or town. These bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements. Their funds are derived from improvements.

own chairmen, whilst larger grants have been made from the general revenues for water supply and drainage.

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self-Government in the Presidency. The Act provides more adequate basis for Municipal Administration in the larger cities of the Bombay Presidency The larger municipalities are now styled as Municipal Boroughs which are now 30 in number. The executives of these Borough Municipalities are invested with larger powers than intherto exercised. Another important change introduced by the Act was the extension of municipal franchise to occupiers of dwellings or buildings with annual rental values of Rs 12 or with capital value of not less than Rs 200

#### Public Works.

The Public Works Department is under the control of two Chief Engineers who act as Secretaries to the Government, one for Roads, Buildings, Railways, etc ,and the other for Irrigation Under them are Superintending Engineers in charge of Circles and Executive Engineers in charge of divisions, the Consulting Architect and the Electrical Engineer The chief irrigation works are in Sind and consist of a chain of canals fed by the annual inundations from the Indus The Lloyds Barrage and canals project which was inaugurated in 1923 is the greatest Irrigation Scheme in the world and is designed to ensure the vast areas of fertile land in Sind a regular and constant supply of water It will enable about 6 million acres of crops to be irrigated annually, to, about as much area irrigated in Egypt The scheme is not only vital to the future of Sind but of inducet benefit to the whole of India The whole scheme is estimated to cost over 15 million sterling or 20 crores of rupees The Barrage was formally opened by the Viceroy and Governor General of India on 13th January 1932 In the Presidency proper there is a chain of protective irrigation works, originating in reservoirs in the Ghat regions. The principal works are the Nira Canals fed by Lake Whiting impounded by the Lloyd Dam at Bhatgar, the Pravara Canals fed by Jake Arthus Hill impounded by Wilson fed by Lake Arthur Hill, impounded by Wilson Dam at Bhandardara, the Mutha Canals fed by Lake Fife at Khadakvasla, the Godavari Canals fed by Lake Beale at Nandur Madhmeshwar and the Gokak Canal. The Mutha Canals and the Gokak Canal were completed in 1896-97, the Nira Left Bank Canal in 1905-06, the Godavari Canals in 1915-16 and the Pravara Canals in 1926-27 The Nira Right Bank Canal The Nira Right Bank Canal which has been under construction since 1912 is nearing completion The Wilson Dam at Bhandardara the second highest yet constructed by Engineers the world over was opened by His Excellency the Governor on 10th December 1926 The Lloyd Dam at Bhatgar which is 5,383 feet in length, 190 feet in height and 124 feet in width was opened by H. E Sir Leslie Wilson on 27th October 1928 1t cost Rs 172 lakhs It is remarkable as being the largest Dam in volume hitherto constructed and contains 211 million cubic feet of masonry. The Assuan Dan in Egypt is popularly supposed to be the largest Dam in existence but that contains 19 million

cubic feet It cost also nearly 50 per cent more than the Lloyd Dam. An idea of the magnitute of the Lloyd Dam can be gathered from the fact that if a wall 6 feet high and 15 inches thick were constructed from the masonry in the Dam it would stretch a distance of 520 miles, say from Bombay to Nagpur. These projects will irrigate certain tracts most liable to famine

#### Police.

The Police Force is divided into 3 categories, viz, District Police, Railway Police and the Bombay City Police The District and Railway Police in the Presidency proper are for the purpose of control under the Inspector-General of Police who is assisted by three Deputy Inspectors-General, of whom two are in charge of Ranges and the third is in charge of the Crimi: nal Investigation Department and the Finger Print Bureau District and Railway Police in Sind are under the Deputy Inspector-General of Police for Sind, subject to the control of the Commissioner-in-Sind The executive manage ment of the Police in each district and on Railways in the Presidency proper, as well as in Sind is vested in a Superintendent of Police under the general direction of the Magistrate of the District concerned except in the case of the Railway Police For the purposes of effective supervision over the investigation and prevention of crime, some of the larger districts are divided into one or more sub-divisions each under a Sub-Divisional Officer who is either an Assistant Superintendent of Police, or an Inspector of Superintenuent of Police, or an inspector of Police, a Deputy Superintendent of Police. Sub-Inspectors are the officers in charge of Police Stations and are primarily responsible under the law, for the investigation of offences reported at their Police Stations Officers appointed directly to the posts of Assistant Superintendents of Police, Deputy Superintendents of Polices and Sub-Inspectors tendents of Police, Inspectors and Sub-Inspectors undergo a course of training at the Central Police Training School at Nasik before being posted to Districts for executive duty. The Bombay City Police is a separate force under the Commissioner of Police who is directly responsible to Government.

#### Education.

Education is imparted partly through direct Government agency, and partly through the medium of grants-in-aid Government maintam Arts Colleges at Bombay, Andheri, Poona, Ahmedabad and Dharwar; the Grant Medical College, the Poona College of Engineering, the Agricultural College, Veterinary College, School of Art, Law College and a College of Commerce Most of the secondary schools are in private hands The primary schools are in private hands The primary schools are maintained by Local Authorities, with a grant-in-aid. The Bombay Municipality is responsible for primary education in Bombay City- (q. v., Education),

The Quinquennial Report on Public Instruction in the Bombay Presidency for the years 1927-1932 reveals much information regarding the progress of education in recent years. The passing in 1923, of the Primary Education Act was perhaps the most important event in the history of Primary Education in the Bombay Presidency during the last 80 or 40

years whereby the control of Primary Education was transferred from the Department to the Most of the Boards have Local Authorities prepared schemes for the expansion of education, some of them on a compulsory basis, and many boards have levied additional taxation but the finances of Government have not permitted them to perform to the full the part contem-plated by the Act The fact, however, must not be lost sight of that during the quinquennium the assignments of Government to Primary Education fell from  $\mathbf{R}\mathbf{s}$ 1,21,59,848 Rs 1,18,17,308 the decrease was mainly due to retrenchment in Government grants during 1931-32.

"Reports on Public instruction in this presidency during the last five or six years however point to the fact that there has been considerable decline in the efficiency of Primary Education since the transfer of control" says the Director of Public Instruction "It will be seen from these reports that the factor which has militated more than any other against efficiency has been communalism \*\* The composition of the various District Local Boards has had its effect on the working of the Primary Education Act The majority of School Boards which came into existence developed communal tendencies and this attitude influenced the selection of the supervising and teaching staff and then transfers and promotions"

The quinquennium has been noticeable for the greater recognition given to the Educational needs of the backward classes especially in Primary Education and a very liberal system for these classes has been introduced by Govern-

ment since 1921

Lack of funds has cramped the activities of Government in the field of Primary and Secondary Education Economy has been the dominating note of the Educational policy throughout the quinquennium . In view of the present financial stringency which precludes Government from providing additional funds for Secondary Education there would appear to be some grounds for raising the fees in Government Schools, but Government have decided not to take any action in this direction at present In the case of Primary Education Government were compelled to apply a cut of 5 per cent to the grants pavable to local authori-ties in 1931-32 Since then it has become necessary to increase the cut to 20 per cent So far from it being possible to provide the funds required for the expansion of Secondary and Higher Education, it has been necessary to exercise retrenchment, and that too in directions in which it could not be applied without educational loss As one instance only, the Director of Public Instruction mentions the discontinuance of the scheme of Medical Inspection after it had been in existence for a year Among the chief purposes for which additional funds are required, perhaps the most important is that for additional provision for Technical and Industrial Education, including the expin-sion of the College of Engineering and the establishment of a Technological institution of an advanced nature The total expenditure on Education increased from Rs 3,51,49,449 in 1926-27 to Rs 3,99,27,898 in 1931-32 or an increase of 4 7 per cent against 29.6 per cent during the last quinquennium.

The total number of institutions increased during the quinquennium from 16,211 to 17,159. Recognised institutions increased by 1,145 to 15,929 while unrecognised institutions decreased by 197 to 1,230 Of the recognised institutions 16 are Arts and 11 Professional Colleges and 686 Secondary Schools, 14,694 Primary Schools and 349 Special Schools

The total number of recognised and unrecognised educational institutions during the year 1932-33, was 16,871 and the number of pupils 1,332,087

Out of a total of 26,848 towns and villages 10,763 possessed schools, the average area served by each town or village with a school being 11 5 square miles. The percentage of pupils in recognised institutions to the total population of the Presidency was 5 95, in 1932-33 Of the total number of 1,332,087 pupils under instruction, 1,033,521 were boys and 298,566 weregifs.

Hindu pupils in recognised institutions numbered 966,230, Muhammadans 234,146, Indian Christians 39,070, Parsis 17,003, Europeans and Anglo-Indians 5,489 The rest comprised 35,354

The total expenditure on education in 1932-33 was Rs 3813 lakhs, of which 444 per cent was met from Government funds, 189 per cent from Board funds, 222 per cent from fees, and 147 per cent from other sources Primary schools absorbed over Rs 205 lakhs, exclusive of expenditure on inspection, construction, and repairs

The Educational Department is administered by a Director, with an Inspector in each Division and a Deputy or Assistant Inspector in each district.

Higher education in the Presidency is controlled by the Bombay University which was established in 1857. The constitution of the University has recently undergone, however, considerable changes in virtue of a new enactment known as the Bombay University Act of 1928. This Act altered the whole constitution of the University so as to make it adequately representative with a view to bringing into, closer association with the public the industrial commercial and civic life of the people of the Presidency to enable it to provide greater facili-ties for higher education in all branches of learning including Technology and to undertake on a larger scale than heretofore post-graduate on a larger scale than heretotore post-graduate teaching and research, while continuing to exercise due control over the teaching given by colleges affiliated to it from time to time. The new University Department of Chemical Technology was formally imaggurated by His Excellency the Governor of Bombry on 15th November 1933. The authorities of the University of the Chivernot constituted are able to the Chivernot and the Chivernor of the University of of the Univ sit, as now constituted, are chick the Chin-cellor, Vice-Chincellor, the Syndicate, the Academic Council and the Senate The Senate consisting of fellows is the supreme governing hods of the University. The number of fellows is 144 of whom 40 are nominated by the Chan-cellor and 11 are ex-officio. The Academic Council consisting of educational experts deals with all purely academical questions. This body works in collaboration with the Syndicate which is the principal executive of the University.

Finance.

from time to time.

Under the Reform Scheme of 1919 Provincial fundace entered on a new phase Before the passing of this Act Provincial financewas incorporated in Imperial Finance The Provinces had certain heads of revenue of thoir own and other heads which they divided with the Govern ment of India By the new constitution comparatively clean cut was made between the finances of the Government of India and those Such revenues as they enjoy of the Provinces the Provinces enjoy in full, and in return the make cash contributions to the Government of India, fixed for a term of years. The general principle underlying this settlement is that those contributions shall gradually disappear. These contributions have now been remitted.

The Finance Member, introducing the budget estimates for 1934-35, in the Bombay Legislative Council spoke as follows —"Sir, Government have re-organised their finances on a basis of solvency But they realise as well as do members of this House that this is a budget of attenuation and that much has yet to be done to place their finances on a fully sound The continuance of economic depression throughout the presidency is a matter of most scrious concern to government and they are examining in concert with other governments in India what measures are necessary for the alleviation of the distress of the agricultural class This is a problem which is to-day engaging the attention of all governments in the world."

Twenty-nine spinning and weaving mills were at work during the year and they employed 41,083 operatives The number of jute mills at work was three At the close of the year 1983 the number of the other factories in the Presidency was 1,471 These consisted of oil mills, rope works, the works, etc Tanning is one of the principal industries of the Presidency and · there is considerable export trade in skins and hides The manufacturing activities which are under the direction of the Department of Industries are mainly confined to the production of soap There are a number of indigenous matter. factories run on cottage lines. It is expected that the levy of the excise duty on matches will drive off the market products of inferior quality and it is probable that only the very efficient units of the cottage industry will be able to continue the manufacture of matches once the full force of the excise duty is felt upon the industry. It is slowly becoming recognised that the Madras' Presidency is one of the most suitable parts of India for sugarcane cultivation and that the several deep-rooted varieties of cane which have been evolved at Coimbatore and require very little water are especially suited for the conditions which obtain in several areas of the Presidency where they grow better than in the north. The departments of Industries and Agriculture assist the development of the sugar industry by demonstration of the methods of manufacture of white sugar by centrifugals by getting trained sugar technologists, by the award of scholarships and by investigating schemes for starting sugar factories

The question of finding foreign markets for the products of Madras cottage industries was under the consideration of the Government for sometime and they have passed orders during the year sanctioning an annual subsidy of Rs 3,000 to the Victoria Technical Institute, Madras, for three years to enable them to appoint an agent in London for the sale of products of Madras cottage industries in European markets

## Education.

The Presidency's record in the sphere of education has been one of continuous progress There are at present about 51,000 public institutions, ranging from village primary schools to arts and professional colleges, their total strength being about 2,865,000 Special efforts are being made to provide education for boys belonging to the Depressed Classes The Council passed a resolution in the year 1929 at the instance of a nominated member that poor girls reading in any educational institution in the province—Government, local fund, Municipal or sided—should be exempted from School fees in any Standard up to III Form The total expenditure of the province on Education is in the neighbourhood of Rs. 539 lakhs. The principal educational institutions in the province are the Madras, Andhra and Annamalai Universities, the Presidency College, the Christian. Proposals have been formulated for the next College, the Law College, and the Queen College, the Law College, and the Queen Mary's College for Women, Madras; the St Joseph's College, Trichinopoly, the American Joseph's College, Trichinopoly, the American College, Madura; the Government College, ments are to be made on the new reclamation the neighbourhood of Rs. 539 lakhs. The

Rajahmundry; the Agricultural College, Colmbatore; the Medical Colleges at Madras and Vizagapatam and the Engineering College at Madras (Guindy).

# Cochin Harbour Scheme

The importance of this project lies in the fact that a good harbour at Cochin would lead to the development of a valuable hinterland and provide a ready outlet for agricultural and other produce from an area which is at present not adequately served by a convenient or well-equipped harbour The scheme involves cutting a passage through the bar which hitherto blocked the entrance from the sea to an extensive backwater and by dredging and are extensive backwater and by drenging and reclamation, forming a sheltered harbour accessible and giving full protection and facilities at all seasons of the year. An agreement has been reached between the Government of Madras and the Darbars of Travancore and Cochin States indicating how the work is to be averaged out and outling the fine paid agreement. carried out and outlining the financial arrange-ments necessary. A trial cut was made in 1923 and the effects of the monsoon thereon were The results recorded were examined observed by a Committee of Harbour Engineers in England who reported favourably on the prospects of the scheme.

The first cut through the bar 400 feet wide by 321 feet deep was completed on 30th March 1928 The channel through the outer bar is now 8 miles long by 450 feet wide and its average depth after the maintenance dredging in January 4, 1934, was 40 2 ft at low water in the section west of the crest of the bar and 37 4 ft at low water in the Section East of the Crest The dredging of the mooring area has been completed. Since March 1930 the Harbour has been in constant and regular use by all ships Details of the berthing accommodation inside the harbour at the end of 1933-34 were—

alreads by dredging from the harbour intended to connect this to the mainland by a rallnas bridge across the bull water Reclume. tion when completed, will provide enflutent spice for about 20 or 30 large vescle to load or unload at the same time. The execution of the further worl at the port has been held over pending actilement of certain que tion connected with the harbour administration. The Shoranus Emikulam line his been converted from inetre to broad-gauge and opened for traffic The line is to be extended to the whirtes at the reclamation. These developments will enhance the utility of the port to the planting; and igricultural areas in that part of the Presidency. To facilitate nasignation during the night, the channels have been lighted, and a hostel is under construction to provide their accommodation for passingers calling at the port

#### Local Self-Government.

administered under the following Acts .-

The Madras City Municipal Act, 1919, The Madris District Municipalities Act. 1920.

as amended by Madris Act X of 1950, and

The Madras Local Bourds Act. 1920, na amended by the Madras Act AI of 1930

The amending Acts of 1979 which came into force on the 26th August 1930, provide, interatia, for the abolition of the system of nominations to local bodies, for the inclusion of sillage panchivats within the scope of the Madras Local Boards Act with a view to making the village the unit of local cell-go-ernment, for direct elections to district boards, for the creation of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the eresation of office of the President or Chairman on a motion of non-confidence being passed against him by a prescribed majority. The Acts have undergone subsequent amendments Taluk Boards have been abolished with effect from the 1st April 1934

Local bodies are now enabled under the Madras Local Authorities Entertainments Tax Act, 1926, to levy a tax on entertainments given within their jurisdiction.

#### Irrigation

In March 1925, the Secretary of State sanctioned the Canvery Reservoir Project, the esti-mated cost of which amounted to about \$44 The project has been framed with two main objects in vicw The first is to improve the evisting fluctuating water supplies for the Cauvery Delta irrigation of over a million acres, the second is to extend irrigation to a new area of 301,000 acres, which will, it is estimated, add 150,000 tons of rice to the food store 93,500 milion cubic feet of water and was completed in 1934 provides for a large dam at Metur on the Cauvery to store 93,500 milion cubic feet of water and for a canal nearly 88 miles long with a con-

## Electric Schemes

The first stage of the 1'31 are Medico-Llectric project which was under construction by the Government of Madras has now been completed and is in operation from let April 1933. It consists in utilising a full of over 3,090 ft in the Pylara river as it desends the Allgiris Piateau for the generation of electrical energy. and its transmission for supply to the neighbouring districts, tie, the Might-, Colmhatore, Salem and Irichinopole. The Glen Morsan scheme started in 1925 with the object of supplying power to the main construction works of the Pykara project has now been merged with it. In its present completed form the project consists of the main power house at singura with an installed plant capacity of 33,000 B HP, and the transformer station, the receiving station at Coimbatore, 7 other sub-stations, 40 miles of 66 K V, line, 68 miles of 22 K.V. Tower line and 143 miles of 22 K V pole line. The booked cost upto 31st March 1024 supplying power to the in un construction works K V pole line The booked cost upto 31st March 1934 against an original estimate of R= 1,33,36,640 is R= 1,09,88,000 and the revised estimates for 1931-35 include an expenditure of Rs 5,22,000 The revenue anticinated decreases 1934-25 is about Re 8 55 lakks against an estimated revenue of Rs 4,70,000 The following places receive supply from the Pykara Project at present -

Thex and Nonsuch. Bhavani and Glendale in endowments came into force early in the Nilgins District and Kallayar, Akkamalais, Karimalai, Vellamalia, and Pachmalains in the Anamalaıs.

It is expected that supply to Trichinopoly, Tiruvarur, Negapatam, and Tanjore will be extended by the end of 1935

The Government of Madras have also a proposal under consideration to start a Hydro-Electric Scheme at Mettur about which they are awaiting sanction from the Secretary of State

### Co-operation

On account of the continued general economic depressions, overdues in Societies increased still further during the year 1933-34 There was a further contraction in the loan transactions of Central Banks The surplus in Central Banks The surplus in Central Banks which amounted to more than a crore of rupecs at the end of the year 1932-33 was reduced to 54 lakhs at the end of the year 1933-34, as a result of the measures adopted by the banks at the instance of Government The attention of the department was paid for the last few years more to the consolidation of existing societies than to the expansion of the movement Only 140 societies were registered during the year as against 107, 127 and 320 in the previous three years. The registration of 462 societies was cancelled during the year 1933-34 as against 691 in 1932-33. Under the scheme of subvention to Central Banks for carrying on rectification and consolidation work, the Provincial Bank paid Rs 17,130 to 22 Central Banks which in their turn spent Rs 131 728 on the work. In spite of the large sums of money spent on rectification work in the last few years by the Provincial and Central Banks, the progress in rectification is slow as complete rectification is aimed at and collection work has become very difficult. The Registrar has also suggested a plan of rectification according to which Central Banks are enabled to take stock of the position and set on foot schemes of rectification of societies to secure their investments According to the scheme steps have to be taken to recover loans on inadequate security in respect of which there is no chance of securing additional security South Indu Co-operative Insurance Society started in March 1932 continued to do satisfactory work during the year The Central Land Mortgage Bank which was started in 1929 for the purpose of financing primary land mortgage Banks by floating debentures has now been firmly established and was able to declare a profit of Rs 41,111 for the year The value of debentures issued by the Banks in circulation at the end of the year was Rs 34 56 lakhs and up to the end of the year loans to the extent of Rs 33 82 lakhs have been granted by it to primary banks The Government have guaranteed both the principal of and the interest on the debentures issued by the Bank satisfying certain conditions and debentures so guaranteed have become trustee securities according to a recent amendment of the Indian Trusts Act

# Social Legislation.

Hindu Religious which has for its object the better administration whole and governance of certain Hindu religious circulated to ellcit opinion. As in the mean im-

It provides for the appropriation of the surplus funds of the endowments to religious, educational and charitable purposes not inconsistent with the objects of the institutions to which they are attached. The Act has been workthey are attached The Act has been rused they are attached Doubts having been rused and to the validity of the Act it was re-enacted and passed into law as Act No II of 1927 The new Act came into force on 8th February 1927 Another piece of legislation—a non-official Bill—which has raised a heated controvers is the Malabar Tenancy Bill, which aims to confer, subject to certain conditions, occupancy rights on "kanom" tenants and actual cultivators of As there was a sharp difference of the soil opinion on the very principles of the Bill, the Governor withheld his assent and a committee was appointed to go into the matter thoroughly and its findings were submitted and the same were published with a view to receive objections and suggestions "The recommendations of the Committee were placed before a Round Table Conference consisting of the representatives of the Jenmies, Tenants and of the Government. The objections and suggestions made by the representatives at the Conference were carefully considered by the Government and the Government re-drafted the Bill and introduced it in the Council on 6th August 1929. The Bill was passed by the Council on 15th October 1929. His Excellence the Governor was of opinion that changes were expedient in respect of certain clauses of the Bill passed by the Council and accordingly returned parts of the Bill to the Legislative Council, under Section 81-A (1) of the Government of India Act, for reconsideration." The Bill was finally passed by the Legislative Council on the 1st March 1930, and received the assent of His Excellency the Governor on the 25th alarch 1930 The assent of His Excellency the Governor-General was given on the 18th Governor-General was given on the November 1930 and the Act came into force on the 1st December 1930 amongst other efforts at le Noten orthy legislation social reform was the non-official resolution passed by the Council recommending to Government to undertake legislation or to recommend the Government of India to do so to put a stop to the practice of dedicating young women and girls to Hindu temples which has generally resulted in exposing them to immoral purposes under the pretext of caste Mrs Muthulalshmi Reddl, Ex-Deputy President of the Legislative Council, introduced a bill in the Legislative Council on 5th September 1928 so as to enfranchise or free the lands held by mam-holding Devadasis on condition of service in Hindu temples from such condition The bill was passed into law on 1st l'ebruare 1929 The Act received the assent of the Governor on 12th April 1929 and of the Gover nor-General on 13th May 1920 Rules have been framed to give effect to the provisions of the Act and the enfranchisement of Devadus inams is now in progress. On 24tl January 1930 Mrs. Muthulakshmi Reddi introduced another bill in the Legislative Council with the object of putting an end to the dedication of young women and girls not only among in-m-Endowments Act holding Devadasis but among Devadasis as etter administration whole. The bill was discussed in the Council and

Mrs Muthulakshmı Reddi resigned her member- j ship in the Council, the bill was not proceeded with Subsequently, the Council also dissolved with Subsequently, the Council also dissolved and the bill lapsed A bill for the suppression of brothels and of traffic in women and girls was introduced in the Council by Mr. K. R. Venkatarama Ayyar on 5th September 1928 and was passed into law on 31st January 1930. The Act received the assent of the Governor on 24th February 1930 and of the Governor-General on 28th March 1930. It could not however be brought into force immediately owing to certain practical difficulties To obviate these difficulties, an amending Act was passed by the Legislative Council on 30th October 1931 and received the assent of the Governor on 3rd December 1931 and of the Governor-General on 26th December 1931. The amending act enables the Local Government to bring the Act into force in selected areas and to extend it gradually to other areas as circumstances permit and also to bring into force such of its provisions as may the practicable in any particular area All the provisions of the Act are now in force in the provisions as a provision as a provision as a provision as an appear to the Act are now in force in the provisions brought into force immediately owing to certain The Act except sections 6, 7, 8 and 16, is also in force in the following Municipalities and their environs within a distance of five miles from their limits — Truchinopoly, Srirangam, Madura, Parallementary

Board Temperance Publicity Committee and the District Propaganda Committees had to be discontinued from August 1931 The Provisions of the Mussalman Wakf, Act, 1923 (India Act XLII of 1923) were brought into force in this Presidency on 1st January 1932. This Act makes provision for the better management of Mussalman Wakf properties and for ensuring the maintenance and publication of proper accounts in respect of such properties.

#### Law and Order.

by 26 District Judges, and 41 Subordinate Judges and 145 District Munsiffs. In the Presidency Town there are a City Civil Court consisting of one Judge and Small Causes Court consisting of a Chief Judge and two other Judges Madras is a litigatus province and the meaning show one suff for exercise. Brzwada, Calicut, Cocanada, Rajahmundry, Ianjore, Vizagapatam Colmbatore, Erode, Sakun and Kumbakonam It was also resolved Injure, Virgipatam Colmbitore, Erode, other Judges Madras is a litigious province with and Kumbi konam. It was also resolved and the records show one suit for every 74 to 14 to comment to fix as their goal total persons. The Police department is under an probabilition of drink in the presidency within 20 year. In pursuance of this resolution and of the recommendations of the Exise Advisory charge of ranges of the Presidency, one in charge of the recommendations of the Exise Advisory charge of ranges of the Presidency, one in charge of the Railway Police and the Criminal Investigation described a scheme of propaganda against the use of alcoholic liquors and intoxicating drinks. But owing to financial stringency, the vork curried on by the Central Propaganda police force is about 28,220

#### Industries

in the state of the centre of the control of 19.1 in porter amounting to 20.30 tons along the control of the co

The Pre-idence of Bengal, as constituted on and tobacco is grown for local consumptions needs April 1912, compares the Burdwan and inearly every district of Bengal. The area under tea in 1031 was 207,600 acres. There were 393 plantations employing a daily average of 184,539 permanent and 7,410 temporary hands

Manufacture and Trade-Agriculture is the principal industry of Bengal in addition to this there are the jute mill industry, the tea industry (confined to the districts of Jalpalguri including the Dooars and Dary eling), the coal mining industry and the sugar industry. The jute mills in and around Calcutta and in the triparian tracts of the districts of Howrah and Hooghly constitute the principal manufacturing industry of the Presidency

There was some improvement in the fute trade of Bengal (which began to decline since the year 1928-29) due to a rise in the price of ran jute, as a result of the policy of voluntary restriction of jute crop, undertaken by the Government of Bengal

General.—The world-wide economic depres-tion coupled with the in-tability of certain foreign explange continued to affect the normal course of the trade of this province during the 3 ar 1933-34, and the total value of private merchandise was the lowest for the last thirty years. Exports were hampered by the low prices offered for raw material and agricultural produce, and by tariff barriers which have been raised in many countries

The aggregate value of the total trade of the province (excluding treasure) with foreign countries and other Indian ports declined for R-1,22 00 erores in 1932-33 to Rs 1,20,40 crores during year 1933-34 This decline is due mainly to the fall under imports, which needed from Rs 37 83 erores in 1932-33 to its 33 28 erores in 1933-34 Foreign exports showed come improvement, viz. from Rs 56.43 crores in 1932-35 to Rs 64 10 cross -howed some improvement, viz, from R-, 56,43 crops in 1932-33 to Its 64,12 crores in 1937-34 In the coasting trade there was a general falling off; the imports decline from R- 18 90 crores to R- 14 15 crores, and exports from Re 11 82 crores to Re 8 83 crores

Imports—The imports of liquous of all decription declined from 1,509,718 gallons valued at Rs 63.72 lakes to 1,169,252 gallons valued at Rs 69.42 lakes The import trade in sugar has been practically killed by the growth by the Indian industries due to high potective duties, the total quantity intented amounting to 20,020 tens valued imported amounting to 20,000 tons valued at Re. 20 71 lath- a- against 118,150 tons valued at Re 1 22 lath- The total quantity

There was a further fall in the import of from 530 687 cwts, valued at Rs 1,42 06 lakhs the total quantity of Mineral oils, from to 508 283 cwts valued at Rs 1,41 60 lakhs. 104,693,789 gallons valued at Rs 5,62 05 In this trade United Kingdom has mainlakhs in 1932-33 to 89,478,036 gallons valued tained a leading position as supplier of at Rs 3,86 48 lakhs in 1933-34 Java and aluminium, artification metal and brars Roumania have come in a large suppliers of kerosene oil, largely at the expense of Russia imported from USA and from Portuguese and United States, while the importation from East Africa. Burms has decreased apparently due to increased production of kerosene on the mainland of India Petrol from Burma has increased from 4,470,958 gallons valued at Rs 43 80 lakhs to 5,711,724 valued at Rs 32 24 lakhs It is also noteworthy that while the quantity has increased the value has decreased has increased, the value has decreased, ports of petrol from foreign sources was negligable

For the first time since 1929-30, the motor vehicles trade showed an improvement, the total number of motor vehicles increasing from 2,007 valued at Rs 37 35 lakins in 1932-38 to 2,989 valued at Rs 51 09 in 1933-84 Of the 2,354 motor cars imported, the United Kingdom supplied 1,560 Canada, 452 and United States 263 Motor Cycles and scooters showed a decrease from 202 in 1932-33 to 195 in 1933-34 while there was a remarkable increase in the import of motor omnibuses, vans and lorries from 187 in 1932-33 to 440 in 1933-34 Tyres and tubes increased in quantity from 100,531 to 109,590, but decreased in value from Rs 23 88 lakes in 1932-33 to Rs 21 51 lakhs in 1983-84

During the year under report, imports of drugs, medicines and chemicals continued to show some improvement from Rs 1,67,13 lakhs in 1932-33 to Rs. 1,76 87 lakhs in 1933-34. The total value of glassware and earthenware

There was a substantial increase in the import of machinery and millwork to the extent of Rs 4,96 69 lakhs as against Rs 3,81 02 lakhs in 1932-33 Of this imports from the United Kingdom, Germany and other countries contributed largely to the increase in import figure, while those from United States and Belgium marked a decline Owing to the continued development of the indigenous sugar industry, sugar machinery to the indugenous sugar industry, sugar machinery to the value of Rs 2,13 95 lakhs were imported as against Rs 1,31 53 lakhs in 1932-33 Paper mill machinery, cotton machinery and boilers made notable increases, while jute and tea machineries showed some decline

The total quantity of imports of iron and steel increased from 102,291 tons valued at Rs 1,61 95 lakhs in 1932-33 to 105 908 tons valued at Rs -1,79 75 lakhs in 1933-34 with the exception of a few items there was a general increase in the value of articles of iron and steel The United Kingdom continues to have the largest shares of the you and steel trade, which largest shares of the iron and steel trade, which

Imports of paper showed an increase from 601,943 cwts valued at Rs 68 36 to 613,782 cwts valued at Rs 70 38 lakhs The quantity and value of pasteboard, milboard, etc., decreased from 129,975 cwts. valued at Rs 12 48 crores to 118,420 crores valued at Rs 11 01 lakhs The imports of wood pulp show a considerable increase over 1932-33 viz., from 283,181 cwts valued at Rs 19,75 lakhs to 365,693, cwts valued at Rs 24 05 lakhs

The total value of cotton precegoods imported The total value of cotton piecegoods imported showed a decline from Rs 5,44 68 lakhs to Rs 3,19 22 lakhs in 1938-34, and the quantity from 351,191,868 lbs to 204,004,098 lbs in 1933-34 The quantity and value of cotton twist and yarn also showed a decrease from 16,018,061 lbs at Rs 1,10 63 lakhs to 15,351,012 lbs at Rs 1,04 49 lakhs during the period under review The total value of all classes of cotton goods showed a great decline from of cotton goods showed a great decline from Rs 7,12 56 lakbs in 1932-33 to Rs, 4,86 17 lakhs in 1933 84 The only item that regis-tered an increase is other cotton fabrics from Rs 57 24 lakhs to Rs 62 46 lakhs, while piecegoods and cotton manufactures fell lakhs in 1932-33 to Bs. 1,76 87 lakhs in 1933-34. heavily from Rs 5,44 68 lakhs and Rs 6,01.02

The total value of glassware and earthenware lakhs to Rs 3,19 22 lakhs and Rs 3,81 68 imports registered a decrease from Rs 47 27 lakhs respectively China an Japan were lakhs in last year to Rs 44 45 in the current the chief suppliers of cotton twist and yarn, period Japan was the chief supplier of every variety of cotton piecegoods except grey-bordered and white dhuties which came chiefly from the United Kingdom

> During year under report silk and artificial silk of the total value of Rs 26 53 lakhs were imported as against Rs 50 05 lakhs in 1932-33 There was a general decrease in all kinds of suk. In all these varieties Japan was the principal supplier. Italy came next in the supply of artificial silk, and United Kingdom figured third. The respective figures for silk, mixed-silk, and artificial silk piecegoods are Rs. 3.56, Rs. 4.13 and Rs. 26.53 lakks

The total value of woollen goods imported during the year under report remained practi-cally the same etc., Rs 46 33 lakes as against Rs 46.75 lakhs in 1932-33. Italy's share of import, however, diminished, while that of United Kingdom increased. The figures for largest shares of the iron and steel trade, which was responsible for increasing the value of the United Kingdom increased. The figures for was responsible for increasing the value of the United Kingdom trades by about 16 per cent United Kingdom trades by about 16 per cent United Kingdom trades by about 16 per cent United Kingdom increased. The figures for per cent United Kingdom increased The figures for per cent United Kingdom increased. The figures for per cent United Kingdom increased. The figures for called at Rs. 2,300 lbs. valued at Rs. 2,092,527. United Kingdom increased. The figures for called at Rs. 2,000 lbs. valued at Rs. 3 95 lakhs, hostery 106 667. The figures for valued at Rs. 2,000 lbs. valued at Rs. 2,000 lbs. valued at Rs. 3 95 lakhs, carpets, rugs and blankets 2,092,527. United Kingdom increased. The figures for valued at Rs. 2,000 lakhs, hostery 106 667. United Kingdom increased. The figures for valued at Rs. 3 95 lakhs, valued at Rs. 3 95 lakhs, piecegoods valued at Rs. 2,120 lakhs, shawls valued at Rs. 2,120 lakhs, shawls valued at Rs. 2,120 lakhs, shawls valued at Rs. 2,120 lakhs, piecegoods are 56,896 tons valued at Rs. 2,120 lakhs, piecegoods valued at Rs. Of the articles of minor importance, the articles to show improvement in imports, were like from Rs 56 lakhs to Rs 11 23 lakhs in consequence of a recovery of trade from the Struts Settlements, living animals from Australia increased by Rs 11 37 lakhs, Railway carriages increased by Rs 9 92 lakhs, toys and requisites for games by Rs 4 56 lakhs, Manures by Rs 5 53 lakhs rubber by Rs 4 07 lakhs, tea chests, by Rs 4 99 lakhs, and instruments, etc. by Rs 2 58 lakhs. The trade in umbrella and umbrella fittings remained almost steady Japan increasing her chare at the expense of Germany, on the other hand there were heavy falls in imports of jewellery by Rs 28 lakhs, grain, pulse and flour by Rs 17 61 lakhs, for which wheat from Australia, was mainly responsible and non-mineral oils by Rs 16 39 lakhs, due to lesser imports of coconut oil from Ceylong Precious stones decreased by Rs 688 lakhs, hardware by Rs 4 48 lakhs and the value of unspecified articles imported by post fell from Rs 65 63 lakhs to Rs 60 86 lakhs

Exports —The Foreign Export Trade of Bingal marked a tangible increase from Rs 56 43 crores to Rs 64 12 crores in 1933-34, which is due to a general revival in world trade during the period under review

There was a sharp decline in the total export of grain, pulse and flour the total quantity and value failing from 150,322 tons and Rs 162 27 likhs in 1032-33 to 131 800 tons and Rs 1,17 77 likhs in 1037-34. The average shipment price per ton of husked rice, wheat and wheat flour iell from Rs 108-9, Rs 126-5 and Rs 139-1 to Rs -5-2, Rs 106-1 and Rs 98-4 respectively Mauritius, as usual, purchased the biggest quantity of rice, South Africa, Arabia, Notherlands and Ceylon coming off next successively

The total quantity of Ter exported to foreign countries decreased from 328,824,700 lbs in 1932-33 to 270-822-026 lbs but the value increased from Rs 12,53 26 lakhs to Rs 15.53 84 lakhs The restriction scheme is responsible for an improvement in the prices of tea, and reduced supments to most countries were the concomitant of the restriction scheme United Kingdom was the largest consumer of Indian Tea, while Canada, United States and Africa came next in order Tea Cess was raised from 6 annus to 8 annus per 100 lbs from 16th september 1933. The value of tea machiners imported, amounted to Rs 5,96,317 which was even 16s than half the value in 1932-33.

Inere was a decline in the export of coal to foreign countries, tw., from 451,564 tons valued at Rs 43 68 lakhs to 372,598 tons valued at Rs 37 10 lakhs, in 1933-34 This chieff due to the depression prevailing in the Bengal Coal Irade

The total quantity of lac exported during 1053-34 is 727,247 cuts valued at Rs 2,45 40 1415 is against 415,555 cwts valued at Rs 1,23 =1 14 hs in 1052-33

There was an appreciable increase in the hides and skins trade of Bengal, the corresponding fourses for 1932-33 and 1933-34 being 15417 tens valued at Rs 1,96 95 lakhs and 20,174 tons valued at Rs 2,92 47 lakhs.

The total value of metals and ores exported showed a slight fall from Rs 1,59 04 lakhs in 1932-33 to Rs 1,58 60 in 1933-34, but the total quantity exported registered a considerable increase from 483,094 tons to 644,254 tons In Manganese ore trade, although a slight decline from 137,224 tons to 134,643 is recorded, the reduction in prices marked a good reduction from Rs 37 29 lakhs to Rs. 24 80 lakhs The United Kingdom and Japan have increased their takings while shipments to France and Belgium, usually two of the principal purchasers of this ore, fell considerably There was a considerable increase in the export of pig 1701, Japan alone taking 183,832 tons as against 71,371 tons in 1932-33, but there was no proportionate increase in value

The export trade in mica also showed a good increase from 34,354 cwts valued at Rs 26 08 lakhs to 55,697 cwts valued at Rs 35 59 lakhs While United Kingdom her share in the trade, demand from the United States of America greatly increased from 7,881 cwts in 1932-33 to 26,529 cwts in 1933-34, but prices, however, failed to keep pace with the increase in the volume of trade United States and United Kingdom contributed to more than three-fourths of the volume of the export trade.

The total value of oil-seeds, vegetable oils and oil-cakes exported during the year was Rs 2,39 36 lakhs as against Rs 1,07 80 lakhs in 1932-83. There has been a striking increase in the export trade in linseed to the United Kingdom, viz., 124,811 tons valued at Rs 1,36 96 lakhs in 1933-34 as against 13,950 tons valued at Rs 15 80 lakhs in the preceding year. This must be due largely to the Imperial Preference granted by the United Kingdom as a result of the Ottawa Agreement. Castor Seed, Tea seeds and other seeds marked a decrease while vegetable oils increased from 383,832 gallons to 463,928 tons

Shipments of raw cotton showed a good increase from 3,749 tons valued at Rs 21 83 lakhs to 8,548 tons valued at Rs 40 68 lakhs during the period. United States and Japan contributed chiefly to this increase the respective quantities and values being 3,011 tons and Rs 15 10 lakhs and 3,038 tons and Rs 14 62 lakhs as against 849 tons and Rs 5 27 lakhs and 407 tons and Rs 1 95 lakhs in 1932-33.

The exports of hemp increased from 201,650 cwts valued at Rs 22 69 lakhs to 297,638 cwts valued at Rs 24 07 lakhs during the period under review

The total shipments of jute during 1933-34 was 1,372,087 tons valued at Rs 31,49 86 lakhs as against 1,220,084 tons valued at Rs 31,00,11 in 1932-33 This increase in trude is attributable to a general increase in demand and to a considerable extent the efforts made by the Government of Bengal in the direction of restriction of acreage under jute crop Excepting gunny-bags which fell from 397,504 tons to 380,618 all other items under jute and jute manufactures registered an increase in quantity, while the prices realised for jute manufactures was less than last year. The total quantity of raw jute exported during year increased from 542,462 tons valued at

at Rs. 9.34.70 lakhs to 701.842 tons valued at [ Rs 10,16 58 Germany taking the largest quantity and United Kingdom, France and Italy coming off next.

The total export of myrobalam, myrobalam extracts and other sorts also showed an increase, viz, 541,466 cwts as against 499,190 cwts in 1932-33, but the value fell from Rs 29 57 lakhs to Rs 24 64 lakhs in 1933-34 This rise in quantity is due mainly to greater off take from United Kingdom, France, Germany and USA

Of the other items, opium has recorded a large increase from Rs 11 24 lakhs to Rs 72 64 lakhs which was principally due to shipments to Siam, while exports of parrin wax fell by Rs 25 64 lakhs owing to diminished demand from Portuguese East Africa Shipments of raw wool and woollen manufactures, Indian leather, exports of manures, saltpetre and apparel increased while spices, provisions and oilman's stores decreased

of Chittagong -- Chittagong is the only other foreign trade port of Bengal The total value of the import into this port from foreign countries amounted to Rs 70 12 lakhs in 1938-34 as against Rs 72 46 lakhs in the last year This decline is due to a general fall in imports excepting Building and Engineering materials and a few other items

Coasting Trade of Bengal —The trade of Calcutts with other Indian ports, British and non-British, declined in value from Rs 30 72 The respective import and export trade figures are Rs 14 03 crores and Rs 8 83 crores in 1933-34 as against Rs 18 78 crores and Rs 11 82 crores in 1932-33.

#### Administration.

The present form of administration in Bengal, dates from January 1921 In 1912 the Government of the Province underwent an important change, when, in accordance with the Proclama-tion of His Majesty the King-Emperor at Delhi, the Province was raised from the status of a Lieutenant-Governor to that of a Governor-in-Council, thus bringing it into line with the Presidencies of Madras and Bombay. In 1921, under the Reform Scheme, the Local Government was reconstituted, certain of the departments was reconstructed, certain of the departments being placed under the control of Minusters appointed from among elected members of the Legislative Council. There are normally four members of the Executive Council who are in charge of the "reserved subjects", and three Ministers, who are in charge of the "transferred subjects."

Bengal is administered by five Commissioners, the divisions being those of the Presidency, Burdwan, Rajshalu, Dacca and Chittagong The unit of administration is the District Magistrate and Collector As Collector he supervises the ingathering of the revenue and is the head of all the Departments connected with it, while as District Magistrate he is responsible for the administration of criminal justice in the district The immediate superior of the District Magistrate is the Divisional Commissioner Commis chairman of the old Act, a Deputy Mayor, and sioners are the channels of communication Executive Officer, and Deputy Executive officer.

between the local officers and the Government In certain revenue matters they are, in their turn, subject to the Board of Revenue in Cal-cutta; in other matters they are under the direct control of Government

#### Justice.

The administration of justice is entrusted to the High Court of Calcutta which consists of the Chief Justice who is a Barrister and 15 Puisne Judges including one additional judge who are Barristers, Civilians or Vakils Below the High Court are the District and Additional Judges, the Small Causes Court and Subordinate Judges and Munsifs Of these officers, the District and Additional Judges and a certain number of Subordinate Judges are also endowed with the powers of a Criminal Court while the remainder have jurisdiction in Civil matters only Criminal Justice is administered by the High Court, the Courts of Session and the Courts of the various classes of Magistrates On its appellate side, the High Court disposes of appeals from the order of a Court of Session, and it also confirms, modifies or annuls sentences of death passed by Sessions Courts Calcutta has six Stipendiary Presidency Magistrates, including one temporary Additional Magistrate in charge of the Traffic Court One of the Presidency Magistrates is in charge of the Children's Court, is helped by Hony. Women Magistrates It has also two Municipal Magistrates and it possesses a Court of Small Causes with Judges who dispose of cases of the class that are usually heard in County Courts in England In addition a number of Union Benches and

Courts have been established in selected rural areas for the disposal by honorary agency of petty criminal cases and civil disputes

#### Local Self-Government.

By Bengal Act III of 1884, and its subsequent amendments, which hitherto regulated municipal bodies in the interior, the powers of Commissioner of municipalities were increased and the elective franchise was extended Bengal Act III of 1884 was repealed by Act XV of 1932 by which material changes have been introduced, eg, the franchise of the electors have been further widened, women have been enfranchised, the proportion of elected commissioners has been increased and the term of office of the Commissioner has been extended from three to four veers Municipal expenditure now comprises a large number of objects, including veterinary institutions, employment of health officer, vaccinators and sanitary inspectors, the training and employment of female medical practitioners, the provision of model dwelling houses for the working classes, the holding of industrial, sanita-ry and health exhibitions and the improvement of breed of cattle The Commissioners also have large powers in regard to the water supply and the regulation of buildings.

The Municipal Government of Calcutta is governed by Act III of 1923 This Act, which replaces Act III of 1899, makes the Corporation paramount in matters relating to municipal administration. The Act provides for the appointment of a Mayor, who replaces the chairman of the old Act, a Deputy Mayor, and

the appoint. all elegted by the Corporation. mont of the Chief Executive Officer is subject to the approval of Government. The total number of councillors, after the encement of Police, the District Police the Palis as Police, the Calcutta Municipal (Second Amendment, 1ct, 1032, is 01 with 5 Aldermen elected by the Councilloss Of the fil scats, is a reacted, of which 21 are reserved for Muhammadana, of which 21 are reserved for Muhammadana, mainter of the Imperial Police state, Under Ten of the councillors are nominated by Govern montand the rest closed by the general or special constituencies. In order to improve the insant range, the Parishahi range, the Pre Series of Constituencies. In order to improve the insant range, the Burta an range and the Bakargan is constituencies. tary and congested areas of the city, the Calcutta Improvement Trust has been created with extensive powers. In the motusti, district and local boards excicise considerable powers, with regard to public works, education and medical reliof.

Dongal Act V of 1919 introduces the new system of self-government by the creation of Allines The cutre compeles to istant Superintendents. authorities vested with the powers and duties Deputs necessary for the management of village affairs. In spectors, Serge ints, 1 at Sub-Inspectors, and ontrusted with powers of self treation hard constable and constable. There is also and entrusted with powers of self-treation hard constable and constable. There is also The new village authority, called the union a Village Police, composed of daffairs and board, replaces gradually the old chaukidari) thoughdary, who receives a tentile entry which panehayais and the union committees and deals is collected from the villages or union by the with the village police, village roads, water Pauchasat or I nion Board. There is a tribula, supply, sautation, primary schools and dispense college, and which at Santas in the different The Act also empowers Government to create out of the members of the union bounds, sillage benches and courts for the trial or petty criminal and civil cases arising within the union The Act has been extended to all districts in the Piesidoney oxcopt Midnapore and up to March 1933 over 4,701 Union Boards were actually constituted.

### Public Works.

The Public Works Department consists of annual cost of the Police is Public Works and Railway Departments and is lakks under the charge of Secretary to Government to the Department of Agriculture and Industries.

# The United Provinces.

The United Provinces of Agra and Oudh lie | physical types are Dravidian, in practically the centre of Upper India. are bounded on the north by Tibet, on the north-east by Nepal, on the east and southeast by Bihar, on the south by two of the Chota Nagpur States of the Central India Agency and the Saugor district of the Central Provinces, and on the west by the States of Gwalior, Dholpur, Bharatpur, Sirmoor, and Jubbal, and by the Punjab. Their total area amounts to 106,248 square miles, to which may be added the area of the three Indian States of Rampur, Tehri-Garhwal and Benares with an area of 5,943 square miles, giving a total of 112,191 square miles. The total population is 49,614,833

The Provinces, originally termed the North-Western Provinces and so amalgamated in 1877, receiving their present designation in 1902, include four distinct tracts of country portions of the Himalsyas, including the Kumaon division which consists of three hill districts, two of which are entirely in the hills and one is half in the submontane belt, the sub-Hima-layan tract; the great Gangetic plain, and portions of the hill systems of Central India including Bundelkhand. The Gangetic plain is protected by an extensive Canal system, which though somewhat liable to run short of water in extremely dry years, is of great benefit in all ordinary years and years of lumited drought The first two of these tracts are infertile and support a very sparse population and the Central Indian plateau is almost equalis infertile, though better populated. The soil of the Gangetic plain, however, possesses an extreme fertility and here the density of population varies from 542 persons per square mile in the west to 555 in the centre and 753 in the in the west to 555 in the centre and 753 in the east, which gives the Provinces as a whole a greater population pressure on the soil than any other Province in India save Delhi and Bengal In the south there are low rocky hills, broken spurs of the Vindhyan mountains, covered with stunted trees and jungle, and in the north the lower slopes of the Himalayas, clothed with dense forest, affording excellent big and small game shooting, and rising beyond in a tangled mass of ridges, ever higher and higher, until is reached the line of the eternal snows, but the greater part of the provinces snows, but the greater part of the provinces consists of level plain, teeming with highly-cultivated fields and watered by three rivers the Ganges, Jumna, and Gogra.

## The People

The population is mainly Hundu, 84 4 per cent ranking as such whilst Mahomedans number 15 to the United Provinces. The three main of the total area in Oudh,

Mongoloid, the latter being confined to the Himalayan and sub-Himalayan districts and the former to South Mirzapur and Bundelkhand, whilst the high-caste Aryans frequent the Western districts of the Provinces. Most of the people, however, show a mixed Arya-Dravidian origin. Two languages are spoken by the majority of people in the plains, Urdu, and Hindi. Urdu being more common in the urban areas and because of its close relationship with Persian and Arabic on the one hand and Hindi on the other, forming the lingua franca of the Province.

#### Industries

The chief industry is agriculture. 15 the principal source of livelihood of 71 1 per cent of the population and a subsidiary source of income to a further 8 2 per cent The soils of the Provinces fall into three groups the valley soils of the Himalayas, the main alluvium and the Central Indian alluvium, the chief characteristic soil or the Central Indian alluvium is the black soil, with a lighter variant, though here also there are light beausered. though here also there are light loams and gravel The Himalayan soils are of local origin and vary with the nature of the rock from which they have with the nature of the rock from which they have been formed, whilst the main alluvium soils are sand, clay and loam, the loam being naturally the most productive. The soil generally yields excellent crop of rice, millet, maize, linseed, cotton, wheat, sugarcane, pulses, and barley, rice being grown mostly in low-lying, heavy clays. The greater part of the Provinces is highly cultivated, the rainfall varies from 50 to 60 inches in the Hills, to 40 inches in the Benares and Gorakhpur Divisions. Whilst, the Agra res and Gorakhpur Divisions, whilst the Agra Division receives only about 25 to 30 inches Drought seriously affected Bundelannually annially Drought seniously succeed Duntar-khand and the Agra Divisions in the past, improved dramage, and irrigation facilities have effected considerable improvements In the latter area, however, shortage of water in the canals and the general lowering of the water table still continue to react against full agricultural returns Steps are being taken to increase the amount of water passing down the canals Commodity prices showed a definite decline throughout the year 1934 Though in some cases the prices in January of 1934 ruled higher than those of 1938, by December all commodity prices were at a lower level than at the corresponding data of the previous year. To generally ponding date of the previous year. In general the harvested crop of 1934 was poorer than that of 1933 It cannot be said that those solely of 1933 dependent on agricultural produce are in any per cent, the total of all other religions was better off than in the previous year Land being 0 6 per cent composed of Christians (Europeans and Indians), Jains, Sikhs, Parsis, Buddhists and Jews Included among the Hindus are the Arja Samajists, followers of cipal landowners in Oudh are the Taluqdars, the Arya Samaj sect, which obtains widely in the Punjab and has extended its influence in the United Provinces. The three ment of the total area in Oudh.

### Manufactures

The provinces are not rich in minerals Iron and copper are found in the Himalayan districts, and there were mines of importance there formerly, but owing to high cost of production and maccessibility, most of them have been closed Gold is found in minute quantities by washing the sands in some of the rivers in Limestone is found in the Himalayas the hills and in the Etawah district, and stone is largely quarried in the Mirzspur district Cotton is ginned and spun throughout the Western districts of the provinces as a home industry, and weaving by means of handlooms, is carried on in most districts. Cawnpore is the charter constitution and measures. the chief centre for cotton spinning and weaving mills According to the census of 1931, 45,128 persons were employed on cotton ginning, cleaning and pressing and 408,033 on spinning and weaving Silk weaving used to be confined to Benares (where the famous 'Kımkhab' brocade is made) but considerable work is now done at Shahjahanpur and Mau and some at done at Shahjahanpur and Mau and some at Agra as well Embroidery work is done at Lucknow, where the noted 'Chikan' work of cotton on muslins is produced, and in Benares, where gold and silver work on silk, velvet, crepe and sarsenet obtains Benares uses local gold thread for embroidery work and 'Kamkhab' weaving The glass industry is important at Firozabad, Bahjoi, Balawah and Naini (Allahabad) Moradabad is noted for its lacquered brass-work, Benares for brassware-engraving and repousse. Farrukhabad for its calico prints and Agra for its carpets and marble and alabaster articles, glazed pottery is made at alsbaster articles, glazed pottery is made at Chunar and Khurja and clay figures of men and fruits at Lucknow.

The making of brass utensils at Mirzspur, Farrukhabad and Oel (District Kheri) the carving and inlay work of Nagina and Sahacarying and injuy work of Nagina and Saintrappur, the art silk industry of Mau, the lock and brass fittings industry of Aligarh, the copper utensil industry of Almora, the durnes of Agra and Bareilly, the pottery of Nizamabad (District Azamgarh) and the ivory work of Lucknow also deserve mention

Cawnpore is the chief industrial centre has tanneries, soap factories, oil mills, cotton, woollen and other mills. The woollen mill is wooden and other mills The wooden fall is the largest in India Lucknow possesses an important paper-mill There are cotton ginning and pressing factories at Aligarh, Meerut and Bareilly and cotton mills at Agra, Hathras, Lucknow, Benares and Moradabad Many sugar mills have been recently started, mainly in the Gorakhpur and Robilkhand divisions Excellent furniture is made at Bareilly mostly on cottage lines. on cottage lines

The largest trade centres are Cawnpore, Allahabad, Mirzapur, Benares, Lucknow, Meerut, Aligarh, Hathras, Muttra, Agra, Farrukhabad, Moradabad, Chandausi, Bareilly, Saharanpur, Muzaffarnagar, Ghaziabad, Khurja, Gorakhpur, Ghazipur, Pilibhit and Shahjahanpur

raised to the status of a Governor-in-Council the Governor being assisted by two members of the Executive Council in charge of the Reserved Subjects and two Ministers from Jan. 12, 1926, in charge of the Transferred Subjects The medium for the transaction of public business is the Secretariat, the Staff of which consists of ? Secretaries (including Chief Secretary) and 6 Deputy Secretaries including the Director of Public Instruction and the Deputy Legal Remembrancer who are ex-Officio Deputy Secretaries in the Education and Judicial Departments respectively The Chief Secretary is nn charge of Appointment, General Administration, Evecutive, Political, Newspaper and Police Departments, the Finance Secretary deals mainly with the Finance Department, the Revenue Secretary is in charge of the Revenue Scarcity, Ecclesiastical and Forest Departments and also the Buildings and Roads branch of the Public Works Department, the Education Secretary looks to the Education, Industries, Secretary looks to the Education, Industries, Agriculture and Excise Departments; the L S G Secretary to the local Self-Government, Municipal, Medical and Public Health Departments and the Judicial Secretary is in charge of the Judicial and Legislative Departments. The seventh Secretary belongs to the Public Works Department (Irrigation Branch) and is also Chief Engineer for the Irrigation Branch of the PWD Government spends the cold weather, October to April, in Lucknow and Allahabad, mostly in Lucknow, though the Secretariat remains throughout the year at Lucknow The Governor and the Secretaries spend the hot weather in Nami Tal, but during the monsoon the Governor tours the plains, the monsoon the Governor tours the plains, as he does also in the cold weather. The Board of Revenue is the highest court of appeal in revenue and rent cases, being the chief revenue authority in the province There are revenue authority in the province. There are forty-eight British districts, thirty-six in Agra and twelve in Oudh, average area 2,200 square miles and average population a million. Each district is in charge of a District Officer, termed a Collector and Magistrate in Agra and a Deputy Commissioner in Oudh and Kumaon. The districts are grouped together in divisions Each division is under a Commissioner, except the Kumanu division, the charge of which is held by the Deputy Commissioner, Nami Tal, in addition to his duties There are ten divisions, having an average area of nearly 10,600 square miles and an average population of nearly 5 millions. The districts are sub-divided into taheils, with an average area of 500 square miles and an average population of 236,000 Each Inhail is in charge of a Tahaildar, who is responsible for the collection of revenue, and also exercises judicial powers Tahsus are divided into parganas which are units of importance in the settlement of land revenue. Sub-The largest trade centres are Cawnpore, Allahabad, Mirzapur, Benares, Lucknow, Meerut, Aligarh, Hathras, Muttra, Agra, Farrukhabad, Moradabad, Chandausi, Bareilly, Saharanpur, Muzaffarnagar, Ghaziabad, Khurja, Gorakhpur, Ghazipur, Pilibhit and Shahjahanpur

Administration.

The Province was until the close of 1920 administered by a Lieutenant-Governor, chosen from the ranks of the Indian Civil Service from the Reform scheme the Province was made of the Province was under the Reform scheme the Province was indies, who may be covenanted civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians (Joint Indian Civilians Indian Civilians (Joint Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilians Indian Civilian Indian Ci

approximately 2 square miles, with a discharge of 33,000 gallons per hour and is intended to irrigate on the average 150 acres of sugarcance and 250 acres of wheat annually Water 1sold on a volumetric basis to individual cultivators thus greatly conserving water by the prevention of waste

5 Another development in hand 15 the construction of the Daurala sugarcane trainway for tapping an area of 14 000 acres of canal prigated sugarcane in the Meerut district Sixteen miles of this are already working and a further twelve will be ready by June 1935 When finished this tramway will be in a position to carry 105,000 tons of cane from remote areas to the rail-head on the North-Western Railway at 1 pie per maund per mile

#### **Police**

The Police Force is administered by an Inspector-General, with three Deputies and two Assistants, forty-six Superintendents, forty-four Assistant Superintendents and sixty-three Deputy Superintendents including three temporary officers. There is a Police Training School at Moradabad under a Superintendent of Police as Principal There is a C I D form-Ing a separate department, under a Deputy Inspector-General with three Assistants The armed police of the three police ranges have recently been rearmed with the 410 musket, the 476 musket and the Martini Henri rifle having formed their late armament The administration of the Jail Department is in charge of an Inspector-General of Prisons, who is a member of the Indian Medical Service

#### Education.

Education is maintained in part by the State and partly by means of grants-in-aid There are five universities, the four residential universities of Allahabad, Lucknow, Aligarh (Muslim) or aided by district and municipal boards and and Benares (Hindu) and the affiliating University of their vernacular education is almost entirely in their The last named was established hands sity of Agra in 1927 and consists, besides six affiliated colleges situated outside the United Provinces, of the eight colleges, formerly associated with Allahabad University on its external side, viz, the Agra and St. John's Colleges at Agra, the Christ Church, D.A. V. and Sanatan Dharma Colleges at Cawnpore, the Meerut College, Meerut, the Bareilly College, Byrelly and St Andrew's College, Gorakhpur There and at Andrew's conege, Gorakhpur There the are Intermediate Colleges which prepare the boys for the high school and intermediate examinations conducted by the Board of High important the School and Intermediate Education, which a controls high school and intermediate education. #### Medical

Medical Department is in charge of an Inspector-General of Civil Hospitals. who is assisted by a lady Superintendent for Medical aid to women in the administration of the Dufferm fund affairs. A post of Per-onal Assistant to the I G. Civil Hospitals has also been created from December 8, 1934 to relieve the I G of the routine duties in connection with the control of his office. A Civil Surgeon is in charge and is responsible for the medical work of each district and in a few of the larger stations he has an assistant. In two stations (Rankhet and Roorkee) Medical Officers in multary employ hold collateral civil charge. There are 11.2 Provincial Medical service officers in charge of important Moffusil dispensaries and or the reserve list and a large number of Provincial subordinate medical service officers Lady doctors and women sub-assistant surgeons visit pardanactin women in their own homes and much good work is done in this mapner.

The best equipped hospitals for Indian natients are the Thomason Hospital at Agra, King George's Hospital and the Calcumpur Hospital at Lucknow the Prince of WaleHospital, Cawnpore, King Edward VII Hospital, Benares, the Civil Hospital at Allahabad (for Europeans, Anglo-Indians and Indians living in European style) and Saint Mary's Cottage Hospital, Mussoone The Ramsay Hospital for Europeans at Nami Tal is a first class institution and there are also the Lady Dufferin Hospitals. King George's Medical College, Lucknow, is one of the best equipped colleges in the country, with a staff of highly efficient professors, and the hospital attached to it is the first in the Province. The Queen Mary's Hospital attached to the country of pital for women and children, completed in 1932 is also attached to the King George's Medical College and provides clinical material for the students in midwifery and instruction of There gynaecology are also male and female medical schools at Agra. As the X-Ray Institute at Dehra Dun has been closed, As the X-Ray it is proposed to institute classes of instruction in X-ray diagnosis and therapy at the King pital, Dehra Dun, Srimati Bhagwan Dei Leper George's Medical College, Lucknow, where every from the King pital, Dehra Dun, Srimati Bhagwan Dei Leper George's Medical College, Lucknow, where every from Cawnpore, Mission Leper Hospital trulity for such work would be forthcoming Almora, and the Leper Hospital at Nain (Alla The scheme is, however, held up owing to lack of funds. There are sanatoria for British soldiers ment of leprosy and are doing good work.

The King Edward VII Sanatorium in the hills at Bhowali in the district of Nami Tal is an up-to date and well-equipped institution for the treat ment of European and Indian consumptives An anti-tuberculosis hospital at Lucknow is in the course of construction and will soon provide a long felt want of the preovince. It is also proposed to close down the five centres for the treatment of tubercular patients at presen-working at Agra. Allahabad, Benares, Cawmi pore and Lucknow, and to start a better clas tubercular clinic at Allahabad, complete with X-Ray, as an experiment. A tubercular sana torium at Sarnath near Benares, is doing good work there are mental hospitals for Indian non-criminal functions at Agra and Bareilly and for oriminal lunations at Benares. Arrangements for the treatment of active cases of Leprosy have been made at most of the head quarters hospitals The MacLaren Leper Hos

# THE FINANCES OF THE UNITED PROVINCES.

As explained in the chapters on the new constitution of India, under the Reforms Act of 1919. the financial position of the Provinces underwent a remarkable change The Provinces are, for al practical purposes, financially independent of the Government of India. The contribution payable by the Local Government has been remitted entirely by the Government of India with effect from the year 1928-29 As the finances of the Provinces thus become of greater importance, the position is set out in some detail in the following pages.—

#### ESTIMATED REVENUE FOR 1934-35.

Principal Heads of Revenue.	Debt Services.
Taxes on Salt	Rs. 14,05,500  Total 14,05,500
Stamps . 1,71,80,000 Forests . 43,30,000 Re_istration . 13,02,400 So ieduled Taxes	Civil Administration. Administration of Justice 13,14,000

# The Punjab.

The Punjab or land of the five rivers, is so in the rainfall involves distress, if not actual called from the five rivers by which it is en-closed, namely, the Jhelum, Chenab, Ravi, Beas and Sutley Together with the North-West Frontier Province and the Indian State of Jammu and Kashmir which lie to the north, the Punjab occupies the extreme north-western corner of the Indian Empire, and with the exception of the above-mentioned province comprises all of British India north of S'ad and Rajputana and west of the river Jumna Previous to October 1912, the Punjab with its feudatories embraced an area of 136,330 square miles and a population at the Census of 1911 of 24,187,750 (inclusive of 28,587 transfrontier Baluchis), that is to say, about onethirteenth of the area and population of the indian Empire. But the formation of a sepa-rate province of Delhi reduced the area and population of the Punjab by about 450 square miles and 880,000 souls, respectively The total population of the Province in 1931, including the Baloch tribes on the border of the Dehra Ghazi Khan District, was 28,490,857 of whom 4,910,005 were in the Indian States

## Physical Features

The greater part of the Punjab consists of one vast alluvial plain, stretching from the Jumna in the east to the Suleman Range in The north-east is occupied by a the west. section of the Himalayas and the Salt Range forms its north-western angle A few small spurs of the Aravalli mountain system traverse the extreme south-east and terminate in the Ridge at Delhi The Punjab may be divided into five natural divisions The Himalayan tract includes an area of 22,000 square miles. with a scanty population living scattered in tiny mountain hamlets. The Sait Range tract includes the districts of Attock, Rawai-pindi and Jhelum and part of Shahpur district Its physical configuration is broken and confused and the mountainous tracts of Murree and Kahuta approximate closely in characteristics to the Himalayan tract Except in the hills, the rainfall leaves little margin for protection against distress in unfavourable seasons and irrestion is almost unknown Skirting and irrigation is almost unknown the base of the hills and including the low range of the Siwaliks, runs the narrow sub-montane This tract, secure in an ample rainfall and traversed by streams from the hills, comprises some of the most fertile and thickly popults populalated portions of the province tion of over four millions is almost agricultural and pastoral but it includes one large town in Sialkot. Of the plains of the Punjab, the eastern portion covers an area of some 36,000 square miles with a population of 101 millions. East of Lahore, the runfall is everywhere so far sufficient that cultivation is possible without irrigation in fairly favour-divided between the five divisions of the province, able seasons, but over the greater part of the Next in importance come the Rajputs, who area the margin is so slight that, except where irrigation is employed, any material reduction is of them are Mahomedaus by religion,

famine. Within the eastern plains lie the large cities of Lahore and Amritsar, and the popula-tion in comparison with the western Punjab is largely urban. The western plains cover an area of 59,000 square miles, with a popu-lation of a little over six millions. The rainfall in this area, heaviest in the north and east and decreasing towards the west and south is everywhere so scanty that cultivation is only possible with the aid of artificial irrigation or upon the low-lying river-banks left moist by the retreating floods In this very circumstance, these tracts find their security against famine, for there cultivation is almost independent of rain, a failure of which means nothing worse than a scarcity of grass. So little rain is sufficient, and absolute drought occurs so seldom that the crops may be said never to fail from this cause. The western plains embrace the great colony areas on the Chenab and Jhelum Canals which now challenge the title of the eastern plains as the most fertile, wealthy and populous por-tions of the province. Multan and Lyalipur are the largest towns in the western arca. Owing to its geographical position, its scrinty owing to its geographical position, its scrinty rainfall and cloudless skies, and perhaps to its wide expanse of untilled plains, the climate of the Punjab presents greater extremes of both heat and cold than any other portion of India The summer, from April to September, is scorchingly hot, and in the winter, sharp frosts are common. But the bright sun and invigorating air make the climate of the Punjab in the cold weather almost ideal. of the Punjab in the cold weather almost ideal.

#### States.

The Indian States of the Punjah were formerly in the Political charge of the Punjab Government, In 1921, however, the thirteen most important States, including Patiala, Bahawalpur, Jind and Nabha, were formed into a separate "Punjah States Agency" under the control of the Agent to the Governor-General, Punjah States The only States remaining in the charge of the Punjah Government are the Simla Hill States, for which the Deputy Commissioner of Simla is Political Officer, and three small states the Ambile Division. Estand States in the Ambala Division, Kalsia, Pataudi and Dujana, which are supervised by the Commissioner of Ambala.

#### The People.

Of the population roughly one-half is Mahomedan three-eighths Hundu and one-eighth medan three-cirities rimdu and one-cirities sikh. Socially the landed classes stand high, and of these the Jats, numbering nearly five millions, are the most important. Roughly speaking, one-half the Jats are Mahomedan, one-third Sikh and one-exith Hindu. In distribution they are ubiquitous and are equally all add between the five divisions of the produce. about a fourth are Hindus and a sers few Sikhs. They are widely distributed over the province. Both Jats and Rajputs of the Puniab provide many of the best recruits for the Indian Army. In fact all the agricultural classes of the Punjab, except in the southwestern districts, made a magnificent response to the appeal for recruits in the great war and province's contribution of upwards of 400,000 men to the man power of the Lampire speaks for itself. The Gujars are an important agricultural and pastoral tribe, chiefly found in the eastern half of the province and in the extreme north-west In organisation they closely resemble the Jats and are often absorbed into that tribe. There are many minor agricultural tribes, priestly and religious caste (Brahmans, Savads and Kureshis), most of whom are landholders, the trading castes of the Hindus (Khatris, Aroras and Banias), the trading castes of the Mahomedans (Khoju, Parachas and Khakhas), and the numerous artisan and menial castes. There are also vaggant and criminal tribes, and foreign ele-

# dealing, labour and trade A small Fibetan element is found in the Himalayan districts Languages

ments in the population are represented by the Baluchis of Dera Gnazi Khan and neighbouring

districts in the west, who number about

bolf a million and maintain their tribal system, and the Pathans of the Attock and

scattered all over the province engaged in horac-

Pathans are also found

Mionwall districts

The main language of the province is Punjabi, which is spoken by more than half the population Western Punjabi may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west. The next most important languages are Western Hindi, which includes Hindustani and Urdu (the polished language of the towns) polished language of the towns) Western Pahari, which is spoken in the hill tracts; and Rajasthani, the language of Rajputans Baluchi, Pushto, Sindhi and Tibeto-Burman languages are used by small sections of the population.

# Agriculture.

Agriculture is the staple industry of the province affording the main means of sub-sistence to 60 5 per cent. of the population 1t is essentially a country of peasant proprietors About one-sixth of the total area in British districts is Government property, the remaining five-sixths belonging to private owners, and a large part of the Government land is so situated that it cannot be brought under without Chenab extensive irrigation cultivation Canal irrigates Thus the 1,939,000 acres of what was formerly waste land, the Lower Jhelum Canal, 4,18,000 acres, and the Lower Bari Doab Canal, adds 1,005,000 acres to this total On account of the opening of the Sutley Valley canals an area of about 1,244,000 acres more has been brought under, sufficient force formerly waste has been brought under cultivation Large areas in the hills and elsewhere which are unsuited to cultivation are preserved as forest lands, the total extent of which is about 6,000 square miles. Of the crops grown, wheat

of Irrigation has led to a preat expansion of the wheat area. Next in importance to wheat is cram. Other important staples are backs, rice, millets, maire, ollareds (rape, tools and secumium), cotton and surreans. In the canal colonica large areas of American cotton are grown but in the coftons rowing districts the thort of sple indigenous varieties are predominant, The country being prepondersofts acticultural. a considerable proportion of the vealth of the people lie in live-fock. Jarve profits are derived from the cuttle and dair, trades and wool is a stable product in Kulu and Kanges and throughout the plaine generally. The instruction of hide and lebus, which to not bullound industry.

# Industries The mineral wealth of the Punjable email.

rock salt, wiltpetre and lime tone for road building heing the most important products There are some small coal mines in the Ihelum, Shahpur and Mians all districts tiold washing is earth don in mo tof the rivers not without remunerative results Iton and copp consuce plentiful but the difficulty of earther and the absence of fuel have hitherto prevented smelting on a large scale. The Pupilb is not a large manufacturing province, the to il number of factories being only 71\_ the majority of which are cotton gluping and pre-sing incloner. Blankets and woollen rugs are produced in coast derable quantitles and the early to of Amelican are famous. Slik we wing is also carried on and the workers in gold, allier, brass copper and curlingwire are fairly numerous. Isory earthenware are fairly numerous. Ivory carving is carried on extendially at American and Islah and also in the Pathala State. Mineral oil is being extracted and refined in the Attock and Rawalpindi Districts and a cement factory is established at Wah near Hassanabdal. There is also a match factors at Shahdara and a factory for the hydrogenation and refining of

oils at Lalipur.

is the most important and the development | taries (Chief Engineers), one in the Buildings and

Administration. Prior to the amendment of the Government of India Act in 1919 the head of the administra tion was a Lieutenant-Governor, drawn from the ranks of the Indian Civil Service Under the amended Act the province was relect to the status of a Governor-hip, with an Executive Council and Ministers, the Governor-in-Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects The general system of provincial administration under this scheme is sketched in the section "Provincial Governments" (q r) where is also given a list of the Reserved and Transferred Subjects with the Governor and the Council and Ministers is an enlarged Legislative Council, with wide powers, whose scope and authority are given in the section 'Legislative Councils' (qr), the system being common to all the major provinces. The business of Government is carried on through the usual Secretariat which consists of four Secretaries, designated (1) Chief, (2) Home, (3) Finance, and (4) Transferred Departments, one Deputy Secretary, two Under-

Secretaries, and one Assistant Secretary. In the Public Works Department, there are five Secre-

Roads Branch, one in the Hydro-Electric Branch traditional village community organisation, the and three in the Irrigation Branch, while elected committee or Panchayat possessing the Legal Remembrancer is also the Secretary certain powers in respect of taxation, local to Government in the Legislative Department The head of the Police Department is Joint Secretary and of Education Department an Under Secretary to Government. The Govern-ment winter in Lahore and the summer (from the middle of May to the middle of October) in Simia. Under the Governor, the province is administered by five Commissioners (for Ambala, Juliunder, Lahore, Rawaipindi Multan) who exercise general control over the Deputy Commissioners—29 in number—each of whom is in charge of a district,

The principal heads of Department in the province are the two Financial Com-missioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Agriculture and the Court of Wards), the five Chief Engineers, the Inspector-General of Police, the Director of Public Instruction, the Inspector-General of Pusons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co-operative Credit Societies and Joint Stock Companies and the Legal Remembrancer.

#### Justice.

The administration of justice is entrusted to a High Court, which is the final appellate authority to civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil juris-diction in special cases. The Court sits at Lahore and is composed of a Chief Justice and eight Puisne Judges (cither civilians or barristers), and seven temporary Additional Judges, including the Inspecting Judge sanctioned each year for six months Subordinate to the High Court are the District and Sessions Judges (25 in number) each of whom exercise civil and criminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Prontier Crimes Regulation is in force the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment.

#### Local Self-Government.

Local Self-Government is secured in certain branches of the administration by the constitution of District Boards, each exercising authority over a district, of Municipal, Small Town, and Notified Area Committees each exercising authority over an urban area, and of Panchayats, each exercising anthority over a revenue yavs, each exercising authority over a revenue estate or a compact group of revenue estates. The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession taxes and miscellaneous fees, and those of Municipal, Small Town, and Notified Area Committees from octro or terminal tax and other forms of taxation from Government grants and from rents and miscellaneous fees. The and from rents and miscellaneous fees The Panchayat system is an attempt to revive the Civil Surgeon.

elected committee or Panchayat possessing certain powers in respect of taxation, local option, civil and criminal justice, the abate-ment of nuisances and other matters. Most of the members of practically all local bodies are now elected and elections are as a rule Leculy contested.

#### Police.

The Police force is divided into District Police, Railway Police and Criminal Investigation Department The combined force is under the control of the Inspector-General, who is a member of the gazetted force and has under him three Deputy Inspectors-General in charge of ranges comprising several districts and a fourth Deputy Inspector-General in charge of the Criminal Investigation Department and of the Finger Print Bureau at Phillaur. There is a Police Training School at Phillaur controlled by a Principal of the rank of Superintendent of Police The Railway Police are under an Assistant Inspector-General. The District Police are controlled by Superintendents, each of whom is in charge of a district and has under him one or more Assistant Superintendents or Deputy Superintendents.

#### Education.

The strides which have been made in the past decade especially in the concluding years of the period, have brought the Punjab into line with the older and more forward provinces. The advance has not been confined to any one form of education but is spread over all grades and varieties. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains fifteen arts colleges (including one for Europeans and two for women), three normal schools for two for women), three normal schools for males, fourteen training classes, and combined institutions for females, one hundred and twenty secondary schools for boys and girls and fifty centres for vocational training Apart from these institutions for general education, Government maintains six higher grade professional institutions, tzz., the King Edward Medical College and Veterinary College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the Agreealty of College at Leboro the College at at Lahore, the Agricultural College at Lyallpur, the Engineering College at Moghalpura, the Central Training College Lahore and the Chelmsford Training College at Ghoragali, and two schools, viz, the Medical School at Amritar and the Engineering School at Rasul. In addition there are thirty-two technical and industrial schools (thirty for males and two for females) scattered over the province.

The Department of Education is in charge of the Minister for Education who is assisted in the work of administration by the Director of Public Instruction.

#### Medical.

The Medical Department is controlled by the Inspector-General of Civil Hospitals, who is an officer of the Indian Medical Service holding the rank of Colonel He is assisted by an officer designated the Assistant Inspector-General of Civil Hospitals, who is at present an officer of the Indian Medical Department of the rank of a

# Public Health.

The Department of Public Health is controlled by the Director of Public Health who has, working under him, three Assistant Directors of Public Health, 34 District Medical Officers of Health, and twenty-eight District Sanitary Inspectors In addition there is a temporary staff of 10 Sub-Assistant Health Officers and 15 Sanitary Inspectors for assistance in combating epidemic diseases The ancillary services comprise

- (i) A Vaccine Institute which is in charge of the Assistant Director of Public Health, Punjab (Technical) Vaccination, assisted by a Superintendent and which prepares sufficient vaccine lymph to meet the needs not only of the Punjab, but of the Army in Northern India and of several provinces and Indian States in and beyond the confines of India
- (2) An epidemiological bureau, which is in charge of the Epidemiologist to Government where, in addition to routine bacteriological examination, research work in matters bearing upon public health problems is carried out

- (3) An Education Bureau, to which attached a photographer and a diafisman.
- (4) A Chemical Laboratory in charge of a fully trained chemist whose duties comprise the chemical analysis of water samples and food stuffs
- stuffs
  (5) A Public Health Equipment Depot which supplies Government Institutions, local bodies, etc., with reliable disinfectants, vaccine
- (6) A Public Health School, the staff of which is respondible for the training of health victors. The Principal, who is also Inspectress of Health Centres, supervises the materiaty and child welfare work throughout the province.

child welfare work throughout the province.

In matters connected with sanitary works the Director of Public Health works in close touch with the Superintending Engineer, Public Health Circle, Punjab, who acts as technical adviser of the Public Health Department in engineering matters. This officer and the Director of Public Health are also the technical advisers of the Sanitary Board whose duty it is to examine and report upon sanitary schem's put forward by local bodics.

There was a fairly large improvement in the output of tin and wolfram during the year 1938, (2,943 62 tons) as compared with the output of 1932 (2,511 58) Silver lead and zinc ore are extracted by the Burma Corporation at Bawdwin in the Northern Shan States Copper in small quantities is also found there There are small deposits of Molybdenite in Tavov and Mergui and of plantinum in Myltkyma Mining for precious stones in the Mogok stone tract of the Katha District continued to be carried out by native miners working under licenses The output of rubbles during 1933 was 1,106 carats as compared with 74 66 carats during 1981, there being no weights recorded in the year 1932 The output of amber in 1922 and 1932 of amber in 1933 was 675 cwt The output of Burmese Jadeite during 1933 compared with that of the previous year showed a decrease of 1855 cwts The oldest and largest oil field in The output the province, is at Yenangyaung in the Magne District where the Burma Oil Company has its chief wells There were increases in the output from the wells in the Yenangyaung Oilsteld and in the Pakokku District due to increased drilling operations in these operation in these There were decreases in the output in the Chank Oilfield and in the Minbu and Thavetmy o Districts due to the natural decline in the production of oil from existing wells There was also a decrease in the output in the Chindwin District due to the curtailment of the activities of The Indo-Burma Petroleum Company, Messrs Limited The output of petroleum during 1933 exceeded that of 1932 by 1,430,603 gallons the increase being mainly from wells in the Pakokku District and the Yenangyaung Olfield of the Magne District The Burma field of the Magne District Oil Company take their oil to the refineries at Rangoon by pipe line from the Yenangyaung and Singu Oilfields Other companies take it down by river flats The area under rubber 15 106,496 acres

#### Manufactures

There are 1,010 factories, more than half of which are engaged in miling rice and nearly one-seventh are sawmills. The remainder are, chiefly engineering works, cotton ginning milis, oil mills for the extraction of oil from groundnuts, printing presses, ice and aerated water factories, and oil refineries connected with the petroleum industry. The total number of persons employed in establishments under the Indian Factories Act in 1933 was \$6,433 Percinnal factories employed 39,938 and seasonal factories 46,495 At the Census of 1931, 1,850,176 or 29 79 per cent of the total population were engaged outside agriculture and production

As is the case in other parts of the Indian Empire, the imported and factory made article is rapidly ousting the home-made and indigenous But at Amarapura in the Mandain District a revival has taken place of hand silkweaving Burmese wood-carring is still famous and many artists in silver still remain, the finish of whose work is sometimes very fine Bassein and Mandalay parasols are well known and much admired in Burma But perhaps the most famous of all hand-made and indigenous industries is the lacquer work of Pagan with its delicate patterns in black, green, and yellow traced on a ground-work of red lacquer over bamboo. A new art is the making of bronze

figures The artists have gone back to nature for their models, breaking away from the conventionalized forms into which their silver work had crystallized and the new figures display a vigour and life that make them by far the finest examples of art the province can produce.

#### Administration.

Burma, which was at that time administered as a Lieutenant-Governorship, was deliberately excluded from the operation of the Reform Act of 1919. It was felt that the Province differed so markedly from the other Provinces in the Indian Empire that its requirements should be separately considered. After repeated discussions the question was referred to a special Burma Reforms Committee, which in 1922 recommended that all the essential provisions of the Reform Act should be applied to the Province. This recommendation was accepted and its proposals became law Under this Act Burma became a Governor's Province, with an executive council and ministers, and conforms to the provinces recreated under the Act of 1919 (q v). The main difference is in the size of the electorate. Under the frunchise accepted, the rural electorate is estimated at 1,979,450 and the urban electorate has been put as high as 99,882. The Legislative Council consists of 103 members, of which 80 are elected and the balance nominated. Owing to the special status of women in Burma, female franchise was adopted from the beginning.

Burma is divided administratively into Upper Burma (including the Shan States, the Kachin and Chin Hills) and Lower Burma. The Shan States are administered by the Chlefs of the States, subject to the supervision of the Commissioner, Federated Shan States, who is also Superintendent for the Southern Shan States, and the Superintendent of the Northern Shan States, and the Superintendent of the Northern Shan States were formed into a Federation on the 1st October 1922, and are designated the F S. States The other Shan States in Burma are subject to the supervision of the Commissioner, Sagaing Division The Civil, Criminal and Revenue administration is vested in the Chief of the Scate, subject to the restrictions contained in the sanad. The law administered is the customary law of the State

strictions contained in the sanad. The law administered is the customary law of the State Under the Governor are eight Commissioners of divisions, three in Upper, four in Lower Burma, and one in the Federated Shan States

#### Justice

The administration of Civil and Criminal Justice is under the control of the High Court of Judicature at Rangoon, which consists of a Chief Justice and ten other permanent Judges. The Superior Judges, there are also separate Provincial and Subordinate Judicial Services.

All village headmen have limited magisterial powers and a considerable number are also invested with civil jurisdiction to a limited extent

In pursuance of the policy of decentralization steps were taken in 1917 to restore to the village headmen the power and influence which they possessed in Burmese times before the centralizing tendencies of British rule made them practically subordinate officers of the administration

Further, there is a River Trainin. Lapert On account of reduction of works due to the Anancial stringency the number of temporary Engineers recruited to augment the perminent staff has been reduced to one

#### Police

The Police Force is divided into Civil, Military and Rangoon lown Police. The first two are under the control of the Inspector-General of Police, the latter is under the orders of the Commissioner of Police, Rangoon, an officer of the rank of Deputy Inspector-teneral. There are five other Deputy Inspector-General, one each for the Northern, Southern and Western Ranges, one for the Railway and Criminal Investigation. Northern, Southern and Western Ranges, one for the Rallway and Criminal Investigation Department, and one for the Military Police

A special feature of Burma is the Military Police. Its officers are deputed from the Indian Army. The rank and file are recruited in July 1915. The Director is a member of from natives of India with a fou Kachins, Indian Medical Service.

### THE FINANCES OF BURMA.

In common with the other Provinces of India, the financial arrangements between the Government of India and the Government of Burma underwent a remodelling in consequence of the reconstitution of the Province on the lines of the other Indian Provinces. The Province obtained substantial financial independence The present position is set out in the following statement.—

#### The People

The Province has a population of 12,5-9,5-3; persons Even so with 451 persons per square mile, Bihar and Orissa is more thickly populated than Germany There are only four towns, which can be classed as crites, namely, Patra, Gaya, Jamshedpur and Bhagalpur During the last ten years the population of Patna has Hindus form at overbeen steadily increasing whelming majority of the population Thrugh! the Muhammadans form about one-tenth of the total population they constitute more than ! one-fifth of urban population of the province Animets account for 5.9 per cent These are inhabitants of the Chota Nappur plateau and the Santal Parganas, the latter district These are being a continuation of the plateau in a northeasterly direction.

Rain at this time not only contributes materials to an increased outturn of the rice crop, but a' o provides the moisture necessary for starting the spring or rate crops

#### Manufactures

Opinm was formerly, with indice, the oblef manufactured product of Indar, but it contewith the Chines quence of the executent Government the Patna Luctory has been closed it Monghy: the Peninsular Iobacco Company have created one of the largest connecte facforces in the world and as a result tobecco is being grown much more extensisely. Tata Iron and Scil Works at Jam-hedpur in Singhbhum district are also one of the largest In the world and numerous sub-ldiary industries are springing up in their vicinity. The most are springing up in their vicinity. The most important of these are the Timplice Company of India, Agricultural Implements, Ltd , Lufield

<sup>\*</sup> The figures given in this paragraph relate to British territory only.

Cable Company of India, Enginelled Ironware, Limited, and Indian Steel Wire Products. The population of Jamshedpur is rapidly approaching 100,000 and it consumes 14 million tons of coal annually. This part of the province has also some of the richest and most extensive fron mines in the world and supplies the iron and steel works in both Bengal and Bihar and Orissa with raw materials, but of coal is still the most the raising important the mineral industries in the province The coalfields in the Manbhum District have undergone an extraordinary development in the past twenty years, while valuable new fields are being developed at Ramgarh, Bokaro and Karanpura in Hazaribagh This same district is the most important mica mining centre in the world both on account of the quality as well as the size of its output Manbhum, Palamau, Ranchi, the Santal Parganas and Gaya are also the chief centres for the production of lac and the manufacture of shellac, the latter of which is exported from India to the value of ten crores annually

#### Administration.

The Province on first constitution was administered by a Lieutenant-Governor-in-Council. thus being unique in India as the only Lieutenant Governorship with a Council Under the Reform Act of 1919 it was raised to the Status of a Governorship, with an Executive Council and Ministers. The principles of the provincial administration are fully explained in the section. The Provincial Governorships, where the division of the administration into Reserved Subjects, in charge of the Governor and his Executive Council, and Transferred Subjects, in charge of the Governor and Ministers chosen from the Legislative Council, is set out in detail in all these respects Bihar set out in detail in all these respects Bihar and Orissa is on the same plane as the other Provinces in India.

#### Public Works.

The Public Works Department in the Province of Bihar and Orissa consists of two separate branches, viz.—(1) the Buildings and Roads which includes Railways and (2) Illigation, which includes the Public Health Lugineering Branch Each has a Chief Engineer, who is also Secretary to the Local Government with an Engineer Officer as Under-Secretary in the Buildings and Roads branch and a non-professional Assistant Secretary and a Deputy Chief Engineer in the Irrigation branch under him The Electrical work of the Province is carried out by an Electric Inspector and Electrical Engineer and a staff of subordinates

#### Justice

The administration of justice is controlled by the High Court of Judicature at Patna. In the administration of civil justice below the High Court are the District Judgs as Courts of Appeal, the Subordinate Judges and the Munsiffs The jurisdiction of a District Judge or Subordinate Judge extends to all original suits cognizable by the Civil Courts. It does not, however, include the powers of a Small Cause Court. unless these be specially conferred. The of Government, supervised and inspected ordinary jurisdiction of a Munsif extends to all by an Inspector-General with a staff of suits in which the amount or value of the subject tants. The Commissioner of Excise and Sult matter in dispute does not exceed Rs 1,000 is also Inspector-General or Registration.

though the limit may be extended to Rs 4,000 On the criminal side the Sessions Judge hears appeals from Magistrates exercising first class powers while the District Magistrate is the appellate authority for Magistrates exercising second and third class powers. The District Magistrate can also be, though in point of fact he very rarely is, a court of first instance. It is usual in most districts for a Joint Magistrate or Daylett Magistrate for a Joint Magistrate and a Deputy Magistrate to receive complaints and police reports, cases of difficulty or importance being referred to the District Magistrate who is responsible for the peace of the district. In the non-regulation districts the Deputy Commis-sioner and his subordinates exercise civil powers and bear rent suits

#### Land Tenures.

Estates in the Province of Bihar and Orise, are of three kinds, namely, those permanently settled from 1793 which are to be found in the Patna, Tirhut and Bhagalpur divisions, those temporarily settled as in Chota Nagpur and parts of Orissa, and estates held direct by Government as proprietor or managed by the Court of Wards The passing of the Rengal Tenancy Act (VIII of 1885) safeguarded the rights of the cultivators under the Permanent Settlement Act Further, the Settlement Department under the supervision of the Director of Land Records makes periodical survey and settlement operations in the various districts both permanently and temporarily settled. In the former, the rights of the undertenants are recorded and attested, while in the latter there is the re-settlement of rents In the re-settlement proceedings. rents are fixed not only for the landlords but also A settlement can be ordered for all the tenants by Government on application made by landlords or tenants

The tenures of Orissa are somewhat different. Under the zamindars, that is, the proprietors who took settlement from Government and pav revenue to Government direct, is a class of subrevenue to Government direct, is a class of subordinate proprietors or proprietary tenure
holders, who were originally village headmen
dealing more or less direct with the revenue
authorities. They have a variety of names,
such as mukadam, padhan, maurusi, sarbarakar
purseths, kharidar and shikmi zamindar.
These sub-proprietors or proprietary tenure
holders pay their revenue through the zamindars of the estates within which their lands
ha In Chota Naganr and the Santal Parhe In Chota Nagpur and the Santal Par-ganas, the rights of village headmen have been recognised. The headman collects the rents and is responsible for them minus a deduction as remuneration for his trouble

Both Onssa and Chota Nagpur have their own Tenuncy Acts In the district of the Santal Parganas, the land tenures are governed by Regulations III of 1872 and II of 1886 and in the district or Sambalpur by the Central Provinces Land Revenue Act, 1881 and the Central Provinces Tenancy Act, 1828

#### Police.

The Departments of Police, Prisons and Registration are each under the g nemi direction Under the Inspector-General of Police are four Deputy Inspectors-General and 30 Super-intendents There are also 25 Assistant Super-intendents There are also 25 Assistant Super-intendents The force is divided into the District Police, the Railway Police and the Military Police A Criminal Investigation Department has also been formed for the collection and distribution of information relating to professional criminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in investigations of crime of this class and other serious action which its assistance may be invoked There are three companies of Unmounted Military Police and one company of Mounted Military Police which are maintained as reserves to deal with senious and organised disturbances and perform no ordinary civil duties.

#### Education.

The position of education in the Province, with the numbers attending schools, is set out in the section Education and the tables attached thereto (q v.) showing in great detail the educational status of the administration.

There is a University at Patna, whose functions are described under the Indian Universities. ( $q \ v$ )

#### Medical.

The Medical Department is under the control of the Inspector-General of Civil Hospitals who is a Member of the Indian Medical Service. Under him there are 21 Civil Surgeons who are responsible for the medical work of the districts at the headquarters of which they are stationed. 60 Dispensaries are maintained by Government in addition to 626 Dispensaries maintained by Local hodies, Railways, private persons, etc. 7,080,200 patients including 70,900 in-antients were treated in all the dispensaries in 1933. The total income of the dispensaries maintained by Government and Local Bodies including that of the private aided institutions amounted to Rs. 32,30,078

A large mental hospital for Europeans has been opened at Ranchi which receives patients from Northern India Asimilar institution for Indians has been opened at Ranchi since September 1925 for the treatment of patients from Bihar and Orissa and Bengal Asanitorium at Itki in the district of Ranchi has also been established for the treatment of tuberculosis. An institute for radium treatment has also been established at Patna Centres for anti-rabic treatment have been started at Patna and Cuttack

A medical college has been opened at Patna and the Medical School which was in existence at Patna has been transferred to Darbhango.

### THE FINANCES OF BIHAR AND ORISSA.

As Bihar now enjoys practical financial autonomy, the finances are set out in greater detail.

# The Central Provinces and Berar.

and Bengal Their area is 133,069 sq bay miles, of which 82,149 are British territory proper, 17,808 (viz. Berar) held on perpetual lease from HEH the Nizam and the remainder held by Feudatory Chiefs The population (1931) various parts of the Central Provinces passed under British control at different times in the wars and tumult in the first half of the 19th century and the several parts were amalgamated after the Mutiny, in 1861, into the Chief Commissionership of the Central Provinces Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with H E H the Nizam for the maintenance of the Hyderabad Contingent, and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with HEH the Nizam

The Country. The Central Provinces may roughly be divi-ded into three tracts of upland, with two intervening ones of plain country. In the north-west, the Vindhyan plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the admirable agricultural departments in India rich wheat growing country of the Nerbudda and is now receiving additional strength by a valley Then comes the high Satpura plateau, phenomenal growth of the co-operative credit characterised by forest-covered hills and deep water-cut ravines Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the more important cotton tracts of India and the wealthiest part of the C P proper The Eastern half of the plain lies in the valley of the Wainganga and is mainly a rice growing country. Its numerous irrigation tanks have given it the name of the "lake country" of Nagpur. Fur ther east is the far-reaching rice country of Chattisgarh, in the Mahanadi casin. The southeast of the C.P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The Feudatory States of Bastar and Kankar he in this region Berar lies to the south-west of the C P and its chief characteris-tic is its rich black cotton-soil plains

The population of the province is a comparatively new community. Before the advent of the Aryans, the whole of it was peopled by community and other primitive tribes and these aborginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home. But successive waves or immigration flowed into the province from all sides. The early inhabitants were driven into the maccessible forests and hills, where they form nearly a quarter of the whole bopulation of the Central Provinces being found in large numbers in all parts of the province, particularly in the South-east. The province, particularly in the South-east. The main divisions of the newcomers are indicated The by the language divisions of the province Hindi brought in by the Hindustan-speaking peoples of the North prevails in the North and East, Marathi in Berar and the West and Centre of the Central Provinces, Hindi is spoken by future developments of the natural wealth of

The Central Provinces and Berar compose a 56 per cent of the population and is the lingua great triangle of country midway between Bom- franca Marathi by 31 per cent and Gondi by 7 per cent The effects of invasion are curiously illustrated in Berar, where numbers of Moslems have Hindu names, being descendants of ior-mer Hindu officials who on the Mahomedan invasion adopted Islam rather than lose their positions The last census shows that a gradual Brahmanising of the aboriginal tribes is going The tribes are not regarded as impure by the Hindus and the process of absorption is more or less cavalising

Industries.

When Sir Richard Temple became first Chief Commissioner of the C P the province was landlocked The only road was that leading in from Jubbulpore to Nagpur. The British administration has made roads in all directions, the two trunk railways between Bombay and Calcutta run across the province and in the last few years a great impe us has been given to the construc-tion of subsidiary lines. These develorments have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most phenomenal growth of the co-operative credit movement. The land tenure is chiefly on the system, malguzarı, or landlord with numerous variations, from the great Fcu-datory chief ships, which are on this basis, to holdings of small dimensions to holdings of small dimensions. A system of land legislation has gradually been built up to protect the individual cultivator. Berar is settled on the Bombay raisatwari system 15,073 square miles of the C P is Government. Reserved forest, in Berar the forest area is about 3,339 square miles, the total forest area being one-sixth of the whole Province. The rugged nature of the greater part of the country makes forest. ter part of the country makes forest conservation difficult and costly. Excluding forest and waste 67 per cent of the total land is occupied for cultivation, for the two most advanced districts in the Central Provinces, the proportion averages 83 per cent, while the average figure for the Berar Districts is as luch as 93 per cent. The cultivated area has extend-The People as 93 per cent The cultivated area has extend-The population of the province is a compiled almost continuously except for the tempor-

#### Commerce and Manufactures.

the province. Nagpur is the chief centre of a ] busy cotton spinning and weaving industry. The Empress Mills, owned by Parsi manufacturers, were opened there in 1877 and the general prosperity of the cotton trade has led to the addition of many mills here and in other parts of the province The total amount of spun yarn exported from the Province during the year ending 31st March 1938 was 1,34,967 maunds, valued at Rs. 40,49,010.

The largest numbers engaged in any of the modern industrial concerns are employed in manganese mining which in 1932 employed 2,971 persons and raised 77,186 tons Then follow coal mining with an output of 1,049,238 tons and 8,932 persons employed, the Jubbulpore murble quarries and allied works, the limestone quarries and the mines for pottery clay, soapstone, etc

The total number of factories of all kinds legally so described was 956 in 1983, the latest period for which returns are available and the number of people employed in them 61,781 The same economic influences which are operative in every progressive country during its transition stage are at work in the C. P and Berar, gradually sapping the strength of the old village industries, as communications improve, and concentrating industries in the towns. While the village industries are fading away, a large development of trade has taken place. The last pre-war reports showed an increase in volume by one-third in eight years.

### Administration.

The administration of the Central Provinces and Berar is conducted by a Governor-in-Council, who is appointed by the Crown He is assisted by seven Secretaries and four undersecretaries. Under the reform scheme the administration is conducted by a Governor with an Executive Council of two members, one of whom is a non-official and two Ministers, the latter being in charge of the transferred subjects

The local legislature consists of 78 members distributed as follows—38 elected from the C.P.; 17 elected from Berar, 2 members of the Executive Council, 8 nominated non-officials; 8 nominated officials The Governor (who is not a member of the Council) has the right of nominating two additional members will special knowledge on any subject regarding which legislation is before the Council The C P members with regarding are divided for administrative purposes into divisions and Berar constitutes Each of these is controlled by a Comdivision missioner The divisions are sub-divided into districts, each of which is controlled by a Deputy Commissioner, immediately subordinate to the Commissioner The principal heads of Pro-vincial departments are the Commissioner of Settlements and Director of Land Records, the Chief Conservator of Forests, the Inspector-General of Civil Hospitals, the Director of Public Health, the Inspector General of Police, the Inspector-General of Prisons, the Director of Public Instruction, the Excise Commissioner and Superintendent of Stamps and Inspector General of Registration, and Registrar-General of Births, Deaths and Marriages, the to have taken root successfully. The larger Director of Agriculture, the Registrar of towns have municipalities, there being 75 such Co-operative Societies, the Director of Indus-bodies in the Province.

tries, the Legal Remembrancer, the Director of Veterinary Services and a Chief Engineer, Public Works Department, Buildings and Roads and Irrigation Branches. The Deputy Commissioners of districts are the chief revenue authorities and District Magistrates and they evereise the usual powers and functions of a district officer. The district functions of a district officer. The district forests are managed by a forest officer, over whom the Deputy Commissioner has certain powers of supervision, particularly in matters. affecting the welfare of the people district has a Civil Surgeon, (except Mandla, Drug and Balaghat where there are Assistant Surgeon-) who is generally also Superintendent of the District Ital except at Central July at Nagpore and Jubbulpore and District July at Rappur, Narsinghpur, Amraotl and Akola where there are whole time Superintendents and whose work is also in various respects supervised by the Deputy Commissioner The Deputy Commissionei îs also Marriage Registrar and manages the estates of his district which are under the Court of Wards In his revenue and criminal work the Deputy Commissioner is assisted by (a) one or more Assistant Commissioners, or members of the Indian Civil Service , (b) one or more Extra Assistant Commissioners, or members of the Provincial Civil Service, including a few Anglo-Indians and (c) by Tahsildars and Naib or members of the Subordinate Tahsildars, service. The district is divided for administrative purposes into tabsils, the average area of which is 1,500 square miles—In each village a lambardar or representative of the proprietary body is executive headman.

#### Justice

The Court of the Judicial Commissioner is the highest court of appeal in civil cases, and also the highest court of criminal appeal and revision for the Central Provinces and Berar including proceedings against European British subjects and persons jointly charged with European British subjects.

The Court sits at Nagpur and consists of a Judicial Commissioner and 4 Additional Judicial Commissioners of whom one at least must be an advocate of the Court or a Barrister or pleader of not less than 10 years' standing. Subordinate to the Judicial Commissioner's Court are the District and Sessions Judges

(9 in number) each of whom exercises civil and criminal jurisdiction in a Civil and Sessions district comprising one or more Revenue districts. The civil staff below the District and Sessions Judge consists of Subordinate Judges of the first and second class.

#### Local Self-Government.

Municipal administration was first introduced under the Punjab Municipal Acts and the Municipality of Nagpur dates from 1864 revising Acts extend its scope and the C P Municipalities Act passed towards the end of the year 1922 has considerably increased the power of the Municipal Committees The C P Municipalities Act has also Municipalities ied to Berar ct has Viewed been extended erally, municipal self-government is considered

Under the Central Provinces Local Self-Government Act passed in 1920 as amended in 1931 there is a local Board for each tahsil and a district council for each district everpting Hoshangabad, Chhindwara and Saugor districts each of which has two district councils. The local board consists of elected representatives of circle and nominated members other than Government officials not exceeding in numbers one-fourth of the board, and the constitution of the district council is a certain proportion of elected representatives of local boards, of members elected by those representatives and of members, other than Government servants, nominated by Government.

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Councils. The new Central Provinces Local Self-Government Act has also been applied to Berar. The Office Bearers of all the district councils and with few exceptions of local boards also are non-official.

Rural education, sanitation, medical relief and rural communications are among the primary objects to which these bodies direct their attention, while expenditure on famine relief is also a legitimate charge upon the District Councilfunds

The Central Provinces Village Panchiyat Act was passed in the year 1920. So far 861, Panchiyats have been established. As the result of a recommendation of a Committee appointed in 1925 to look into the question of Panchiyats, a Village Panchiyat Officer was appointed to guide the developments of the Panchiyat system. This post was kept vacant on account of financial stringency for more then two years. It has now been filed in with effect from the 24th May 1933.

Public Works

The Public Works Department, which comprises Buildings and Roads and Irrigation Branches, is under the control of the Chief Engineer who is also Secretary to the Government. There are two Superintending Engineers who between them supervise the work of both branches. The Province is well served by a net-work of roads, but in a number of cases they are not fully bridged and are therefore impassable to traffic at times during the rains. During the last 16 years Government has been pursuing a policy of transfer of certain State roads of local importance and buildings situated thereon to the District Councils for maintenance and up to date 1,106 miles of metalled and 795 miles of unmetalled roads have been transferred. State irrigation was introduced early in the

State irrigation was introduced early in the present century mainly as a result of the recommendations of the Irrigation Commission (1901-03) The Irrigation Branch of the department was separated from the Roads and Buildings Branch in 1920 During the last thirty-four years a sum of Rs 7 3 crores has been expended on the construction of irrigation works, of which the more important are the Winganga, Tandula, Mahanadi, Kharang and Maniari canals

Three works, viz., the Minhanadi and Wainginga Canals and the Asola Mendan tank ware sand

Three works, v.z., the Mahanadi and Wainganga Canals and the Asola Mendha tank were sanctioned originally as productive works and the locality as productive works and the locality as productive works and the convenience of pupils whose mother remainder were all sanctioned as unproductive to the convenience of pupils whose mother works. The three works sanctioned as productive have all failed to justify their classification in that category and have now been trans-

ferred to the unproductive list. The conditions in the province are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their value as a protection against famine. The normal area of annual irrigation is at present about 352,000 acres, mainly rice and the income from these works is somewhat more than the expenditure incurred on their maintenance and management.

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities, is under one force. The strength is equal to one man per nine square miles of area. The superior officers comprise an Inspector-General, whose jurisdiction extends over Berar, three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendents and subordinate officers. On railways special Railway Police are employed under the control of two Superintendents of Railway Police with headquarters at Raipur and Hoshangabad. A Special Armed Force of 870 men is distributed over the headquarters of eight districts, for use in dealing with armed disturbers of the peace in whatever quarter they may appear. There is a small force of Younted Police. The Central Provinces has the subordinate of the village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect.

The Education Department of the Central Provinces and Berar is administered by a Director of Public Instruction, a Registrar, Education Department and Secretary, High School Education Board, four Inspectors and two Inspectresses who in their turn are assisted by nine Assistant Inspectors and four Assistant Inspectresses Schools are divided into (a) schools for general education and (b) schools for special education. The latter are schools in which instruction is given in a special branch of technical or professional education. The mun division of schools for general education is into Primary and Secondary. In the Primary Schools the teaching is conducted wholly in the vernature schools. The Secondary Schools are divided into Middle and High Schools. The former may be either Vernacular Middle Schools in which instruction is given (a) wholly in the vernatular or (b) infinity in the vernacular with an option to take English as an additional language of Anglo-Vernacular Middle Schools in which instruction is given both in Linghsh and the Vernacular in the High School (lasses instruction in the High School (lasses instruction in the High School (lasses instruction in the High School (lasses instruction in the High School (lasses instruction in the English and the Vernacular was adopted in the medium of instruction in the beginning of the school vernacular of the convenience of pupils whose marker ton medium in a recognised vernacular of the locality of the English medium (lasses schools are further divided accounts.

# North-West Frontier Province.

The North-West Frontier Province, as its 1918. The transfer frequency was agreed ame denotes, is situated on the moth yest by the lively hand to one placed rater the and North-West Frontier Province, as it name denotes, is situated on the north vest frontier of the Indian Lampire. It is in form an irregular strip of country, lying north by east and south by west and may penerally be described as the treet of country, north of Baluchistan, lying between the India and the Durand boundary line with Afglashican. To the north it extends to the mountains of Kuch I rom this range a long the Hindu broken line of mount die rune nime t due couth, disiding the province from Afghanist in, until the Sulaiman Range eventually the the south of the Province from Baluchistic. The greatest length of the province is 108 miles its greatest breadth 270 miles and it 103 miles area about 36,350 equare miles the term tory falls into three main groundincal distinguished the Cis-Indus district or linearia, the narrow strip between the Indus and the Hills, containing the Districts of Pesh are, known Bannu and Dera Ismail Khan, and the rate 1 mountainous regions on the north and west between those districts and the border line of Afghanistan Hazara and the four assistes. in the second division contain 1,514 squire miles. The mountain regions, north and vert, are occupied by tribes subject only to the political control of the H. the Governor in his capacity as Agent to the Governor in a capacity as Agent to the Governor in a capacity as Agent to the Governor in a capacity as Agent to the Governor in his capacity as Agent to the Governor in his The area of this tract is roughly 22,825 . min miles and in it are situated, from north to couth, the political agencies sixerally I now nor the Milakand, Khyber, Kurran, North Wedri tin wal bouth Waziristan Agencies I ach of the Deputs Commissioners of the five administered districts is responsible for the intime ment of political relations with certain tribes or so thousal the tribes across the frontier. A few hundred miles of the trans-border Territory are internally administered by the Political Agints, but the bulk of the transborder population is free from any internal interference, so long as offences are not committed and so long as the tribes observe the conditions on which allowances are paid to many of them.

The area of the Province is a little more than

half that of Bombay (excluding Sind and Aden) and amounts to more than three fifths of the size of England without Wales. The density of population throughout the Province equals of population throughout the Frontice equals 99 persons to a square mile, but in the more favoured portions the pressure of population is much greater. In the Hazara District there are 208 persons to a square mile and in the trans-Indus plains tract the number is 156. Density for the 5 rented Districts 5,179 persons is the square mile with the letters of the rented by the state of the rented by the state of the rented points. per s. mile The key to the history of the people of the N.-W. F. P lies in the recognition of the of the N.-W. F. P fics in the recognition of the fact that the valley of Peshawar was always more closely connected politically with Eastern Iran than with India, though in pre-Mahomedan times its population was mainly Indian by race Early history finds the Iranians dominating the whole Indus valley. Then came the Greek invasion under Alexander the Great, in BC 327 tirn the invasions of the Sakas, and of the Yhite Huns and later the two great waves of Muhammadan invasion. Ight came the Sikhs invasion beginning in

control of the Panish Governo at Frequence moto receipt subthe descriptions were the war proved about the area of the area of the first of the second substitutions. this lifts of the trainer of the expension of the trainer of the t all period in the first of the extension of the second of mod lity. If a ter of this to spel as liet. ou willing name of her owners by or at the Truster

The division of the Leafter to the firster from the Pany de him for grounds, to whole me . The thought and co, in strength of expenses them the difference of the content of the first o lined British from the reason of the bed good dent to be ten take grader in a country to reproved from the manufacture of the find himself. ministration in Peri Lieux is necessarily political transfer of the contribution in Period Reposition of the Contribution of t and Avent to the Gos rece-ther r 1, s Ph I estquart runt P. has it, in the computation with the few erms . of it lie in the exion with the teneral and in the interior of the feeling and Political Department. In April 19.2 the Proxime and political questions the allocations of the local office, and areas in at the local office, and areas in at the local office, and areas in at the local office, and areas in the local of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and areas of the local office, and are also alen d to came to be proper as assect, of references and the unitarion of the expert knowledge of frontler conditions for which the had of the administration is selected. The advis bility of resurers the Province with the Propine was much discussed. in cert iin Indian political cials and as a roull of the views expressed upon the matter in the Last lative Armoble the Government of India in 1922 appointed a Committee of officials and in 1822 appointed a Committee of on citis and unofficials to invitigate it. The Committee, presided over he Mr. D. de S. Pray, M.L.A. Joint Foreign Secretary, toured the Frantist Province and the Punjab and he and numerous with the sec. Its members were Mesers Raza. All, M.C.S. T. Rargacharia, Chaudhai Shalabuddin, K. M. Samarth and K. B. Aldur Rahing. Schammers of the Localities Assembly, F. Khan, members of the Legislative Assembly, F. N. Bolton, 108 (Foreign Pept) and A. F. Parker, 108 (Punjub) (members). Inclinquiry developed practically into a contest between Slahomedans and Hindus on communal lines The Hindus, allied in sympiths with their co-religionists in the Punjab demanded the reunion of the administered districts of the

Province with the Punjab or, if that were not attrinable then the placing of the indicial administration of the Province under the Punjab High Court at Labore The Mahome lans on the other hand claimed the right of their Province to a status corresponding with that enjoyed by other Provinces of India and to immediate reforms initiating and providing for progress along that line The Hindus argued that a separate Pathan Province on the Frontier would cause a dangerous sentimental division from the rest of India, with leanings towards the allied racial elements outside British India The answer to that was that a contented Pathan Province would be a valuable buttress against hostile feeling across the Border The Committee's Jeliberations ended in disagreement, the two Hindu members writing each a separate report favourable to the Hindu viewpoint already explained, and the majority of the Committee, comprised of all its other members, recommending advance on a Provincial basis Their principal recommendations were for-

Retention of the Settled Districts and Imbal Tracts as a separate unit in charge of a minor administration under the Government of India.

Early creation of a Legislative Council for the Settled District and appointment of Member of Council and Minister,

Appointment of a second Judicial Commissioner which has since been sanctioned and of the judicial administration in reform various directions, including interchange of officers with the Punjab, so that the memincluding hers of the Service in the smaller Province should have the advantage of experience in the

larger one
'If (concluded the Majority) the Pathan
nationality is allowed self-determination and given scope for that self-development within the Indian Empire under the Reforms Scheme after which it is now striving we are assured that with a contented Frontier population India can face with calm resolution the future that Use Frontier has in store for her."

The People.

The total population of the N-W.F.P (1931) 16 4,681,361, made up as follows -

669,636 **Fazara** Trans-Indus Districts 1,755,440 .. 2,259,288 Trans-Border Area

This last figure is estimated There are only of 13 females per 1,000 males in the towns, and 872 2 females per 1,000 males in rural

urcje

This disproportion of the sexes cannot at present be explained in the N-W F P any more than in other parts of Northern India where it also appears The discrepancy is greater here than in any other Province of India is no ground for believing that the neglect of girls in infancy has any effect in causing the phenomenon. On the other hand, the female population has to face many trials which are unknown to men The exils of unskilled midulers and early matriage are among them Both the birth and death-rates of the Province are abnormally low. The birth rate in the administered districts according to the last available official reports, is 25.6 and the deathrate 21 9

The dominant language of the Province is Pashtu and the population contains everal rashtu and the population contains everal ingual strata. The most important actions of the population, both numerically and by social position, are the Pathans. There or a very large proportion of the land in the administered districts and are the ruling the of the tribularies to the west. There is a long list of Pathan, Baluch, Rajput and other triba. divisions. Gurkins have recently settled in the Province. The Mahomedan tribes constitute almost the whole population. Hindus amounting to only 5 per cent of the total and Sikhs to a few thousands The occupational cleavage of the population confuses ethnical divisions

(Under the North-West Frontier Province Law and Justice Regulation of 1901), custom governs all questions regarding successions, betrothal, marriage, divorce, the separate property of women, dower, wills, gifts, partitions, family relations such as adoption and guardianship, and religious usages and insti-tutions, provided that the custom be not con-trary to justice, equity or good conscience. In these matters the Wohammadan Law where the part es are Mohammadans, and Hindu Lan where the parties are Hindus, is applied in so far as that law has not been altered or abolised by any legislative enactment and is not opposed to the provisions of the linguittion and has moreover not been modified by any custom

#### Climate. Flora and Fauns.

The climatic conditions of the N-W I P which is mainly the mountainous region, but includes the Peshavar Valles and the riverine tracts of the Indus in Dera Ismail Khan Dis-trict, are extremely diversified. The latter district is one of the hottest areas of the Indian continent, while on the mount in ranges the weather is temperate in summer and inten-ils cold in winter. The air is generally dry and two wet seasons, one the S-W. Monsoon season when moisture is brought up from the Arabian Sea and the Bay of Bengal the other in winter when storms from Mesopo-Province has tamia, Persia and the Casplan Districts bring widespread rain and enowfall Both source of supply are precarious and not infrequently either the winter or the summer rainfall ful-almost entirely. The following description of the Daman, the high ground above the Indis stretching across Dera Ismail Khan to the mountains on the west, occurs in an account written some years ago by Captain Cross lewritten. "Men drink once a day and the cattle every second day. Washing is an impact library.

It is possible in the howerther to ride thirty miles and petther is at a dog bark nor see the smoke of a single fac." With the exception of the Kunhar Pisce, In Hazara, which flows into the Ju han, the whole territors drains into the Index The flora of the Province spries from the sixulity jungle of the south-eastern plains to lair n hills, pine forests and fertile mount in valit Tigers used to abound in the forests let. now quite extinct, leopards liveras a liveraches and foxes are the clinif corning.

. The districts under the Deputy Commissioners are divided into from two to five subcollectorates in charge of tabsildars, who are invested with criminal and civil and revenue powers, and are assisted by naib-tabsildars, who exercise only criminal and revenue powers. Some sub-divisions are in charge of Assistant or Extra Assistant Commissioners. The village community characteristic of some parts of India is not indigenous among the Pathans Its place as a social unit is to some extent taken by the tribe, which is held together by the ties of kinship and ancient ancestry, real or imagi-nary. Modern municipal local government has been introduced in the towns. There are also district boards. The district is the unit for police, medical and educational administration and the ordinary staff includes a District Superintendent of Police, a Civil Surgeon, the Superintendent of Jail and a District Inspector of Schools The Province forms a single educational circle and only possesses are forest division that of Horzag Tha one forest division, that of Hazara P W D. of the Province carries out duties connected with both Irrigation and Buildings & Roads It is organised in two circles (in all seven Divisions) under a Chief Engineer, P. W. D. who is also exoffice Secretary to H. E. the Governor in Council. The administration of the civil police force of the districts is vested in an inspector-General There is a special special torce of Frontier Constabulary Of the Agencies only Kurram and Tochi Valley pay land eevenue to the British Government The revenue administration of all five administried districts is controlled by the Revenue and Divisional Commissioner For the administnation of civil and criminal justice there are two Civil and Sessions districts, each presided over by a District and Sessions Judge The two Judicial Commissioners are the controlling authority in the Judicial branch of the administration, and their Courts are the highest criminal and appellate tribunals in this Province The improvements needed to bring the judicial administration up-to-date, in accord with the growth of the business of administra-tion, are dealt with in the Inquiry Committee's report to which reference was made above

A Governor's Province —In January 1932 it was announced that the Province would be constituted as a Governor's Province, and the application to the Province of the provisions of the Government of India Act was gazetted, subject to the following modifications -

(a) that the number of members of the Legislative Council shall be forty,
(b) that the maximum annual salary of the Governor shall be Rs 66,000, and of a member of the Executive Council Rs. 42,000, and

(c) that Section 58 of the said Act shall cease to have effect in its application to the Province This notification shall have effect from such date or dates in respect of any or all provisions as may be notified

Electoral rules were notified in February 1932

#### FINANCES.

In order to meet the excess in expenditure over the income of the Provinces a subventure of Rs one erore per annum is given by the Government of India out of Central Revenues The Administration.

The principal officers in the present Administration are -

E the Governor and Agent to the Governor-General—H E Lieut -Col Sir Ralph Griffith, KCSI, CIE (Assumed charge 18th April 1932)

Private Secretary-Captain L. M Barlow, M. C. Arde-de-Camp-Lieut R Richards, R A

northern and eastern borders, comprises an area of some 67-834 square miles. It includes the Assam Valley Division, the Surma Valley and Hill Division and the State of Manipur It owes its importance to its situation on the north-east frontier of India It is surrounded by mountainous ranges on three sides while on the fourth (the west) lies the Province of Bengal on to the plains of which debouch the two valleys of the Brahmaputra and the Surma which form the plains of Assam These two which form the plains of Assam These two valleys are separated from each other by the Assam Range, which projects westward from the hills on the eastern border.

Population.

The total population of the Province in 1931 was 9,247,857, of whom 445,606 were in Manipur Of the population in 1931, nearly 51 millions were Hindus, over 23 millions were Muslims a million belonged to tribal religions and a quarter of a million were Christians 43 per cent of the population speak Bengali, 21 per cent speak Assamese other languages spoken in the province are Hindi, Uriva, Mandari, Nepali and a great variety of languages classified under the general heading of the Theto Chinese languages Owing to the great areas of waste and rivers the density of the province is only 137, which compared with that of most other parts of India is low.

Agricultural Products.

It has agricultural advantages for which it would be difficult to find a parallel in any part of India, climate, soil, rainfall and river sys-tems all being alike favourable to cultivation Rice is the staple food crop, nearly 47,21,973 acres being devoted on this crop Except in the Himal ivan Terai irrigation is unnecessary. Tea and inte are the most important crops grown for The area under tea consists of 4,30,267 export Wheat and tobacco are also grown and acres about 35,485 acres are devoted to sugarcane

#### Meteorological Conditions.

Rainfall is everywhere abundant, and ranges from 23 39 to 241 76 inches The maximum is reached at Cherrapunji in the Khasi Hills, which 1 18 one of the wettest places in the world, having a raintall of 520 09 inches. The temperature ranges from 59 at Sibsagar in January to 84 8 in July Earthquakes of considerable severity , in July have taken place, by far the worst being that which occurred in 1897

### Mines and Minerals.

The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil The most extensive coal measures are in the Naga Hills and the Lakhimpur districts, where about 191,600 tons were raised in 1933 Limestone is quarried in the Khasi and Jainta Hills Petroleum is worked only in A Lakhimpur and Cachar

The Province of Assam, omitting the partly Surma This belt is traceable over a distance administered and unadministered tracts on its of some 800 miles from N E. Assam through of some 800 miles from N. E. Assam through Cachar and Chittagonz to the Arakan coast, where it has a SSE, trend

#### Manufactures and Trade.

Silk is manufactured in the Assam Valley, the weaving being done Cotton weaving is also by the women largely practised by the women, and almost every house contains a loom; the cloth is being gra-dually displaced by imported goods of finer texture and colour Tea manufacture is the most important industry of the province Boat building, brass and metal and carthenwares, and limestone burning are the other industries apart from agriculture, which itself employs about 89 per cent of the population Assam carries on a considerable trade with the adjoining foreign tribes and countries

#### Communications

Much of the trade of Assam is carried by ver The excellence of its water communicariver The excellence of its water communications makes the province less dependent upon roads than over parts of India A large fleet of steamers maintained by the India General Navigation Company and the Rivers Steam Navigation Company plies on the rivers in both Valleys An alternate day ervice of passenger-boats runs between Goalundo and Dibrugath In recent years the road system has developed There is an unmetalled truth road through the There is an unmetalled trunk road through the length of the Assam Valley and excellent metalled roads from Shillong to Gauhati and to Cherrapun-Bengal Railway, and Imphal, the capital of the Manipur State A motor road, connecting Shillong with the Surma Valley, has been completed and opened to traffic. The portion completed and opened to trailly. The portion between Jaintiapur and Sylhet is being metalled. The Government of Assam have recently launched into a large programme of road improvements but has to be postponed on account of financial depression. About 735 miles are to be bridged throughout and the surface improved by metalling and gravelling where possible. Kucha roads will be maintained by means of mechanical plant, which has proved by means of mechanical plant which has proved successful in maintaining, throughout the year, a surface fit for motor vehicles. Notor traffic has increased on all sides and the demands for better roads has been insistent. The open mileage of railway has also shown a steady improvement and several branch lines to the Assam Bengal Railway system have been added in recent years. The main Assam Bengal Rallway line runs from Chittagong Port in Bengal, through the North Cachar Hills to Tinsukin, restation on the Dibru-Sadisa Railway and connects the Surma and Brahmaputin Valleys A branch of the line runs from Badarpur to Silchar at the Eastern end of the Surma Valley and another runs through the west of the Assum Valley from Lunding to Gauhati where it effects a junction with the An account of the petroleum occurrences in Assum was recently published in the memoirs of the Geological Survey of India It states that the petroleum localities in this states that the petroleum localities in this province are confined to a curved belt of country published in the petroleum localities in this province are confined to a curved belt of country punction, clong the North I and of the Brahmaputra and putra has been of ried to traine

## THE FINANCES OF ASSAM.

In common with the other Proxinces of India, Assam secured substantial financial automater the Reform Act of 1919. The present financial position for 1911-75 is not a following table.—

#### Administration

The province of Assam was originally formed in 1874 in order to relieve the bieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1905, as the result of further deliberations, it was decided to add to the small Province of Assam the castern portion of its invieldy neighbour and to consolidate those territories under a Lieutenant-Governor The Province of Eastern Bengal and Assam as then binstituted was again broken up on the 1st of 1pril, 1912, the Eastern Bengal Districts for united with the Bengal Commissionerships of Bundwan and the Presidency to form the Iresidency of Bengal under a Governor-infouncil, Bihar, Chota-Nagpur and Orissa were armed into a separate province, while the old Province of Assam was re-constituted under 4 Chief Commissioner.

Under the Indian Reforms Act of 1919 the Rovinca was raised in status to that of administration by a Governor-in-Council and was tiereby ranked, with certain minor provinces, is suit its undeveloped character with the older raijor provinces of India.

The capital is Shillong, a town laid out with geat taste and judgment among the pine wiods on the slopes of the Shillong Range which ries to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt in a way more likely to winstand the shocks of earthquake.

Aden was the first new territory added to Supply mains for distributing water by pipe the Empire after the accession of Queen Victoria its acquisition was the outcome of an outrage committed by local Arabs upon the passengers and crew of a British Indian buggalow wrecked in the neighbourhood Negotiations having failed to secure satisfactory reparation the Government of Bombay despatched a force inder Major Baille which captured Aden on January 19th, 1839

Aden is an extinct volcano, five miles long and three broad, jutting out to sea much as dibraltar does, having a circumference of about 5 miles and connected with the mainland by narrow isthmus of flat ground. The highest eak on the wall of precipitous hills that surpunds the old Crater which constitutes Aden 1,725 feet above sea level Rugged spurs, pth valleys between, radiate from the centre b the circumference of the crater The peninas obtained by purchase in 1868 and the dioining tract of Shaikh Othman, 39 square riles in extent, was subsequently purchased then, in 1882, it was found necessary to make the square of the square novision for an overflowing population Atached to Aden is the island of Ferim, 5 square miles in extent, in the Straits of Bab-el-landeb at the entrance to the Red Sea The Hria Muria islands, which were acquired from the Sultan of Muscat in 1854, were attached to the Aden Residency until 1931, when they were transferred to the control of the British Resident in the Persian Gulf.

The whole extent of the Aden Settlement, initiding Aden, Little Aden, Shaikh Othman aid Perim, is approximately 80 square miles Tie 1931 census showed Aden, with Little Aden, Shaikh Othman, and Perim to have a population of 48,388 The population of Perim is 1,700 largely dependent on the Coal Depot mintained there by a commercial firm

The language of the Settlement is Arabic, by several other Asiatic tongues are spoken The population is chiefly Arab The chief mustries are salt and cigarette manufacture and dhow building The crops of the tribal low country adjoining are jowar, sesamum, a little edton, madder, a bastard saffron and, a little indgo In the hills, wheat madder fruit, cofee and a considerable quantity of wax and hotey are obtained The difficult problem of water supply has recently been solved An artesian supply of fresh water has been obtained at Sheikh Othman Early in 1924 a sart was made with a deep bore and sweet water was found at a depth of 1,545 feet The artisian flow of water now rises from this bore at 750 gallons per hour A second bore was that the first Five more bores have since bea sunk, but two bores only are in operation that the first Five more bores have since then sunk, but two bores only are in operation at present and are sufficient to meet the requirements of the public and shapping. Bore water line practically replaced condensed water ment is now responsible for the righter, and

connections to houses have been laid at Crater and several of the private houses have been connected to the mains The question of laying a separate water main to Tawahi has had the a separate water main to Laurence preliminary consideration of the Executive preliminary consideration of the Executive Drainage systems at Tawahi and Crater have been completed

Climate—The average temperature of the station is 87 degrees in the shade, the mean range being from 75 in January to 98 in June, with variations up to 102. The lulis between the monsoons in May and September are very oppressive But Aden is usually free from infectious diseases and epidemics, and the absence of vegetation, the dryness of the soil and the purity of the drinking water constitute affector assessment many maledian. tute efficient safeguards against many maladies common to tropical countries. The annual rainfall varies from 1 inch to 81 inches, with an irregular average of 3 inches.

Aden Protectorate—The principal Chiefs of the Aden hinterland are in protection treat; relations with the British Government, and relations with the British Government, and their territories and dependencies comprise the Aden Protectorate. In April 1905 an Angio-Turkish Boundary Commission signed a convention specifying a demarcated frontier between the Aden Protectorate and the (then) Turkish Yemen, stretching from Shaikh Murad, opposite Perim, to the river Bana, some 29 miles north-east of Dhala', and thence north-east to the Great Desert (Rub' al Khall) With certain modifications this frontier has been accepted by the Treaty of San's signed on 11th February 1934 as the boundary between the Aden Protectorate and the territories of the Aden Protectorate and the territories of the King of the Yemen, who became ruler of the former Turkish possessions in § W. Arabia after the conclusion of the Great War The Aden Protectorate stretches castwards to include the Hadhramaut and the territories of the Sultan of Qishn, bordering upon Oman, and comprises in all about 24,000 square miles

The Sultan of Qishn is also Sultan of Sokotra, an island about 1,382 square miles in extent lying off Cape Guardaful on the African coast. Sokotra is included in the Aden Protectorate by virtue of a treaty between the bultan and the British Government in 1886 it population is said to be about 12,000 mainly pastoral inland. and fishing on the coast The Aden Protectorate which is under the control of the Resident and Commander-in-Chief, Aden, on behalf of the Colonial Office, is not directly administered, and since the withdrawal of a small British Garrison from Dhala' in 1906 no military Posts have been maintained in tribal territory

political situation in Aden and the Aden Chief Protectorate The settlement of Aden itself remains under the Government of India The financial settlement required by this division C of authority provides for the payment by India to Imperial Revenues of \$259,000 a year for three years and thenceforward of £150,000 a year The larger amount is considerably less than the annual expenditure falling upon Indian revenues under the former system of control

The administrative control of the Settlement of Aden was transferred from the Bombay Government on 1st April 1932, when Aden was formed into a separate province under the direct control of the Government of India.

The administration is vested in a Chief Commissioner who is also Resident and Commander-in-Cluef Since the introduction of the dual control referred to above, the Resident's post 1s to be held alternatively by an Officer of the Indian Service and a member of the Colonial Service. The District of Aden Court is the Colonial Court of Admiralty under Act XVI of 1891, and its procedure as such is regulated by the provisions of the Colonial Courts of the Admiralty Act, 1890 (53 and 54 Vic Chapter 27) The laws in force in the Settlement are generally speaking those in force in India, supplemented on certain points by special regulations to suit local conditions. The main arment of the port is under the control of a Board of Trustees formed in 1888. The principal business of the Port Trust in recent ierrs has been the deepening of the harbour so as to allow versels of large size to enter and leave at all states of the tide. The police force, consisting of land, harbour and armed police, has been reorganised.

The island of Kamaran in the Red Sea abou 200 miles north of Perim was taken by the British from the Turks in 1915, and is admir stered by the Government of India through a Civil Administrator under the control of Chief Commissioner of Aden It has an ari of 22 square miles and a population of about A quarantine station for pilgrin travelling to Mecca from the East is maintain on the island under the joint control of the Government of India and the Government in the Dutch East Indies

Civil Administrator, Captain G V Wickham

Under the new Federal constitution for In it is proposed to separate Aden from India

# The Home Government.

The Home Government of India represented for Eixty years the gradual evolu-tion of the governing board of the old East India Company. The affairs of the originally managed by the Were. Court of Directors and the General of Proprictors In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and concerns relating to the civil and military go-troment, and revenues of India By de-grees the number of the Board was reduced and it power were exercised by the President. the innul preursor of the Scentary of State for India With modifications this system insied until 1858, when the Mutmy, followed by the as umption of the Government of India by the Crown, demanded a complete change. Under the Act of 1958 (merged in the consolidating me sure passed in 1915) the Secretar, of St i'm is the constitutional adviser of the Crown on all meture relating to India. He inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors is required. The Act of 1919 greatly modified the Secret Committee in respect of the the rigidity of the law maintained for sat. covertment and revenues of India.

The Secretary of State.

Until the Reform Act of 1919 came into foce the Secretary of State had the unqualited power to give orders to every officer in Inda, including the Governor-General, and to supein tend, direct and control all acts, operation and concerns relating to the government or revenues of India In the relations of the Secretary of State with the Governor-Gental in Council no express statutory change was mac but Parliament ordained through the Select Committee that in practice the ventions governing these relations should L modified, only in exceptional circumstates should he be called upon to intervene in matter of purely Indian interest where the Gov . . . . and the Legislature of India are in agreement

Of the wide powers and duties still vestel is the Secretary of State, many rest on his pe responsibility; others can be performed duy in consultation with his Council, and for of these the concurrence of a majority of the members of his Council voting at a is required. The Act of 1919 greatly modifi-the rigidity of the law majority of art. years as to the relations of the Secretary

State with his Council, and he has fuller power, than in the past to prescribe the manner in which business is to be transacted In practice the Council meets weekly in vacation periods) this has ceased to Though (save to be a statutory requirement, the law now providing that there shall be a meeting at least once in every month

### The India Council

The number of members of the Council was reduced by the Act to not less than eight and not more than 12, the Secretary of State being free to appoint within those limits The period of office was reduced from 7 to 5 years, though the Secretary of State may, for special reasons of public advantage to be communicated to Parliament, re-appoint a member for another Half the Council must be persons five years who have served or resided in India for at least ten years, and who have not left India more than five years before their appointment. The Act restored the old salary of £1,200, with an additional subsistence allowance of £600 for any member who was at the time of appointment domiciled in India Lord Morley opened the door of the Council to Indians, and since 1917 the number of Indian members has been three.

Associated with the Secretary of State, and the India Council is a Secretarity of States and India Office, housed at Whitehall Appointments to the establishment are made by the Secretary of State in Council, and are subject to the ordinary Home Civil Service rules in all respects.

In the past the whole cost of the India Office has been borne by the revenues of India, except that the Home Government made certain grants and remissions in lieu of a direct contribution amounting to £50,000 a year The total cost now is about £230,000 In conformity with the spirit of the 1919 Act, an arrangement was made wherely the salary of the Secretary of State is placed on the Home estimates and most of the outlay needed for the controlling and political functions exercised in Whitehall is met from British revenues, agency functions being still chargeable to Indian revenues The contribution from the Treasury to India Office administrative expenses is about £115,000.

### The High Commissionership.

financial readjustment was pauled by a highly important administrative change provided for by the Act. in the creation of a High Commissioner for India in the United Kingdom with necessary establishments October 1st, 1920, the High Commissioner took over control of the purchase of Government stores in England and the Indian Stu-Assistant Private Secretary. L W N Hill in dents Branch, together with the supervision of Parliamentary Private Secretary. C M Public dents Branch, together with the supervision of Parliamentary Frital Secretary of the Work of the Indian Trade Commissioner | M P

The further development of the functions | Polytical A-D-C. to the Secretary of Streend powers of the High Commissioner have; Lieut-Col W G Neule, CIF included such agency work as the parament of Civil leave allowances and pensions the recruit ment of technical officers, supervision of I C S | Frivale Secretary to Pennicul Ci i f Secretary and Forest productioner after first appending of Size I I Triphull ment, the making of arrangements for officers | Privale Secretary to Parly. Ci i f Secretary of State Secretary of Size I F Triphull ment, the making of arrangements for officers | Privale Secretary to Parly. Ci i f Secretary of Size Secretary of

of destitute lascare, sale of Government India publications, etc The staff of the Stores Department is located at the Depot off the Thames in Belvedere Road, Lambeth The High Commissioner and the rest of the staff, are at India House, Aldwich, W. (2, built to the designs of Sir Herbert Baker at 7 cost for construction and equipment of £324,000 There could be no question of idorting tinctly Oriental style for the exterior, but there are enough Indian features of ornamentation to proclaim the Eastern association of the place Moreover the Dalibition Hall (typically India) in design) has five windows on two sides for display specimens of the arts, craft and commerce of India

Parliament set up in 1920 a Joint Standing Committee consisting of eleven members of each House to keep Parliament in closer touch with Indian affairs but the system has not flourished in the last few years.

# The Indian States.

The area enclosed within the boundaries of of Benares, the great taluquar of Oudh, was India is 1,773,168 square miles, with a population of 352,837,778 of people—nearly one-fifth sessions. On many occasions the Govern-bf the human race. But of this total a very ment of India has had to intervene, to prelarge part is not under British Administration The area covered in the Indian States is 675,267 square miles with a population of 81,310,845 The Indian States embrace the widest variety of country and jurisdiction They for intervention passed. Almost all states vary in size from petty states like Lawa, in possess the right of adoption in default of Rajputana, with an area of 19 square miles, heirs talputana, with an area of 19 square miles, and the Simia Hill States, which are little more than small holdings, to States like Hyderabad, as large as Italy; with a population of over fourteen millions. They include the inhospitable regions of Western Rajputana, Baroda, part of the Garden of India, Mysore, rich in agricultural wealth, and Kashmir, one of the inpost favoured spots on the face of the most favoured spots on the face of globe.

### Relations with the Paramount Power.

So diverse are the conditions under which the Indian States were established and came into political relation with the Government of India, that it is impossible even to summarise them. But broadly it may be said that as the British boundaries expanded, the states came under the influence of the Government and the rulers were confirmed in their posses-To this general policy however there was, for a brief period, an important departure the regime of Lord Dalhousie the Government introduced what was called annexation through lapse That is to say, when there was no direct heir, the Government considered whether public interests would be secured by granting the right of adoption Through the application of this policy, the states of Satara and of Kagpur fell in to the East India Company, and the kingdom of Oudh was annexed because of the gross misgovern ment of its rulers. Then came the Mutiny It was followed by the transference of the dominions of the East India Company to the Crown, and an irrevocable declaration of policy toward the Indian States. In the historic Proclamation of Queen Victoria it was set out that "We desire no extension of our present, territorial possessions; and while we will permit no aggression on our dominions or our rights to be afternated with immunity we shall was annexed because of the gross misgovern rights to be attempted with impunit, we shall allow no encroachments on those of others We shall respect the rights, dignity and honour of the Native Princes as our own; and we desire that they, as well as our own subjects, should enjoy that prosperity and that social advancement which can only be secured by internal peace and good government. Since internal peace and good government." Since the issue of that proclamation there has been must act so that no just cause of offere is no encroachment on the area under Indian rule by the Government of India On the contrary, the movement has been in the opposite direction. In 1881 the State of Mysore, which had been o long under British administration that the traditions of Native rule is a subject to the British every question of direct contractions of Native rule is a subject to the British every question of direct contract which had been of long under British administration that the traditions of Native rule is a subject to contract the subject to the Imperial Government, their is a subject to the Parameter of were almost forgotten, was restored to the with the Imperial Government, their it is end old Hindu ruling house. In 1911 the Maharajah forces, their equipment and armament are

granted ruling powers over his extensive pos vent gross misgovernment, or to carry on the administration during a long minority, but always with the undeviating intention of restoring the territories as soon as the necessity

### Rights of Indian States.

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer. The Chiefs have, without exception, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Para-mount Power acts for them in relation to foreign Powers and other Indian States habitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India Criminals escaping to an Indian State must be handed over to it by its authorities, they cannot be arrested by the police of British India without the permission of the ruler of the State The Indian Princes have therefore a suzerain power which acts for them in all external affairs, and at the same time scrupulously respect their in ternal authority. The suzerain also intervenes when the internal peace of their territories is seriously threatened. Finally they participate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the railways, the ports, and the markets of British India Except in rare cases applied to maritime states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government.

### Obligations of Indian States.

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states; the authority of their rulers has no evistenc. out side their territories. Their subjects outside their dominions become for all interts and purposes British subjects Where for interests are concerned, the Parameunt Por er than for police, or display, or for ever r ter with the Imperial Government, their r is ery

prescribed by the Paramount Power Although noble families. The spread of higher educated and unaltered treaties declare that the tion has placed at the disposal of the Indian British Government will have no namer of States the products of the Universities. In British Government will have no namer of concern with any of a Maharajah's dependents or servants, with respect to whom the Mahaor servants, with respect to whom the Maharajah is absolute, logic and public of innon have endorsed the principle which Lord Canning set forth in his minute of 1860, that the "Government of India is not precluded from stepping in to set right such serious abuses in a Native Covernment as may threaten any part of the country with anarchy or disturb ance, nor from assuming temporary charge of a Native State when there shall be sufficient reason to do so." Of this necessity the Governmental in Council is the sole judge subject to the control of Parliament. Where the law of British India confers jurisdiction over British subjects or other specified persons in foreign territory, that power is exercised by the British courts which possess it. The subjects of European Powers and the United States are on the same footing. Where cantonments exist in an Indian State, jurisdic-States are on the same footing Where cantonments exist in an Indian State, jurisdiction both over the cantonment and the civil station is exercised by the suzerain power.

### Political Officers.

The powers of the British Government are excreised through Political Officers who, a rule, reside in the states themselves larger states the Government is represented by a Resident, in groups of states by an Agent to the Governor-General, assisted by local Residents or Political Agents These Officers form the sole channel of communication between the Indian States and the Government of India and its Foreign Department, with the officials of British India and with other indian States They are expected to advise and assist the Ruling Chiefs in any adminisand assist the Ruling Chiefs in any adminis-matrix or other matters on which they may be consulted Political Agents are similarly employed in the larger States under the Pro-ynical Governments but in the petty states scattered over British India the duties of the Agent are usually entrusted to the Collector or Commissioner in whose district they lie All questions relating to the Indian States are under the special supervision of the Su-preme Government, and in the personal charge preme Government, and in the personal charge of the Governor-General.

### Closer Partnership.

Lieuts have tended gradually to draw the Paramount Power and the Indian States into closer harmony Special care has been de voted to the education of the sons of Ruling Uniels first by the employment of tutors, and uternads by the establishment of special colleges for the purpose. These are now estion striblished at Ajmere, Rajkot, Indore and Lation of the The Impensi Cadet Corps, whose headquesters are at Dehra Dun, imparts military of integrating to the scions of the ruling chiefs and affairs

these ways there has been a steady rise in the character of the administration of the Indian States, approximating more closely to the British ideal Most of the Indian States have also come forward to bear their share in the and come forward to dear their smars in the burden of Imperial defence Following on the spontaneous offer of 'military assistance when war with Russia appeared to be inevitable over the Penjdeh incident in 1885, the states have raised a portion of their forces up to the standard of the troops in the Indian Army, These were until recently termed Imperial Service Troops, but are now designated Indian State forces they belong to the States; they are officered by Indians, but they are inspected by a regular cadre of British officers under the general direction of an Inspector-General Their numbers are approximately \$2.000 person that are result the area as the General Their numbers are approximately 22,000 men, their arms ment is the same as that of the Indian Army and they have done good service often under their own Chiefs, on the Frontier and in China, in Somaliland and in the Great War. Secure in the knowledge that the Paramount Power will be a state of the Paramount Power will be a state of the Paramount Power will be a state of the Paramount Power will be a state of the Paramount Power will be a state of the Paramount Power will be provided the Paramount Power will be provided the Paramount Power will be provided the Paramount Power will be provided the Paramount Power will be provided the Paramount Power will be provided the Paramount Power will be provided the Paramount Power will be provided the Paramount Power will be provided the Paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be provided the paramount Power will be paramount Power will be paramount Power will be paramount Power will be paramount provided the paramount Power will be pa respect their rights and privileges, the Ruling Chiefs have lost the suspicion which was common when their position was less assured, and the visits of the Plince of Wales in 1875, of the the visits of the Pince of Wales in 1875, or the Prince and Princess of Wales in 1905-06, and of the King and Queen in 1911-12 have tended to seal the devotion of the great feudatories to the Orown The improvement in the standard of native rule has also permitted the Government of India largely to reduce the degree of interference in the internal affairs of the Indian States The new policy was authoritatively laid down by Lord Minto, the then Vicerov. In a speech at Udalpur in 1909, then Viceroy, in a speech at Udaipur in 1909, when he said

"Our policy is, with rare exceptions, one of non-interference in the internal affairs of the Native States But in guaranteeing their in-ternal independence and in undertaking their protection against external aggression it naturally follows that the Imperial Government has assumed a certain degree of responsibility for the general soundness of their administra-tion and could not consent to incur the reproach of being an indirect instrument of misrule. There are also certain matters in which it is necessary for the Government of India to safeguard the interests of the community as a whole as well as those of the paramount power, such as railways, telegraphs and other services of an Imperial character But the relationship of the Supreme Government to the State is one of suzerainty The foundation stone of the whole system is the recogni-tion of identity of interests between the Imperial Government and Durbars and the minimum of interference with the latter in their own

### HYDERABAD.

The Nizam exercises full sovereignty within his dominions, grants titles and has the power of life and death over his subjects Before 1919, the Government consisted of a Prime Minister responsible to the Nizam, with Assistant Minister but an Executive Council was established which now consists of seven members A Legislative Council consisting of 20 members of whom 12 are official, 6 non-official, and 2 extraordinary, is responsible for making laws. The administration is carried on by a regular system of departments on lines similar to those followed in British India The State is divided into two Mahratwara—15 divisions—Telingana and districts and 153 Talukas Local Boards are constituted in each District and Taluka The State maintains its own currency which consists of gold and silver coins and a large note issue The rupee, known as the Osmania Sicca, etchanges with the British Indian rupee at an average ratio of 116-10-8 to 100 There is a State postal Service and stamps for internal purposes. The Nizam maintains his own army consisting of 18,418 troops of all rinks of which 11,211 are Irregular, & 7,207 are Regular troops, which includes 2 battalions for Imperial Service 1,033 strong

Finance.—Hyderabad State is by far the wealthiest of the Indian States, having a revenue in its own currency of about 82 crores, which is approximately the same as that of the Central Provinces and Behar and Orissa and double that of any other State After many vicissitudes, its inances are at present in a prosperous condition and it enjoys a large annual surplus of revenue from which a reserve of 9 crores has been built up. This is being used partly is a Sinking Fund for the redemption debt and bartly for the development or the resources of the State. The Budget estimates for the present year show a revenue of 854 79 lakhs inder service heads and an expenditure of 836 85 lakhs, inclusive of large sums set aside for development, famine insurance and debt redemption. The capital expenditure programme provides for an expenditure of 46 88 lakhs which includes 16 22 lakhs for completion of large irrigation projects and 19 63 lakhs for open line works and roud motor transport of the year opened with a cash balance of 104 64 lakhs which is expected to be about 79 65 lakhs by the end of the year. The Government loaus stand at 118/8 for long term issues

Production and Industry—The principal industry of the State is agriculture, which maintains 57 per cent of the population. The common system of land tenure is ryotwin thout 55 per cent of the total area is directly administered by the State. The rest consists of private estates of His Evalted Highness the Nilam, which comprise about one-tenth of the total area of the state, and the estates of the interest and Paigh nobles. The total land freenue is over 3 crores. The principal food crops are millet and like, the staple money-crops softon, which is grown extensively on the black cotton soils, and oil-ceds. Hydewibad is yell known for its Gaorani cotton which is the

longest stable indigenous cotton in India The total area under cotton exceeds 3½ million acres. Hyderabad possesses the most southerly of the Indian coal mines and the whole of southern India is dependent on it for such coal as is transported by rail. The chief mine is situated at Singarenl; which is not far from Bezwada junction on the Calcutta-Madras line. The chief manufacturing industry is based on the cotton produced in the State. There are a large mills in existence and others are likely to be established, while about one-third of the cloth worn in the Dominions is produced on local hand-looms. There are about 391 ginning pressing decorticating factories in the cotton tracts and also a number of tanneries and flour mills, the total number of factories (as defined in the Hyderabad Factory Act) of all kinds in the State being 419. The Shahabad Cement Co which has been established at Shahabad on the Great Indian Pennsula Railway line, not far from Wadi, supplies the whole of Southern India with cement and has at present an annual output of 109,150 tons.

Taxation — Apart from the land revenue which, as stated above, brings in about 3 21 crores, the main sources of taxation are excise and customs. The receipts from each are estimated for the present year at 170 laklis and 103 laklis respectively. After these come interest on investments (31 laklis), railways (105 laklis) and Berar rent (29 laklis). The customs revenue is derived from an ad valorum duty of 5 per cent on all imports and exports

Communications —One hundred and thirtyseven miles of broad gauge line from Bombay to Madras traverse the State; also 33 miles of metre gauge line from Masulipatam to Marmagoa At Wadi, on this section, the broad gruge 4 stem of the Nizam's State Railway takes off and run-ning east through Hyderabad City and Warangal reaches the Calcutta-Madras line at Bezwada, a total length of 352 miles From Kazipet, near Warangal on this line, a new link to Bellarshah strikes north thus providing the shortest route between Madras and Delhi From Secunderabad between Madras and Delhi From Secunderabad the metre gauge Godyeri Valley railway runs north-west for 386 miles to Manmad on the main line of the Great Indian Peninsula Railway A metre gauge line also runs south derabad through Mahbubnagar to Calcutta Secunderabad from to the border and is now linked up with Kurnool on the Madras and Southern Mahratta Railway Branch lines exist from Purns to Hingoli, Parbhani to Purli-Valinato Karipalli to Kothagudium and Vikharabad to Bidar, which list was extensed to Purli-Valinath Thus, with branch lines, there are now 805 miles of broad gauge and 656 of the metre gauge in the state The Burst Light Rullway owns a short extension from Kurdwadi on the Bombay-Madras has to Latur in Osminibad District The Mizzer's Guirmiced State Ruleas ne noved by a company antil April, 1930, when it is pur-chasel by the Merm's Government Hi road system is being repudly carrolled by Louisdine with a well-considered programs

midistration is, under the reformed constitution, granted the power of voting on the demands for grants. The Dewan is the evofficio President of both the Representative Assembly and the Legislative Council

The Legislative Council has a Public Accounts
Committee which examines the audit and
appropriation reports and brings to the notice
of the Council all deviations from the wishes
of the Council as expressed in its Budget grant

Standing Committees —With a view to enlarge the opportunities of non-official representatives of the people to influence the everyday administration of the State, three Standing Committees consisting of members of the Representative Assembly and the Legislative Council, have been formed, one in connection with Railway, Electrical, and P W Departments, the second in connection with Local Self-Government and the Departments of Medicine, Sanitation and Public Health and the third in connection with Finance and Taxation.

All the important branches of the administration are controlled by separate Heads of Departments. The combatant strength of the Military Force at the end of 1930-31 was 2,149 of which 501 were in the Mysore Lancers, 132 in the Mysore Horse, and the remaining 1,516 in the Infantry Animal Transport Corps, was replaced by the Mechanical Transport which consists of 2 lorries (six wheeler lorries) and 4 commercial lorries with the necessary staff The total annual cost is about 17 lakks of rupees The cost of the Police Administration during 1930-31 was about 19 lakis

Agriculture -Nearly three-fourths of the population are employed in agriculture, and the general system of land tenure is ryotwarl. The principal food crops are ragi, rice, jola, millets, gram and sugarcane, and the chief fibres are cotton and sun-hemp Nearly fifty thousand acres are under mulberry, the silk industry being the most profitable in Mysore next to Gold Mining The Department of Agriculture is popularising agriculture on scientific lines by means of demonstrations, investigations and experiment There are seven Government [Agricultural Farms at Hebbal, Babbur, Marthur Nagenhally, Hunsur, Mandya and the coffee ex-perimental Station at Balehonnur A live-stock section has been organised which has been taking necessary steps for the improvement of live-stock. A cattle breeding station has been established at Parvathara, analore, near Agampur in the Kadur District, with 1 sub-station at Bisur. A Serum Institute has been opened at Bangalore for the manufacture of serum and virus for against rinderpest and other as below inoculation

contagious diseases. There are 68 Vetermary Dispensaries and Hospitals in the State under the control of the Civil Vetermary Department,

Industries and Commerce—A Department of Industries and Commerce was organised in 1913 with a view to the development of Industries and Commerce in the State Its main functions are stimulating private enterprise by the offer of technical advice and other assistance for starting new industries, undertaking experimental work for pioneering industries and developing existing industries and serving as a general bureau of information in industrial and commercial matters The department has under its control the following demonstration factoriesthe Government Soap Factory, Government Porcelain Factory and the Central Industrial The Department has a well-equipped Workshop staff to undertake the drilling of boreholes for meeting the requirements of drinking water in the rural areas. Mysore is the largest producer of silk in India, and the care and development of this industry is entrusted to a Department of Sericulture in charge of a Superintendent subject to the general control of the Director of Industries and Commerce Arrangements have been made for the supply of disease-free seed and a central and five taluk popular schools have been doing good work With a view to demonstrate and impart instructions in the utilisation of the high grade silk produced in the State, Government have recently established a silk Weaving Factory and Dyeing and Imishing Works at Mysore The Sandalwood Oil Factory started on an experimental basis is now working on a commercial scale A factory is working at Mysore A large plant at a cost of more than 170 labbs of rupees has been constructed at Bhadravathi for purposes of manufacturing charcoal, pig-iron, dis-tilling wood-alcohol, and developing subsidiary industries A new pipe foundry was opened there for the manufacture of pipes which are in great demand in several towns in India A steel plant is also proposed to be installed shortly. The works are on the borders of an extensive forest area and practically at the foot of the hills containing rich deposits of Iron, manganese and bauvite, and are not far from the Gersoppa Water Falls estimated to be capable of producing 100,000 horse-power of electric energy. A Trade Commissioner in London has been appointed to look after the interest of the trade and industry of the State.

Finances—The actual total receipts and disbursements charged to Revenue for the past five years together with the revised budget estimate for 1933-34 and budget for 1934-37 were as below—

Year	:	Receipts	Disbursements	Surplus	Deficit*

Ruler—His Highness Farzandi-i-Khae-j-Dowlat-i-Englishia, Maharaja Sir Sayaji Rao III Gaekwar, Sena Khas Khel, Samsher Bahadur, GCSI., GCIE, LLD, Meharaja of Biroda Resident—Lieut-Col J L R Weir, CIF Dewan -Sir V T Krishnamachari, kt, C11

### BALUCHISTAN AGENCY.

In this Agency lies the State of Kalat with its feudatory State of Las Bela.

Kalat is bounded on the North by the Chagar district, on the Last by Sindh and the Marri-Bugti tribal territories, on the South by the Arabian Sea and on the West by Persia

The Kalat State, unlike the other Indian States, 14 a confederacy of partially independent chiefs, whose head is the Khan of Kalat \_The divisions of the State are Sarawan or the Highlands, Jhalawan or the Lowlands, Kachhi, Mekran and Kharan The inhabitants are, for the most part Muhammadans of the Sunni sect. The area is 73,278 square miles and the population 3,42,101.

of jurisdiction on the rilly as and in the Bolan Bales histan through the Political Azer' Late

The Khan is assisted in the administration of the State by a Wazir-1-Azam, at present a European Officer of the Imperial service Governor-General's Agent in Biluchistan conducts the relations between the Government of India and the Khan, and exercises general political supervision over the State. The reverve of the State is about Rs 14 5 lakhs, out of which the Khan retains a civil list of Rs 3,00,000 per I he annum The present Khan is His Highner-Begi Lieut Mir Ahmad Yar Khan Begiar He was born in 1903.

Las Bela is a small State under the suzeraint) of Kalat The Hab river for the Southern part of its course forms the Lastern boundars with Sind, and the greater part of the State consist. The relations of Kalat with the British Govern
ment are governed by the treaties of 1854 and the first miles, population 1876, by the latter of which the independence average revenue is about Re 3 8 lakis 11 of Kalat was recognized, while the Khan agreed to act in subordinate co-operation with the British Government There are also agreements 1895. The administrative control of the State in Chiefly Sunni Muhammadans. The estimated to act in subordinate co-operation with the British Government There are also agreements 1895. The administrative control of the State Constitution of the Indo-European telegraph line, the cession Governor for term and the Constitution of the Political Agent 1895. Pass, and the permanent leases of Quetta, The Jam also employ a Wazir to as is the reduced ration of the state

## RAJPUTANA AGENCY.

circle with a total area of about 133,886 square miles, which includes 21 Indian States, one chiefship, oncestate, and the small British district of Amer-Merwara. It is bounded on the west of Amer-Merwaia It is bounded on the west by Sind, on the north-west by the Punjab State of Bahawalpur, on the north and north-east by the Punjab, on the east by the United Provinces and Gwallor, while the couthern boundary runs across the central region of India in an irregular rigzag line Of the Indian States, Chiefship and estate 19 are Rajput, 2 (Blaratpur and Dholpur) are Jat, and two (Palaupur and Tonk) are Mahomedan The chief administrative control of the British district is vested ex-officio in the political officer, who holds the post of Governor-General's Agent for the supervision of the relations between the several Indian States of Rapputana and the Government of India For administrative purposes they are divided into the following groups —Bikaner and Sirohi in direct relations with the Agent to the Governor-General Eastern Rajputana Agency Governor-General Eastern Rapputana Agency 6 States (Bharatpur, Bundi, Dholpur, Jhalawar, Karanliand Kotah), Jaipur Residency 1 States Alwar, (Jaipur, Kishangarh, Tonk, Shahpura and Lawa Estate), Mewar Residency, and Southern Rajputana States Agency 4 States (Mewar, Dangarpur, Banswara and Pratabgarh and the Kushalgarh Chiefship), Western Rajputana States Residency, 4 States (Jodhpur, Jaisalmer States Residency, 4 States (Jodhpur, Jaisalmer 'alanpur and Danta,

Aravalli Hills intersect the country The tract to the northnost from end to end. est of the hills is, as a whole, sandy, ill-watered and unproductive, but improves gradually from being a mere desert in the far west to comparatively fertile lands to the north-east. To the south-east on the Aravallı Hılls lie higher and more fertile regions which contain extensive hill ranges and which are traversed by considerable TIVETS.

Communications — The total length of railways in Rajputana is 3,259 miles, of which about 1,000 are the property of the British Government, The B B & C. I. (Metre-gauge) (Government) runs from Ahmedabad to Bandikui and from there branches to Agra and Delhi Of the Indian State railways the most important are the Jodhpur and Bikaner lines from Marwar Junction to Hyderabad (Sind) and to Bikaner. A new Railway line from Manli (on the Udaipur-Chitorgarh Railway) to Marwar Junction is under construction

Inhabitants --- Over 50 per cent of the population are engaged in some form of agriculture, about 20 per cent of the total population are maintained by the preparation and supply of material substances, personal and domestic service provides employment for about 5 per cent and commerce for 21 per cent of the population The principal language is Rajastbani. Among castes and tribes, the most numerous are the Brahmans, Jats, Mahajans, Chamars,

Rapputana is the name of a great territorial position as integral families of pure descent, as a landed nobility, and as the Linemen ruling chiefs, they are also the aristocracy of India; and their social prestige may be measured by observing that there is hardly a tribe or clan (as distinguished from a cade) in India which dock not claim desee at from, or irregular connection with, one of these Raippet stacks

Udaipur State (also called Menar) was founded in about 646 A.D. The capital city is Udaipur, which is beautifully situated on the slope of a low ridge, the summit of which is crowned by His Highness the Maharana's palaces, and to the north and west, houses extend to the banks of a beautiful piece of water known as the Pichola Lake in the middle of which stand two island nalaces It is situated near the terminus of the urous Udaipur-Chittorgarh Railway, 697 miles north nars, of Bombay. His Highness Maharajadhiraj and Maharana Sir Bhupal Singhji Bahadur, G.C. S.I., Maharajadhira, Rajluts, Minas, Gujars, Binls, Malis and Balatana, Maharana Sir Bhupal Singhji Bahadur, G.C.S.I., Balais The Rajputs are, of course, the aristocracy of the country, and as such hold the land to a very large extent, either as receivers of land to a very large extent, either as receivers of rent or as cultivators. By reason of their G.C.I.E., G.C.V.O., in 1930, is the Premier Ruling

Prince of Rajputana The revoue and

Banswara State is the southernmost State of Bajoutana within the Political Agency of the Southern Rajoutana States The area of the State is 1,946 square miles and the population 2,60,670 souls. It is thus in regard to size eleventh among the States of Rajputana Banswara with Dungarpur originally formed a country known as Bagar, which was, from the beginning of the thirteenth century until about the year the Ghelot or Sishodya clan, who claimed descent from an elder branch of the family now ruling in Udappur After the death of now ruling in Udaipur After the death of Maha-Rawal Udai Singhu, the Ruler of Bagar, about 1529, his territory was divided between his two sons, Jagmal Singhi and Prithvi Rajji and the descendants of the two families are now the Rulers of Banswara and Dungarpur respectively Where the town of Banswara now stands, there was a large Bhil pal or colons under a powerful Bhil Chieftain, named Wasna, who was defeated and slain by Maharawal Jagmal Singhi about 1580 The name of Banswara is by tradition said to be a corruption of Wasnawara or the country of Wasna Others assert that the word means the country (wara) of bamboos (bans) Nearly three centuries after its foundation by Maharawal Jagmal Singhi, Maharawal Bijai Singhii an lious to get rid of the supremacy of the Mahiattas offered to become a tributary to the British Government In 1818, a definite treaty was made with his successor, Maharawal Umed Singhi Banswara successor, Maharawal Umed Singhii has been described as the most beautiful portion of Rajputana, it looks at its best just after the rains. The principal rivers are the Mahi, the Anas, the Eran, the Chap and the Haran

The present Ruler is His Highness Rayan Rai Maharaja Dhiraj Maharawalii Sahib Shree Sir Pirthi Singhii Bahadui, KCIE, who was born on July 15, 1888, and is the 21st in descent from Maharawal Jagmal Singhii His Highness was educated in the Mayo College and succeeded his father in 1914 His Highness is entitled to a salute of 15 guns The State is ruled by His Highness the Miliarawald Salub Bahadur with the assistance of the Diwan and the Home Limiter, and the Judicial and the Legislative Council, of which the Diwan is the President and the heir apparent, Maharaj Raj Kumur Salub Shri Chandraveer Singhi Salub, is Semor Member The revenue of the State is about 7 Lakhs and the expenditure is about thes ime

Dinan -Mr Nand Lil Binerjee (Actg.) Home Menister -Mr Nind Lal Binerjee

Dungarpur State, with Binswara, for-merly comprised the country called the Bazar. It was invided by the Mahrittas in 1818 with Binswara, for-It was incided by the Manistra in 1818 As in other States inhabited by hill tribes, it became necessar at an early period of British supremier to employ a military force to coerce the Bluls. The State represents the Gadi of the eldest branch of the Sisolias and dates its separate existence from about the close of the 12th Century. Samant Singh, King of Chitor, when driven away by hirtigal

of Jalor, fled to Bagar and Lilled Chor ra-unal expenditure of the State are now about Chief of Baroda, and founded the State of 80 6 lakbs. Its archeological remains are numerous, and stone inscriptions dating from the third century have been found.

Or salot, new to English and Founded the State of Baroda, and founded the State of Dungarpur The present Chief is His Highness numerous, and stone inscriptions dating from Rail Rayan Mahimahendra Maharajaniraj the third century have been found. on 7th March 1908, succeeded on 15th November 1916 and assumed charge of the administration on the 10th February 1928. No railway line crosses the territory, the nearest railway station, Udaipur, being 65 miles distant and Talad on Abmedabad side, being about 70 miles distant Revenue about 8 lakhs

Partabgarh State, also called the Kanthal, was founded in the sixteenth century State, by a descendant of Rana Mokal of Mewar. town of Partabyarh was founded in 1099 h; Partab Singh. In the time of Jaswant Singh (1775-1844), the country was overrun by the Marathas, and the Mahamwat only saved his State by agreeing to pay Holkar a tribute of Salim Shahi Rs 72,700 (which then being coined in the State Mint was legal tender throughout the surrounding Native States), in lieu of Rs 15,000 formerly paid to Delhi The first connexion of the State with the British Government was formed in 1804; but the treats then entered into was subsequently cancelled by Lord Cornwalls, and a fresh treats by which the State was taken under protection was made in 1818 The tribute to Holkaris paid was that the British Government, and in 1904 was converted to Rs 36,350 British currency. The present ruler is H14 Highness Maharawat Ram Singh Bahadur who was born in 1903 and succeeded in 1929. The State is governed by the Maharawat with the help of the Dewan, and, in judicial matters, of a Committee of members styled the Raj Sabha or State Council Revenue about 5½ lakhs; expenditure nearly 5½ lakhs. The fluancial administration is under the direct supervision of the State

Jodhpur State, is the largest in Rajput in with an irea of 36 021 square miles and a population of 2.4 millions, of which 5.5 per cent are Hindus, 8 per cent Musalmans and the rest Juins and Animists. The greater part of the country is an arid region. It improves gradually from a mere desert to comparatively firthe land as it proceeds from the West to the 1 set. The rainfall is scanty and expression. There are no perennial rivers and the supply or subscoil viter is very limited. The only important river is Luni

The Maharija of Todhpin is the head of the Rathor Clin of Rapputs and Clims descent from Rama the deffied King of Avodby. The imilitary force courses of local ness Government bound itself to be guided by levies under the control of the different chief, the advice of the British Government in regard. They are of no imilitary value.

Bhutan extends for a distance of approximately to its external relations, while the British of miles east and west along the southern Government undertook to exercise no interference in the internal administration of Blintan Tibet Mission occasion of the of 1904, the Bhotias gave strong proof of their friendly attitude Not only did they consent to the survey of a road through their country to Chumbi, but their ruler, the Tongsa Penlop, accompanied the British troops to Lhasa, and assisted in the negotiations with the Tibet in authorities For these services he was mide a K C I II , and he has since entertained the British Agent hospitably at his capital The ruler is now known as H H the Maharaja of Bhutan, Sir Uggen Wangehul, KCSI, KCII At the head of the Bhutan Government, there are nominally two suprime authorities, the Dharma Raja, known as shapting Renipoche, the spiritual head; and the Deb or Depa Raja, the temporal ruler. The Dharma Raja is regarded as a very high incornation of Buddha, far higher than the colors of the debt of the state of the st than the ordinary incornations in Tilet of which there are several hundreds. On the death of Dharma Raja a year or two is allow d to class and his reincarnation then tales place, always i

## NORTH-WEST FRONTIER STATES.

the North-West! The Indian States of Frontier Provinces are Amb, Dir, Swat and Chitral The area of the latter three is 3,000,1,800 and 4,000 square miles and population 250,000, 216,000 and 99,000 respectively

Amb — Is only a village on the western bank of the Indus in Independent Tanawala

Chitral —Runsfrom Loweral top to the south of the Hindu-Kush range in the north, and has an area of about 4,000 square miles The ruling dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with its neighbours. It was visited in 1885 by the Lockhart Mission, and in 1889, on the establishment of a political agency in Gilgit, the ruler of Chitral received an annual subsidy from the British Government That subsidy was increased two years later on condition that the ruler, Amen-ul-Mulk, accepted the advice of the British Government in all matters connected with foreign policy and frontier defence His sudden death in 1892 was followed by a dispute as to the succession The eldest son Nizam-ul-Mulk was recognised by Government, but he was mur-dered in 1895. A war was declared by Umrakhan of Jandul and Dir against the infidels and the Agent at Gilgit, who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched (April 1895) to their relief

The valleys of which the State consist are extremely fertile and continuously cultivated. The internal administration of the country is conducted by IIIs Highness Sir Shujaul-mulk, KOIL, the Mehtar of Chitral and the foreign policy is regulated by the Political Agent at Malakand.

Dir —The territories of this State, about 3,000 square miles in area, include the country drained by the Panjkora and its affluents down to the junction of the former river with the Bajaur Rud. The Nawab of Diristhe overlord of the country, exacting allegiance from the potty chiefs of the class Dir is mainly held by Yusufrai Pathans, the old non-Pathan inhabitants being now confined to the upper por-tion of the Panjkora Valley known as the

Dir Kohistan A motor roadhas been construc-ted to Dir from Malakand
Swat—The Ruler of the State, Miangul Gulshahrada Sir Abdul Wadood, K Bi , is a descendent of the famous Akhund Salubor Swit He consolidated his rule in Swat from 1917 to 1922, and was recognized by the Government of India as Wali of Swat in 1926. The area of the State is 1,800 square miles and population 216,000 The Headquarters of the State is at Saidu Sharif about 40 miles from Malakand and connected with Malakand by motor road

Political Agent for Dir, Suat and Chitral— L. W. H. D. Best, OBE, MC, ICS.

## STATES IN THE MADRAS PRESIDENCY.

Thr Madras Presidency includes Indian States covering an area of 10.644 square miles Of these, the States of Travancore and Cochin represent ancient Hindu dynastics Pudukottai is the inheritance of the chieftain called the Tondiman, Banganapalle and Sandur two petty States, of which the first is ruled by a

Name.	Area sq miles	Popula- tion,	Estimated Gross Revenue in lakhs of rupces
Travancore .	7,625	5,095,978	232 92
Cochin .	1,417	1,205,016	92 08
Pudukottai .	1,179	400,694	53 32
Banganapalle.	256	39,218	3 77
Sandur .	167	13,583	1 55

These States were brought into direct relation | with the Government of India on October 1st, 1923.

or 5,095,973 with a revenue of Rs 232.98 lakhs fixed at 8 lakhs of rupees,

bjoccupies the south-west portion of the Indian Penmsula, forming an irregular triangle with its apea at Cape Comorm The early history of Travancore is in great part traditional, but there is little doubt that H H the Maharaja is the representative of the Chera dynasty, one of the three great Hindu Lynasties which Nawab, he in the centre of two British districts. exercised sovereignty at one time in Southern India The petty chiefs, who had subsequently set up as independent rulers within the State. were all subdued, and the whole country, included within its present boundaries, was con-solidated and brought under one rule, by Maha-raja Marthanda Varma (1729-58) The English first settled at Anjengo, a few miles to the north of Trivandrum, and built a factory there in In the wars in which the East India Company were engaged in Madura and Tinnevelly, in the middle of the 18th century, the Travancore State gave assistance to the British authorities Travancore was reckoned as one of the staunchest allies of the British Power and was accordingly included in the Treaty made in 1784 between the East India Company and the Sultan of Mysore To protect the State from possible inroads by Tippu, an arrangement was come to in 1788 with the East India Company, and in 1795 a formal treaty was concluded, by which the Company agreed to protect Travan-Travancore — This State, which has an core from all foreign enemies. In 1805 the area of 7,624 84 square miles and a population annual subsidy to be paid by Trayancore was

H H the Maharaja (b 7th November 1912) ascended the massad on the 1st September 1924 During the minority the State was ruled by Her Highness Maharani Setu Takshmi Bai, 01 , aunt of the Maharaja, as Regent on his behalf His of the Maharaja, as Regent on his behair. His Highness was invested with ruling powers on the 6th November 1931. The work of legislation was entrusted to a Legislative Council established as early as 1888. The Legislature was last re-constituted in January 1933 when a bicameral body was instituted. The new Chambers, wz, the Sri Mulam Assembly and the Sri Chitra State Council have a predominant elected hopoefficial majority. Both Chambers elected non-official majority Both Chambers possess the light to vote on the annual Budget to move resolutions and ask questions Both Chambers have also the right to initiate legislation. The elections to the Assembly are based on a wide franchise Differences of opinion between the two Chambers will be settled by a Joint Committee consisting of an equal number of members selected by each Chamber are placed on a footing of complete equality with men in the matter both of franchise and membership in the Legislature

Local Self-Government on a small scale exists in the more important towns. The State supports a military force of 1,471 men Education has advanced considerably in recent years and the State takes a leading place in that respect. In the matter of female Education the State has a leading place among Indian States and the British Indian Provinces. The principal food-grain grown is rice, but the main source of agricultural wealth is the cocoanut. Other crops are pepper, areca-nut, fack-fruit, sugar-cane and tapioca. Rubber and tea are among other important products. Cotton weavmg and the making of matting from the coir are among the chief industries. The State is well provided with roads, and with a natural system of back-waters, besides canals and rivers navigable for country crafts One line of railway about one hundred miles in length cuts across the State from east to west and then runs along the Coast to the Capital More Rallway lines are in contemplation. The capital is Trivandrum

Cochin.—This State on the south-west coast of India is bounded by the Malabar District of the Madras Presidency and the State of Travancore Very little is known of its early history. According to tradition, the Rajas of Cochin hold the territory in right of descent from Cheraman nated (1806). Apart from that there is no treaty of Rerala, including Travancore and Malabar, as Viceroy of the Chola Kings about the beginning of the ninth century, and afterwards established himself as an independent Ruler. In the Portuguese were allowed to settle in what is now British Cochin and in the following year they built a fort and established commercial relations in the State. In the carlier wars with the Zamorin of Calcut, they assisted the Rajas of Cochin. The influence of the Portuguese on the west coast began to decline about production of the state is well provided with reals in the latter part of the seventeenth century, and State. the territory in right of descent from Cheraman the latter part of the seventeenth century, and State. in 1663 they were ousted from the town of Cochin by the Dutch with whom the Raja

entered into friendly relations About a century later, in 1759, when the Dutch power began to decline, the Raja was attacked by the Zamorin of Calicut, who was expelled with the active tance of the Raja of Travancore In 1776, the State was conquered by Hyder Alı, to whom it remained tributary and subordinate, and subsequently to his son, Tippu Sultan A treats was concluded in 1791 between the Raja and the East India Company, by which His Highness agreed to become tributary to the British Government for his territories which were then in the possession of Tippu, and to pay anpaida

His Highness SrigSir Rama Varmah, G C 1 7, who ascended the throne in January 1915 having demised on 25th March 1932, His Highness Siee Rama Varma who was born on 30th December 1861 succeeded to the throne and was duly installed as Maharaja on 1st June 1932 The administration is conducted under the The administration is conducted under the control of the Maharaja whose chief Minister and Executive officer is the Dewan, C G Herbert, Esq , I C s The forests of Cochin form one of its most valuable assets. They abound in teak ebony, blackwood, and other valuable trees. Rice forms the staple of cultivation Cocoanuts are largely raised in the sandy tracts and their products form the chief exports of the State Communications by road and back-waters are good, and the State owns a line of railway from Shoranore to Trnakulam, the capital of the State, and a Torest Steam Tramway used in developing the forests. The State supports a force of 111 officers and 552 men. Agent to the Governor-General—I leut-Col

D M Field

Pudukkottai -This State is bounded on the north and west by Trichinopoly, on the south by Rammad and on the east by Transor. In early times a part of the State belonged to the Chola Kings and the southern part to the Pandya Kings of Madura Relations with the English began during the Carnatic wars. During the siege of Trichinopoly by the French in 1752, the Tondiman of the time did good service to the Company's cause by sending them provisions, although his own country was on at least one occasion rayaged as a consequence of his fidelity to the English In 1756 he sent some of his troops to assist Muhammad Yusuf, the Company's sepoy commandant, in settling the Madura and Tipnevelly countries Subsequently he was of much service in the wars with Hudar All. His services were rewarded by a grant of territory subject to the conditions that the district should not be altered. nated (1806). Apart from that there is no treate

Airst to the Governor-General—I. C. 1 M 1: 11. n

Banganapalle.—This is a small State in two detached portions which in the eighteenth century passed from Hyderabad to Mysore and back again to Hyderabad The control over it was ceded to the Madris Government by the Nizam in 1800 The present ruler is Nawab Meer Fazle Ali Khan Bahadur. The chief food-grain is cholam The Nawab pays no tribute and maintains no military force The revenue of the State is over 3 lakhs. The Nawab enjoys a salute of 2 guns.

Agent to the Gorcenor-General -Lt -Col D. M. Field.

Sandur—The State is almost surrounded by the District of Bellary. The State is under the political control of the Agent to the Governor General, Magaras States. After the destruction of the Empire of Vijvanagar in 1565 the State came to be held by semi-independent chiefs under the nominal sovereignty of the Sultan of Bijapur and in 1728 one of these chiefs, a Poligar of Bedar tribe, was turned out by an ancestor of the present Raja named Siddoji Rao of the Bhosle family of the famous Mahratta Chief Sivaji, they were Senapathies of Sivaji In Siva Rao's time the State came under the Mad-

ras Government and his heirs in perpetuity with full powers. In 1876 the title of Raja was conferred on the Chief as a hereditary distinction. The present ruler is Raja Shrimant Yeshwantrao Hindurao Ghorpade who was invested with full ruling powers in February 1930.

The Raja pa's no tribute and maintains no military force. The most important staple crop is cholim. Teak and sindalwood are found in small quantities in the forests.

The minerals of the State possess unusual interest. The hematites found in it are probably the richest ore in India. An outcrop near the southern boundary forms the crust of a ridge 150 feet in height, which apparently consists entirely of pure steel grey crystalline hematite (specular iron) of intense hardness. Some of the softer ores used to be smelted, but the industry has been killed by the cheaper English iron. Manganess deposits have riso been found in three places, and during 1911 to 1914 over 223,000 tons of manganese ore were transported by one company.

Agent to the Governor-General --- It -Col D. M. Field.

## STATES OF WESTERN INDIA

Owing to the large number of States concerned and the interlacing of their territories with neighbouring British districts, the transfer of States under the Bombay Government to direct political relations with the Government of India (which was advocated in the Montagu-Chelmsford Report on the Constitutional Recorns) had been delayed. The first stage of that process, however, was carried out in October, 1924, when a new Residency was created in direct relation with the Government of India comprising the whole of the compact area making up the Kathiawar Cutch and Palanpur Agencies under the Government of Bombay.

The remaining States in the Bombry Presidency which continued to remain in political relations with the Government of Bombry were transferred to the direct control of the Government of India with effect from the 1st April 1933. The transfer necessitated recrouping not only of the remaining Bombry States but also of some of the States comprised in the Western India States Agency. All the States and Estates hitherto included in the Minhi Kantha Agency except the Danta State are now in the Western India States Agency. These and the States and Estates comprised in the Banas Kantha Agency except the Palanpur State under the Western India States Agency now form a combined Agency which is designated "Sabar Kantha Agency". The Danta State has been transferred to the Rajputana Agency, so also the Palanpur State which was in the Western India States Agency has been transferred to the Rajputana Agency.

Resident of the First Class and Agent to the Governor-General in the States of Western India —

The Honourable Mr. C. Latimer, C.S.I. CIE, I.C.S.

Judicial Commissioner in the States of Western India —D R Norman, 1 C s

Kathiawar.—Kathiawar is the peninsula lyingimmediately to the north of Gujaratin the Its extreme Bombay Presidency length is about 220 miles and its greatest breadth about 165 miles, the area being 23,445 square miles There are nearly 200 separate States in Kathiawar, which for purposes of administrative convenience is sub-divided into subordinate Agencies known as the Western and Eastern Kathiawar Agencies The Western Kathiawar Agency comprises the Halar and Sorath Prants, while the Eastern Kathuwar Agency comprises the Prants of Jhalawad and Gohelwad but in whichever of these two Agencies States with Salutes of guns are situated, they are in direct political relations with the Hon'ble the Agent to the Governor-General The history of the British connection with Kathiawar commences from Colonel Walker's settlement of 1807. 1863, the States in Kathiawar were classified into 7 classes, and although classes have since been abolished, the various jurisdictions still remained graded, as fixed in 1863.

Cutch —Before the creation in October 1924, of the Western India States Agency, the relations of the Cutch Durbar with the Bombay Government were conducted through a Political Agent in charge of the Cutch Agency, with Headquarters at Bhuj The Cutch Agency and the appointment of the Political Agent have since been aboushed and the State of Cutch is in direct relations with the Hon'ble the Agent to the Governor-General in the States of Western India

Sabar Kantha Agency.—As stated above, this is a new group comprising the States and Estates in the old Banas Kantha Agency and States and Estates in the old Yahi Kantha

Agency except the Danta State. Before the year 1925, the Banas Kantha Agency was known as the Palanpur Agency when it also comprised the First Class States of Palanpur and Radhanpur Of these two States, Palanpur is now in direct political relationship with the Government of India through the Honourable the Agent to the Governor-General in Rajputana and Radhanpur, through the Honourable the Agent to the Governor-General in the States of Western India The First Class State of Idar which was included in the old Mahi Kantha which was included in the old Mani Kantna Agency is also in direct political relationship with the Government of India through the Honourable the Agent to the Governor-General in the States of Western India, so also the full powered State of Vijayanagar The group comprising the remaining minor States, Estates and Talukas which were included in the old Banas Kantha Agency under the Western Banas Kantha Agency under the Western India States Agency and the old Mahi Kantha Agency under the Government of Bombay has been named the Sabar Kantha Agency and is in charge of a Political Agent who is subordinate to the Honourable the Agent to the Governor-General in the States of Western India

Bhavnagar -This State lies at the head and west side of the Gulf of Cambay The Gohel Rajputs, to which tribe the Ruler of Bhavnagar belongs, are said to have settled in the country about the year 1260, under Sajakji from whose three sons—Ranoji, Sarangji and Shahji—are descended respectly ely the rulers of Bhavnagar, Lathi and Palitana An intimate connexion was formed between the Bombay Government and Bhavnagar in the eighteenth century when the ruler of that State took pains to destroy the pirates which infested the neighbouring seas. The State was split up when Gujarat and Kathiawar were divided between the Peshwa and the Gaekwar, but the various claims over Bhavnagar were consolidated in the hands of the British Government in 1807 The State pays an annual tribute of Rs 1,28,060 to the British Government, Rs 3,581-8-0 as Peshkashi to Baroda, and Rs 22,858 as Zortalbi to Junagadh His Highness Maharaja Krishna Kumarsinhip succeeded to the gade on the death of his father, Maharaja Sir Bhavsinhiji, K C S I on 17th
July 1919, and was invested with full powers
on 18th April 1931 The State Council
consists of Sir Prabhashankar D Pattani,
K C.I E, as President The other members
of the Council are Dewan Bahadur T K
Trivedi and Khan Bahadur S A Goghawala, MA, LLB, Bar-at-Law One noteworthy feature in the administration is the complete separation of judicial from executive functions and the decentralisation of authority is another. The authority and powers of all the Heads of Departments have been clearly defined, and each within his own sphere is independent of the others being directly responsible to the Council

The chief products of the State are grain, cotton, sugar-cane and salt. The chief manufactures are oil, copper and briss vessels and cloth The Bhavnagar State Railway is 307 miles in length. The capital of the State is the town i Kumbhoji II, the most powerful Civif and port of Bhavagar, which has a good of the Horse, ridened the territories t and safe harbour for shipping and carried, almost their present limits by cor in the on an extensive trade as one of the principal it was left to the present tules to details

markets and harbours of export for cotton in Kathiawar. Bhavnagar supports 270 State Lancers and 250 State Infantry.

Population (in 1931) was 500,274 of whore 86 per cent were Hindus and 8 per cent Mahomedans The average income for the last five years was Rs 1,50,08,857, and the average expenditure Rs 1,20,20,099

Dhrangadhra State is a State of the First Class in Kathiawar with a population of nearly one lakh and an area of 1,167 square miles exclusive of the Dhrangadhra portion of the Runn of Cutch The ruler of Dhrangadhra is the head of the Jhala family of Rajputs, originally called the Makvanas. This Rajput clin is of great antiquity having migrated to Kathiawar from the North, establishing itself, first at Patri in the Ahmedabad District, thence moving to Halvad and finally settling in its present scat Being the guardians of the North-Lastern myrches of Kathiawar they had to suffer repeatedly from the successive inroads of the Mahomedans trom the successive inroads of the Mahomedans into that Peninsula, but after suffering the various vicissitudes of war they were confirmed in their possession of Haliad, its surrounding territories and the salt-pans attached thereto by an Imperial Filman issued by Emperor Aurangzeb. The States of Wankaner, Limbdi, Wadhwan, Chuda, Sayla and Than-Lakhtar are off shoots from Dhrangadhra. His Highness Maharana Maharana Shri Sir Ghankia majohu Maharaja Maharana Shri Sir Ghanshy umainhi, GCIE, KCSI, Maharaja Raj Saheb, is the ruler of the State and the titular head of all the Thalas The administration is conducted under the Inharaja's directions by a Council of four members, Financial, Political, Revenue and Military The soil being emmently fit for cotton cultivation, the principal crops are long Excellent building and ornamental stone is quarried from the lulls situated within the State Wadagara Salt of an excellent quality with Magnesium Chloride and other bycproducts of salt are also manufactured in the state Salt Works at Kuda which offer practically mexhaustible supplies for their manufacture To utilize these valuable resources, the State has recently built and put into operation a hug-factory in Dhrangadhra, known as the Shri Shakti Alkali Works, for the manufacture on a large scale of Soda Ash, Caustic Soda and Soda Bicarb as bye-products of alt, and these have found a ready market all over India The capital town is Dhrangadhra, a fortified town. 75 miles west of Ahmedalad.

Dhrangadhra State owns the Railway from Wadhwan Junction to Halvad, a distance of 40 miles, which is worked by the B B & C I Railway. An extension of this line to Mahaa Railway. An extension of this line to Maliya is under contemplation. A railway siding has been laid from Dhrangadhra to Kuda—a distance of 11 miles—to facilitate the salt traff c

Gondal State—The Ruling Prince of Gondal is a Rapput of the Jade je stock with the title of H. Maharaja Thakore Salie by the present Ruler being H. H. Shri Biagwat slahin, GCIF The early founder of the title kunbhoji I, had a modest estate of 20 village. State -The

its resources to the utmost, and in the words of Lord Reay, Governor of Bombay, by its "importance and advanced administration to get it recognised as a First Class State. The State pays a tribute of Rs. 1,10,721 The chief products are cotton, groundnuts and the chief manufactures grain are cotton and woollen fabrics and gold embroidery Gondal has always been preembroidery eminent amongst the States of its class for the vigour with which public works have been prosecuted, and was one of the carliest pioneers of railway enterprise in Kathiawar, having initiated the Dhasa-Dhoran line, it owns the Dhasa-Jam Jodhpur section called the Gondal Railway and manages it along with the Jetalsar-Rajkot Railway, it subsequently built the Jetalsar-Rajkot Railway in partnership with other Native States in Kathiawar There are no export and import dues, the people being free from taxes and dues Comparatively speaking Gondal stands first in Kathiawar in respect of the spread of education Compulsory female education in the State has been ordered by His Highness Rs 25 lakhs have been spent on irrigation tanks and canals, water supply and electricity to the town of Gondal The capital is Gondal, a fortified town on the line between Rankot and Jetalsar

Junagadh State — A first class State under the Western India States Agency and lies in the South-Western portion of the Kathiawar Pen-insula between 24°-44′ and 21°-53′ North latitude, 80° and 72° East longitude with the Halar division of the province as its northern boundary and Gohilwad Prant to its east. It is bounded on the south and west by the Arabian Sca State is divided into 12 Mahals It has 16 ports of which the principal are Veraval and Mangrol The principal rivers in the State are the Bhadar, Uben, Ozat, Hıran, Saraswatı, Machhundrı, Sın-gaoda, Meghal, Vrajmı, Raval and Sabli The prıncıpal town of Junagadh, which is one of the most picturesque towns in India, is situated on the slope of the Girnar and the Datar Hills, while in antiquity and historical interest it yields to none. The Upperkote or old citadel contains interesting Buddhist caves and the whole of the ditch and neighbourhood is honey-combed with caves of their remains. There are a number of fine modern buildings in the town. The famous Asoka inscription of the Buddhist time carved out on a big bolster of black granite stone is housed at the foot of the Girnar Hill, which is sacred to the Jains, the Shivaites, the Vaishnavites and other Hindus To the south-east of the Girnar Hill lies the extensive forest of the Gir comprising 494 square miles, 823 acres and 10 gunthas It supplies timber and other natural products to the residents of the State and the neighbouring districts and is unique as the sole stronghold of the Indian The area of the State is 3,337 square miles and the average revenue amounts to about Rs 84,00,000 The total population according to the census of 1931 is 545,152 Until 1472 when it was conquered by Sultan Mahomed Begra of Ahmedabad Junagadh was a Rajput State ruled by Chiefs of the Chuda Sama tribe During the reign of the Emperor Akbar it became a dependency of Delhi under the immediate authority of the Moghal Viceroy of Gujarat. 'About'

1735 when the representatives of the Moghals had lost his authority in Gujarat, Sherkhan Bubi, the ancestor of the present Babi Ruler, expelled the Moghal Governor, and established this own rule. The ruler of Junagadh first entered into engagements with the British Government in 1807. The principal articles of production in the State are cotton, bajri, juwar, sesamum, wheat, rice, sugarcane, cereals, grass, timber, stone, castor-seed, fish, country tobacco, groundnuts, cocoanuts, bamboos, etc, while those of manufacture are ghee, molasses, sugar candy, copper, and brassware, dyed cloth, candy, copper, and brassware, gold and silver embroidery, pottery, hardware, leather, hamboo furniture, etc. The State pays a tribute of Rs 28,394 annually to the Paramount Power and Poshkashi of Rs 37,210 to His Highness the Gackwar on the other hand, the State of Junagadh receives a tribute styled Zortalbi amounting to Rs 02,421 from not less than 134 States and Talukas, a relic of the day of Mahomedan supremacy The State mainof Mahomedan supremacy tains State forces consisting of Lancers and the Mahabat Khanji Infantry, the sauctioned strength of the former being 173 and of the latter 219 inclusive of Bag-pipe Band

The Ruler bears the title of Nawab. The present Nawab is His Highness Sir Mahabat Khar III, Goir, Kosi, and is the ninth in succession and seventh in descent from His Highnes Bahadurkhanji I, the founder of the Babi Family of Junagadh in 1735 AD His High ness the Nawab Saheb was born on 2nd Augus 1900 and succeeded to the gadi in 1911, visite England in 1913-14 received his education at the Mayo College, Ajmer, and has been invested with full powers since March 1920. His High ness the Nawab Saheb is the Ruler of the Premier State in Kathiawar, ranks first amongst the Chiefs of Kathiawar, exercising plenary power and enjoys a salute of 15 guns personal, 12 permanent and 15 local within the territoria limits of the Junagadh State. Maharaja Manikya Bir Bikram Kishore Deb | inhabitants to serious disorders and attacks Barman Bahadur, who is a Kshatrija by caste and comes of the Lunar race He was born on and comes of the Lunar race ne was both 19th August 1908 and he is entitled to a salute of 13 guns. He succeeded the late Maharaja Manikya Birendra Kishore Deb 18th August 1923. The Barman Bahadur on 13th August 1923 The Military prestige of Tripura dates back to the fifteenth century and a mythical account of the State takes the history to an even earlier date Both as regards its constitution and its relations with the British Government, the State differs alike from the large Native States of India, and from those which are classed as tributary. Besides being the Ruler of Tripura, the Maharaja also holds a large landed property situated in the plains of the Districts of Tippera, Noakhali and Sylhet. This estate covers an area of 600 square miles, and is held to form with the State an indivisible Raj Disputes as to the right of succession have occurred on the occasion of almost every vacancy in the gade producing in times gone by disturbances and domestic wars, and exposing the

from the Kukis, who were always called in as auxiliaries by one or other of the antendra parties. The principles which govern speci-sion to the State have recently, however, are embodied in a sanad which was drawn up in 1904. The chief products of the State are ner, cotton, til, jute, tea and forest produce of various kinds, the traffic being carried chicals by water The Maharaja received full admin traine poners on 10th August 1927 Highness married the sixth drughter of the late Maharaja Sir Bhagabati Prasid Singhi Saheb Bahadur, KCIL, R.B.C., of Balarampur (Oudh) on the 16th Januar, 1929 but on her death in November, 1930, married the cldest daughter of H Maharaja Mahendra Sig Yadvendra Singh Bahadur, K O I L, Maharaja of Panna The State courts are authorised to inflict capital punishment. The capital is Agartala

Political Agent -Magistrate and Collector of Tippera (Lx-officio.)

## EASTERN STATES AGENCY.

From the 1st April 1933 the States in Bihar Nayagarh, Kilgiri, Pal-Lahara, Patha, Rurakha, and Orissa and in the Central Provinces (with the exception of Makrai) were comprised in the connected or authentic history. They were newly created Eastern States Agency and placed first inhabited by abornously races who were

newly created Eastern States Agency and placed in the political charge of an Agent to the Governor General

The names of the States are —Athgrh, Athmallik, Bamra, Baramba, Bastar, Baud, Bonat, Changbhakar, Chhuikhadan, Daspalla, Dhenkanal, Gangpur, Hindol, Jashpurr, Kalahandi, Kanker, Kawardha, Keonjir, Khandgari, Khandpari, Kharsawan, Korea, Mayurbhaj Nandgaon, Narsinghpur, Nayagarh, Nilguri, Pal-Lahara, Patna, Raigarh, Rairakhol Ranpur, Sakta, Sarangarh, Sernikela, Sonpur, Surguja, Talcher, Tigiria, and Udaipur

The total area is 59,680 square miles and the same of Mayurbhan over 1,300 years ago, and serial states of the forests on the other. In course of time their hill retreats were penetrated by Aryan adventurers who gredurily overthrew the tribal Chiefs and established them-electron the north, came to Puri on a pilgrini and remained behind to found kluzdoms and dynasties. It was thus that Jal Singh by the same of Mayurbhan over 1,300 years ago. the total population 71,08,786 The annual ruler of Mayurbhan over 1,300 years are, and the total population 71,08,786 The annual was succeeded by his eldest son, while his tribute amounting to Rs 3,85,549 to Govern-Baud and Dashalls are said to be considered. meome is Rs 1,47,07,529 These States pay a tribute amounting to Rs 3,85,549 to Government.

Khar sawan and Seraikela—The inhabitants are mostly hill-men of Kolarian or Dravidian origin The Chief of Kharsawan belongs to a junior branch of the Porahat Raja's family. The State first came under the notice of the British in 1793, when in consequence of disturbances on the frontier of the old Jungle Mahals the Thakur of Kharsawan and the Kunwar of Seraikela were compelled to enter into certain agreements relating to the treatment of fugitive rebels. The Chief is bound, when a called upon, to render service to the British Government, but he has never had to pay tribute. The Bengal Nacpur Railway runs through a part of the State The adjoining State of Seraikela is held by the elder branch of the States of Athgarh Athmalik, Ramra Rarambl, Baud, Bond, Daspalla, Dhenkand Gangpur, Hindol, Kalakhandi, Keonshare in the rester the reservance in the rester in the reservance in the rester in the reservance of the states of Athgarh Athmalik, Remnar Rarambl, Baud, Bond, Daspalla, Dhenkand for the reservance in the reservance in the reservance in the reservance in the reservance of the states of Athgarh Athmalik, Remnar Rarambl, Baud, Bond, Daspalla, Dhenkand for the reservance in the reservance in the reservance in the reservance in the reservance in the reservance of the states of Athgarh Athmalik, Remnar Rarambl, Baud, Bond, Daspalla, Dhenkand for the reservance in the reservance of the dynasties that have ruled over them, but they are made up for the most part of legend and fiction and long genealogical tables of doubtful accuracy, and contain very few features of general interest The British conquest of Orissa from the Marathas which took place in 1803, was immediately followed by the submission of ion of the tilbutary states the treaty engagements.

The States have formed the subject of frequent legislation of a special character. They were taken over from the Marathay in 1803 with the rest of Orlsen, but, as they had always been talbutary States rather than regular districts of the native Governments, they were exempted from the operation of the general regulation system. This was on the ground of expediency only and it was held that there was nothing in the nature of British relations with the proprietors that would preclude their being brought under the ordinary jurisdiction of the British Courts, if that should ever be found advisable 1n 1882 it was held that the States did not form part of British India and this was afterward accepted by the Scaletary of State

The staple crop in these States is rice. forests in them were at one time among the best timber producing tracts in India, but until 1-tely forest conservancy practically m as The States have formed the subject ևոս<u>ա</u>ն equent legislation of a special character

ne States of Bastar, Changbhakar, Chhuikha-an, Jaspur, Kanker, Kawaidha, Khuragarh, Korea, Nandgaon, Raigarh, Sakti, Sarangarh, Surguja and Udaipur are scattered round the Chhattisgaih Division in the Central Provinces to the different districts of which the majority of them were formerly attached

Bastar -This State is situated in the southeast corner of the Central Provinces In area (13,602 square mules) it is the twelfth largest State in India and is very scattered and back-A point of interest is that Bastar is the only State in India of which the Chief is a Hindu She is the last descendant of an ancient family of Lunar Rajputs, which juicd over Waringal until the Mahommedan conquest of the Decean in the 14th contury A D when the brother of the last Raja of Walangal fled into Bastar and established a kingdom there From then till the days of the Marathas the State was vutually independent, its maccessibility securing it from all but occasional raids of Maliommedan freebooters. The Bhonslas of Nagpur imposed a small tribute on Bistar in the 18th century, and at various times for delay in payment deprived it of the Sihawa tract in the Raipur district, and allowed the Raja of Jeypore in the adjacent Vizagapatam Agency of Madras to retain possession of the Kotapad tract, originally pledged to Jeypore by a Bastar Raja for assistance during family dissensions The dispute between Bastar and Jeypore over this land led to constant border disturbances, and was not finally settled till 1863, when the Government of India, while recognising Bastan's Agency Inschain, finally made the tract over to Jeypole Mi H Misra.

Marathas, ever interfered with their internal on the ground of long po seesion, on condition administration. All the States have much of payment by Jeypore of R. 3,000 tribute. of payment by Jeypore of R: 3,000 tribute, two-thirds of which was remitted from the tribute psyable by Bastar. The precent tribute paid by Bistaris Re 15,000 a scir.

On the formation of the Central Provinces Bistar was recognised as a Leulatory State. Since then the state has made steels, if slow, progress, hampered by the lunate conversation submission of ten of the tributary States the of its aboriginal population, which has from Chiefs of which were the first to enter into time to time reduced. The last redullion in 1910 was due to oppression by minor State offilial and dislike of the algorous forcet policy then under introduction. After the rebellion the under introduction Raja had his powers reduced and a series of Diwans were appointed by the Central Provinces Administration. The State has since his death continued to be under Government management owing to the minority of Militaria Profulls Kumarl Devi

Reals 11,000 square miles are covered by forest of which about 3,000 square miles are reserves. Cultivation is therefore sparse. Rive and mustard are the chief crop. There is a large export of grain, timber and minor fore-t produce, particularly myrabolams Most of the sal forest is leaved for sleeper manufacture Most of There are more than 600 miles of gravel motorable road in the State The capital, Jacdalpur, on the Indrawati river is 181 miles, by motorable road, from Raipur in the Central Provinces

Surguja — Until 1905 this was included in the Chotanagpur States of Bengul The mest important feature is the Mainput, a mignificent table lind forming the southern barrier of the State The early history of Surguja is obscure, but according to a local tradition in Palaman the present Ruling family is said to be descended from an Arksel Ruja or Pulamiu In 1758 a Maratha army overran the 5t ite and compelled its Chief to uknowledge himself a tributing of the Bhonsla Raja At the end of the eighteenth century in consequence of the Chief having aided a rebellion in Palaman against the British an expedition entered Surguja and though order was temporarily restored, disputes again broke out between the Chief and his relations, necessitating British interference Until 1818 the State continued to be the scene of constant lawle - nes; but in that your it was ceded to the British Government under the provisional agreement concluded with Mudhoil Bhon-la of Angpur, and order was soon established. The principal crops are rice and other cereals

## UNDER THE GOVERNMENT OF ASSAM.

Manipur.—The only State of importance, conferred on him. He is entitled to a sainte under the Government of Assam, is Manipur of 11 guns.

which has an area of 8,620 square miles and a population of 4,45,606 (1931 Census), of which about 58 per cent are Hindus and 85 per cent animistic hill tribes. Manipur consists of a Durbar, which consists of a President, who is animistic hill tribes. Manipur consists of a usually a member of the Indian Civil Service. great tract of mountainous country, and a valley about 50 miles long and 20 miles wide, which is shut in on every side. The State adopted Hindusm in the early eighteenth century, in the reign of Famhelba or Gharib Fawaz, who subsequently made several invasions into Burma. On the Burmese retaliating, Manipur negotiated a treaty of alliance with the British negotiated a treaty of alliance with the British in 1762. The Burmese again invaded Manipur during the first Burmese war, and on the conclusion of peace in 1826 Manipur was declared independent. The chief event in its subsequent history was the intervention of the British in 1891 to establish the claim of Kuls Chandra Singh as Maharsia, followed by the treacherous murder of the Chief Commissioner, Mr. Quinton, and the officers with him, and the withdrawal of the escort which accompanied him From 1891 to 1907 the State was administered by the Political Agent, during the minority of H H Chura Chand Singh The Raja was invested on the gadi in 1908 For his services during the War the hereditage. with ruling powers in 1907 and formally installed a Khasi State has always been of a very demo-on the gadi in 1908. For his services during eratic character, a Siem excreising but little the War the hereditary title of Maharaja was control over his people.

The administration of the State is now conducted by H. H. the Maharaja, assisted by n Durbar, which consists of a President, who is usually a member of the Indian Civil Service, his services being lent to the State by the Assam Government three ordinary and three additional members, who are all Manipurus The staple crop of the country is rice Forests of

i Brought under the Political control of the A G G Punjub States in April 1933

Bahawalpur.—A Native State in direct political relationship with the Government of India tical relationship with the Government of India through the Agent to the Governor-General, Punjab States Agency Bahawalpur is situated between the Punjab and Rajputana, Latitude 27° 41′ to 30° 22′ 16″, Long 70° 47′ to 74° 1° and bounded on the North-East by the District of Ferozepur, on the East and South by the Rajputana States of Bikaner and Jaisalmere, on the South-West by Sind, on the North-West by the Indus and Sutlej rivers. Area, 15,000 appara miles. square miles.

This State is about 300 miles in length and about 50 miles wide, is divided lengthwise into three great strips. Of these, the first is a part of the Great Indian Desert, the central track which is as barren as uplands of the Western Punjab, has however been partly rendered cap-able of cultivation by the network of Sutlej Valley Canals constructed recently, and the third a fertile alluvial tract in the river valley is called the Sind The State is a partner in the great Sutles Valley Project which is now nearing The scheme embodies four colossal completion weirs and a network of canals that are gradually but surely converting the and and bleak descrit of Cholistan into a valley of smiling field, and rich gardens. It has been estimated that the perennial and non-perennial areas to be brought under cultivation by the Project would cover 14:64 and 25 82 lakh acres of land respec-tively. The ruling family is descended from the Abbasside Khalifas of Baghdad The tribe The tribe originally came from Sind, and assumed inde-pendence during the dismemberment of the Durrant Empire in the Treaty of Lahore in 1800. Ranjit Singh was confined to the right bank

of the Sutley The first treaty with Bahawalpur was pezotiatthe directivity with Danau appear as the test with Ranut singh for regulating trains on the Indus It secured the independence of the Nawab within his own territories and opened up the trains on the Indus and Sublet During the first that the Indus and Sublet During the first that the Indus and Sublet During the first that the Indus and Sublet During the first that the Indus and Sublet During the first that the Indus and Sublet During the first that the Indus and Sublet During the first that the Indus and Sublet During the first that the Indus and Sublet During the first that Indus and Sublet During the first that Indus and Sublet During the Indus and Sublet During the Indus and Sublet During the Indus and Sublet During the Indus his own territories and opened up the traffic) Chamba—This serie is enclosed on toon the Indus and Subjet During the first west and north by Kashun, on the 12 Afghan Warthe Nawab rendered assistance to the South by the Best had recise of Konny, the

British and was rewarded by a grant of territory and life pension On his death his heir being minor for a time the administration of the State was in the hands of the British authorities,

Gurdaspur, and it is shut in on almost every side by lofty hill ranges. The whole country is mountainous and is a favourite resort of sportsmen It possesses a remarkable series of copper plate inscriptions from which its chronicle have been compiled.

Founded probably in the sixth century by Marut a Surajbansi Rajput, who built Brahmapura, the modern Barmaur, Chamba was extended by Meru Varma (680) and the town of Chamba built by Sahil Varma about 920. The State maintained its independence, until the Moghal conquest of India.

Under the Moghals it became tributary to the empire, but its internal administration was not interfered with, and it escaped almost unscathed from Sikh aggression. The State The first came under British influence in 1846 The part, west of the Ravi, was at first handed over to Kashmir, but subsequently the boundaries of the State were fixed, as they tand, and it was declared independent Kashmir. The present chief is H. H. Baja Ram Sinzh, who was born in 1890, and succeeded in 1919 The principal crops are rice, maize and millets. There are valuable forests which were partly to Government in 1864 for a term of 99 years, but the management of them has now been retreeded to the Chamba Durbar mountain ranges are rich in minerals which in little worked The principal road to Chamba town is from Pathankot, the terminus of the Amritsar Pathankot branch of the North-Western Railway. Chamba town, on the right then of the Ray, contains a number of inter-c-ting temples, of which that of Lakshmi Naman, dating possibly from the tenth cen-tury, is the most famous.

Faridkot —The ruling family of this sand, level tract of land belongs to the Sidhu-Barar clan of the Jats, and is descended from the same stock as the Paulkian houses. Their o cupation of Faridiot and Kot Kapura dates from the time of Akbar, though quarrels with the surrounling Sikh States and internal diss neigns have greatly reduced the patrimony

The present Ruling Prince, Tarzand-i-Snadat Ni-han Hazarat-1-Kaisar-1 Hind Brar Bans Raja Har India sinch Bahadur was born in 1915 and ance eded his inthat in 1919 Under the orders of the Government of India the administration of the State has been entrusted to a Connell of Administration consisting of a President, earlier B hadur Surdar Indar Singh, BA, and there in miles. The State has an area of (40 - fater miles with a population of 164,364 The Rul ris chatled to a salute of 11 guns : The Sixte lore s con-ist of State Sappers and Howerbold Proofs (Cavalry and Infantry).

principality. He was succeeded by Raja Bhag Singh, who greatly assisted Lord Lake in 1805 His grandson Raja Sangat Singh was succeeded by the nearest male collateral Raja Sarup Singh nn 1837. In the crisis of 1857 Raja Sarup Singh rendered valuable services to the British and was rewarded with a grant of nearly 600 square miles of land, known as Dadri territory. He was succeeded by his son Maharaja Raght Singh, who gave help to the British Government on the occasion of Kuka outbreak (1872) and the 2nd Afghan War (1878) The present ruler Maharaja Ranbir Singh was born in 1879, succeeded in 1887, and invested with full powers in 1899. The State rendered exemplary services in the Great European War. It supplied 8,673 men to the Indian Army and Imperial Service Troops and doubled the strength of its Imperial Service Infantry. The total contribution amounted to nearly 35 lakhs, in gifts of cash, materials, animals and loan.

His Highness enjoys a salute of 15 guns The capital is Sangrur, which is connected by State Railway with the North-Western Railway The principal executive Officer of the State 1 called Chief Minister.

Ruler.—Colonel His Highness Farzand-i Dilband Rasikh-ul-Itikad, Daulat-1-Inglish Raja-1-Rajgan Maharaja Sir Ranbir Singi Rajendra Bahadur, G.O I E , K C.S I., etc

Kapurthala -This State consists of three detached pieces of territory in the great plan of the Juliundur Doab The ancestors of th ruler of Kapurthala at one time held possession both in the Cis and Trans-Sutlej and also in the Bari Doab In the latter lies the village of Ahl whence the family springs, and from which it takes the name of Ahluwalia When the Ju lundur Doab came under the dominion of th British Government in 1846, the estates nort of the Sutlej were maintained in the independer possession of the Kapurthala Ruler, condition on his paying a commutation in each for militar service engagements by which he had previous been bound to Maharaja Ranjıt Singh, Lahore This annual tribute of Rs. 1,31,000 year was remitted by the Government of India perpetuity in (1924) in recognition of the splend! war record and uniformly efficient administration or the State. The Barr Doab estates are help the head of the House as a jaghir in perp tuity, the civil and police jurisdiction remainis in the hands of the British authorities. It good services during the Mutiny, the present Maharaja's grandfather was rewarded with grant of other estates in Oudh, which yields large annual income equal to those of Kapurth State The present Ruler's titles are Col I H. I arzana-I-Dilband Rasikhul-Itikad Daule I-Inglishia Raja-I-Rajagan Maharaja Jagrif Sinch Bahadur Maharaja of Kapurthala, G C d (1911), GCIF. (1918), GBP (1927) who we born on 24th November 1872 and succeeded (other His Highness the late Raja-I-Raja Kharal Singh of Kapurthala in 1877 He w granted the title of Maharaja as an heredital distinction in 1911. His salute was raid to 15 guns and he was made Honorary Color of the 15th Rattrays Sikhs. The Mahar? received the Grand Cross of the Legs d'Honneur from the French Government? from 1705, research Pola Grist Singh, the maternal received the Grand Cross of the Legistary of the farmer singh, and great d'Honneur from the French Government grant of the farmer Print creath-both his 1924, and possesses also the Grand Cross of the

Order of Carlos 3rd, of Spain, Grand Cross of the Order of the Star of Roumania, Grand Cross of the Order Menelek of Abyssinia, Grand Cordon of the Order of the Nile of Egypt, Grand Cordon of the Order of Morocco, Grand Cordon of the Order of Morocco, Grand Cordon of the Order of Tunis, Grand Cross of the Order of Chili, Grand Cross of the Order of Chili, Grand Cross of the Order of Chili, Grand Cross of the Order of Cuba, represented Indian Princes and India on the League of Nations in 1926, 1927 and 1929, celebrated the Golden Jubilee of his reign in December 1927 with great eclat, when Their Excellencies the Viceroy and Lady Irwin, the Commanderin-Chief in India and Lady Birdwood, Governor of the Punjab and Lady Hailey, Their Highnesses the Maharajas of Jammu and Kashmir, Bikaner Patiala, Jamnagar, Alwar, Bharatpur, Rajpipla, Mandi, the Nawabs of Palanpur, Malerkotla, Loharu and the Raja of Kalsia were present, besides a very large and distinguished gathering of European and Indian guests.

The rulers of Kapurthala are Rajput Sikh, and claim descent from Rana Kapur, a distinguished member of the Rajput House of Jasaimer. Only a small proportion of the population however are Sikhs, the majority being Mahomedans. The chief crops are wheat, gram, maize, cotton and sugarcane. The town of Sultanpur in this State is famous for handprinted cloths. Phagwara is another important town in the State and is very prosperous on account of its gram markets and factories for manufacture of agricultural implements, and metallic utensils of household use. The situation of this town on the main railway line and the consequent facilities of export and import make its importance still greater and this is the chief commercial town in the State. The main line of the North-Western Railway passes through part of the State and the Grand Trunk Road mins parallel to it. A branch railway from Jullundur City to Ferozepur passes through the capital. The Imperial Service and local troops of the State have been re-organized and are now designated as Kapurthala State Forces. The State Troops, the strength of which was raised during the Great War, to carly 2,000, served the Empire in that crisis in East Africa, Mesopotamia and on the lifehan Fronter Primary education is free throughout the State, and it spends a large proportion of its revenues on its Education Repartment. The State also possesses a Legislative Assembly which was created by the present Maharaja on the occasion of the Silver Tabilee of his reign in 1916. The capital is Kapurthala which has been embellished by the present Maharaja with a Palace of remarkable beauty and grandeur and with various buildings of public utility. The town boasts modern amenities such as electric light, water-works, etc.

Political Officer. The Hon'ble Agent to the Governor-General, Punjab States, Lahore.

'Malerkotla.—This State consists of a letel sandy plain unbroken by a hill or stream, bounded by the district of Ludhiana on the north, by Patiala territory on the east and south and by the Ludhiana District, Patiala and habha territories on the west. The Rulers (Nawabs) of Malerkotla are of "Eurd",

descent who came originally from the Province of "Sherwan" and settled in the town of "Sherwan" north of Persia, and after settling for a time in Afghanistan near Ghazni came to India and settled at Maler, the old capital of the State in 1442. Originally they held positions of trust under the Lodhi and Moghal Emperors. As the Moghal Empire began to sink into decay they gradually became independent. They were in constant feuds with the newly created adjacent Sikh States. After the victory of Laswan, gained by the British over Sindhia in 1803 and the subjugation and flight of Holkar in 1805, when the Nawab of Majerkotla joined the British Army, the British Government succeeded to the power of the Mahrattas in the districts between the Sutley and the Jumnia The State entered into political relations with the British Government in 1809. The present Ruler is Lt.-Col. His Highness Nawab Sir Ahmad Ali Khan, Bahadur, K O S I, K G, I I, who was born in 1881 and succeeded in 1908. He was created Hony. Major in the Indian. Army in June 1916 and promoted to the rank of Lt.-Col. in December 1919.

The chief products are cotton, sugar, poppy, anisced, mustard, alwain, methi, tobacco, garlie, onions and all sorts of grains.

The State maintains Sappers, Infantry, Cavalry and Artillery. The capital is Maler-kotla. The population of the town is 30,000. Annual revenue of the State is about 10 lakhs

Mandi is an Indian State in the Punjab Political Agency lying in the upper reaches of Bias river which drains nearly all its area Its area is 1,200 square miles and it lies between \$12-28' North Lat, and 76°-22' East Long.; and is bounded on the east by Kulu; on the south by Suket and on the north and west by Kangra It has an interesting history of considerable length which finally resulted in its entering into a treaty with the Bitish in 1846.

The present Ruler, Capt His Highness Raja Sir Jogindar Sen Bahadur, K C 5 I , assumed full powers in February 1925. His Highness married the only daughter of His Highness the Maharaja of Kapurthala.

The Mandi Hydro-Lictric Scheme was formally opened by His Lycellency the Victory in March, 1932. The principal crops are rice, maize, wheat and millet. About three-fifths of the State are occupied by forests and grazing lands. It is rich in immeral. The capital is Mandl, founded in 1527, which contains several temples and places of interest and is one of the chief marts for commerce with Ladhikh and Yarkand.

Nabha—Nabha which became a separate State in 1763 is one of the 3 Phulkan Etates—Nabha, Patial and Jind—and though second in point of population and revenue of the 3 sister States, it claims scalorly being de-corried from the eldest branch. It consists of two distinct parts the main portion comprising the other Punjab States and Districts, forms the City of Nabha and the Mazan zir of Phul

In 1930, His Highness led the Princes' delegation to the Round Table Conference He was again elected Chancellor of the Chamber of Princes in 1933

Sirmur (Nahan)—This is a hilly State in the Himalayas under the Political control of the Mon'ble the Agent to the Governor-General, Punjab States, Lahore. Its inistory is said to date from the 11th century. In the eighteenth century the State was able to repulse the Gurkha invasion, but the Gurkhas were invited to and in the suppression of an internal revolt in the State and they in turn had to be evicted by the British in 1857 the Raja rendered valuable services to the British, and during the second Afghan War he sent a contingent to the North-West Frontier. The present Prince is H. H. Maharaja Rajendra Prakash who was born in 1913 and succeeded in 1933. The main agricultural feature of the State is the recent development of the Riarda Dun, a fertile level plain which produces wheat, gram, rice, maize and other crops. The State forests are valuable and there is an iron foundry at Nahan which was started in 1867 but, being unable to compete with the imported iron, is now used for the manufacture of sugarcane arushing mills. The State supports a Corps of Sappers and Miners which served in the Great War. It was captured with General Townshend's force at Kut-1-Amara but the Corps was reconstituted and sent to service.

Khsirpur—The state of Kharpur lies in Upper Sind between 26°10° and 27°-16° North Latitude and 68°-20° and 70°-14' East I oughtude It is bounded on the East by Jodhpur and Jesselmere territories and on the North, West and South by British Districts of Sind The Chimate is similar to the rest of Sind The British Districts of Sind The Imaximum temperature in summer is 117° in the shade and the minimum in vinter 30° If the nearest hill station is Quetta, 5,500 feet above

sea level Rainfall is source, the last 13 to 15 average being 3°-50". The area of the 5' to 15 about 6,050 square miles. The population of the State according to the census of 1931 is 22.15 souls. The majority of them are cultivery of them are engaged in trade, State servers and labour. By religion they are mainly some Muslims, but the Ruler and his family and some others are Shass. Hindus form the minority community. The state's revenue from the sources calculated on the average of the pastific years amounts to 18 19,31,957. The relations of the State with the British Government are those of subordinate allumic. The State pass no tribute either to the British Government or to any other State. The language of the State is Sindhi. Urdin and English are also spoken. The chief product of the State is grain, which is cultivated on itiestion canals taking off from the Indus river at the Lloyd Barrage and to a small extent on wells. Oli-seeds, ghee, hides, tobacco, I uller's earth ("met"), carbonate of Soda ("Khiro chambo"), cotton and wool are also produced The manufactures comprise cotton, silken and woollen fabrics, lacquer work, carpots and potter;

The Ruler's full name is His Highness Mir Ah Nawaz Khan His is a Mushin 7 thou Baloch and belongs to the Shir sect He use inded the gade on the 25th Imm 1921 Provious to the accession of this family on the fall of the Kalhota dynasty of sind in 1753, the history of the State belongs to the general history of Sind. In that year Mir I itehali Khan Talpur established himself as Ruler of sind and subsequently his nephew, Mir Sorhab Khan Talpur, founded the Khairpur branch of the Lalpur family. In 1882 the individuality of the Lalpur family. In 1882 the individuality of the Khairpur State was recognized by the British Government. The Ruler is a first classification of the Significance and is entitled to a perminent sinte of the limits.

## UNDER THE GOVERNMENT OF BURMA.

The States under this Government comprise the Shan States which are included in British.

India though they do not form part of Burma proper and are not comprised in the regularly administered area of the Province and the Karenni States which are not part of British India and are not subject to any of the laws in force in the Shan States or other parts of Burma.

The Shan States comprise the two isolated States of Hsawnghsup and Singaling Hkamti in the Upper Chindwin District under the supervision of the Commissioner, Sagaing Division, the eight petty village communities under separate hereditary Chiefs known as Hkamti Long in the Myitkvina District and the two main divisions of the Shan States known as the Northern and Southern Shan States numbering six and thirty States respectively which are under the Commissioner, Federated Shan States.

Harwnghsup with an area of 529 square miles and a population of 7,230 lies between the 24th and 25th parallels of latitude and on the 95th parallel of longitude between the Chindwin river and the State of Manipur.

Singaling Hamti has an area of 983 square miles and a population of 2,157 and hes on the 96th and 90th parallels of latitude and longitude respectively.

The Hkamti Long States have an area of 200 square miles with a population of 6,349 and the between the 27th and 28th parallels of latitude on the Upper Waters of the N'Mal branch of the Irrawaddy.

The Northern Shan States (area 20,156 square miles and population 630,107) and the South in Shan States (area 36,157 square miles and population 870,230), form with the unidministered Wa States (area about 2,600 square miles) and the Karenni States, a huge triacely lang roughly between the 19th and 12sting parallels of latitude and the Orth and 102sting rapidels of longitude with its been on the plans of Burma and its apex on the Mehl one river.

The population consists chain of Surveille balong to the Surveille from of the Tun Chair fixally; the remainder belong chairs to the Wa-pulating and flor Khmer groups of the Austra Asiatic brand of the Austra

Toungoo. The largest State is Kantarawadi with an area of 8,000 square miles and a population of 30,677 and a revenue of nearly 14 lakhs of rupees, More than haif of the inhabitants are Red Kurens An Assistant Political Officer is posted at Lorkaw subject to the supervision of the Superintendent, Southern Shan States, who exercises in practice much the same control over the Chiefs as is exercised in the Shan States though nominally they are more independent than their Shan neighbours. Mineral and forest rights however in Karenni belong to the Chiefs and not to the Government. In the past substantial contribu-

tions from Provincial revenues have been made to the Karenni Chiefs for education and medical service The Chiefs are at present unwilling to surrender their special rights and join the Shan States Federation though very considerable advantages might accrue from their doing so.

The principal wealth of the country used to be in its teak timber and a large alien population was at one time supported by the timber trade. This has largely declined in the last few years and unless the Chiefs are prepared to deny themselves and close their forests they will soon disappear.

## JAMMU AND KASHMIR STATE.

The territory known generally as the Jammu and Kashmir State hes between 32° and 37° N. and 73° and 80° E. It is an almost entirely mountainous region with a strip of level land along the Punjab Border, and its mountains, valleys and lakes comprise some of the grandest scenery in the world. The State may be divided physically into three areas the upper, com-prising the area drained by the River Indus and its tributaries; the middle, drained by the Thelum and Kishenganga Rivers, and the lower area, consisting of the level strip along the southern border, and its adjacent ranges of hills The dividing lines between the three areas are The dividing lines between the three areas are the snow-bound unner and outer Himalayan ranges known as the Zonia and the Panchal The area of the State is 84,258 square miles Regunning in the south where the great plain of the Punjab ends, it extends northwards to the high Karakoram mountains "Where three Empires Meet.

Briefly described, the State comprises the valleys of the three great rivers of Northern India, viz, the upper reaches of the Chenab and the Thelum, and the middle reaches of the Indus The total population is 3,220,518 souls.

History -- Various historians and poets have left more or less trustworthy records of the history of the Valley of Kashmir and the adjacent remons In 1586 it was annexed to the Moghul Empire by Akbar Srinagar, the Capital, originally known as Pravarapura, had by then been long established though many of the fine buildings said to have been erected by early Hindu rulers had been destroyed by the Muhammadans who first ponetrated into the Valley m the fourteenth century In the reign of Sikandar, who was a contemporary of Trinerlane, a large number of Hindus was converted to Islam Juhangir did much to beautifu the Valley but after Aurunareb there was a period of disorder and decay and by the middle of the eighteenth century the Suba or Governor of Kashmir had become practically independent of Delhi Thereafter the country experienced the oppression of Afghan rule until it was recued in 1810 by an army sent by Mahraja Rapjit Singh The Sikh rule was less oppressive than that of the Afghans. The early lustors of the State as at present constituted is that of Mahraja Shri Gulab Singhii a scion of the old Ruling Kamily of Jammu who rose to eminence Valley but after Aurungreb there was a period Ruling Family of Jammu who rose to eminence in the service of Maharija Rampit Singh of Labore is pre-amountly agricultural and family of Jammu in 1820. He hold wheat Oils 122 (1921) is also from the way between the British and the let, cotton, safeot, to account of the principal of the principal fool crops are rate that it is also from the way between the British and the let, cotton, safeot, to account of the principal of the p

Sikhs, only appearing as mediator after the britle of Sobraon (1846), when the British made over to him the valley of Kashmu and certain other areas in return for his services in re-establishing His son, His Highness Maharaja Ranbir Singhu, 60 SI, 60 IE, a model Hindu and one of the staunchest allies of the British Government, ruled from 1857 to 1885. He did much to consolidate his possessions and evolve order in the frontier districts. He was succeeded by his eldest son His Highness Maharaja Sir Pratap Singhil, G 0.81, G 0.Li., G B E., who died on 23rd December 1925 and was succeeded by His Highness the present Maharaja Shri Harisinghii Bahadur,

The most notable reform effected in the State during the reign of the late Milarija was the Land Revenue Settlement originally carried out under Lawrence and revised from time to time

Administration—For some years after the accession to the gade of the late Miharaja, the administration of the State was conducted by a Council over which the Maharaja presided In 1905 this Council was abolished and the administration of the State was thenceforward carried on by His Highness the Maharaja with the help of a Chief Musician and a number of the help of a Chief Minister and a number of Ministers in charge of different portfolios. This system continued until the 21th January 1922 when an Executive Council was inaugurated. Very recently, certain modifications have been introduced in the Constitution as a result of which the contact of Ills Highness with the administration of the State has become more durect and intimate

The British Resident has his headquarters at Sringar and Sichot and there is also a l'olitical Agent at Gileit A British Officer is suptioned at Leh to assist in the supervision of 'a Central Asian Trade with India which passes through Kashmir

In the Dograf the State has splanded rasterful for the Arms which consists of 7,70° troop. Besides this, thousands of Dogras serie in the Indian Army.

Finance—The finance of position of the safe is strong. The total reviews including pair is about its 270,03,000; the chief source is in: land, forests, curroms and exci-and & ric fleur-. There is a big reserve on ling dibr

almonds and hops are also grown. Pears and apples, the principal fruits of the Valley, are exported in large quantities. The State forests are extensive and valuable The principal species of timber trees are deodar, blue pine and The most valuable forests occur in Kishtwar, Karnah and Kamraj Ilagas. A survey of the mineral resources of the State is being con-ducted under an expert. The most noteworthy of the minerals are bauvite, coal, fuller's earth, kaolino, slate, zinc, copper and tale. Gold is found in Bultistan and Glight, sapphires in Paddar, aquamatines in Skardu and lead in The silk filature in Srinagar is the largest of its kind in the world Manufacture of silk is a very ancient industry in Kashmir Zain-ul-Abidin who ruled from 1421 to 1472 is said to have imported silk weavers from Khurasan and here Woollen cloth, shawls, and wood carving of the State settled them here papier-mache The State participated in are world-famous the British Empire Exhibition of 1924 Kashmir Court was styled "The Gem of The Smaller Courts" and attracted many visitors.

Communications —Great efforts have been made and are being made towards the improvement of roads for wheeled traffic in the State. The Thelum Valley road (196 miles) which links the Kashmir Valley with the Punjab and the North-Western Frontier Province is considered to be one of the finest motorable mountain roads in the world

The Banihal Cart Road, 205 miles long, which has recently been completed, joins Kashmir with the North Western Railway system at Juning-Tawi and is also a fine motorable road.

Roads for pack animals lead from Srinagar, the summer capital of Kashmir, to the frontier districts of Gilgit and Ladakh Internal village communications have also been much improved.

The Jammu-Suchetgarh Railway, a section of the Wazirabad-Sialkot branch line of the North Western Rillway system, is the only Railway in the State. The mountainous nature of the

#### THE CHAMBER

The Narendra Mandal, or Chamber of Princes came anto existence, with the earnest co-opera-tion of a number of leading Princes themselves tion of a number of leading Frinces by Mariana a one of the results of the Report on Indian constitutional reform presented to Parliament by Mr Montagu, Secretary of State for India and H L Lord Chelmsford, Viceroy and Governor-General of India, in 1910 The proposal vas that the Chamber should exist as a permanent consultative body, with the Viceroj as President and the members composing the Chamber consisting mainly of the Princes and Chiefs having salutes, or whose member-ship might otherwise be considered desirable by the Victor. Certain smaller Chiefs were grouped and were given the privilege of nominating a member to represent them from year to year The Chamber is a recommendatory boly, which performs its functions under a constitution approved by the Secretary of State and it deals with quistions submitted to it concerning the Prino's and their rights and privileges generally and their position in imperial allair.

country has made the extension of the line into

Public Works —In 1904 a flood spill channel above Srinagar was constructed to minimise the constant danger of floods in the River Jhelum and it was hoped that the danger would be still further reduced by the carrying out of a scheme for lowering a part of the bed of the River Jhelum by dredging, which has been taken in hand. It is interesting to know that dredging operations were once before carried out in the reign of Avantivarman (A D. 855-883) by his engineer Suyya near Sopore, with the same object Good progress has been made with irrigation but the most important scheme of recent years has been the installation of a large Electric Power Station on the Jhelum River at Mahora which was completed in 1907.

Education—Of the total population of 3,259,527 excluding the frontier ilaqas where literacy is not recorded, there are 72,228 persons who are able to read and write, of whom 4,007 only are females. In other words, 26 out of every 1,000 persons aged five or more can read and write. Among males 46 in every 1,000 are literate. The number of educational institutions including two Arts Colleges and two technical institutes is 784 and is being steadily increased. In municipal areas education for boys has been made compulsory from 1929. Much progress has also been made in female education and two new girls' schools have been established during the year.

Reforms—The most important reforms connected with the present Maharaja's reign have been the establishment of an independent High Court of Judicature modelled on British High Courts and the annual summoning of representatives from the provinces as a beginning of popular institutions in the State Important legislative measures passed by His Highness' Government in recent years include the raising of the age of consent to 14 for girls and 15 for boys and the 'Agriculturists' Relief Regulation meant to cope with the problem of rural indebtedness.

### OF PRINCES.

The Chamber was formally inaugurated by HR H the Duke of Connaught on 8th February 1921 It meets regularly once a year and the agenda of subjects for discussion is framed and proposed by the Chancellor of the Chamber who at present is His Highness the Maharajah of Patiala The Chamber selects by vote its own officers, who are the Chancellor, a pro-Chancellor to act for him in his absence out of India and a Standing Committee of the Chamber. This Committee considers before the annual meetings the subjects to be discussed at them

Until 1929, the proceedings of the Chamber were considered as confidential and there was no admittance of the general public to its meetings. At the annual session in February 1929, the Princes passed a resolution by which all meetings were ordinarily made open to the public. The Chamber contains very restricted accommodation and admission has to be regulated according to the number of seats available.

## Indian States' Tribute.

Many of the States pay tribute, varying in amount according to the circumstances of each case, to the British Government. This tribute is frequently due to exchanges of territory or settlement of claims between the Governments, but is chiefly in lieu of former obligations to supply or maintain troops. The actual annual receipts in the form of tribute and contributions from Indian States are summarised in the following table. The relations of the States to one another in respect of tributes are complicated, and it would serve no useful purpose to cuter upon the question. It may, however, be mentioned that a large number of the States of Kathiawar and Gujarat pay tribute of some kind to Baroda, and that Gwalior claims tribute from some of the smaller States of Central India.

States paying tribute directly to the Government of India.

The Portuguese possessions in India, all of Diu, with two places called Gogla and Simbor, on the southern extremity of the Kathiawai All these three territories constitute Peninsula what is called the State of India.

## GOA.

Gon forms a compact block of territory surrounded by British districts Savantwadi State lies to the north of it the Arabian Sea on the west and North Kanara on the south, and the ca-tern boundary is the range of the Western Ghats, which separates it from the British dis-tricts of Belgaum and North Kanara The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 mile. The territory has a total area of 1,301 equare mile and consists of the Velhas Conquistas, or Old Conquests, comprising the island of Gon acquired by the Portuguese in 1510, and the neighbouring municipalities of Salsette, Bardez, and Mormugao acquired in 1543, and of the North Conquitat, or New Conquests, comprising the municipalities of Pernem, Sanquelim, Ponda, Quer in, Canacona, Saturi and Sanguem acquired in the latter half of the 18th century The small island of Angediva situated opposite the port of Karwar, in the British district of North Kunara, forms administratively a portion I the Canacora municipality. This was actual in 1505 The whole country is hilly, and the castern portion, the predominating place il feature being the Western Ghats, which larles bounding the country along the north-. ' and so ith-east just off westward and spread "" or the country in a succession of spurs and tile . There are several conspicuous isolated 1 1 -, of which the highest, Sonsagar, is 3,827 ice think

The country is intersected by numerous rivers to ring we-twent from the Ghats, and the principal eight which are all navigable, are in size o. sinc importance Gor po-sees a fine har-ber, form d by the promontories of Bardez and Silette. Half-way between these extre-mide has the cabo, or cape, which forms the externity of the island of Gor. This divides th whole has into two anchorages, known as are inmodating the largest shipping from Septraber to Min, but Agunda is virtually closed during the south-west monsoon, owing to the link only of a sultothe formation of sand the arms of the Mandori riser, and of the Mandori riser, and of the Mandori riser, and of the Mandori riser, and of the Mandori riser, and of the Mandori riser, and the mandoring the formation is necessarily to the mandoring the formation is necessarily to the mandoring the formation of the formation is necessarily to the mandoring the formation of the formati ent tall time and is therefore the harbour the ralls are river to the coest from the inland of Loreston Street, Abreak ater and port treets—I like the real the trade is considered. In the treets the considered in the streets of the trade from British

#### The Pcople.

The trial problem of Gownes 531,052 at the cross of Mal Take gives a density of ( \*; ".... to t' ' "'... rui, and the popula-

tion showed an increase of 9 per cent since the census ten years previously. In the Velhas Conquistas the majority of the population is In the Novas Conquistas Hindus Christian are more numerous than Christians The Moslems in the territory are numbered in a few thousands The Christians still very largely adhere to caste distinctions, claiming to be Brahmans, Chaidos and low castes, which do not intermarry The Hindus who form about one-half of the total population are largely Maritha and do not differ from those of the adjacent Konkan districts of Bombay. All classes of the people, with the exception of Europeans, use the Konkani dialect of Marathi with some admixture of Portuguese words The official language is Portuguese, which is commonly spoken in the capital and the principal towns as well as by all educated people Nearly all the Christians profess the Roman Catholic religion and are spiritually subject to an archbishop who has the titles of Primate of the East and Patriarch of the East Indies and exercises ecclesiastical jurisdiction also over a portion of British India, and the provinces of Macau (China) and Timor (Oceania), with missions in foreign countries and Mocambique (Portu-guese East Africa). The Christians of Daman and Diu are subject under a new Treaty signed and Diu are subject under a new Treaty signed in 1928 between Portugal and the Holy See to the Archbishop of Goa There are numerous churches in Goa, mostly built by the Jesuits and Franciscans prior to the extinction of the churches are in charge of secular priests. Hindus and Mahomedans now enjoy perfect freedom in religious matters and have their own places of worship In the carly days of Portugueso rule the worship of Hindu gods in public and the observance of Hindu usages were strictly forbidden and rigorously suppressed.

The Country.

A little over one-third of the entire territory of Gor is stated to be under cultivation fertility of the soil varies considerably according to quality, situation and water-supply. The Vellias Conquistas are as a rule better and more intensively cultivated than the Novas Conquis-In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying from half an acre to five or six acres The staple produce of the country is rice, of which there are two good harasts, but the quantity produced is barely suffict at to much the needs of the population for ty o-thirds of the year Next to rice, the culture of cocoanut palms is deemed most important, from the variety of uses to which the products are applied. Hilly places and inferior

soils are set apart for the cultivation of cereals and several kinds of fruits and vegetables are cultivated to an important extent. The condition of the agricultural classes in the Velhas Conquistas has improved during recent years, owing to the general rise in the prices of all classes of agricultural produce and partly to the current of emigration to British territory. There is a great shortage of agricultural labour in the Velhas Conquistas. In the summer months bands of artisans and field labourers from the adjoining British territory make their way into Bardez where the demand for labour is always keen. Stately forests are found in the Novas Conquistas. They cover an area of 116 square miles and are under conservation and yield some profit to the administration. Iron is found in parts of the territory, but has not been seriously worked. Manganese also exists and some mines are being worked at present, the ore being exported to the Continent.

#### Commerce.

In the days of its glory, Goa was the chief entrepot of commerce between East and West and was specially famous for its trade in horses with the Persian Gulf It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant

The present trade of Goa is not very large. Its imports amount to about Rs 160 lakhs and exports to about Rs. 40 lakhs The discrepancy is met from the money sent to Goa by the many emigrants who are to be found all over the world Few manufacturing industries of any moment exist and most manufactured articles in use are imported Exports chiefly consist of cocoanuts, betel nuts, mangoes and other fruits and raw produce.

A line of railway connects Mormugao with the Madras and Southern Mahratta Railway Its length from Mormugao to Castle Rock above the Ghats where it joins the British system, is 51 miles, of which 49 are in Portuguese territory. The railway is under the management of the Madras and Southern Mahratta Railway administration, and the bulk of the trade of Mormugao port is what it brings down from and takes to the interior. The telegraphs in Portuguese territories are worked as a separate system from the British. The latter, however, had an office at Nova-Goa maintained jointly by the two Governments but since 1925 the Nova-Goa office has been handed over to the Portuguese Government which now maintains and works all the telegraphs in its territories

#### Taxes and Tariffs.

The country was in a state of chronic financial equilibrium for nearly sixty years with occasional exceptions. The last war enhanced the deficits to alarming proportions and taese were met by fresh taxes and new loans. Most of the new taxes were the result of the initiative of the Governor-General Jaime de Morais, who is popularly known as the "Governor of Taxes" Only in 1927 the country experienced the jove of a balanced budget and the public servants whose salaries had always remained in arrears are now being paid regularly. There is an estimated surplus of about a lakh and a half which has been cor-marked for promoting the ipdgs-

trial progress of the country. If minicipal and national taxes be added together, the country presents a very high incidence of the country presents a very high incidence of the country presents a very high incidence of the country presents a very high incidence of the country presents a very high incidence of the caverage coming to about Rs 8.8 per cruit. There is no incometax, except for government servants, but there is a special ten per ceut tax on all incomes derived in the shape of interest on loans. Thus tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief sources of revenue are the land tax, Excise and the customs. There is a special tax on emigrants which yields to the State about Rs 60,000. The country being economically backward, the taxes give very little indication of its productive capacity or of its annual wealth. The national wealth is a matter of pure conjecture for lack of statistics.

The tanif schedule is based on the three-fold principle, fiscal, protective and preferential There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent according to the nature of the commodities, but the duties in several cases are specific, not ad valorem. This causes considerable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonics. Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent, on their basic price.

The Capital.

Nova-Goa, the present capital of Portuguese India, comprehends Panjim and Ribandar, Old Goa is some six miles distant from the new city Panjim occupies a narrow strip of land leading up to the Cabo, the cape dividing the Aguada bay from that of Mormuzao, and mainly slopes down to the edge of the Aguada. It was selected as the residence of the Portuguese Viceroy in 1739, and in 1843 it was raised to its present rank as the capital of Portuguese India. The appearance of the city, with its row of public buildings and cleant private residences, as seen from the water is very picturesque and this impression is not belied by a closer inspection of its neat and spacious roads, bordered by decent, tidy houses The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library and the Government Press Other notic able buildings are the Cathedral and various churches, the viceregal palace and the High Court. The square in the lower part of the town is adorn! with a life-sized statue of Alluquerque staning under a canopy.

Gos was captured for the Portugues? be Alfonso de Albuquerque in 1510 Albuquerque promptly fortified the place and establed. I Portuguese rule on a firm basis I rom this time Goa rapidly rose in amportance and became the metropolis of Portuguese power in the East. There was constant fighting with the armies of the Bijapur kingdom by the Portuguese held their own and gaired the farrounding territory now known as the Y in Conquistas.

The subsequent history of the town is one of ostentation and decay. Goz reached its summit of prosperity at the end of the sixteenth century. The accounts of travellers show that the Goz of those days presented a scene of military, eccleviastical and commercial magnificence which has had no parallel in the British capitals of India Portugal, however, with its three milhons of population, was too small to defend itself against Spain and maintain at the same time its immence Empire in the four Continents Albuquerque tried to consolidate Portuguese rule in India by his policy of attracting the conquered Indians and granting them civil and religious liberties His contemporaries however, could not understand his far-seeing statesmanship and after his death they unded all his work basing their dominion on conquest by the sword and mulitary force and they laboured to consolidate it by a proselytising organisation which throws all the mission-ary efforts of every other European power in India into the shade Old Goa, as the ruins of the old capital are called to-day, had a hundred churches many of them of magnificent proportions, and the Inquisition which was a power in The sixty years' subjection to Spain the land in the 17th century completed the ruin of the Portuguese Empire in the East and though the Marquis of Pombal in the 18th century tried to stave off its decadence, his subordinates in far-off India either could not understand or would not carry out his orders and even his strong hand was unable to stop the decline was in the 19th century that the colonials began to enjoy full Portuguese catizenship and sent their representatives to the Parliament in Lisbon

#### Modern Times.

There was frequently recurring fighting and in 1741 the Marathas invaded the neighbourhood or Goa and threatened the city itself of 12,000 men arrived from Portugal at the critical moment The invaders were beaten off, and the Novas Conquistas were added to the Portuguese possessions In 1844 the the Portuguese possessions In 1844 the shelter given by Goa to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bombay In 1852 the Ranes of Satar, in the Novas Conquistas, revolted In 1871 the native army in Goa mutinied and the King's own brother came from Lisbon to deal with the trouble and having done so disbanded the native army, which has never been reconstituted But another outbreak among the troops took place in 1895 and the Ranes joining them the trouble was again not quieted until the arrival of another special expedition from Lisbon. The Ranes again broke out in 1901 and again in 1912, troops being again imported to deal with the last outbreak, which was only reported concluded in the summer of There has been no outbreak after that 1913

The people on the whole appear to be quite satisfied with the Portuguese connection There is no agitation for further reforms as in British India and not a sign of disaffection against Portuguese rule This is chiefly due to the fact that under the present regime the natives of Goa enjoy complete equality with the natives of Por-

tugal, many of the sons of Goa occupying high and responsible positions in Portugal. Thus Elvino de Britto who was Minister of Public Works towards the end of the last century was a native of Goa as was the father of Dr. Bettencourt Rodrigues, Minister for Foreign Affairs in General Carmonas dictatorial Government Natives of Goa are also Dr. Almeida Arez, the President of the Supreme Court in Lisbon. Dr Caeteno Gonsalves, Judge of the same Court and Mr. Alberto Navier, Secretary-General of the Ministry of Finance

#### Administration.

The Lisbon Government by Decree No 3266, dated 27th July 1917, enacted new rules regarding the administration of Portuguese India under an Organic Charter (Carta Organica) in force since 1st July 1919 This Charter, regarding civil and financial administration of the colony, was modified by rules Nos 1005 and 1022, dated 7th and 20th August 1920, and decrees Nos 7008 and 7030 dated 9th and 16th October A new Organic Charter modifying in certain parts the carlier one was granted by Decree No 12499 of 4th October 1926 and is now in force

The territory of Portuguese India is ruled by one Governor-General, residing in the Capital of the State, at Panjim alias Nova-Goa, and is divided into three districts. Goa, Daman and Diu 'The last two are each under a Lieutenant-Governor The district of Goa is under the direct superintendency of the Governor-General

Subordinate to the Governor-General the following Secretariats are working: Home and Political, Finance, Customs, Education, Military, Kaval, Agriculture, Health and Public Works There are also three special and autonomous Departments, which do not constitute exclusive Secretariats, one of them being the Department of Posts and Telegraphs, the second that of Survey and the third that of the Fiscal of the W. I. P. Railway

As the principal organ of administration next to the Governor-General and in collaboration with him works a Governor's Council (Conselho do Governo) with Legislative and advisory powers The Council is constituted, in addition to the Governor-General, ci-officio President, of four officials (Attorney-General, the Director of Finances, the Director of Civil Administration and the Director of Public Works), five elected members (three representing Velhas Conquistas, one the Novas Conquistas and one the Districts of Daman and Diu) and five members nominated by the Governor-General to represent the minorities, agricultural, commercial and other interests and the press.

In each province of Gor, Daman and Diu, there is a District Council to supervise the Mini cipalities and other local institutions. The District Council of Goa is composed of the Director of Civil Administration, President, the Government Prosecutor of the Nova-Goa Civil Court, the Deputy Chief Health Officer; the Engineer next to the Director of Public Works; the Deputy Director of Finances; the Chairman of the Municipal Corporation of the Islands, one member elected by the Commercial and Industrial Associations of the district; one member elected by the 60 highest tax payers of Goa; one member elected by the Associations of Landres

owners and Farmers of the District, and one member advocates elected by the Legislative Council among the legally qualified.

At Daman and Diu the corresponding body is composed of the local Governor, President, the Government Prosecutor, the Chief of the Public Works Department, the Health Officer, the Financial Director of the district, the Chairman of the Municipal Corporation, two members elected by 40 highest tax payers of the District and one member elected by the Merchants, Industrialists and Farmers of the district

Under the provisions of the above quoted Decree is also officiating in the capital of Por-India a administrative tribunal to take comizance and dende all intr-grous administrative matters, fiscal questions and accounts. It is named Tribunal Adminisraturo Fiscal e de Contas and is composed of the Chief Justice as President, four High Court judges, one superior Government officer, who must be a Bachelor of Laws, nominated by the Government and a citizen, who is not an official elected by the Governor-General's Council When matters regarding finances and accounts | Ponda, Diu and Nagar-Aveli.

come up for decision and discussion the Durector of Finances also sits on this Tribunal

Under the presidency of the Governor-Ger veri the following bodies are also working -

Technical Council of Public Worls — Its members are all engineers on permanent duty in the head office, a military officer of high at rank in the army or navy, the Director of Ligarics, the Attorney-General, the Chief Health Officer and a Secretary being a clerk of the Public Works Department appointed by the Director of Public Works

Council of Public Instruction—This Council presided over by the Governor-General is com-

presided over by the Governor-General is composed of five officials the Director of Civil Administration, the Director of the Medical College, the Director of the Lyceum, the Director of the Normal School and the Inspector of Primary Schools, and four nominated members.

There is one High Court in the State of India with five Judges and one Attorney-General, and Courts of Justice at Panjim, Margao, Mapu, Bicholim, Quep m e Damio; and Municipal Courts of Justice at Mormugão (Vasco da Gama),

#### PORT OF MORMUGAO.

Mormuglo is situated towards the south of Aguada Bar, on the left Bar, on the left bank of Zuary River in Lat 15° 25'N. and Long 73° 47' E, about 225 miles south of Bombav and 62 miles south of Panjim, the Capital of Portuguese India The Port of Mormugao is the natural outlet to the sea for the whole area served by the M & S. M. By. (metre-gauge), and offers the shortest route both passenger and goods traffic. The distance from Adem to Mormugho is about the same as from Aden to Bombay The Port is provided with lighthouses, buoys and all necessary marks and it is easily accessible all the year round and at any hour of the day or night even without the assistance of a Pilot Pilotage is not compulsory, but when usual pilot fing is hoisted, a qualified officer will board the vessel and render such assistance.

Mormugio Harbour is the terminal station of the West of India Portuguese Railway which is controlled by the Madras and Southern laharatta Railway Company, with herdquarters t Madras Goods are shipped direct from Moraugão to any Continental Ports, every facility eing afforded for such direct shipments Cargo be unloaded from or loaded direct into lailway wagons, which run alongside steamers, reducing handling. Warehouses ere longside. Steumers of over 5,000 tons net egister, from any Continental Ports can be lischarged or loaded rapidly and in complete afety, in a working day of 10 hours 650 tons ron work or 800 tons bale or bag cargo can solve he loaded or discharged. The port is movided with steam cranes and all other applinees for quick loading and discharging of ressels, one of the cranes being of 30 tons apacity for discharging heavy litts. The onnage, quay dues and all other charges are large low supposed concessions. ery low, special concessions being granted or steamers arming from European or American force touching Lisbon. Fresh water can be btained at a low cost.

The Bombay Steam Navigation Company's (Shepherd) stermers between Bombay and Mangalore call at Mormugão twice a week tish India Steam Navigation Company's steamers between Bombay and Africa call at Mormug to at least once a month The Ellerman Strick I me maintains a regular service from Liverpool maintains a regular service from Liverpool to Mormugao calling occasionally at Lisbon. This service offers every facility for shipment from the United Kingdom to stations on the M & S M. Railway under the "Combined Sea and Rail Through Bills of Lading" There are several stevedoring firms, the maximum are several stevedoring firms, the maximum rate for discharging or loading coal and general cargo being fixed by Government at 6 annae per ton, deadweight Goods for British India pass through Goa without any charge being collected by Portuguese Government. British Constoms duty payable at Castle-Bock can be paid by the Railway Company and collected at destination. Goods from stations on the M. & S. M. Rv. System to Mormus or tree-term are railed without transhipment, thus avoiding a second handling Steam tugs, barges, etc., for unloading in the stream can be had at a very low charge.

With a view to promoting the economical commercial and industrial development of Mormundo, a special Department under the designation of the "Mormundo Improvement Trust" with its head office at Vesco da Giver, 2 miles from Morning to Harbour, has been created and the Local Government have introduced various regulations granting (1.7 facility to those intending to raise buildir\_s for residential and industrial profiles in the whole area, comprising about 400 error treat the Harbour There are over 2009 particular measuring between 1000 and 2009 carries metris (each square yard—0 8.331 square mere), available for residential quarters, granted or permanent least on cach payment of 2 mass to Es 1-8 per squire metre according to their situation, in addition to an annual reserved of 4 pag per square recting as leave the man

Within about 60 days from the date of application for a plot, the same is made over to the applicant or to the highest bidder, should there be more than one applicant for one and the same plot. The plan of buildings is in all cases subject to the approval of the Chairman of the Improvement Trust, such plan being required to be submitted within 60 days from the date the plot is made over to the lessee, and the period within which building is to be completed is 2 years. Importation of building materials is allowed free of Custom duties. In addition is anowed tree of custom unites. In authtom to the above, there is an extensive area available and reserved only for Industrial and Commercial Establishments this area being known as "Free Zone". Within this "Free Zone," in addition to plots, which are leased at a very low rate for building factories, bonded are very low rate for building factories, bonded are supported or for establishment of any long. warehouses or for establishment of any kind of industrial or commercial concerns, accordance with rules and regulations lately regued by the local Government, special concessions and privileges are granted, such as:

(I) For Establishment of Factories or Industral Concerns .- All machinery, building materials, tools, raw materials, etc., required for information can be obtained from the Worming construction, maintenance and regular working

The settlement of Daman lies at the encease of cultivation only one-twentieth part of trance to the Gulf of Cambay, about 100 miles territory is under tillage. The principal control of Bombay. It is composed of two portions, namely, Daman proper, lying on the coast, and the detached pargana of Nagar Aveli, and the detached pargana of Nagar Aveli, minerals. There are stately forests in Nagar Aveli, and about two-thirds of them consist territory and bisected by the B B & C. I. Railway. Daman proper contains an area of 22 source miles and 26 villages and has a population (1921) of 17,566 of whom 1,480 are Christians. The number of houses is according to the same census 4,095. Nagar Aveli has an area of 20 square miles and a population (1921) of 31,048, of whom only 271 are Christians. The number of houses is 6,069. The town of Daman was sacked by the Portuguese in 1531. The territory forms for administrative process a single district and has a Munical Chamber and Corporation. It is ruled by rebuilt by the natives and retaken by the Portuguese with both civil and militimate to the Gulf of Cambay, about 100 miles territory is under tillage. The principal civiliance to the principal civiliance to the form of houses. In Nagar Aveli, and about two-thirds of them consist teak, but the forests are not conserved and timber has not been determined. Before the cambar of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of land covered by each kind cextent of Daman was sacked by the Fortuguese in 1551; channer and corporation it is ruled by rebuilt by the natives and retaken by the Portu- Governor invested with both civil and milit guest in 1558, when they made it one of their functions, subordinate to the Governor-Gene permanent establishments in India They of Goa. #### DIU.

## FRENCH POSSESSIONS.

The French possessions in India comprise five Settlements, with certain dependent lodges, or plots They aggregate 203 square miles, and and a total population on the 26th Feb 1931 of 286,410. The first French expedition into Indian waters, with a view to open up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen, but it failed, as also did several similar attempts which followed. In 1642 Cardinal Richelieu lounded the first Campagnie d'Orient, but its efforts met with no success Colbert reconstituted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years after having twice attempted, without success, to establish itself in Madagascar, Colbert's Company again look up the idea of direct trade with India and its President, Caron, founded in 1668 the Comptoir, or agency, at Surat But on finding that city unsuited for a head establishment he seized the harbour of Trincomalee in Ceylon from the Dutch The Dutch, however, speedity retook. Trincomalee, and Caron, passing over to the Coromandel coast, in 1672, soized St Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland He was, however, compelled to restore it to the Dutch in 1674.

The rum of the Company seemed impending

The rum of the Company seemed impending when one of its agents, the celebrated Franco's Martin, suddenly restored it Rallying ander him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trincomalee and St Thome, he took up his bode at Pondicherry, then a small village, which he purchased in 1683 from the Raja of filingee. He built fortifications, and a trade began to spring up; but he was unable to hold the town against the Dutch, who wrested it from him in 1693, and held it until it was respected to the French by the Peace of Ryswick, in 1697 Pondicherry became in this year and has ever since remained, the most important of the French Settlements in India Its soundation was contemporaneous with that 51 Calcutta Like Calcutta, its site was purhased by a European Company from a native mee, and what Job Charnock was to Calcutta

hased by a European Company from a native mee, and what Job Charnock was to Calcutta ancors Martan proved to Pondicherry On restitution to the French by the Peace of swick in 1697, Martin was appointed evernor, and under his able management indicherry became an entrepot of trade

Chandernagore, in Lower Bengal, had been guired by the French Company in 1688, by ant from the Delhi Emperor, Mahé, on the alabar Coast, was obtained in 1725-6, under is government of M Lenoir, Karlkal, on the romandel Coast, under that of M. Dumas, 1739 Yanaon, on the coast of the Northern irears, was taken possession of in 1750, and smally ceded to the French two years later.

#### Administration.

The military command and administration-intic of the French possessions in India are vested a Governor, whose residence is at Pondiierry. The office is at present held by Monsieur torge Bourret (Francois-Adrien). He is assisted

by a Chief Justice and by several "Chefs de Service" in the different administrative depart-In 1879 local councils and a councilgeneral were established, the members being chosen by a sort of universal suffrage within the French territories. Seventeen Municipalities, or Communal Boards, were erected in 1907, namely, Pondicherry, Ariancoupam, Modelmrpeth, Oulgaret, Villenour, Throubouvane, Bahour and Nettapacam, for the establishment of Pondi-cherry, Karikal, Neravy, Nedouncadou, Tiru-nalar, Grande Aldée, Cocchery, for the e-tablishment of Karikal, and also Chandernagore, Mahé and Yanson. On municipal boards natives are entitled to a proportion of the seats. Civil and criminal courts, courts of first instance and a court of appeal compose the judicial machinery. The army and establishments connected with the Governor and his staff at Pondicherry, and those of administrators at Chandernagore, Yanaon, Mahe and Karikal. together with other headquarters necessarily engross a large proportion of the revenue All the state and dignity of an independent Government, with four de-pendent ones, have to be maintained. This is effected by rigid economy, and the prestige of the French Government is worthily maintained in the East. Pondicherry is also the scene of considerable religious pomp and missionary activity. It forms the seat of an Archbishop, with a body of priests for all French India; and of the Missions Etrangeres, the successors of the Mission du Carnatic founded by the Jesuits in 1776 But the chief field of this mission lies outside the French Settlements, a large proportion of its Christians are British subjects and many of the churches are in British territory. The British rupee is the ordinary tender within French territories. A line of railway running via Villenour, from Pondicherry to way running viz Villenour, from Pondicherry to Villupuram on the South Indian Railway, maintains communication with Madras and the rest of British India, and Karikal is linked to the same railway by the branch from Peralam. A Chamber of Commerce consisting of fifteen members, nine of them Europeans or persons of European descent, was reorganised by a decree of 7th March, 1914 The capital, Pondicherry, and presents expecially is a very handsome town, and presents, especially from the sea a striking appearance of French civilisation.

#### People and Trade.

The Settlements are represented in Parliament at Parls by one senator and one deputy. The Senator is Mons. Lemolgnic The Deputy is Mons Pierre Dupuy There were in 1932 by primary schools and 3 colleges all maintained by the Government, with 308 teachers and 9,203 pupils Local revenue and expenditure (Budget of 1932) Rs 2,604,019 The principal crops are paddy, groundnut, and ragi. There are at Pondicherry 3 cotton mills, and at Chandernagore 1 jute mill The cotton mills have, in all 1,631 locus and 71,744 spindles, employing 7,450 persons There are also at work one oil factory and a fevoil presses for groundnuts, and one ice factors.

## The Frontiers.

the Indian Frontier problem, which has loomed so large in the discussion of Indian questions, has always borne a two-fold character—the local issue and the international issue For almost a century the international issue was the greater of the two, and the most serious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face-But the tendency of later times was for the international aspect to recede and for the local aspect, to grow in importance, until it wright be said, with as much truth as charac-terises all generalisations, that the local issue dominated if it did not absorb the situation

The Local Problem.—The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail From the Arabian Ses on the West to the confines of Nepal is a, wild and troublous sea of some of the highest mountains in the world. The thin valleys in the se immense ranges are poorly populated by haidy, brave, militant mountaineers, rendered the Hercer and the more difficult by professing the Imartial Moslem faith, accontuated by the most latter fanaticism But sparse as the by the most linter fanaticism. But sparse as the population is, it is in excess of the supporting power of the clountry. Like mountaineers in all parts of the world, these brave and fearless men have sought to eke out their eviguous agriculture by cuding the cich plains of Hindustan We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by orening for the warlike Highlanders a military caleer in the fumous Highland regiments, and in rendering min tary operations easier by the construction of Wade's rosin. The Highland problem had disappeare pointing from English politics that its prevalet lessons are little realised, but if the crand's student will read again that hadiant or avery Neil Munro. intile realised, but if the crand's student will read again that he alient of avery Neil Munro, "The New Road," he will ar regulate what Wade's work meant for the health a regulate what Wade's work meant for the health a regulate what Wade's what lessons it to ches to the who are called upon to face, in its local spect, the Indian frontier problem so far as he area with which we are dealing wis concern it, two policies were tried. In Baluchistan, the genius of sir Robert Sandeman/devised the method of entering into military, occupation of the principal points, and thence controlling the country. At the same time close engagements were entered into with the principal cliefs, through whom the tribesmen were kept in order. That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not points, and there controlling the country time of trouble we should have to deal with Atthe same time close engagements were entered into with the principal chiefs, through whom the tribesmen were kept in order. That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not seriously embarriss the Government of India to the fixed belief that even if the Formonthe time when Sandeman set his mark on standpoint, it would involve charges over an interest of the fixed belief that even if the Formonthe time when Sandeman set his mark on standpoint, it would involve charges over an interest of the fixed belief that even if the Formonthe time when Sandeman set his mark on standpoint, it would involve charges over an interest of the fixed belief that even if the Formonthe time when Sandeman set his mark on standpoint, it would involve charges over an interest of the fixed belief that even if the fixed belief that even if the Formonthe time of trouble we should have to deal with a line of communications. There was expensive the fixed belief that even if the Formonthe time of trouble with the irreconcilable tribesmen along the fixed belief that even if the Formonthe time of trouble with the irreconcilable tribesmen along the fixed belief that even if the Formonthe time of trouble with the irreconcilable tribesmen along the fixed belief that even if the Formonthe time of trouble with the irreconcilable tribesmen along the fixed belief that even if the Formonthe time of trouble with the irreconcilable tribesmen along the fixed belief that even if the Formonthe time of trouble with the irreconcilable tribesmen along the fixed belief that even if the Formonthe time of trouble instead of a tribe with the irreconcilable tribesmen along the fixed belief that even if the Formonthe time of trouble with the irreconcilable tribesmen along the fixed belief that even if the Formonthe time of tribesmen along the fixed belief that even if the Formonthe time of tribesmen along the fixed belief necessitated occasional military operations, Frontier, the position was complicated by the and the Gomai Pass was involved in the expansion of Russia in Cartral Asia. The expert general tribal disturbances which followed passes, and the passes down which for centuries the wanton declaration of war by Afghanistan; from the time of Alexander the Great invaders

By those who take a long view of politics in in 1919. But speaking broadly, Sandeman the wide sense of the term, it will be seen that brought peace to Baluchistan, and to the large the Indian Frontier problem, which has loomed frontier area which is embraced in that generic term. So far as this section of the frontier is concerned it may be said that no frontier problem exists, save the need for an economical and constructive policy.

> Towards Afghanistan —Far otherwise has it until lately been with the section of the frontier which stretches from Baluchistan to the con-fines of Keshmir. That has, for three quarters of a century, been the scene of almost ceaseless military operations, which have constituted a devastating drain on the Indian exchequer. For years one sought for a definite policy guiding the actions of the Government of India One explanation of their inconsistencies was found in the existence of two schools of thought. Once the frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupation of the whole country right up to the confines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country. But those who looked at polloy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan frontier would only shift the frontier problem farther Instead of the differing tribes, should, they argued, have to meet the Afghan on our border line If Afghanistan were a strong, homogeneous State, that would be a matter of little account But even under the iron rule of Abdurrahaman Khan, the Amir's writ ran but lightly in the southern confines of his kingdom Under his successor, Habibuliah Khan, whose policy was generally wise and successful, it ran still less firmly. The Amir was unable to control the organisation of the tribal gatherings which involved us in the Zakka Khel and Mohmand expeditions during the Indian secretaryship of that arch pacifist, Lord Morley. Nor did it enable Habibullah to deal effectively with a rising against his own Governor in Khost The Afghan forces melted away under transport difficulties when they were moved against the rebellious Khostwalis, and the Amir had to make peace with his troublous vassals. Theremake peace with his troublous visuals. Therefore, it was said, occupation up to what is called the Durand Line because it is the line demarcated by the Frontier Commission in which Sir Mortimer Durand was the British Plenipotentiary, would simply mean that in time of trouble we should have to deal with Alchapitan instead of setupe or two seeds.

have sucht from Persia and Central Aria to loot the fat plains of Hindustan, traverse this rome under the direct control it was deemed caustist to ment of india, and in the fatter of the flux of the flux of the line of the polloy ribbed and flowed between the luxuard School, which would have occupied, or dominat ed, the whole I contler up to the Burned Line, that is to say up to the Air han trouller and the Close Border school, which would have us to main out of the difficult incomtate one rose and west the tribesmen on the plains is the sealled forth The extreme advocates of this school sould

The emergency thus created synchronised with the advent of I ord Curzon as Viceroy. He'dealt with it in masterful fashion. In the first place, he separated at the frontier zone from the Government of the Punjab, which had hitherto been responsible for its administration, and had organised for the side of the side of the side of the side of the side of the side of the side of the side of the side of the side of the side of the side of the side of the certain fitter, his viceroy had been able to carry it to read of the day of reckoning had come and strove that the day of reckoning had come an ₹**₹** \$ # # # Tryongs of news

to avert the settlement of their account by the When he was done to death, his brother, Nasrullah Khan, was proclaimed Amir by the assassins But the conscience of Afghanistan revolted against the idea of Nasrullah, the arch fanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his A military movement in Kahul itself brushed him aside and installed the son of Habibulish, Amanulish Khan, on the throne But Amanulish Khan soon found it was a thorny hed on which he lav, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical crime, set his troops in motion on April 25, 1919, and preaching a *jehad* promised his soldiery the traditional loot of Hindustan The Indian Army was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten Dacca was selzed, Jelalabad and Kabul were frequently bombed from the air, and there was nothing to prevent our occupation of Kabul, save the knowledge gleaned easily beaten from the bitter heritage of the wars of 1838 and 1978, that it is one thing to overset a government in Afghanistan, but it is quite another to set up a stable government in its stead Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August 1919

But an untoward effect of this wanton war was to set the Trontier from the Gomal to the Knyber ablaze. With one or two exceptions, the Tribal Militia left without the support of the regular troops who in the emergency regular troops who in the emer it to have been bastened to their not stand the strain of could guccour, an appeal from their fellow tribesmen, and either melted away or joined the rising. This has often been described as the fallure of the Curzon rolloy, which was based on the tribal militia But there is another aspect to this issue, which was set out in a series of brilliant articles which Vir Arthur Moore, its special correspondent, contributed to The Times He pointed out that the militia was meant to be a military police force. The lapse of time, and forgetfulness of its real purpose, had converted the militia into an imitation of the regular army Militia was meant to be a police Wi The When the war broke out its units were treated as a covering force behind which the Regular Army mobilised This is a role which it was never intended they

in British foreign policy less attractive to the student of Imperial affairs student of Imperial affairs. Russia was con-fronted in Central Asia with precisely the same conditions as those which faced England in India when the course of events converted the old East India Company from a trading corporation into a governing body. The decaying khanates of Central Asia wers impossible neighhours. Confronted with an inferior civilisation. and with neighbours who would not let her alone, Russia had to advance. True, the adventhrons spirits in her armies, and/some of the great administrators in the Teamet capital were not adverse to paying off on the Indian Borderland the score against Great Britian for the Crimean War, and for what the Russians thought was depriving them of the fruits of their costly victory over Turkey in 1877-78 The result was a long and unsatisfactory guarilla enterprise between the hardlest spirits on both sides, accompanied by periodic panics in the British Press each time the Russians moved forward, which induced the coining, after the Russian occupation of Merv, of the generic term "Mervousness." This external force involved the Government of India in the humiliations of the Afghan War of 1838, with the tragic destruction of the retiring Indian force between Kabul and Jelaisbad, slightly relieved by the heroic defence of Jelalabad and the firmness of General Pollock in refusing to withdraw the punitive army until he had set his mark on Kabul by the razing of the famous Bala Hissar fortress It involved us in the second Afghan War of 1878, which left the baffling problem of no stable government in Afghanis-There was a gleam of light when Abdurrahaman Khan, whom we set up at Kabul to relieve us of our perplexities, proved himself a strong and capable ruler, if one ruthless in his methods. But in the early eightles the two States were on the verge of war over a squabble for the possession of Penjdeh, and then men began to think a little more clearly. There began a series of boundary delimitations and agreements which clarified the situation, without however finally settling it. The old controversy broke out in another form when intrigues with a Burlat monk, Dorlieff, during Lord Curron's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Tibit An expedition to Lhasa rent the veil which had so long concealed the mysterious city and dis-This is a role which it was never intended they should serve, exposed to a strain which they should never have been called upon to bear, they crumpled under it. If on the outbreak of trouble troops had promptly hurried to their at a stage long sought by those who looked support all might have been well. Left to be yound their noses. Of the dominant forces in Petrograd. It was not until Russia was chastened on the battlef lide Russia and the Frontier.—The Curzon of Manchura by Japan, and disapprand 23 is policy was up to the time of its collapse greatly sea power in the decisive battle of Tei-livia, assisted by extraneous events. The greatest that an atmosphere was created favourable external force in moulding Indian frontier policy to the conclusion of an Agreement This was the long struggle with Russia. For nearly embraced the whole frontier zone. Then were three quarters of a century a veiled warfare many unsatisfactory features in the Agreement for predominance in Asia was waged between especially in regard to Persia, for which we great Britain and Russia. There are few pages had to pay a conclusion of the battle are taken as the conclusion of the conclusion of the particular was the long struggle with Russia. For hearly embraced the whole frontier zone. Then were there are supposed between especially in regard to Persia, for which we are few pages had to pay a conclusion of the conclusion of th

Minor and The Middle East, and the route-selected, often criticised, was the best for the rapid movement of troops to the strategic centres As a commercial line, the Railway, if completed, would have served three zones The western area of Turkey in Asia at Haidar Pasha. The rich lands of Anatolis at Alexandretta The eastern zone at Basra The Germans, it is understood, attached immense importance to the subsequent engagements with Turkey which placed them in maritime command at Alexandretta They began to inaugurate a commercial position in the Persian Gulf through the establishment of a subsidized line of steamers run by the great Hamburg-America corporation. They strove to obtain an actual footing in the Gulf through the German house of Wonkhaus The Germans were probably never serious in their alleged designs on Koweit, which could never have borne a more definite relation to the commerce of the Gulf than Flushing to Antwerp or Cuxhaven to Hamburg, that was one of the red herrings they drew across their trail to divert attention from their real objective, Basta, which is destined by virtue of an unchallengeable geographical and natural position to be the great port of The Middle East These considerations have no more than an academic value now. Germany was defeated. The Turks, when they emerged from an isolated military despotism based on Angora, were confronted with the immense problem of re-building their bankrupt State, deprived of the most intelligent section of the old population—the Greeks and the Armenians, by massacre and expulsion—were a very different factor. The completion of the through line was indefinitely postponed. But as the advantages of the route, for the purposes we have indicated, are many and great, the ultimate construction of the through line is only a matter of time, so one has placed these authoritative characteristics on record for the guidance of opinion when the project of the through route is revived, as it must be.

Turkey and the Frontier—The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never assumed any significance, save as the arent course of Germany, when she passed under the tutelage of that Power, and for a limited period tutelage of that Power, and for a limited period during the war. Although so long established in Mesopotamia, Turkey was not very firmly sented in that country, the Arabs tolerated rather than accepted Turkish rule so long as they were substantially left alone, and the administration, it is understood, never paid its way. For a brief period Midhat Pasha raised the status of Mesopotamia, and after the Revolution that fine solder Nazim Pisha because a power in the land. But speaking broadly Turkey remained in Mesopotamia because it was no-one's interest, even that of the Arab, to turn her out When however Germany developed her "B B" policy, Turkey was used as a stalking horse She moved a small force to the Pennsula of Al-Katr in order for a few sentences on the position of Francto frighten the Sheikh of Bahrein, and tried on the frontiers of India, it is not because the to frighten the Sheikh of Bahrein, and tried on the frontiers of India, it is not because the to convert the nominal suzeraint; exercised, have any present day significance, but in order or rather claimed, over the Sheikh of Koweit to complete this brief survey of the waxing and into a de facto suzervint, exercised by military washing of external influences on Indian frontier force. These efforts faded before the vigorous action of the British Government which con-

cluded a binding arrangement with the Sheikh of Rowelt, and the position of the Turks at Al-Katr was always very precamous On the outbreak of the war however the situation proroundly changed. When the sound and carefully executed expedition to Basra and its strategic hinterland was developed into the insane enterprise to capture Baghdad by coup de main, with very Inadequate forces, and still more madequate transport, we found ourselves involved in multary operations of the most extensive and unprofitable character. These were completely successful with General Maude's occupation of Baghdad. After the Bussian deback we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asia, producing military exploits of an almost epic character, but exercising little influence on the war They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power in Palestine, where Lord Allenby scattered the Turks like chaff the aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite fron-tiers This enabled the Turks, if they were so disposed, to be troublesome through guernla warfare in the Mosul Zone, and by stirring up the Kurds, who are the Ishmaelites of Asia hinor. The conclusion of the Treaty of Lausanne in 1923 brought temporary relief, but it did not settle the main issue, the frontier between Turkey and Irak Under the Treaty it was provided that if the two parties could not agree to a boundary line delimitation should be left to The League of Nations tions were promptly opened at Constantinople, but it was immediately found that there could be no mutual agreement; the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Irak The issue therefore went to the League of Nations That body despatched a neutral commission to study the position on the spot, this commission reported that the best settlement would be for the Mosul layet to be incorporated in Irak, if the British Government were prepared to prolong its mandate over that State for a period of twenty-five years. When the report of this commission came before the League in 1925 Britain gave the necessary guarantee, and the Council of The League unanimously allotted the

policy. It is difficult to find any sound priley behind the clorks of France to obt in a co ling

truth a repetition of the Sandeman particulars are given on 272 and following pages solicy, adapted to local conditions. There one of its latest fruits is a request by the Afridistas been no withdrawal in the ordinary sense for roads in their country of Tirah, a beginning of the term, but the limit of the North with construction has been made. Ramfak, not at Ladha. A network of consequential roads was pushed forward Its laboration continues In South Waziristan, entrance to the Khyber Pass, was in the autumn Yana has been re-occupied, partly in response of 1925 extended to Landi Khana, at the o a pressing invitation from the Wana Wazirs, opposite end of the Pass and within a mile of the pecause they wanted to share the benefits frontier between India and Afghanistan.

This controversy lasted long. It resulted which they saw British occupation to be bringing This controversy lasted long. It resulted which they saw British occupation to be bringing in a typically British compromise which specially to their cousins northward of them In rose from the changed conditions in which refere in occupation of Waziristan as a result of the Afghan Border because of a rebellion on the he operations forced upon us for the suppression of the tribal outbreak which the Afghan side and of the need to assist the King of Kabul by preventing excursions by bodies of Waziris into His Majesty's disturbed territory. tured up in support of their invasion of India Wazirs into His Majesty's disturbed territory in 1919. The ensuing policy has been aptly The work of control and of civilization is rapidly escribed as the "half-forward" policy. It is progressing in the whole territory. Of this One of its latest fruits is a request by the Afridis for roads in their country of Tirah, a beginning

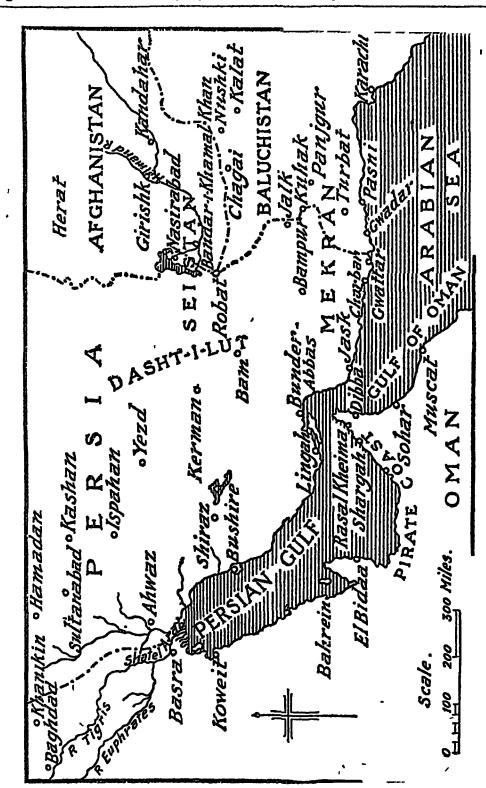

## I.—THE PERSIAN GULF.

Sovernment remained there primarily to preserve the peace. This work is quietly and efficiently cerformed. Piracy was stamped out, the Prucial Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Royal Navy kept watch and ward, and our consuls egulated the external affairs of the Arab rulers on the Arab coast. In return for these services frent Britain claimed no selfish advantages. The waters of the Gulf were kept free to the avigation of the ships of all nations, and shough Great Britain could have made an erritorial acquisitions she pleased she retained possession of only the tiny station of Bassidu Left to herself Great Britain desired no other policy, but for a quarter of a century the Gulf was involved in European affairs France sought to acquire a coaling station at Jisaa, and obstructed the efforts. sought to acquire a coaling station at Jissa, and obstructed the efforts of the British Government to stamp out the slave trade and to check the immense traffic in arms which was equipping the tribes on our land frontier with weapons of precision and quantities of a writer of unchallenced authority. The American Naval writer, the late Admiral Malan, placed on record his view that "Concession in the Persian Gulf, whether by formal arrangements following the Anglo-I rench Enterte Russia sent one of her finest cruisers to "show the flag" in children were no interests of preserve. She was credited with the intention of occupying a particular with casting arrangements for the most dreadful spot in the Gulf ports. The British Government with the Gulf ports. The British Government also took alarm. They were fortified in their stand against foreign intrigue by the opinion of a writer of unchallenced authority. The American Naval writer, the late Admiral Malan, placed on record his view that "Concession in the Persian Gulf, whether by formal arrangement (with other Powers) or by neglect of the local commercial interests which now underlied political and military control, will impose the arrangements of preserve. She was greated with the intention of occupying a political and military control, will impose the provided with the intention of occupying a political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political and military control, will impose the political

From what has gone before it will be seen (after the signing of the Anglo-Russian Agreement that the keynote of this discussion of Indian routier policy is that the external menace has argely disappeared. No part of the frontier is more powerfully influenced by this consideration han the Persian Gulf. Our first appearance of Evench and the Dutch, who had established reacting stations there. With the Portuguese, he French and the Dutch, who had established reacting stations there. With the capture and lestruction of the great entrepot which the Portuguese had established at Ormuz, the supercision of the land by the sea route, and the appearance of anarchy in the interior the mportance of the Gulf declined. The Indian struments of Imperial policy rather than as hat the keynote of this discussion of Indian and disappeared with the collapse of Russian struments of Imperial policy rather than as inoffensive merchantmen. She also strove, through the agency of the firm of Wonkhaus, to acquire a territorial footing on the Island of Shargah These events stirred the British Government to an unusual activity in the waters of the Gulf.

#### Counter Measures.

The first effective steps to counter these influences were taken during the vigorous viceroyalty of Lord Curzon, who visited the during his early travels and incorporated a masterly survey of its features in his monumen-tal work on Persia. He appointed the ablest men he could find to the head of affairs, c-ta blished several new consulates, and was instrumental in improving the sea communications with the Gulf ports. The British Government also took alarm. They were fortified in their

a naval base or of a fortified port in the Persian Gulf by any other Power as a very grave menace to British interests, which we should certainly resist with all the means at our disposal" The negative measures following these declarations were followed by a constructive policy when the oil fields in the Bakhtian country, with a great refinery, were developed by the Anglo-Persian Oil Company, in which the British Government has a large financial stake But with the disappearance of these external forces on Gulf policy, as set out in the introduction to this section, the politics of the Persian Gulf receded in importance, until they are now. more than they were before these external influences developed, a local question, mainly a question of policy. They are therefore set out more briefly and those who desire a complete narrative are referred to the Indian Year Book for 1923, pp 178-183 An interesting new feature in 1981 was the decision of the Persian Government to instal a Navy of their own in the Gulf The fleet consisting of two sloops and four launches, all suitably armed, was built in Italy and duly arrived at its destination in 1932 is at the outset officered by Italians The immediate reason for the new fleet is that an increase in the Persian Customs tariff for revenue purposes led to extensive smuggling. The fleet is required to check it

#### Maskat.

Maskat, which is reached in about fortyeight hours from Karachi, is outside the Persian Gulf proper It lies three hundred miles south of Cape Musandim, which is the real entrance to the Gulf, but its natural strength and historical prestige combine to make it inseparable from the politics of the Gulf, with which it has always been intimately associated.

Formerly Maskat was part of a domain which embraced Zanzibar, and the Islands of Kishm and Larak, with Bunder Abbas on the Persian shore Zanzibar was separated from it by agreement, and the Persians succeeded in establishing their authority over the possessions on the eastern shore.

The relations between Britain and Maskat have been intimate for a century and more. It was under British auspices that the separation between Zanzibar and Maskat was effected, the Sheikh accepted a British subsidy in return the suppression of the slave and in 1892 scaled his dependence upon us by concluding a treaty pledging himself not to cede any part of his territory without our consent.

## The Pirate Coast.

expeditions were fitted out to break their power, their boldness and bardli ood.

words of great import—"We (\* e , His Majesty's | with such success that since 1820 no cons.demble Government) should regard the establishment of pumitive measures have been necessary. The punitive measures have been necessary The frucial Chiefs are bound to Gnat Britain b. a series of engagements, beginning with 1800 and ending with the perpetual treaty of 1853 by which they bound themselves to avoid all which they bound themselves to a like hostlities at sea, and the subsequent treats of 1873 by which they undertook to prohibit altogather the traffic in slaves line relations of the frucial Chiefs are controlled by the Parlant at Rushim who visits the British Resident at Bushire, who visits the Pirate Coast every year on a tour of inspection the

The commercial importance of the Pirate Coast is increasing through the rise of Debai. Formerly Lingah was the entrepot for this trade, but the exactions of the Belgian Customs officials in the employ of Persia drove this traffic from Lingah to Debai. The Trucial Chiefs are—Debai, Abu Thabee, Share Ayman, Um-al Gawain and Ras-el-Kheyma. Thabee, Shargah,

#### Bøhrein.

North of the Pirate Coast lies the little Archipelago which forms the chlefship of the Shellh of Bahrein. Of this group of islands only those of Bahrein and Maharak are of any size, but their importance is out of all proportion to their extent. This is the great centre of the Guif pearl fishery, which, in a good year, may be worth half a million pounds sterling. The anchorage is wretched, and at certain states of the tide ships have to lie four miles from the shore, which is not even approachable by boats, and passengers, mails and cargo have to be handed on the donkeys for which Bahrein is famous But this notwithstanding the trade of the port is valued at over a million and a quarter sterling, and the customs revenue, which amounts to some eighty thousand pounds. makes the Sheikh the richest ruler in the Gulf.

In the neighbourhood of Bahrein is the vast burying ground which has hitherto baffled archæologists. The generally accepted theory is that it is a relic of the Phœnicians, who are known to have traded in these waters.

The British Government recently announced that they proposed transferring the principal British Naval station in the Gulf from Henjam, on the Persian side of the water, to Bahrein

#### Koweit.

In the north-west corner of the Gulf lies the port which has made more stir than any place of similar size in the world. The importance of Koweit hes solely in the fact that it is a possible Gulf terminus of the Baghdad Railway. This is no new discovery, for when the Euphrates Valley Railway was under discussion, General Chesney selected it under the alternative name of the Grane- so called from the resemblance of the formation of the Bay to a pair of horns—as the sea terminus of the line Turning Cape Musandim and entering the Nowhere else would Koweit be called a good Guif Proper, we pass the Pirate Coast, controlled or a promising port The Bay is 20 miles deep by the six Trucial Chiefs The ill-name of this and 5 miles broad but so shallow that heavy exby the six Tructul lines — the in-maine of this same of this should have to be incurred to render it but in the carly days it had a very real relation, suitable for modern ocean-coing steamers. It to the actual conditions — The parties were the sis sheltered from all but the westerly winds, holdest of their kind, and they did not hesitate and the clean thriving town is peopled by some to attack on occasion and not always without 20,000 inhabitants, chiefir dependent on the success, the Company's ships of war. Large sea, for the manners of Koweit are 20.6.1 for a success, the company's ships of war.

## Muhammerah.

On the opposite side of the entrance to the Shatt-el-Arab lie the territories of Shelkh Khazzal of Muhammerah. The town, favour-The town, invoursituated near mouth οſ the has importance grown in since the opening of the Karun River route to trade through the enterprise of Measure Lynch Brothers. This route provides the shortest passage to Ispahan and the central tableland, end already competes with the older route by way of Bushire and Shiraz. This importance line grown since the Anglo-Persian Oil Company established refineries at Muhammerah for the oil which ney win in the right fields which they bave tapped near Ahwaz. Its importance will be still further accentuated, by the opening of the railway to Khorremabad by way of Diriul which is now under construction.

### Basra.

In a sense Basra and Turkish Arabistan can hardly be said to come within the scope of the hardly be said to come within the scope of the frontiers of India, yet they are so indiscolubly associated with the politics of the Gulf that they must be considered in relation thereto Basra is the present sea terminus of the Baghdad Railway It stands on the Shatt-el-Arab, sixty miles from its mouth, favourably situated to receive the whole water-borne trade of the Tigris and Euphrates Rivers.

The local traffic is valuable for the richness The local traffic is valuable, for the richnese of the date groves on either side of the Shattel-Arab is indescribable, there is a considerable entrepot traffic, whilst Basra is the port of entry for Baghdad and for the trade with Persia, which follows the caravan route ria Kermanshah and Hamadan

The political destinles of Basra are at present wrapped up with the destinles of the new Arab State which we have set up in Mesopotamia under King Feisal. When the war was over we found ourselves committed to immense, undefined and burdensome responsi-bilities in that land. The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad, then the great military enterprises necessitated by the fall of Kut-al-Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary, and west to the confines of Trans-Jordania. Amongst ardent Imperial-ists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire. The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodi-gious. In these circumstances King Feisal was imported from the Hedjaz and installed on the throne under the aegus of Great Britain. Still we were committed to the support of the new kingdom, and that most dangerous condition arose—responsibility without any real power unless King Feisal was to be a mere puppet, immense expenditure and indefinite military commitments In these circumstances there was an insistent demand for withdrawal from the land. British policy moved slowly towards or in four years, whichever might be earlier.

that end, but a definite step was taken in 1923 The Secretary of State for the Colonics announced this policy in a statement which is repro duced textually, for the purpose of reference. Addressing the House of Lords on May 3rd he

Your Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken. Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad, the terms of which I propose to read out to Your Lordships. announcement was drawn up in consultation with King I cleal and his Government, and has their cordial assent. It is being published at Baghdad to-day.

The announcement is as follows :--

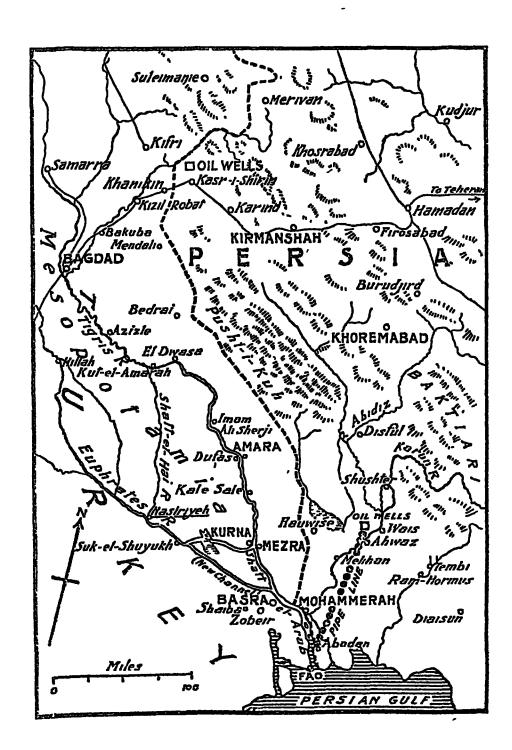

"It will be remembered that in the autumn of last year, after a lengthy exchange of views, it was decided between the Governments of His Britannic Majesty and His Majesty King Felsal that a Treaty of Alliance should be entered into between His Britannic Majesty and His Majesty the King of Iraq This Treaty, which was signed on the 10th October, 1922, and the term of which was to be twenty years (subject to periodical revision at the desire of either party) provided for the establishment of an independent Constitutional Government in Iraq enjoying a certain measure of advice and assistance from Great Britain of the nature and extent indicated in the text of the Treaty itself and of subsidiary Agreements which were to be made thereunder.

"Since then the Iraq Government has made great strides along the path of independence, and stable existence and has been able successfully to assume administrative responsibility and both parties being equally anylous that the commitments and responsibilities of His Majesty's Government in respect of Iraq should be terminated as soon as possible, it is considered that the period of the Trenty in its present form can conveniently be shortened to obviate the inconvenience of introducing amendments into the body of a Treaty already signed, it has been decided to bring about the necessary modifications by means of a protocol which, like the Treaty itself, will be subject to ratification by the Constituent Assembly.

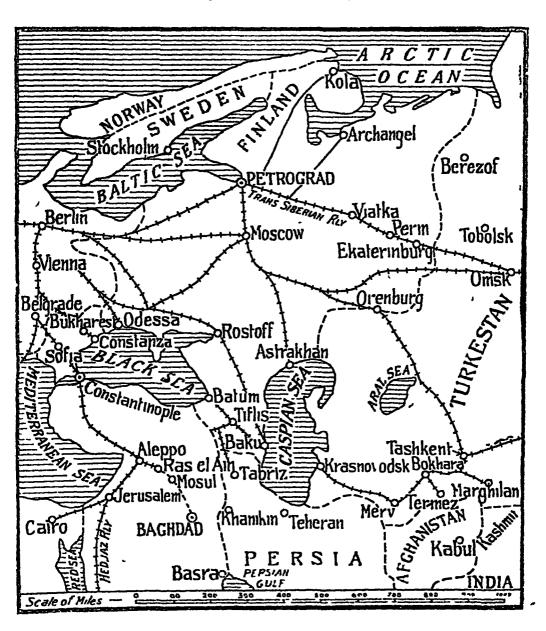

"Accordingly a protocol has now been signed by the parties in the following terms:-

It is understood between the High Contracting Parties that, notwithstanding the provisions of Article 18, the present Treat; is all terminate upon Iraq becoming member of the League of Nations and in any case not later than four years from the ratification of peace with Turkey Nothing in this protocol shall prevent a fresh agreement from being concluded with a view to regulate the subsequent relations between the High Contracting Parties, and negotiations for that object shall be entered into between them before the expiration of the above period

It will be noticed that under this protocol the Treaty in its present form was to terminate on the entry of Iraq into the League of Nations

Railway Position in the Middle East.

considerable difference between the vilayet of Basra and the other portions of King Feisal's State. Basra has for long been in the closest commercial contact with India, and is in many respects a commercial appanage of Bombay. Its people have not much in common with those of the North. They took no part in the Arab rising which followed the war, and they ask nothing better than to remain in close touch with India and through India with the British Government. If we are correct in the supposition that Baera is destined to be great port of the Midule East, then its future under an Arab State, with no experience of administration in such conditions, is one of the prentest interest, which can hardly be regarded as settled by the role; underlying the declara-tion which is set out above.

## The Persian Shore.

The Persian shore presents fewer points of permanent interest thire is administrative rather than commercial for that of Ispahan. But the anchorage is I Lee Further south ses Lingah, reputed been the institution of a Persian Navy. to be the prettiest port on the Persian coast.

ring Gulf was allowed to obscure the frontier in stance of Seistan. Yet it was for many are groups proceupation with the Governto o' India Etistan lies midway north and to historica the point where the frontiers of liusia, Per la and Afghanistan meet at Julil ar and that where the frontiers of Persia and of our Indian Empire meet on the open to at Gwattur It marches on its eastern border with Afghanistan and with Baluchistan, it commands the valley of the Helmand, and with it the road from Herat to Kandahar, and its immense resources as a wheat-producing region have been only partly developed under Persian missule. It offers to an aggressive rivit, an admirable strategic base for future military operations, it is also midway athware the treck of the shortest line which could be built to councet the Trans-Caspian Railway with the Indian Ocean, and if and when the line from 1-1-2-bid to Meshed were built, the transferious to extend it through Seistan would to strong. Whilet the gaze of the British was educintated or the North-West Frontier, and to possible lives of advance through Kandahar to Cuctta, and through Kabul to Peshawar, there can be little nouth that Russian attentich was directed to a more ichurely movement through so, and, if the day came when she roses her armies regime India

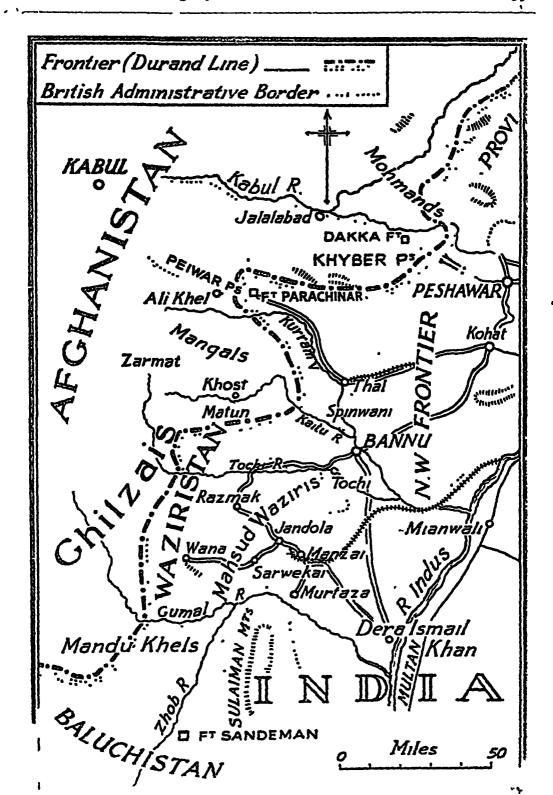

Whether with this purpose or not, Russian intrious was particularly active in belstan in tlactorie grave of the certury. Having Russia the Khorassay, her agents moved into Selstan Negotiations has an ithrough the agency of the Reigian Customs bring about a of this, "sel ntime relations" and an irricto the situation.

It is important to remember that there is a port its trade is being diverted to Debai on the unsiderable difference between the vilayet Pirate Const. In the narrow channel which Basra and the other portions of King Fessal's forms the entrance to the Gulf from the Arabian Sea is Bunder Abbas. Here we are at the key of the Guil. Bunder Abbas is of some importance as the outlet for the trade of Kerman and Yezd. It is of still more importance as a possible naval base. To the west of the town between the Island of Kishm and the mainland, lie the Clarence Straits which narrow until they are less than three miles in width, and yet contain abundance of water. Here, according to sound naval opinion, there is the possibility of creating a payal base which would command the creating a naval base which would command the Gulf. The great obstacle is the climate, which is one of the worst in the world. On the opposite shore, under the shadow of Cape Musandim, fices another sheltered deep-water anchorage, Elphinstone's Inlet, where the climate con-ditions are equally vile But between these two points there is the possibility of controlling the Gulf just as Gibraltar controls the Mediterranean. For many years Bunder Abbas loomed large in public discussions as the posterranean. For It is the headquarters of Persian authority, the sible warm water port for which Russia was residence of the British Resident, and the censeleding. There is a British Naval station at the of many foreign consuls. It is also the main Henjam, a small island close to Kism, where the entrepot to the trade of Shiraz, and competes station was established under agreement with the Persian authorities Its evacuation by recipied and dangerous, the rold to Shiraz Great Britain in favour of Bahrein has lately fire to our the notonous kotals which preclude been decided upon On the Mekran coast, the idea of rill connection, and if ever a railway there is the cable station of Jask, and the possible to the central tableland is opened, the com nerport of Chamber An interesting development, or it value of Bushiro will dwindle to insign.

II —SEISTAN.

The concentration of public attention on the stating plague cordon, sought to establish inwing Gulf was allowed to obscure the frontier fuence, and to stifle the British trade which
working of Scistan Yet it was for many was gradually being built up by way of Nushki.
These efforts died down before the presence
of India Scistan lies midway north and

of the McNahon mission, which, in pursuance
of Treaty rights, was demarcating the bounliusia, Per-la and Afghanistan meet at
alkil ar and that where the frontiers of Persia special reference to the distribution of special reference to the distribution the waters of the Helmand the waters of the Helmand They finally ceased with the conclusion of the Anglo-Russian Agreement. Since then the international import ance of Seistan has waned.

> The natural conditions which give to Seistan this strategic importance persist. Meantime, British influence is being consolidated through the Selstan trade route. The distance from Quetta to the Selstan border at Killa Robat is 465 miles, most of it dead level, and it has now been provided with fortified posts, dak bungalows, wells, and all facilities for caravan trafic The rallway was pushed out from Spezand, on the Bolan Rallway, to Nushki, so as to provide a better starting point for the caravans than Quetta This line was extended to Duzdap, 54 miles on the Persian elde of the indo-Persian Frontier during the war as a military measure, but the traffic after the reestablishment of peace supported only two trains a week There then arose trouble owing to Persian insistence on the collection of Customs duties on rations taken across their frontier for the rallway staff This led to the stoppage of train running on the Persian side of the Frontier Negotiations have now for years dragged on to bring about a reasonable settlement in regard

### III —PERSIA.

From causes which only need to be very briefly set out, the Persian question as affecting Indian frontier policy has receded until it is of no account Reference is made in the introduction to this section to the fact that the conclusion of the Anglo-Russian Agreement left us a bitter legacy in Persia That Agreement divided Persia into two zones of influence, and the Persians bitterly resented this apparent division of their kingdom between the two Powers, though no such end was in view German agents, working cleverly on this feeling, established an influence which was not suspected, and when the war broke out they were able to raise the tribes in opposition to Great Britain, in the South, and after the fall of Kut-al-Amara when a Turkish Division penetrated Western Persia, they exercised a strong influence in Teheran. With the defeat of Turkey and the Central Powers this influence disappeared, but at that time there was no authority in Persia besides that of the British Government, which had strong forces in the North-West and controlled the southern provinces through a force organised under British officers and called The South Persian Rifles. It was one of the first tasks of the British Government to regularise this position, and for this purpose an agreement was reached with the then Persian Government, the main features of which were :-

To respect Persian integrity:

To supply experts for Persian administra-

To supply officers and equipment for a Persian force for the maintenance of

To provide a loan for these purposes:

To co-operate with the Persian Government in rallway construction and other forms of transport

Both Governments agreed to the appointment of a joint committee to examine and revise the Customs tariff.

The second agreement defined the terms and conditions on which the loan was to be made to Persia The loan was for £2,000,000 at 7 per cent redcemable in 20 years It was secured on the revenues and Customs' receipts assigned for the repayment of the 1911 loan and should these be insufficient the Persian Government was to make good the necessary sums from other sources

The Present Position.—We have given the main points in the Anglo-Persian agreebecause few documents have been sunderstood Those who desire to study more misunderstood it in greater detail will find it set out in Indian Year Book for 1921, page 138 st seq. It has been explained that most Persians const ucd it into a guarantee of protection against all external enemies. When the British troops in the north-west retired before the Bolsheviks, the Persians had no use for the Agreement and it soon became a dead instrument. It was finally rejected and the advisers who were to have assist-

Great Britain must take an active hand in Persia because she could not be a passive witness to chaos in that country The view always taken in the Indian Year Book was that the internal affairs of Persia were her own concern, if she preferred chaos to order that was her own look-out, but left alone she would hammer out some form of Government. That position has been justified. The Sirdar Sipah, or commander-inchief, a rough but energetic soldier, gradually took charge of Persian affairs and established a thinly-veiled military dictatorship which made the Government feared and respected through-out the country for the first time since the assassination of Shah Nasr-ed-din. A body of capable Americans under Dr. Millspaugh restored order Thes to the chaotic finances. These two forces operating in unison gave Persia the best government she had known for a generation, But-the Sirdar Sipah chafed under the irregularities of his position, with a Shah spending his time in Europe and wasting the resources of the country. He moved to have his position re-gularised by the deposition of the absentee Shah and his own ascent of the throne. Δt first he was defeated by the opposition of the Mollahs, but in 1925 prevalled, and the Shah was formally deposed and the Sirdar Sipah chosen monarch in his place The change was made without disturbance, and Persia entered on a period of peace and consolidation which has removed it from the disturbing forces in the post-war world. Since then considerable progress has been made with the reform of the administration, and many projects are afoot for the improvement of communications, which is the greatest need of the land, such as an air service to Teheran and railway construc-tion. The least reassuring episode was the departure of the American financial mission, which had done admirable work in the restoration of the finances. When their contract expired Dr Millspaugh and his colleagues were offered a renewal of it on terms which they did not regard as satisfactory, especially in regard to the powers they were to exercise. They therefore withdraw from the country, and have been replaced by other foreign The general situation was gravely disturbed in 1932 by the sudden termination by the Persian Government of the Anglo-Persian Oil Co's concession, a matter affecting one of the biggest industrial undertakings in the world and millions sterling of capital. The world and millions sterling of capital. The intervention of the British tovernment led to the reference of the trouble to the League of Nations and this paved the way for negotiations between the Company and the Persian Govern-While these were being settled some progress was also made with general negotiations between the British and Persian Governments for an agreement covering all outstanding points of difficulty between them

## IV.—THE PRESENT FRONTIER PROBLEM

There yet remains a small part of British tary of State for India, which prescribed for India where the King's writ does not run the Government the "limitation of your inter-form what is called the Durand Agreement ference with the tribes, so as to avoid the exwith the Amir of Afghanistan, the boundary between India and Afghanistan was settled, territory." It fell to Lord Curzon to give and it was delimited in 1903 except for a small office to this policy. The main foundations section which was delimited after the Afghan the political influence requisite to secure our War in 1919. But the Government of India the political influence requisite to secure our have never occupied up to the border. Between imperial interests, to pay them subsidies for the administered territory and the Durand line there lies a belt of territory of varying width extending from the Gomal Pass in the south, to Kashmir in the north; this is generically known as the Tribal Territory. Its future is the keynote of the interminable discussions of feature policy. of frontier policy for nearly half a century

This is a country of deep valleys and secluded glens, which nature has fenced in with almost inaccessible mountains. It is peopled with wild tribes of mysterious origin, in whom Afghan, Tartar, Turkoman, Persian Indian, Arab and Jewish intermingle. They had lived their own lives for centuries, with little intercourse even amongst themselves, and as Sir Valentine Chirol truly said "the only bond that ever could unite them in common action was the bond of Islam" It is impossible to understand the Frontier problem unless two facts are steadily borne in mind. The strongfacts are steadily borne in mind The strongest sentiment amongst these strange people is the desire to be left alone. They value their independence much more than their lives The other factor is that the country does not saffice even in good years to maintain the population. They must find the means of subsistence outside, either in trade, by service in the Indian Army or in the Khassadars, or else in the outlet which hill-men all the world over have utilised from time immemorial, the raiding of the wealth'er and, more peaceful population of the Plains.

#### Frontier Policy.

The policy of the Government of India toward the Independent Territory has ebbed and flowed in a remarkable degree It has fluctuated between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the imbesmen entirely to their own resources, punishing them only when they raided British territory them only when they raided British territory and the Lower Swat Canal converted frac Behind both the policies lay the menace of a Russian invasion, and that coloured our frontier policy until the Angle-Russian Agreement This induced what was called Hit and Retire policy. In the half century which ended in 1897 there were nearly a score of punitive expeditions, each one of which left behind a legacy of distrust, and which brought to permanent improvement in its train. The fruit manent improvement in its train The fruit manent improvement in its stain and the irint of the suspicion thus engendered was seen in its saved us from senous complications for nearly twenty years, although the position Malakand to the Gomal, was ablaze The extent of this rising and the magnitude of the factory, particularly in Waznistan, popied military measures which were taken to meet by the most reckless raiders on the whole week that the position with a hold best later than the position with a bolt hole later the articles. military measures which were taken to meet of the most reckies raiders on the whole of compelled a consideration of the whole position. The broad outlines of the new policy when pressed from the British side. It endured were laid down in a despatch from the Secretary through the Great War and did not over here.

the performance of specific duties, but to respect their tribal in lependence and leave them, as far as possible, free to govern themselves according to their own traditions and to follow their own inherited habits of life without let or hindrance.

#### New Province.

As a first step Lord Curzon took the control of the truces under the direct supervision of the Government of India. Up to thus point they had been in charge of the to this point they had been in charge of the Government of the Punjab, a province whose head is busied with many other concerns Lord Curzon created in 1901 the North-West Frontier Province, and placed it in charge of a Chief Commissioner, with an intimate frontier experience, directly subordinate to the Government of India This was a revival of a scheme prepared by Lord Lytton in 1877, and often considered afterwards, but which had slipped for lack of driving power. Next, Lord Curzon withdrew the regular troops so far as possible from the advanced posts, and far as possible from the advanced posts, and placed these fortalices in charge of tribal levies, officered by a handful of British officers. most successful of these was the Khyber Rifles, which steadfastly kept the peace of that historic Pass until 1919 At the same time the regular troops were cantoned in places whence they could quickly move to any danger point, and these bases were connected with the Indian railway system In pursuance of this policy frontier railways were run out to Dargai, and a narrow-gauge line, since converted to the broad-gauge, was constructed from Kushal-carb to Kohat, at the entrance of the Kohat. broad-gauge, was constructed from Kushal-garh to Kohat, at the entrance of the Kohat Pass, and to Thal in the midst of the Kurram Valley These railways were completed by lines to Tonk and Bannu By the means the striking power of the regular forces was greatly increased Nor was the policy of economic development neglected.

against India. In this insane enterprise the Afghans placed less reliance in their regular troops, which have never offered more than a contemptible resistance to the British forces than in the armed tribermen In this they were justified, for the Indian Military authorities failed to give timely support to the advanced militia posts, some of these posts were ordered to withdraw, the Militia collapsed and the most serious fighting was with the tribesmen. The tribal levies collapsed with almost universal swiftness. The Southern Waziristan Militia broke and there was serious The trouble throughout the Zhob district Afridia, our most serious enemies in 1897, and the most powerful of the tribes on the North-West Frontier, remained fairly quiet throughout the actual hostilities with Alghanistan, but later it was necessary to take measures against a leading malcontent and destroy his fort at Chora But the Mahsuds and the Waziris broke into open hostilities. Their country lies within the beit bounded by the Durand Line and the Afghan frontier on the west, and by the districts of Bannu and Dehra Ismail Khan on the east. Amongst them the Afghan emissaries were particularly active and as they could put in the field some 30,000 warnors, 75 per cent armed with modern weapons of precision, they constituted formidable adversaries. They refused to make peace even when the Afghans craved in. They rejected our terms and active measures were taken against them. The fighting was the most severe in the history of the Frontier. The Mahsuds fought with great tenacity. Their shooting was amazingly good; their tactics were admirable, for amongst their ranks were many men trained either in the Militia or in the Indian Army; and more than once they came within measurable distance of considerable success. They were assisted by the fact that the best trained troops in the Indian Army were still overseas and younger soldiers were opposed to them. But their very tenacity and bravery were their own undoing; their losses were the heaviest in the long history of the Borderland and when the Mahsuda made their complete submission in September 1021 they were more severely chastened than at any time during their career

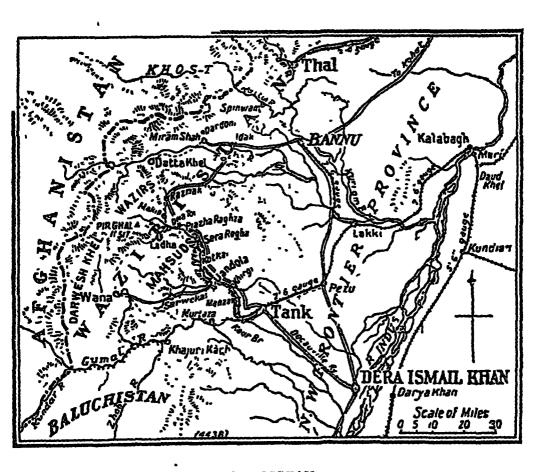

A New Chapter.—As the result of the Afghan War of 1919, Indian frontier policy was again thrown into the melting pot There was much vague discussion of the position in the course of the months which followed the Afghan War and the troubles in Wazrıstan which succeeded it, but this discussion did not really come to a head until February-March 1922. The Budget then presented to the country revealed a serious financial position. It showed that despite serious increases in taxation, the country had suffered a series of deficits, which had been financed out of borrowings. Further heavy taxation was proposed in this Budget, but even then the equilibrium which the financial authorities regarded as of para-mount importance was not attained When mount importance was not attained When the accounts were examined, it was seen that the heaviest charges on the exchequer were those under Military Expenses, and that there

down until the Amir of Afghanistan sought ing expenditure on Waziristan. This forced refuge from his internal troubles in a jehad the Military, and allied with it the Frontier, against India. In this insane enterprise the Afghans placed less reliance in their regular tice the discussion was really focussed on troops, which have never offered more than a Waziristan. In essentials it was the aged controversy-chall we deal with this part of the Frontier on what is known as the Sandeman system, namely, by occupying commanding posts within the country itself, dominating the tribesmen but interfering little in their own affairs; or shall we revert to what was known as the close border system, as modified by Lord Curzon, of withdrawing our regular troops to strategic positions ontside the tribal area, leaving the tribesmen, organised into militia, to keep the passes open, and punishing the tribes-men by expeditions when their raiding propensities become unbearable.

> The Curzon Policy.—The Curzon policy, adopted in 1899, to clear up the aftermath or the serious and unsatisfactory Frontier rising in 1897, was a compromise between the "occupa-tion" and the "close border" policies. It was based on the withdrawal of the regular troops so far as possible to cantonments in rear whilst the frontler posts, such as those in the Tochi at Wana and in the Khy ber and Kurram were held by militia, recruited from amongst the tribesmen themselves The cantonments for regular troops were linked so far as possible with the Indian railway system, so as to permit of rapid reinforcement But it must be remembered that like all Frontier students, Lord Curzon did not regard this are the final polars. not regard this as the final policy. He wrote in the Memorandum formulating his ideas: "It is of course inevitable that in the passage of time the whole Waziri country up to the Durand line will come more and more under our control No policy in the world can resist or greatly retard that consummation. My desire above all without the constant aid and presence of British troops." The Curzon-policy, though it was not pursued with the steadfastness he would have followed if he had remained in control, gave us moderate—or rather it should be Afghan War. It then broke down, because the tribal militia, on which it was based, could not, when left without the support of regular troops in the day of need, withstand the wave of fanaticism and other conditions set up by the Afghan invasion of 1919. The Khyber militia faded away; the Waziri militia either mutinied, as at Wana, or

Waziri militia either mutinied, as at Wana, or deserted. The pillar of the Curzon system fell.

The Policy—The policy first adumbrated to meet these charged conditions was outlined by Lord Chelmsford, the then Viceroy, in a speech which he addressed to the Indian Legislature He said it had been decided to retain commanding posts in Waziristan; to open up the country by roads; to extend the main Indian railway system from its then termain Indian failway system from its then terminus, Jamrud, through the Khyber to the frontier of Afghanistan, and to take over the duties of the Militia by regular troops That immediate policy was soon modified so far as the policing of these frontier lines by regular truops was concerned. Such duties are immensely unpopular in the regular army, which is not organised and equipped for work of this was an indefinitely large, and seemingly unend- character. Irregulars have always existed on

WAZIRISTAN.

the frontier, and as they had disappeared with the Militia, it was necessary to recreate them. The new form of irregular was what have been called Khassadars and Scouts The Khassadar is an extremely irregular He has no British officers and no uniform, excapt a distinguishing kind of pagri. In contradistinction to the old Militia, he finds his own rifle As one informed observer remarked, the beauty of the system is that so long as the Khassadars, under their own headmen, secure the immunity of the caravans and perform their other police duties, they draw their pay and no questions

are asked. If they desert in the day of trouble, they lose their pay but the Government loses no rifles, nor does it risk mutiny or the loss of British and Indian officers. But the application of this policy produced an acute controversy. It was one thing to say that commanding posts in Waziristan should be retained, it was another to decide what these posts should be We must therefore consider the special problem of-Waziristan. The Scouts are a mobile, mounted, irregular force not territorially recruited, officered by British officers.

## v.—Waziristan.

We can now approach the real frontier question of the day, the future of Waziristan. What follows is drawn from an admirable article contributed some years ago to "The Journal of the United Service Institution of India," written by Lt-Col G M Routh, D S O. Geographically Waziristan is a rough parallelogram averaging 60 miles from East to West and 180 from North The Western

Geographically Waziristan is a rough parallelogram averaging 60 miles from East to West and 160 from North to South The western half consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the water shed between the Indus and the Helmund Rivers and corresponds with the Durand Line separating Indus from Afghanistan This is the western boundary. On the east is the Indus North is the watershed of the Kurram River running East and West about 30 miles north of Bannu separating Waziristan from the Kohat District South is a zigzag political boundary from the Durand Line running between Wana and Fort Sandeman in Baluchistan with a turn southwards to the Indus

'The western half is a rugged and inhospitable medley of ridges and ravines straggled and confused in hopeless disarray The more inhabited portions lie well up the slope at heights of four to six thousand feet Here are our outposts of Wana and Ladha some 15 and 20 miles respectively from the Durand Line, in the centre of the grazing district, the latter within five miles of important villages of Kaniguram and Makin

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sand desert

in the Marwat above Pezu.

Where irrigation or river water is obtainable cultivation is attempted under conditions which can hardly be encouraging Other tracts like that between Pezu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfail

Inhabitants—The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of their richer and more peaceful neighbours. The name originates according to tradition from one Wazir, two of whose grandsons were the actual founders of the race Of the four main tribes Darweshkhel, Mahsuds, Dawars and Batanni, only the first two are true Wazirs. Their villages are separate though dotted about more or less indiscriminately, and inter-marriage is the exception—in fact all traditionally are in open strife, a circumstance which, until some bright political comet like the Afghan War of 1919 joined them together, as materially aided our dealings with them.

Unlike other parts of India, however, these wild people acknowledge little allegiance to malike or headmen. No one except perhaps the Mulla Powindah till his death in 1913 could be appeared of any portion of them as his following.

speak of any portion of them as his following.

Policy—The policy of the British was at first one of non-interference with the tribes. Even now only part of the country is administered Gradually it was found that more and more supervision became necessary to control raiding and this was attempted by expeditions to portions of the country with Regulars, followed by building posts and brick towers to be held by Militia. These posts were at first placed at the points where raiders usually debouched. The Political Officers, at first supported by Regulars, built up from 1904 onwards a force of some 3,000 Militia with British Officers at their disposal, who were backed up by the garrisons at Bannu and Dera Ismail Khan. In addition certain allowances were made to the tribes for good behaviour, prevention of raids and surrender of offenders when required, also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied Wana was occupied in 1895 at the request of the Wana Wazirs Similarly the Tochi in 1896. In the comprehensive expedition of 1895-96 when this policy was put into effect, the British arms were shown in every remote valley in the vain hope of taming the Mahsuds It was hoped the various posts would prove a pacifying influence and a rallying ground for Government supporters. From 1904 to 1919 they were held by Militia. Roads and communications were improved and tribal allowances on a liberal scale.

A Programme —Lt-Col Routh then outlined a possible policy for Waziristan We give it textually, because we believe that when it was written it reflected how military opinion in India was developing.—

"To the unprejudiced mind it appears more practical to grasp the nettle firmly and dominate the inhabited tracts. Why should not the road now being made to Ladha be, continued, 36 miles north to the Toohi road at Datta Khel and 29 miles south to Wana? Why should we not occupy the healthier portions of Wazurstan rather than 'the foothills or Cis-Indus zones? The Razmak district round Makin 6,000 feet up is both healthy and fertile The same applies to the Shawal valley laying behind Pir Gul, the national peak near Ladha rising to a height of 11,556 feet above the sea The Wana plain, 5,000 feet up, 30 miles by 15, could with railways support an army corps; there is no doubt that

a forward railway policy will help to solve the problem. A line has been surveyed from Tank to Draband and thence up the valley to Fort Sandeman, so connecting with the Zhob and perhaps later to Wana. The Gumal Tangi obvious route, but would be prohibitively expensive in construction and require much tunnelling. Beyond Khajuri Kach ma Tanai and Rogha Kot to Wana, some 28 miles, offers no difficulty. The old policy of the raiders working westwards and our retributive expeditions stretching their very temporary tentacles eastwards seems to suggest better lateral com-munications. The broad gauge at Kohat Kohat might without undue cost be extended to Thal and thence to Idak via Spinwam. From here and thenes at Auax var Spinwant. From here till further extension proved desirable, a motor road through Bazmak, Makin and Dwatoi to link up with that now surveyed to Ladha sounds possible to the looker on Eventually such communications, road, rail, or both, could continue to Wans, Fort Sandana and Quetta and Higher Bash, a strategic land was effective great na Hindu Bagh, a strategic line offering great defensive possibilities substituting Razmak, which resembles Ootscamund, and healthy uplands for the deadly fever spots now occupied The very fact of employing the tribesmen on these works with good pay and good engineers tends to pacify the country as well as providing healthy accessible hill stations in place of the proverbially comfortless cantonments which now exist in this part of the Frontier."

A Compromise —A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Mahsud rebellion was made by the Foreign Secretary, Sir (then Mr.) Denys Bray, in the course of a Budget discussion in the Legislative Assembly on 5th March 1928 He outlined neither a Forward policy nor a Close Border policy Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the one plan nor the other remained within the bounds of reasonable argument

The Foreign Secretary explained that the ingredients of the Frontier problem at the present day are essentially three, namely, the Frontier districts, the neighbouring friendly State of Afghanistan, and the so-called Independent Territory, this last being the belt of insettled mountain country which lies between the borders of British India and India He proceeded specially to show that this belt is, in fact, within India "...It is boundary pillars that mark off Waziristan from Afghanistan, it is boundary pillars that include Waziristan in India We are apt to call Waziristan independent territory; and it is only from the point of view of our British districts that these tribes are trans-frontier tribes From the point of view of India, from the international point of view that is, they are cis-frontier tribesmen of India. If Waziristan and her From the cis-frontier '

The task is infinitely more difficult blefly because the tribesmen are .WOM . to-day, chiefly because the tribesmen are infinitely better armed, their arms having increased at least tenfold during the last 20 years." Dealing with the Close Border prescription he showed that if one erected a Chinese wall of barbed-wire fence along the plain some distance below the hills, "all the time the problem in front of us would be going from bad to worse, with the inevitable increase of arms in the trans-border and with that inevitable increase in the economic stringency in this mountainous tract, which would make the tribesmen more and more desperate, more and more thrown back on barbarism.... A rigid Close Border policy is really a policy of negation, and nothing more... We might gain for our districts a momentary respite from raids but we would be leaving behind a legacy of infinitely worse trouble for their descendants"

The settled policy of Government in Waziristan, Sir Denys showed, was the control of that country through a road system, of which about 140 miles would lie in Wazirstan itself and one hundred miles along the border of Derajat, and the maintenance of some 4,600 Khassadars and of some 5,000 irregulars, while at Razmak, 7,000 feet high and overlooking northern Waziristan, there would be an advanced base occupied by a strong garrison of regular troops Razmak he showed to be further from the Durand Line than the old-established posts in the Tochi In the geographical sense, therefore, the policy was, in one signal respect, a backward policy None the less, it was a forward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through civilization, of the most backward and inaccessible, and therefore the most truculent and aggressive. and therefore the most truculent and aggressive tribes on the border "Come what may civilization must be made to penetrate these that there is no solution to the Wazirstan problem, and we must fold our hands while it grows mevitably worse."

The policy thus initiated has proceeded

with results according with the highest reasonable expectations and exceeding the most sanguine hopes of most people concerned in its

The roads are policed by the Khassadars, who have, in the main, proved faithful to their trust The open hostility of the Waziri tribesmen to the presence of troops and other agents of Government in their midst, which at the outset they showed by shooting up individuals and small bodies of troops on ciery opportunity. has faded away, and the people have shown an understanding of the rule of law, and, under the control exercised, a readiness to conform to it. In various small but significant ways, methods of civilization have caught the imagination of the people and won their approval tribes are India's scourse, they are also India's the safety of the roads has encouraged, and is responsibility—and India's alone. That is buttressed by a considerable development an international fact that we must never forget "of motor-bus traffic. The roads, as the King's Sir Denys next referred to the triumph of Highway, are officially held to be sacresent the Sandeman policy in Baluchistan. He that is no shooting up or other purally of pointed out that some people long ago believed that the same policy would prove effective in Waziristan "But what was a practical the plains towns in safety. Outbreak at Peshawar in 1950.—

The Maxim apprehension, after the passing of the Act, strongly inflationed the affirmed of the Act, strongly inflationed the affirmed of the Act, strongly inflations of the Act, provided for stheins of the Act, provided for provided for provided for provided for pr

greatly excited and sent down bands to sit tribes, and must remain there so long as the near the border and watch for an opportunity to join in. The Upper Tochi's Wazirs simultaneously took to arms and shortly afterwards the Mahsud Wazirs, about Ladha, did the same At this stage, the development of the Air arm in India proved of incalculable value Aeroplanes patrolled the whole country and were trequently employed by the political authorities to take preventive and punitive action by bombing. The road system, meanwhile, enabled troops to be moved at will to positions of advantage for dealing with whatever serious tribal aggression appeared likely.

In the result, the Mohmands, after being bombed several times, found discretion the better part of valour and made no descent in force. The Afridis twice endeavoured to raid Peshawar in force but by combined air and land action were both times driven back to their hills with no achievement to report. The Orakzals of southern Tirah threatened to descend by the Ublan Pass upon Kohat and their western clans attacked a post in the Upper Kurram and endeavoured to attack Parachinar. Helped by the machinations of Congress agents, they succeeded in drawing two or three clans of Afghan tribesmen across the border into the fray. Combined air and action crushed these efforts Th these efforts The Tochi Wazirs heavily attacked Datta Kbel, but were speedily brought to order by force The Mahsuds were similarly repulsed and punished when they assaulted Scrarogha, in the valley of the Tak-f-%am

All outbreaks of revolt were suppressed in the same manner and the establishment of new fortified posts on the Peshawar plain, immediately opposite the main valleys leading out of Tirah, and the construction of roads for their service, now indicate the application of the new frontier policy in that region The Afridis long refused to assent to these, but being thereby deprived of access to their normal winter grazing grounds on the Khajuri and Ala Khul plain, and prevented from visiting Peshawar, their marketing centre, they came in an accepted peace under the new conditions before the opening of the winter of 1931-82 The Afridas have later asked for roads into Tirah and are getting them

It will be seen that the events of the summer of 1930 put the policy to a severe test, and that its successful operation in the emergency was specially assisted by the Royal Air Lorce. The resultant position appears, then, to be that the control of the tribes, where the policy has already been expressed in road building and in the establishment of suitable garrisons, is effective, that the political and military ground organization with which the policy is supported brings about the introduction of the ameliorative influence of civilization, and that the rapidity and success with which the Royal Air Force can operate over the hills, tends to diminish the amount of ground force necessary. On the other hand, the two desnecessary. On the other hand, the two descents of the Afridis upon the plain and their loss, return to their homes without great despite all that the Royal Air Force and large bodies of troops could do, indicate the capacity demanding the surrender of the Pret of six for mischief which lies in the hands of the Tirah a given due,

policy is not extended over their highlands.

Mohmand Outbreak Disturbances in the Mohmand country during the summer of 1933 both illustrated the operation of the modern Frontier policy and the need to keep it a live policy if it is to be of any use at all. The Mohmands may for the purposes of present description be divided into two categories namely, the Upper Mohmands, who live in the highlands of the Mohmand country, and the Lower Mohmands, whose country stretches from the lower altitudes of the same hills down to the Peshawar Plain. Through the country of the Upper Mohmands passes the Durand line but the Afghan Government have never agreed to its delimitation in part of this region and consequently its place has long been taken over a considerable portion of the length of the Frontier by what is described as the Presumptive Frontier The exact position of this latter has never been settled between the two governments and it is consequently sometimes difficult to say whether people from particular villages belong to one side or to the other of it.

In 1932, during the revolutionary Red Shirt campaign, in connection with the Indian National Congress, in the Peshawar Plain, the Upper Mohmands decided to join in the disturbances and raids in the administered territory immediately northward of Peshawar. The Lower Mohmands are described as the Assured Tribes The meaning of the description is that the British Indian authorities assure them protection against the attacks of the Upper Mohmands and they, on the other hand, are bound by promises of good behaviour. The Assured Tribes in 1932 interfered with the programme of the Upper Mohmands for raiding the plain and the Upper Mohmands in 1933, when spring and early summer once more facilitated their methods of campaigning, commands attributory raids upon the Hallman. commenced retributory raids upon the Halimzai and other Assured clans The attacked clans appealed to the political authorities for help and that help they were obliged to give

About the same time as this trouble was germinating, there appeared in Bajaur, a country immediately to the north of that in which the events just described developed, a Pretender to the Aghan throne He was accompanied by two companions and started a campaign in Bajaur for a revolution or such other trouble as might be possible in Afgirmistan This compelled the British Indian authorities to take measures in fulfilment of their obligations of good neighbourliness to Afghanistan

Road construction from the Peshwar-Shabkadr road northwards through Ghairnai into the Halimzai country and towards the preses which lead from that country into the unter extremities of the Bajaur Valley was undertaken and two brigades of troops, with other details, were sent form and up at to assist in dealing water the Upper Mohmands. At the same time. aeroplines bombarded the village of Kotlai fr Upper Bajaur, which had given shelter to the Pretender, further serial deconstrations with made and the Bajauris were given an ultitude in

he beat down opposition until none dared lift a hand against him. Aided by a British subsidy of twelve lakhs of rupees a year increased to eighteen by the Durand Agreement of 1893, and subsequently to over 20 lakhs, he established a strong standing army and set up arsenals under foreign supervision to fur-nish it with arms and ammunition. Step by step his position was regularised. The Anglo-Russian Boundary Commission,—which nearly he committed no act of hostility, as soon as precipitated war over the Penjdeh episode it was safe to do so he turfed the members in 1885,—determined the northern boundaries of these missions out of the kingdom. At The Pamirs Agreement delimited the borders the end of the war his policy was completely amid those snowy heights The Durand justified; he had kept Afghanistan out of the Agreement settled the border on the British side, except for a small section to the west of the Khyber, which remained a fruitful source was at its zenith. of trouble between Afghanistan and ourselves until 1919, when the Afghan claims and action upon the undemarcated section led to war. That section was finally surveyed and the frontier determined shortly after the con-clusion of peace with Afghanistan Finally the McMahon award closed the old feud with Persia over the distribution of the waters Seistan Helmand in the estimated by competent that authorities about the time of Abdurrahaman's death, Afghanistan was in a position to place in the field, in the event of war, one hundred thousand sell-armed regular and arregular troops, toc 'her with two hundred thousand tribal levies. and to leave fifty thousand regulars and irre-lars and a hundred thousand levies to meintain order in Kabul and the provinces. But if Afghanistan were made strong, it was made friendly. Abdurrahaman Khan distrusted Eritish policy up to the day of his death. All that can be said is that he distrusted it less than he distrusted Russia, and if the occasion had arisen for him to make c choice, he would have opposed a Russian advance with all the force at his disposal He closed his country absolutely against all foreigners, except those who were necessary for the supervision of his arsenals and factories He refused to accept a British Resident, on the ground that he could not protect him, and British affairs Were entrusted to an Indian agent who was in a most equivocal position. At the same time he repeatedly pressed for the right to pass by the Government of India and to establish his own representative at the Court of St James.

Afghanistan and the War—These relations were markedly improved during the reign of His Majesty the Amir Habibullah Khan It used to be one of the trite sayings of the Frontier that the system which Abdurrahman Khan had built up would perish with him, for note was expable of maintaining it Habib-nilah Khan more than maintained it He-risted India soon after his accession and ac-quired a vivid knowledge of the power and He be forced into many equivocal acts,

means into which it is not well closely to enter; they must trust him; certainly his reception of Turkish, Austrian and German "mission," at Kabul, at a time when British representatives were severely excluded, was open to grave misconstruction. But a fuller knowledge 'aduced the belief that the Amir was in a position of no little difficulty. He had to compromiss with the fanatical and anti-British elements amongst his own people, inflamed by the Turkish preaching of a jehad, or holy Islamic war. But war, he had adhered to the winning side; his authority in the kingdom and in Central Asia

Murder of the Amir.—It is believed that if he had lived Habibullah Khan would have used this authority for a progressive policy in Afghanistan, by opening up communications and extending his engagements with India He was courted by the representatives of Persia and the Central Asian States as the possible rallying centre of a Central Asian Islamic confederation At this moment he was assassinexed on the 20th February 1919. The circumstances surrounding his murder have never been fully explained, but there is strong ground for the belief that it was promoted by the reactionaries who had harassed him all his reign These realised that with his vindication by the war their time of reckoning had come; they anticipated it by suborning one of his aides to murder him in his sleep. His brother, Nasrullah Khan, the nominee of the fanatical element, was proclaimed Amir at Jelalabad in his stead, but public opinion in Afchanistan revolted at the idea of the brother selzing power over the corpse of the murdered man His sons, Hayat and Amanullah, were not disposed to waive their heritage Amanullah was at Kabul, controlling the treasury and the arrenal and supported by the Army Nasrullah found it impossible to make head against him and with-drew. The new Amir, Amanullah, at once communicated his accession to the Government of India and proclaimed his desire to adhere to the traditional policy of friendsnip. But his difficulties at once commenced; he had to deal with the war party in Afghanistan; he was confronted with the dissatisfaction arising from the manner in which the murderers of Habibullah had been dealt with; the fanatical element was exasperated by the imprisonment of Nasrullah; and the Army was so incensed that it had to be removed from Kabul and given occupa-tion to divert its thoughts. A further element of complexity was introduced by the political situation in India. The agitation against the Rowlatt Act was at its height The disturbances in the Punjab and Gujarat had talen place Afghan agents in India, of whom the most prominent was Ghulam Hyder Khan. resources of the Impire. He strengthened the Afghan postmaster at Perlawar, florded resources of the authority in Afghanistan Afghanistan with exargerated accounts of and consolidated his authority in Afghanistan Afghanistan with exargerated accounts of itself. At the outset of the war he made a the Indian unrest. The result of all this was to declaration of his complete neutrality. It is convince the Amir that the real solution of buneved—a considerable reticence is preserved his difficulties was to unite all the disturbing benered the Government of India that he might April his were set in motion and simultaneous in the Government of India that he might April his were set in motion and simultaneous into many equivocal acts, transcord of auti-British properties. were set in motion and simulon whom the Afghans placed their chief reliance

Speedy Defeat —The rar caught the Army in Irdia in the throws of demobilisation and with a large proportion of the Sensoned troops on service abroad Nevertheless the regular Africa Army was rapidly dealt with Strong British forces moved up the Khyber and scired Decca Jelelabad was reperiedly hombed from the cir and also Kabul Nothing but estorate of mechanical transport presented the B-.tich forces from seizing Jelalabed Intendent the Afghans were severely defeated. On the 14th May they asked for an Armetica With the usual Afghan sperit of hasslire that tried to water down the conditions of the stanstice, but as they were met with an theo, marrising emphasis of the situation they de priched representatives to a conference at Haw hard on the 26th July On the 8th April - Irraty of Peace was signed which is get on in the Indian Year Book, 1923, pp. 12-17

> Bolshevik Penetration—Taking a long view, a much more serious development of the policies of Afghanistan, at the period to which the foregoing notes apply was the penetration of the Bolsheviks. These astute propagaudists have converted the former Trans-Caspian States of Tsarist Russia into Soviet Republics, where the rule of the Bolsheviks is much more drastic and disruptive than was that of what was called the despotism of the Romanoffs The object of this policy is gradually to sweep into the Soviet system the outlying provinces of Persia, of China and of Afghanistan Persia this policy was folled by the vigour of the Sipar Salah, Reza Khan, since declared Shah. In Chinese Turkestan it is pursued with qualified success. In Afghanistan it also made certain progress. The first step of the Bolsheviks was to extend the Soviet Republics of Turkestan Usbales and Turkestan as a contraction as a con of Tajıkistan, Uzbekıa and Turkmanistan so as to absorb all Northern Afghanistan. This was later, apparently, abandoned for the moment for a more gentle penetration Large subsidies, mostly delivered in kind, were given to Afghanistan. Telegraph lines were erected all over the country, roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pllots and mechanics was created and was largely developed. In return the Bolsheviks received important trading facilities. The whole purpose of this policy was ultimately to make it possible to attack Great Britain in India through an absorbed Afghanistan.

It is very doubtful if the Amir and his advisers were deceived by these practices, and whether they did not pursue the simple plan of taking all they could get without the slightest intertion of handing themselves over to the Bolsheviks. But it is ensuer to let the Bolshevik in than to get him out, friends of the Afghane were asking themselves whether the Amir was not nourishfor a region by tribul truitors on the ling vipers in his bosom. Towards the end of July 1 the of the lamb prople and rude awakening. The Northern Frontier of the rude awakening. A British Minister is established in Kabul as well as the representatives of other Luropean States The representatives of Afghanistan are

it provided that it should in no way interfere a long tour to India and Europe. It is under with the secret treaty signed in Moscow on stood that this was one of the cherished ambifebruary 28th, 1921. The principal clusses of tions of his father, King Habibuliah, who was this treaty, as disclosed in the Afghan papers, as assassinated in 1919. King Amanulia, when are as follows—

he set out, was warmly welcomed in India and received a great popular greeting in Bombay both from his co-religionists and from members V in London, and visited the principal European capitals. He made a State visit to Turkey, and parties returned to Afghanistan by way of Soviet Russia and Persia A series of treaties with the governments of the countries visited was announced and Afghanistan was peaceful

Reforming Zeal.—King Amanulla returned to his realm as full of reforming zeal. He was much impressed by the political and social institutions of the western lands he visited, and in particular by the dramatic forcefulness with which Mustapha Kemal Pasha had driven Turkey along the path of "reform," or perhaps it would be more correct to say westernisation hostile actions and In this he was encouraged by the Queen, who was desirous of seeing the women of Afghanistan enjoy some of the freedom and opportunity won Clause 3.—The high contracting parties by and for the women of the West. Educt after edict was issued, changing the whole structure of European dress was ordered for the people of

With every appreciation of the spirit and direction of these changes, friends of His Majestv advised the King to moderate the pace They reminded him that in 1924 far less drastic to be used against the other contracting party to pass through its dominions

Clause 6—This treaty will take effect from the date of its ratification, which should take place within three months of its signature it will be valid for three years After this period it will remain in force for another year; provided neither of the parties has given notice six months before the date of its expiry that it would cease after that time

They reminded him that in 1924 far less drafter changes had brought serious trouble in their train. In May of that year the "Lame Mullah" raised the standard of rebellion amongst the Mullahs were openly active against the King and His Majesty was equally frank in his hostility to them Possibly also well-wishers provided neither of the parties has given notice after centuries of close contact with the would cease after that time On March 23rd there was also signed in Berlin | the emancipation of women, might be less easy on March 23rd there was also signed in Berlin | in Afghanistan, where there had been no contact

A change of Kings - Events moved rapidly States The representatives of Afghanistan are established in India and in London, and at some of the European capitals. The various subsidiary agreements under the Treaty have been carried into effect.

The King's Tour —In the closing months of the withdrawal of all the reform and 1927 His Majesty King Amanulla, accompanied by the Queen and a staff of officials, commenced Representatives. Communications with the outer world were broken King Amanulla provision of an interest free foun of gave, over and his family fled from Katul to Kandahar, to King Nadir and by the supply of rifles and and then from Kandahar ric Quetta to Bombay ammunition to him He gave evidence of his or his artifal at Home entered into possession of the Alghan Legation, where he remained. Side of the Frontier joining those on the Bacha-I-Saqao decared himself King of British side against the Government of India in the outer world were broken King where they took ship to Europe King Amanulla on his artial at Home entered into possession of the Afghan Legation, where he remained. Bacna-i-Saqao decared himself King of Afghanistan, and for a few months held his postion in Eabul Without money, Extul Without money, experience or a disciplined edmini tratice of loring his throne the sthorm one and he was harared by content attacks. Amanulla | provision of an interest free loan of £200,000 response to the Congress agitation in the summer of 1930 The trade routes were re-opened and the new King again took up Amanullah's mantle of reform but in a statesmanlike manner which carried the Mullah's along with him. Murder of Nadır Shah —This ordered march of progress was tragically interrupted by the of progress was tragically interpret by the murder of His Majesty Nadur Shah on the after-noon of 8 November 1933 His Majesty was attending a football tournament prize giving, when a young man among the gathering stepped forward and fired several revolver shots into him at close range, killing him instantly. It later appeared that the assassin committed the crime in revenge for the execution of a prominent Afghan who had been caught deeply involved in treasonable activities after he had been mercifully treated for earlier behaviour of the same kind. The assassin's father was stated to have been this man's servant. The murder was not followed by general or widespread disorder The members of Nadir Shah's family disorder and his prominent officers of State stood loyally by his heir, his son, Muhammed Zahir The latter was duly placed on his father's throne and his accession was in due course acknowledged and confirmed throughout the Lingdom in the traditional manner. The new king started his reign with a high reputation for courage and steadiness. He carly issued assurances to his people that he would continue the policy of his

#### Russian Intervention.

This was the position when in 1899 Lord Curzon, Vicercy of India, endeavoured to get into direct touch with the Tibetan authorities Three letters which he addressed to the Dalai Lama were returned unopened, at when the Dalai Lama was in direct intercourse with the Tsar of Russia. His emissary was a Siberian Dorileff, who had established a re-markable assendancy in the counsels of the Dalai Lama. After a few years residence at Lhasa Dorlieff went to Russia on a confidential mission in 1899 At the end of 1900 he returned to Russia at the head of a Tibetan mission of which the head was officially described in Russia as "the senior Tsanite Khomba attached to the Dalai Lama of Tibet" This mission arrived at Odessa in October 1900, and was received in audience by the Tsar at Tiredia Dornell watermed to These to received Livadia. Dorness returned to Lhasa to report progress, and in 1901 was at St Petersburg with a Tibetan mission, where as bearers of an autograph letter from the Dalai Lama they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by a Russian force to which several Intelligence Officers were attached. At the time it was rumoured that Dorneff had, on behalf of the Dalai Lama, concluded a treaty with Russia, which virtually placed Tibet under the pro-tectorate of Russia. This rumour was afterwards officially contradicted by the Russian Government.

#### The Expedition of 1904.

In view of these conditions the Government of India, treating the idea of Chinese suze rainty over Tibet as a constitutional fiction, proposed in 1908, to despatch a mission, with an armed except, to Lhasa to discuss the outstanding questions with the Tibetan authorities on the spot To this the Home Government could not covered by ment could not assent, but agreed, in conjunction with the Chmese Government, to a joint meeting at Khamba Jong, on the Tibetan side of the frontier. Sir Francis Younghusband

time, but which have since been made clearer, the irony of fate sought a refuge in India

the Home Government were unable to accept the full terms of this agreement. The indem-nity was reduced from seventy-five lalks of rupees to twenty-five lakks, to be paid off in three years, and the occupation of the Chumbi Valley was reduced to that period. The right to despatch the British Trade Agent to Linara was withdrawn. Two years later (June 1906) a Convention was concluded between Great Britam and China regulating the position in Tibet. Under this Convention Great Britam agreed neither to annex Tibetan territory, nor to interfere in the internal administration of Tibet. China undertook not to permit any other foreign State to interfere with the territory or internal administration of Tibet Britain was empowered to lay down telegraph lines to connect the trade stations with India, and it was provided that the provisions of the Convention of 1890, and the Trade Regulations of 1893, remained in force. The Chinese Government paid the indemnity in three years and the Chumbi Valley was evacuated The only direct result of the Mission was the opening of the three trade marts and the establishment of a British Trade Agent at Gyantse

### Chinese Action.

The sequel to the Anglo-Russian Agreement was dramatic, although it ought not to have been unexpected. On the approach of the Younghusband Mission the Dalai Lama fled to Urga, the sacred city of the Buddhists in Mongolia. He left the internal government of Tibet in confusion, and one of Sir Francis Younghusband's great difficulties was to find Tibetan officials who would undertake the responsibility of signing the Treaty. Now the suzerainty of China over Tibet had been explicitly reaffirmed. It was asserted that she would be held responsible for the foreign relations of Tibet. In the past this suzerainty having been a "constitutional action," it was inevitable that China should take steps to see meeting at Khamba Jong, on the Tibetan side of the frontier. Sir Francis Youngbushads was the British representative, but after months of delay it was ascertained that the Tibetans had no intention of committing themselves had no intention of the Tibetans developed marked hostility, and there was fighting at Tuna, and several the proceeded gradually to establish his authority, marching through eastern libet and lity, marching through eastern libet and lity, marching through eastern libet and lity, and there was fighting at Tuna, and several treating the people with great severity. ## Railways to India.

The prospect of linking Europe and Asia by a railway running eastwards through Asia Bachdad to Feluja, on the Euphrates When Alinor has fascinated men's minds for generations. The plans suggested have, owing to the British connection with India, always through Baghdad line became indefinitely delayed. lain in the direction of lines approaching India. More than 50 years ago a Select Committee of the House of Commons sat for two years to consider the question of a Euphrates Valley railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many vears before the end of the nineteenth century. A proposal was put forward in 1895 for a line of 1,000 miles from Caro and Port Said to Koweit, at the head of the Persian Gulf While these projects were in the air, German enterprise stepped in and made a small beginning by constructing the Anatolian railway Its lines start from Scutari on the system southern shore of the Bosphorus, opposite Constantinople, and serve the extreme western and of Asia Minor. And upon this foundation was based the Turkish concession to Germans to build the Baghdad Railway.

Meanwhile, Russia was pushing her railways from various directions into the Central Asian territory running along the northern frontiers of Persus and Afghanistan to the borders of Chinese Turkestan The construction of a Trans-Persuan railway, connecting India, across Persua with the Russian lines between the Black Sea and the Caspian Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia

The Germans pushed forward their Baghdad railway project with a calculating shrewdness arising from their estimate of the varue it would possess in their grand aim to over throw the British Fmpire The outbreak of the great war and the success of the Germans in inversing Turkey into it saw the final stages of the construction of the railway pressed forward with pessionate energy Thus, before the overthrow of the Turks and Germans in Asia blinor and of the Germans in France the Asia blinor and of the Germans in France the railway was completed and in use from Sentari across Anatolia, over the Taurus Mountains to Aleppo and thence eastward across the Eupprates to a point between Misibin and Mosul The Germans had also by that time constructed a line to Baghdad at the eastern end of the route, northwards from Rachdad to a point a considerable distance beyond Samara

The war compelled the British to undertake

delayed

The Trans-Persian line to join the Russian Caucasian system and the Indian railways first assumed proportions of practical import-Both the Russian ance in the winter of 1911 and the Indian railway systems were by then well developed up to the point likely to be the termini of a Trans-Persian line. The Russian system reached Julia, on the Russian frontier in the Caucasus During the war this line was carried thence southward that the residence and the systems. into the region east and south-east of Lake Urumla The Indian railway system, on the borderland of India and Persia, was similarly much extended and improved during the war. A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic, but the agreement came to naught

There remains the possibility of linking the Russian and Indian railway system by way of Afghanistan The suggestion has often been made in recent vents that the Russian line from Mery to Herat, on the northern frontier of Afchanistan, should be linked to the Indian ine which proceeds from Quetta to the Afghan horder on Chaman The distance between the rullway heads is about 250 miles But there But there have always for strategic reasons been strong military objections to the rillway across Afghanisten and after the death of the Amir Habibullab the Afchan Govern Government firsty opposed any suggestion for earrying the loding or Russian rallway system within their borders. What the present Alguan Government think about the matter was not shown up to the time this article was written, but the -trange situation in Central Asia and beyond the Indian North West Frontier does not suggest the early removal of the strategic difficulties. The completion of a broad-gauge line extending the Indian rulway system through the Khaber Pass to Landi Khana, at it, we-tern extremity opens a prospect of further possible rail connections with Afghanistan

## The Army.

The great sepoy army of India originated in the small establishments of guards, known as peons, enrolled for the protection of the factories of the East India Company, but sepoys were first enlisted and disciplined by the French, who appeared in India in 1665. Before this detachments of soldiers were sent from England to Bombay, and as early as 1665 the first fortified position was occupied by the East India Company at Armagon, near Masulipatam. Madras was acquired in 1640, but in 1654 the garrison of Fort St George consisted of only ten men. In 1661 Bombay was occupied by 400 soldiers, and in 1668 the number was only 285 of whom 93 were English and the rest French, Portuguese and Indians.

After the declaration of war with France in 1744 the forces were considerably increased, but this did not prevent the French capturing Madras in 1746 Following the French example, the English raised considerable sepoy forces and largely increased the military establishments. In 1748 Major Stringer Lawrence landed at Fort St. David to command the forces landed at Fort St. David to command the forces of the Company. The English foothold in India was then precarous and the French under Dupleix were contemplating fresh attacks. It became necessary for the English Company to form a larger military establishment. The new commandant at once set about the organisation and discipline of his small force, and the garrison was given a company formation. This was the beginning of the regular Indian. Army of which Lawrence subsequently became Commander-in-Chief. In Madras the European companies were developed into the Madras Fusiliers: similar companies in Bengal and Bombay became the 1st Bengal and 1st Bombay Fusiliers. The native infantry were similarly organised by Lawrence and Olive By degrees Royal Regiments were sent to India, the first being the 59th Foot, which arrived in

Struggle with the French.—From this time for a century or more the army in India was engaged in constant war. After a prolonged war with the French, whom Duplels had by 1750 raised to the position of the leading power in India, the efforts of Stringer Lawrence, Clive, and Eyre Coote completed the downfall of their rivals, and the power of England was established by the battle of Plassey in Bengal, and at Wandewash in Southern India, where the French were finally defeated in 1761. A number of independent States, owning nominal allegiance to the Emperor at Delhi, had risen on the decline of the Mughal Empire, some ruled by Mahritta Princes and others by Musalman adventurers such as Hyder Ali of Mysore A prolonged struggle ensued with the latter and his son and successor Tipu Sultan, which ended only with the defeat and derth of Tipu and the capture of Seringapatam in 1799.

Reorganisation of 1796—In 1796 the Indian armies, which had been organised on the Presidency system, were reorganised. The European troops were 13,000 strong and

the Indians numbered some 67,000, the infantry being generally formed into 75 regiments of two battalions each. In Bengal, regiments were formed by linking existing battalions of ten companies each with large establishments of English officers. The Madras and Bombay armles were at the same time reorganised on similar lines, and cavalry and artillery companies were raised.

In 1798, the Marquis Wellesley arrived as Governor-General, firmly imbued with the necessity of destroying the last vestiges of French influence. In pursuance of this policy he reduced Mysore, where Tipu was intriguing with the French, and then turned his attention to the Mahratta States, in which Sindhia had established power over the Mughal Emperor at Delhi by means of a large regular army officered by Europeans under the French adventurer Perron. In campaigns against Sindhia in Hindustan by a British Army under General Lake, and in the Decean against that prince and the Raja of Berar by an army under General Wellesley, afterwards Duke of Wellington, the power of these Chiefs was broken in the battles of Laswari and Assaye. French influence was finally destroyed, and the Mughal Emperor was released from the domination of the Mahrattas Subsequently Hollar also was feduced, and British power established on a firm footing.

Mutiny at Vellore—The Indian Army had been from time to time subject to incidents of mutiny which were the precursors of the great cataclysm of 1857. The most serious of these outbreaks occurred at the fort of Vellore in 1806 when the native troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort, while the striped flag of the Sultan of Mysore, whose sons were confined there, was raised upon the ramparts. The mutiny was suppressed by Colonel Gillespie, who galloped over from Arcct at the head of the 19th Light Draucons, blew in the gate of the fort, and destroyed the mutineers. This retribution put a stop to any further outbreaks in the army.

Overseas Expeditions—Several important overseas expeditions were undertaken in the early part of the nineteenth century. Bourbon was taken from the French - Ceylon and the Spice Islands were wrested from the Dutch, and Java was conquered in 1811 by a force largely composed of Bengal troops which had volunteered for this service

In 1814, the Nepal War took place in which the brave Gillespie, who had distinguished himself in Java, was killed when leading the assault on the fort of Kalunga The Gur'haz were overcome in this war after offenng a stout resistance

In 1817, hostilities again broke out with the Mahrattas, who rose against the British during the progress of operations against the Pindana Practiculty the whole army tool the feld and all India was turned into a vast comp. The Mahratta Chiefs of Poons Nagpur, and Indore rose in succession, and were beaten, respectively, at Kirkee, Sitabaidi, and Mchadpar. I his was The tide of return In the last war in Southern India war rolled to the north never to return the Punjab, to which our frontier now extended our army came into touch with the great military community of the Sikhs.

In 1824, the armies were reorganised, the double-battalion regiments being separated, and the battalions numbered according to the The Bengal Army was dates they were raised organised in three brigades of horse artillery, five battalions of foot artillery, two regiments of European and 68 of Indian Infantry, 5 regiments of regular and 8 of uregular cavalry Madras and Bombay armies were constituted on similar lines, though of lesser strength

First Afghan War and Sikh Wars— In 1839, a British Army advanced into Afghanistan and occupied Cabul There followed the murder of the British Envoys and the disastrous retreat in which the army perished, This disaster was in some measure retrieved by subsequent operations, but it had far-reaching effects on British prestige The people of the Punjab had witnessed these unfortunate operations, they had seen the lost legions which never returned, and although they saw also the avenging armies they no longer regarded them with their former awe Sikh aggression led to hostilities in 1845-46, when a large portion of the Bengal Army took the field under Sir Hugh Gough The Sikhs were defeated after stubborn fights at Mudki and Ferozeshahr, the opening battles, but did not surrender until they had been overthrown at the battles of Aliwal and Sobraon Two years later an outbreak at Yultan caused the Second Sikh War when, after an indecisive action at Chilanwala, our brave enemies were finally overcome at Guierat, and the Punjab was annexed. campaigns of this period were the conquest of Sind by Sir Charles Napler, and the Second Burmese War, the first having taken place in 1824.

The conquest of the Punjab extended over the frontier to the country inhabited by those turbulent tribes which have given so much trouble during the past sixty years while they have furnished many soldiers to our army To keep order on this border the Punjab Frontier Force was established, and was constantly engaged in small expeditions which, while they involved little bloodshed, kept the force employed and involved much ardinous work.

The Indian Mutiny—On the eve of the mutiny in 1857 there were in the Bengal Army 21,000 British and 137,000 Indian troops, in the Viadras Army 8,000 British and 49,000 Indian troops and in Bombay 9,000 British and 45,000 Indian troops The proportion of Indian to British was therefore too large for and various Among these were the amexa-tion policy of Lord Dalhousie, especially that of Oudh from which the greater part of the Bengal Army was drawn, interference with the privileges of the sepoy with respect to certain allowances, and lack of power on the part of commanding officers either to punish or reward The final spark which fired the revolt was the introduction of a new cartridge. The muskets of those days were supplied with a cartridge 1857 the East India Company ceased to exist

'n which the powder was enclosed in a paper cover, which had to be bitten off to expose the powder to ignition. In 1857 a new cartride o was introduced with paper of a glazed texture which it was currently reported was greased with the fat of swine and oxen, and therefore unclean allke for Muhammadans and Hindus This was interpreted as an attempt to destroy the caste and the religion of the sepoys. Skilful agitators exploited this grievance, which was not without foundation, and added reportsthat flour was mixed with hone-dust and sugar refined with the blood of oxen.

Disaffection culminated in mutiny at Berhampur and in an outbreak at Barrackpore where sepoy Mangai Pande attacked a European officer The next most serious manifestation was the refusal of men of the 3rd Bengal Cavalry at Mccrut to take the obnoxious cartridge. These men were tried and sentenced to long These men were tried and sentenced to long terms of imprisonment, their fetters being rivetted on parade on the 9th May. Next day the troops in Meerut rose, and, aided by the mob, burned the houses of the Europeans and murdered many. The troops then went off to Dell' Unfortunately there was in Meerut no senior officer capable of dealing with the situation. The European troops in the place remained inactive, and the mutineers were allowed to depart unmolested to spread the flames of rubelling dames of rebellion

Delhi is the historic capital of India On its time worn walls brood the prestige of a thou-It contained a great sand years of Empire Yet Delhi magazine of ammunition held only by a few Indian battalions, who joined the mutineers The Europeans who did not succeed in escaping were massacred and the Delhi Emperor was proclaimed supreme in India. The capital constituted a nucleus to which the troops who mutinied in many places flocked to the standard of the Mughal An army was assembled for the recovery of Delhi but the city was not captured until the middle of September In the meantime mutiny had spread The massacres of Cawnpore and Jhansi took place, and Lucknow was beneged until its relief on the 27th September. The rebellion spread throughout Central India and the territory that now forms the Central Provinces, which were not recovered until Sir Hugh Rose's operations in 1858 ended in the defeat of the Rani of Jhansi

Minor Campaigns —During the period until 1879, when the Second Afghan War began, there were many minor campaigns including the China War of 1860 the Ambeyla Campaign, and the Abyssinian War. Then followed the Afghan War in which the leading figure was Lord Roberts There were expeditions to Egypt and China, and Frontier Campaigns of which the most important was the Tirah Campaign of 1897. There were also the prolonged operations which led up to or ensued upon the annexation of Burma, several campaigns in Africa, and the expeditions to Lhasa But until 1914, since the Afghan War, the army of India, except that portion of the British gardens which was sent to South Africa in 1899, had rison which was sent to South Africa in 1899, had little severe fighting, although engaged in wany ardnous enterprises.

Reorganisation after the Mutiny,-In

and their army was taken over by the Crown. At this time the army was organized into three armies, siz Bengal, Bombay and Madras, the total strength being 65,000 British and

140,000 Indian troops

Several minor re-organizations took place during the following years, such as the linking of three Regiments together and the raising of Class Regiments and Companies In 1895 the next large reorganization took place. This was the abolition of the three Armies and the introduction of the command system Commands were formed, our Punjab, Bengal. Madras and Bombay

Lord Kitchener's Scheme -This system lasted until 1904 when under Lord Kitchener's re-organization the Madras Command was abolished and the Army divided into three Com-mands—the Northern, Eastern and Western, corresponding to the Punjab, Bombay and

Bengal Commands.

In 1907, Lord Kitchener considered that consequent on the delegation of administrative powers to Divisional Commanders, retention of such powers by Lieutenant-Generals of Commands led to delay in the despatch of business The Command system was therefore abolished and India was divided into two Armies—the Northern and Southern—each under a General Officer who was responsible for the command, inspection and training of the troops but was given no administrative

responsibilities

Early in the War both Army Commanders took the field and were not replaced until 1916 and 1917 whon both had practically the same functions as their predecessors. It was now functions as their predecessors. It was now realised that administration was being unduly centralised at Army Headquarters and the machinery was becoming clogged with unnecessary details To secure efficiency at A H Q, therefore, a certain measure of decentralisation was carried out in 1918. With the alteration of the designation "Army" to "Command" at this time, a considerable increase was made in the administrative staffs of the two Commands and the General Officers Commanding were given powers to deal with all administrative questions other than those dealing with matters of policy, new principles or war The commands were increased to four in 1920,

each under a General Officer Commanding-in-

Chief.

Present System of Administration. The essential features of the Army, as con-"The Army in India and its Evolution," a publication issued in 1924 with the authority of the Government of India.

The Secretary of State, as one of His Majesty's mulisters, has a special responsibility and autho-inty in regard to the military administration

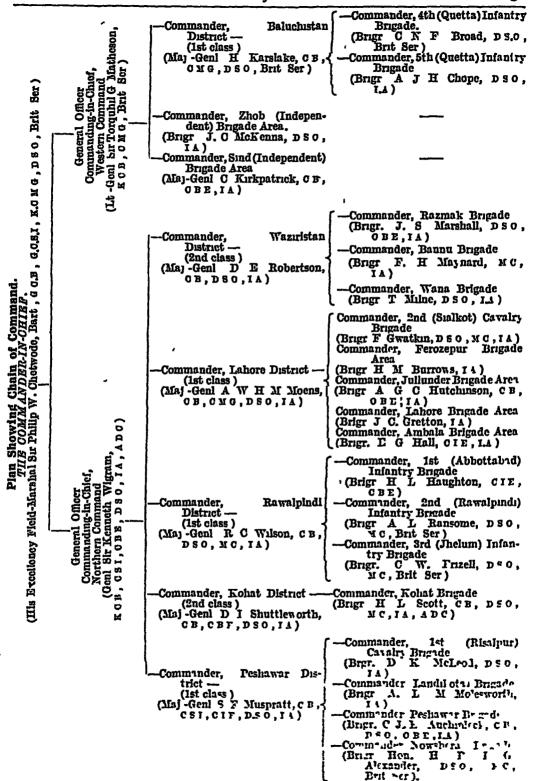

In India.

The Secretary of State's principal adviser on Indian military affairs is the Secretary in the Military Department of the India Office The post is filled by a senior officer of the Inc post is mice of a senior of the Indian Army with recent Irdian experience if the appointment is at present held by Incutenant-General Sir John F. S. D. Cobridge, K. C. B., C. Y. G., D. S. O., who was formerly Commander of the Peshwar District from October 1982, 45, 1982, The Millian Comments of the Peshwar District from October 1982, 45, 1982, The Millian Comments of the Peshwar District from October 1982, tober 1930 to May 1933 The Military Secretary is assisted by one first grade staff officer, selected from the Indian Army. In order that he may keep in touch with the current Indian affairs, the Military Secretary is expected to visit India during the tenure of his office. In addition, by a practice which has obtained for many years, a retired Indian Army officer of high rank has a seat upon the Secretary of State's Council.

The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, who is required to pay due obedience to all such orders as he may receive from the Secretary of State. The Viceroy's Executive Council exercise in respect of Army administration the same authority and functions as they exercise in respect of other departments of the Government. in the first phase of the representative institutions conferred upon India by the Montigu-Chelmsford Reforms Scheme, Army expenditure and the direction of military policy have been excluded from the control of the Indian Legisla-

Commander-in-Chief.—The authority in the chain of administrative arrangements is His Excellency the Commander-in-Chief, who by custom is also the Army Member of the Viceroy's Executive Council. The apof the Viceroy's Executive Council. The appointment is held by His Excellency Field-Marshal Sir Philip W Chetwode, Bart, G.C.B., G.C.S.I., K.C.M.G., D.S.O., British Service, who succeeded Field-Marshal Sir William Birdwood He is also a member of the Council of State. All the work connected with the administration of the Army, the formulation and execution of the military policy of the Government of India, the responsibility for maintaining every branch of the Army, combatant and non-combatant, in a state of efficiency, and the supreme direction of any mulitary operations based upon India are centred in one authority,—the Commander-in-Chief and Army Member. In addition, he administers the Royal Indian Navy and the Royal Air Force in India. The Commander-in-Chief is assisted in the executive side of his administration by 4 Principal Staff Officers, ouz, the Chief of the General Staff, the Adjutant-General, the Quartermaster-General and the Master-General of Ordnance.

The Army Department.—The Department is administered by a Secretary who, like other Secretaries in the civil departments, i-a Secretary to the Government of India as awhole, possessing the constitutional right of access to the Viceroy, he is also for the purposes of Sub-section 4, Section 26 of the Regimental Debts Act, 1893 (56 Vict-5) and the Regulations made thereunder Secretary to the Government of India in the Military Department, and for purposes of the Royal Indian Nasy. Secretary to the Government of India in the Nasy Department. He also exercises the powers vested in the Army council by the Geneva Convention Act, 1911, so far as that Act applies to India under the Order in Council No. 1551 of 1916 He institled by a Deputy Secretary (who is also Secretary of the Indian Soldiers' Doars), and Under Secretary, a Director of Wiltery Lands and Cantonments, a Director, Recultions and Forms, and one Assistant Secretary, (who is also Joint Secretary of the Indian Soldiers' Be

Quarter-Master General's Branch. Q M G —Lt -Genl. Sir W Edmund Ironside, KCB, OMG, DSO, Brit Ser.

D Q M G — Maj -Genl E F Orton, C B , I.A D S & T — Maj -Genl L M Steward, CB, OBE, IA

This Branch is concerned with the specification, provision, inspection, maintenance and issue of supplies, i.e., foodstuffs, forage, fuel, etc, and is responsible for the following Services —Transportation, Movements, Quartering, Supply and Transport, Military Remounts, Veterinary, Garrison and ntal Institutes. Also for the purchase Farms, Regimental Institutes. of grains and of minor supplies not provided in bulk by the authority responsible for production and provision.

Master General of the Ordnance Branch M. G O -Lt -Genl Sir Henry E ap R Pryce. KOB, CMG, DSO, IA

D M G O -Brigr (Local Maj -Genl ) W R Paul, OBE., Brit Ser

This Branch controls the ordnance and cloth ing factories and is concerned with the provision, inspection, maintenance and issue of equipment and ordnance stores, clothing, and necessaries and conducts all matter relating to contracts in respect of food-stuffs, &c., and supply in bulk of general stores and materials. The Master-General is also responsible for the design, inspection, and supply of guns, carriages, tanks. smallarms, machine guns, ammunition, chemical warfare appliances, etc. He also deals with questions regarding patents, royalties and inventions.

There are other branches of Army Head-quarters admin.stered by officers who are not classified as Principal Staff Officers, but are not directly subordinate to any of the four Principal Staff Officers.

These are

(1) MILITARY SECRETARY'S BRANCH Mily Secy — Maj - Genl W L O Twiss, OB. CBE, MO, IA

The Military Secretary deals with the appointment, promotion and retirement of holding the King's Commission, of officera holding the King's Commission, of officers of the Indian Land Forces, the selection of officers tor staff appointments, and the appointment of officers to the Army in India Reserve of Officers. He is also the Secretary of the Selection Board

The Engineer-in-Chief is the head of the Corps He is responsible of Royal Engineers in India tor Engineer operations and Engineer Services during war and peace, the preparedness for warof the Engineering services The supply of Engineer stores during war and peace. The construction and maintenance of all mulitary works and the constructional efficiency, accuracy and economy of all projects and designs

In addition to the above, the Army Headquarters staff includes certain technical advisers, ., the Major-General, Cavalry, the Major-General, Royal Artillery, and the Adviser and | Sceretary, Board of Examiners.

The duties of the Inspector of the Army Educational Corps, India and the Inspector of Physical Training are carried out by the Commandants of Army School of Education, India, Belgaum and Army School of Physical Training, Ambala, respectively.

## Regular British Forces in India.

The British cavalry and British infantry unife of the army in India are units of the British service. No individual British service unit is located permanently in India Units of the British Army are detailed for a tour of foreign service, of which the major part is as a rule spent in India In the case of British infantry battalions the system is that one battalion of a regiment is normally on home service while the in the case of British other is overseas cavalry the same arrangement cannot be applied. as one unit only comprises the regiment.

In Great Britain, in peace-time, units are maintained at an establishment smaller than that required for war. In India, the peace establishments exceed the war establishments in view of the fact that reserves of British personnel do not exist, and reinforcements must be obtained from Great Britain.

British Cavalry —There are 5 British cavalry regiments in India. The establishment of a British cavalry regiment is 27 officers and 567 other ranks.

British Infantry -The present number of British infantry battallons in India is 45, each with an establishment of 28 officers and 865 other ranks.

In 1921, an important change was made in the composition of a British infantry battalionin India by the inclusion of a proportion of Indian combatant ranks Battalions had always maintained a quota of Indian followers, but up to 1921 the combatant personnel was entirely In 1921, on the abolition of the Machine Gun Corps, eight machine guns were included in the equipment of a British infantry battalion This number was increased to twelve in 1927 In 1929, a change of organisation was introduced, and the bittalion now comprises -Headquarters Wing—1 Machine Gun Company and 3 Rifle Companies Each Rifle Company has 4 Lewis guns The Machine Gun Company (now called Support Company) is organised into—Headquarters and 3 Platoons (all on prok) each of 2 Sections of 2 vickers guns each The peace establishment of Indian combatant personnel is fixed at one Indian officer and 42 Indian other ranks The Support Company platoon, as it is called, is transferred en block to another British buttulion when the bittulion to which it was orimpally attached proceeds on relief out of India

Artillers -Indians are emplosed as drivers and artificers in the Royal Horse Artillery and in field and medium batteries, as drivers, gunners and artificers in mountain batteries, and as gunners in heavy batteries

The peace organisation of the artillery at the present day is as follows:

Royal Horse Artillers -Compr. 4.5 four fredependent batteries. Each battery is armed with eix 13-pounder guns

Secretary, P W. D, to the Agent to the Governor-General in Baluchistan Both at Army Headquarters and in Commands there are Staff Officers, R. E., and Technical Officers. At the headquarters of each district there is a Commander, Royal Engineers, assisted in certain districts by A. Cs. S. R. E. Officers of the Barrack Department are also employed as District Stores Officers. Garrison Engineers are in charge of areas and military stations, charges being divided into sub divisions under ters of a Group. The Wing Est consists of 5 officers and 13 airmen.

Buildings and Roads, Electrical and Mechanical, and Furniture and Stores There are suboverseers for Buildings and Roads and the Barrack Department subordinates in charge of Furniture and Stores are assisted by storekeevers.

## Royal Air Force in India.

The Royal Air Force in India is controlled by the Commander-in-Chief in India as part of airmen, while that of the two squadrons totals the defence services of the Indian Empire, 24 officers and 106 airmen. The wing Station at The Air Force budget is incorporated in the Risalpur also administers the Parachute Section Military Estimates The Commander of the The Squadrons.—Of the 8 squadrons 7 Air Force, the Air Officer Commanding in India is an Air Marshal whose rank corresponds to that of a Lieut-General in the Army appointment is now held by Air Marshal Sir

John M. Steel, KOB, KBD, ONG The headquarters of the Air Force is closely associated with Army Headquarters and is located with the latter at the seat of the Government of India. The Air Officer Commanding has a headquarters staff constituted in six branches, namely, air staff, personnel, technical, stores, medical and chief engineer. The system of staff organisation is similar to the staff system obtaining in the Army. Broadly speaking, the duties' assigned to the divisions mentioned are those which are performed by the General Staff Branch, the Adjutant-General's and Military Secretary's branches, the Quartermaster-General's and Military Secretary's branches, the Chartermaster-General's neral's Branch, the Medical Directorate and the Engineer in Chief's branch respectively, of Army Headquarters.

Subordinate formations—The formations subordinate to the Royal Air Force Headquarters are .

- GROUP COMMAND, comprising 2 Wing Stations of two squadrons comprising 2 **(1)**
- each, on a station bring Command comprising squadrons not on a station basis
- (iii) Station Commands. The Aircraft Depot. (เข)

The Aircraft Park. (v)

(vi) Heavy Transport Flight. (til) B.A. F. Hill Depot, Lower Tops.

Group Command -The Group Command Is known as No 1 (Indian) Group Headquarters, and is located at Peshawar. The Group The Group Commander is a Group Captain, corresponding in rank to a Colonel in the Army. His staff is organised on the same system as that of the Headquarters of the R.A.F. in India. establishment of the Group consists of 7 officers and 21 airmen.

The subordinate units to No. 1 (Indian) Group

Headquarters are as follows.—

No. 1 Wing Station, B.A.F., Kohat.

No. 2 Wing Station, R.A.F., Realpur.

## Army Co-operation Squadron at Peshawar,

Wing Command.—There is one Wing Command only namely 3 (Indian) Wing, R A I, located at Quetta The Wing Commander is an officer with Air Force rank corresponding to a Lieutenant-Colonel in the Army.

He is equipped with a staff organised on approximately the same system as the Headquarters of a Group. The Wing Establishment

Wing Station Commands.—There are 2 Wing station commands in India, one located at Peshawar and the other at Risalpur. Each station consists of two squadrons on a reduced squadron basis with one administrative head, te., Station Headquarters under the command of a Wing Commander. The strength of the Station Headquarters is 8 officers and 112 airmen, while that of the two squadrons totals 24 officers and 106 airmen. The wing Station at

The Squadrons.—Of the 8 squadrons 7 are extended along the North West Frontier from Quetta to Risalpur, and one is stationed at Ambala

The squadron is the primary air force unit, and it consists, normally, of a Headquarters and three flights of aeroplanes. A flight can be detached temporarily but not permanently from its squadron as repair facilities, workshops and stores cannot economically be organised on anything less than a squadron basis. The squadrons headquarters comprises officers and other ranks required for the command and administration of the squadron as a whole; it includes the workshops and repair units, the armouries and equipment stores of the squadrons.

The number of aeroplanes in a squadron varies with the type of aeroplane with which the squadron is equipped; but speaking generally squadrons on a peace basis have twelve acroplanes to, four in each of three flights This does not however apply to the twin engined bombing squadrons

Of the 8 squadrons 4 are equipped with Bristol Fighters and four with Wapitis and they are allotted for distant reconnaissance and bombing duties, of the other four, which are allotted for Army Co-operation duties, two squadrons are equipped with Bristol Fighters and two with Wapitis aircraft.

Squadron Establishment —The establishment of officers in a squadron consists of seven officers in the Headquarters, and filtern officers allotted to flying duties. This allows a reserve of one officer for each of the operative flights.

The establishment of other ranks is 123 airmen

The Aircraft Depot.—The Aircraft Depot may be conveniently described as the wholesale store and provision department of the Royal Air Torce Technical stores are received from the United Kingdom, and in the first insurace, held by this unit. It is also the main very shop and repair shop of the lorce, where all engine repairs, mechanical transport repeirs, and aircraft repairs of any magnitude are carried out. The Depot is located at Drick Road, Karachi.

The Aircraft Park —Relatively to the Aircraft Depot, the Aircraft Park may be described as a central retail establishment, intermediate between the squadrons and the Aircraft Depot It receives stores from the depot and distributes them to the squadron. The Stocks held in the Park are, however, usually limited to items necessary at short notice for operations, and the quantities held are kept as low as distance from the depot and local con-In war, an Aircraft Park ditions will admit is intended to be a mobile formation, though the aircraft Park in India cannot be made mobile under ordinary conditions In peace, the Aircraft Park is located at Lahore New aeroplanes received from the United Kingdom are erected there, but no major repairs are undertaken. In addition to the above functions, practically the whole of the motor transport bodies required for R. A. F vehicles are built or repaired at Aircraft Park The Heavy Transor repaired at Aircraft Park

port flight is administered by this unit.

Composition of Establishment. - The personnel of the Royal Air Force in India consists of officers, warrant officers, non-commissioned officers and men in the ranks of the R A. F. of the United Kingdom, and Indian artificers, Mechanical Transport drivers and followers of the Indian Technical and Followers Corps, R A F in India. The officers are employed on administration, flying and technical duties but all with the exception of officers of the store and medical branches are required to be capable g an aeroplane A proportion of are also trained and employed as pilots for a period of five years, after which period, they revert to their technical trades, Apart from these airmen all warrant officers, non-commissioned officers and aircraftsmen are employed solely on technical duties. only other flying personnel who are not officers or airmen pilots are air gunners and a certain percentage of wireless operators.

officers, warrant non-commissioned officers and aircrattsmen are employed at all The personnel of the Indian Technical and Followers Corps are employed as follows .-

- (a) Technical Section .. Aircraft Depot (artificers) Aircraft Park. T Drivers Section All Units.
- (c) Followers Section . All Units.

establishment of the Royal total Air Force in India is as follows. Officers 260

Airmen 1,887 Indian Officers, other ranks and followers 945 Civilians 530

The Royal Ai —In India, Air Force Medical ´ the ˙ Services as in Kingdom, the Air Force has a medical service of its own Flying is carried out under conditions which differ widely from those on the ground. With the growth of aeronautics therefore, it was found necessary to create a separate departof medical science whose functions broadly stated are to study the effect of flying upon the human constitution both mental and physical, to study also the effects soldiers or their equivalent. It is comprised of different forms of illness and physical disables of class 'C' reservists for Indian Cavalry

lity upon flying efficiency and to apply in practical form the results ascertained tial object in view is to save life by ensuring, so far as possible that those who fly are physically and psychologically fit to do so. The present establishment of the Royal Air Force Medical Service in India consists of 11 officers and 27 airmen The Medical Administration is con-trolled by the Principal Medical Officer of the rank of Group Captain, on the staff of the Air Officer Commanding the R. A. F. in India.

Indian Air Force—This force came into existence on 8th October 1932, the date on which the first batch of six Indian cadets, after receiving training at Cranwell, obtained commission as Pilot Officers These officers will form the first unit of the Indian Air Force The training of cadets for the Indian Air Force cannot at present be undertaken in India, and arrangements have been made to continue their training at Cranwell.

## Regular Indian Forces.

Indian Cavalry —The present number of Indian cavalry regiments is 21

The peace establishment of an Indian cayalry regiment comprises. 14 British officers

19 Indian officers.

492 Indian non-commissioned officers and men.

Infantry.—The establishment of Indian the Indian Infantry s constituted as follows.

Battalions

19 Infantry Regiments consisting of 98 3 Regiments of Sappers and Miners ... 10 Gurkha regiments consisting of 20

82 125

The normal strength of an active battalion

,		British Officers	Indian Officers	Indian other ranks
Infantry	••	12	20	703
Gurkhas		13	22	898

The strength of an infantry training battalion depends upon the number of battalions forming the regiment The average is as follows —

the regiment British Officers 10, Indian Officers 15, and

Indian other ranks 780

1932 it was decided that the Pioneer organization was no longer absolutely necessary as the duties on which Pioneers were employed  $e\ g$  , road-making etc , were now generally performed by labour. The whole organization has therefore been disbanded, and the opportunity has been taken to make a much needed addition to the various Engineer units (Sappers and Miners)

Reserves for the various units of the Indian Army have to be sufficient to provide for an actual shortage on mobilisation as well as for the maintenance of the mobilised unit at full

strength for the first 8 months after mobilisation. Reserve,—The conditions of the reserve, are as follows -

The Indian Army Reserve consists of private It is comprised

Artillery Sappers and Miners, Signala and In-fantry and class 1 for Gurkha Rifles The new class 'G' reserve was introduced for Indian Cavalry, Artillery, Sappers and Miners and Signals with effect from 1st October 1932 and for Indian Infantry with effect from 1st May -1982. There still remain a number of classes 'A' and 'B' reservists which count against the authorised establishment of the reserve but those will be gradually eliminated

Training for Indian Cavalry, Infantry and Gurkha Rifles reservists is carried out biennially

Reserve pay at certain specified rates is admissible from the date of transfer to, or enrol-ment in, the reserve When called up for service or training, reservists receive pay and allowances, in lieu of reserve pay, at regular rates according to their arm of the service

The establishment of reservists is fixed at present as follows:---

The Indian Signal Corps — The Corps is organised on the same lines as a Sapper and Miner Corps, with a headquarters for recruiting and training personnel, and detached field units for the various army formations the head corps is the of Officer-in-Chief in the General Staff Branch He acts as a techat Army Headquarters nical advisor on questions connected with signals, and is also responsible for the tech-nical inspection of all signal units. A chief signal officer with similar functions is attached to the headquarters of each Army Command The British portion of the Corps has now been amalgamated with the Royal Corps of Signals

Centre, Lucia, and is commanded The Signal Training Centre, India, is located at Jubbulpore, and is commanded by a Lieut-Colonel, assisted by a stuff, British and Indian, organised on very much the same lines as the headquarters of a Corps

of Sappers and Miners.

The establishments of the Royal Tank Corps formations are shown below:—

The various types of field units and the number maintained are:

Corps Signals Headquarters including Line and Wireless Company

Cavairy Brigade Signal Troops Divisional Signals . District Signals Experimental Wireless Section Zhob Signal Section

In addition, there is an Army Signal School which carries out the training of regimental

signalling instructors

The formation of the District signals units war effected in 1926 with the transfer of Communications on the North-West Frontier to the Posts and Telegraphs Department This transfer of communications also made feasible the raising of the 'A' and 'C' troops of Cavalry Brigado Signals to include a Wireless Section each tho formation of two Corps Signal Headquarters, The District Signals are located at Peshawar, Waziristan and Rohat.

Royal Tank Corps —Six armoured car companies arrived in India in 1921 Two more companies arrived in 1925. Two Group Headquarters were sanctioned in 1925. They were located as follows—the Northern Group at Rawalpindi, this Group Herdquarters com-manded companies in the Northern and Castern Commands. The Southern Group at Poona. This Group Headquarters commanded companies in the Southern

and Western Commands. These have been abolished and their duties are carried out by the Commander, R. Tank Corps, Northern Command, so far as that command is concerned and by the Commandant, R. T. C. School, Ahmednagar, in respect of the other three commands. There is a school at Ahmednagar for the training of R I personnel and the conduct of experiments

Organisations —3 Light Tank Companies Each company consists of Readquarters and 3 Sections and is armed with 25 Carden Lloyd Light Tanks, 4 for Company Headquarters. nd 7 per section

5 Armoured Car Companies Lach company consists of Meadquarters and 3 Sections and is armed with 16 armoured cars, 1 for Company Headquarters and 5 per section The armoured cars at present in India are of various types

Medical Services—The military medical services in India are composed of the following categories of personnel and subordinate organisations.

Officers and other ranks of the Royal | furing Service.
Medical Corps serving in India. (c) Ti - Queen Alexander's 3 detail No. (a)

Army Medical Corps serving in India. (c) Ti Que'n (d) Officers of the Indian Medical Service ing Service for Ird's In military employment

(c) The Indian Medical Department, conrising of tro i murhes, era., (1) as-brant furrecas ind (ii) sub-ussistant surreons.

(d) Opeon Alexandra's Improval Milit to

(f) The Army Debts Ceres.

The Indian Military Nursing Service. The Indian Hospital Corps

Of these categories, the officers and men of the Royal Army Medical Corps and the Army Dental Corps, the assistant surgeons of the Medical Department Indian and Queen Alexandra's Imperial Military Nursing Alexandra's Service and the Queen Service for Nursing India are primarily concerned with the medical care of British troops, while the officers of the Indian Medical Service, the sub-assistant surgeons of the Indian Medical Department and the Indian Military Nursing Service are concerned, primarily, with the medical care of Indian troops The Indian Hospital Corps serves both organisations

Civilians of miscellaneous classes employed by Army in Waziristan are given medical treatment in military hospitals, and arrangements have been made with the Headquarters of the Indian Red Cross Society for the medical treatment and care of cases amongst Indian soldiers and followers of the Indian Army for chronic diseases, such as tuberculosis, leprosy

and diabetes

Indian Army Service Corps—The Indian Army Service Corps is the counterpart of the Royal Army Service Corps of the British Army. It has developed from the Commissariat Department of an earlier period, and its immediate predecessor was the Supply and Transport Corps, by which name the service was known up to 1923. The Indian Army Service Corps which is under the control of the Quarter master-General, is constituted in three main branches, namely (a) Supply, (b) Animal transport, and (c) Mechanical Transport The latter is constituted upon a special basis, which is, generically, a sub-division of the Royal Army Service Corps organisation. The strength of the establishment is shown

by categories in the following table --

Mechanical Transport.

1,844 Followers Total 4,679

There are also 3,035 reservists. mechanical transport establishment consists of the following:(a) Field units—

11 M. T. Companies, consisting of 11 headquarters, 32 service sections (higher establishment), and 8 service sections (lower establishment)

M T. Companies for motor ambulance convoys consisting of 5 headquar-ters, 1 section (higher establish-ment) and 11 sections (lower establishment).

M. T Companies (Mobile Repair Units) consisting of 2 headquarters and 4 sections.

**(b)** Maintenance units Heavy Repair shops, Central M. T. Stores Depot Vehicle Reserve Depot. Chaklala Headquarters. Experimental Section.

Apart from units and vehicles employed in the conveyance of military stores, the mechanical transport service also provides motor ambulance convoys for hospitals and field medical units, and vehicles for other miscel-laneous purposes The total establishment now laneous purposes The total establishment now consists of 2,068 vehicles with 109 motor cycles.

The mechanical transport was taken over by the Indian Army Service Corps in 1927. present the officers of the service are mainly drawn from the Royal Army Service Corps unce at present there are no facilities in India for training officers in every branch of mechanical transport duties The establishment of officers includes, however, a certain number of King's commissioned officers belonging to the Indian Army. The British subordinates of the service are drawn entirely from the Boyal Army Service Corps.

The Ordnance Services which are under the M G O may be broadly described as the agency whose duty it is to supply the army with munitions of war, such as small arms, guns, ammunition and other equipment of a technical multiple above the supplementation. cal military character, and also, under an arrangement introduced in recent years, with clothing and general stores other than engineering stores. A central disposal organisation is in operation under the control of the Master General of Ordnance to dispose of the Surplus Stores and waste materials of the various services of the Army and the Royal Air Force in India to the best advantage of the

Army Remount Department -The following are among the most important duties for the remount service.—The provision of animals for the Army in India. The enumeration throughout India of all animals available for transport in war. The animal mobilifor transport in

zation all units, services and departments of the army. A general responsibility for the efficiency of all the animals of the army both in peace and war. The administration of the remount squadron formed in 1922 as a nucleus for expansion into three squadrons on mobilization. rations of a direct character. Breeging one-

The department is organised on lines corresponding to the remount service in the United Kingdom. Its composition is as follows Kingdom. Its composition is as follows. The Remount Directorate at Army Headquarters consisting of one Director and a Deputy Assistant Director. 4 Remount officers, one attached to each Command Headquarters, 6 Superintendents of Remount Depots, 5 District Remount officers of horse-breeding areas and the Ahmednagar Stud, 12 Assistant Remount officers and 8 Veterinary officers.

Veterinary Services in India — The Veterinary services are responsible for the veterinary care, in peace and war, of animals of British troops, Indian cavalry and artillery, I A S C. units, the remount department (excluding horse-breeding operations), etc. The vetering breeding operations), etc. The veterinary services include The establishment of Royal Army Vetermary Corps officers, serving on a tour of duty in India and those of the continuous service cadre. The establishment of warrant and non-commissioned officers, India Unattached List, and veterinary assistant surgeons of the Indian Army Veterinary Corps.

The organisation consists of 20 veterinary

hospitals, Class I, 25 veterinary hospitals, Class II, 25 branch veterinary hospitals, 10 sick lines and 12 Indian Army Veterinary Corps Sections of personnel posted to veterinary hospitals during peace and forming a cadre for expansion on mobilisation to provide technical personnel for all veterinary units

Farms Department —This department, which is under the control of the

Quartermaster-General consists of two branches -The military grass farms,

provide fodder for the army.

(ii) The military dairy farms, for the provision of dairy produce for hospitals, troops and families

Educational Services —The education of the army is under the control of the Army Educational Corps and of Indian officers borne supernumerary to the establishment of units of the Indian Army. The establishment is as follows including training schools :-

British	Indian	B. O.	1.0:	Civillans.
officers 61	officers.	164	64	446

Terms of service in the Indian army are as follows '-

Cavairy, 7 years' service in army and 8 years

in the reserve

Artillery, 7 years' service in army and 8 in the reserve for guinners and drivers (horse); drivers (mechanical transport) 6 years in army and 9 years in the reserve; and 4 years' service in army for Heavy Artillery personnel
S. & M. Corps, 7 years' service in army and

8 in the reserve.

Indian Signal Corps, ? years' service in army

and 8 in the reserve.

id 8 in the reserve.

Infantry (except Gurkhas and trans-frontier) personnel of the Infantry other than Oralizals),

7 years in army service and 8 years in the

Gurkhas and trans-frontier personnel infantry, 4 years' service in army.

Indian combatant personnel of British infan-

tr. 6 years in army.

Indian Vilitary establishments of the Indian Army Ordnance Corps, 4 years' service in the

Animal transport personnel of the Indian Army Service Corps, drivers of mechanical transport and all combatants of the Army Veterinary Corps, 6 years' service in army and 8 in the reserve

All combatants in the Works Corps, 2 years' scrvice in army

Bandsmen, musicians, trumpeters, drummers, buglers, fifers and pipers, 10 years' service in

Except in the case of those enrolled in the Works and of those who are non-combatants, all school-masters, clerks, artificers, armourers engine drivers, farriers, carpenters, tailors and bootmakers, 10 years' service in army.

The period laid down for service in the army the minimum and may be extended may be enrolled direct into e, in which case there is Combatants Reserve, no minimum period of service, but no one is allowed to serve in the reserve or in any class of the reserve for a longer period than is permitted by the regulations in force

Frontier Militia and Levy Corps— These forces are "Civil" troops, 18, they are administered and prid by the Civil authorities and not by the Army They are, however, and not by the Army Thes are, however, officered by Officers of the Regular Indian Arms. These forces were raised for duty on the North-West Frontier and at present consist of the following -Kurrim Militia, Tochi Scouts, South Waziristan Scouts, Chitral Scouts, Scouts, Zhob militia and the Mekran Levy Corps

### The Auxiliary Force.

After the war, the question of universal training for European British subjects came up for consideration, and it was decided that in India, as elsewhere in the Empire, the adoption of compulsory military service would be underirable. It was recognised, however, that India needed some adequate auxiliary force, if only on a voluntary basis, that could be trained to a fairly definite standard of effi-icency, and in the result, an Act to constitute an Auxiliary Force for service in India was passed in 1920. Under this Act membership is limited to European British subjects, and the liability of members for training and service. is clearly defined. Mulitary training is graduate I according to age, the more extended training being carried out by the vounger mempers, the older members being oblized to fire a musheter course only. It was laid down that mili-tary service should be purely local. As the form of service that would be most sale-bla varies largely according to localities, the local authorities, ac'inc in consultation with the advisory committee of the Adultary Force area, were given the power of adjusting the form of training to suit local condition

The Auxiliary Force comprises all branches of the service, cavalry, artiller, compersion of the service, cavalry, artiller, compersion of the service, cavalry, artiller, compensation of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of

#### Officers.

There are two main categories of officers in the Indian Army, those holding the King's Commission and those holding the Viceroy's Commission. The latter are all Indians, apart from the Gurkha officers of Gurkha battalions, and have a limited status and power of com-mand, both of which are regulated by the Indian Army Act and the rules made thereunder Within recent years several Indians have received King's Commissions, on entry into the Indian Army through the Royal Military College, Sandhurst and the Royal Military

Academy, Woolwich
King's Commissioned officers for the Indian Army are obtained from two main sources : from among the cadets who pass through the Royal Military College, Sandhurst, and by the transfer to the Indian Army of officers belonging to British units. The former is the principal channel of recruitment, the latter being only resorted to when, owing to abnormal wastage or for some other special reason, requirements cannot be completed by means of callets from Sandhurst A third source is from among University candidates When a cadet has qualified at Sandhurst and has received his commission, he becomes, in the first instance, an officer of the Unattached List, and is posted for a period of one year to a British battalion or regiment in India, where he receives a preliminary training in his military duties. At the end of the year, in his military duties he is posted as a squadron or company officer to a regiment or battalion of the Indian Army. Administrative services and departments of the army draw their officers from combatant units, as it has hitherto been regarded as essential that every officer should, in the first instance, receive a thorough grounding in combatant duties, and acquire at first hand an intimate knowledge of the requirements of the combitant arms

The promotion in rank of King's commissioned officers of the Indian Army is regulated by a time-scale up to the rank of Lieutenant-Colonel but is subject also to certain professional examinations and tests being successfully passed. The rank of Lieutenant-Colonel is in normal course attained at 20 years' service; promotion beyond thus rank is determined by selection indian Officers—One of the most

Officers -One of momentons decisions of the Great War, so far as the Indian Army is concerned, was that which rendered Indians eligible to hold the King's commission in the army. King's commission in the large. are obtainable by Indian gentlemen in three ways. (1) By qualifying as a cadet through the the hunger tribing of military personnal and Royal Military College sandhurst or the Royal tor the education of instructors for units—Military Academs, Woolsich Examinations Staff College, Ouetta Military Academy, Woolwich Examinations are held twice a year in India for the selection

of suitable candidates for admission. the selection of specially capable and deserting indian officers or non-commissioned officers of Indian regiments promoted from the ranks or those appointed direct as jemadar. These receive their commissions after training at the Royal Military College or Academy as Cadris and qualifying in the usual way (3) By the bc stowal of honorary King's commissions on Indian officers who have rendered distinguished for ico, but whose age and lack of education preclude their being granted the full King's com-mission. The first two avenues of selection mentioned afford full opportunity to the Indian of satisfying a military ambition and of enjoying a military career on terms of absolute equality with the British officer, who, as a general rule, also enters the army by qualifying at Sandhurst or Woolwich. Until 1931, ten vacancies at bandhurst and three at Woolwich were reserved annually for Indian cadets

A further measure adopted by the Government was the establishment of the Prince of Wales' Royal Indian Military College at Dehra Dun, a Government institution for the preli-minary education of Indians who desire to chalify for the King's colomission in the army through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich The arrangements so far made crable a maximum of 70 boys to be in residence at the college at any one time, and the normal course of education is planned to occupy six years. In February 1923, it was decided that eight units of the Indian Army should be completely Indianized The units selected for Indianization were 7th Light Cavalry, 16th Light Cavalry 2nd Bn , Madras Pioneers, 4/19th Hyderabad Regiment,5th Royal Battalion,5th Mahratta Light In-fantry, 1/7th Rajput Regiment (Q V O L I), 1/14th Punjab Regiment,2/1st Punjab Regiment

In 1932 a considerable advance in the Indianization of the Army was made by the announcement that it was intended to Indianire a Division of all Arms and a Cavalry Brigade In order to implement this decision, the following units have been marked for Indianization, 3rd Cavalry, 5/2nd Punjab Remment, 5/3th Rajputana Rides, 5/8th Punjab Regiment, 5/10th Baluch Regiment, 5/11th Sikh Regiment, 4/12th Frontier Force Regiment, and 6th Royal Battalion 13th Frontier I orce Rifles, in addition to units of Indian Artillery, Engineers, etc., together with the usual complement of aucillars services, to make up a complete Division The Indian Regiment of Artillery has been formed on the 15th January 1975 and the first unit of this new corps has been raised as a field artillers brigade. This brigade is deseron ited "A" Tield Brigade, Indian Artillers

In order to train officers for the India: Arm, of the future the Indian Military Academy at Dehra Dun ans opened in October 1932 will provide officers for all arms enviry, in-fantry, critilery and signals. The first back of fantre, ortillery and signals. The first bottle of officers passing out of the Academic receipt their commissions on the 1st Pebruary 1925.

## Training Institutions

The following institutions exist in India for the higher training of military personnel and Scrior Officers School, Beigaum.

Without it to action. He refused medical attention, the slightest hesitation he collected six other ranks and with the greatest dash and an entire wounded were and on carrying water to them disregard of danger charged and captured the While the medical man was attending to position, thereby saving very heavy casualties these wounded he shielded him with his body to the squadron. He was mortally wounded and he submitted to medical attention himself on the very top of the hill when capturing one only after he was exhausted through three hours' of the machine guns single-handed, but all the continual effort and by loss of blood.

During an attack on the German position by was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engrgement.

# THE EAST INDIES SQUADRON.

Since 1903 a squadron of the Royal Navy, squadron had considerably improved known as the East Indies Squadrov, has been maintained in Indian waters. It has naturally varied in strength from time to time In 1903 the squadron consisted of one second class and three smaller cruisers and four sloops or gunboats In 1906, it consisted of two second class and two third class cruisers, and remained at this strength until 1910 when one second class cruiser was withdrawn and two smaller vessels substituted, and three cruisers were lent from the Mediterranean to assist in the Suppression of the arms traffic in the Carle Suppression of the arms traffic in the Carle Suppression of the Arms traffic in the Carle Suppression of the Arms traffic in the Carle Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of the Suppression of Gulf. India contributes £100,000 a year towards naval expenditure and approximately £3,000 a year on account of indian Transport Service performed by the Admiralty, and also maintains the Royal Indian Navy

## India's Naval Expenditure.

Since 1869 India has paid a contribution of varying amounts to the Imperial Government in consideration of services performed by the Royal Navy. Under existing arrangements which date from 1395-7 the subsidy of £100,000 a year is paid towards the upkeep of cortain ships of the East India Squadron, which may not be employed beyond prescribed limits, except the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the cont India's total naval expenditure is we'l unler with the consent of the Government of India half a million pounds.

The question of a new distribution of the burden of the cost of Imperial Naval defence was discussed at the Imperial Conference in London in October—November 1926. The matter appears i to be one on which the delegates could form no new decision without further consultations in their respective capitals and no resolution was passed

# ROYAL INDIAN NAVY.

The Royal Indian Navy (The Sea Service Ahwaz. 1856-57 War in China 1857-59 under the Government of India) traces its The Indian Mutiny. 1859 Capture of the origin so far back as 1612 when the East India Island of Beyt. 1860 China War, Canton, Company stationed at Surat found that it was Taku Forts, Fatshan and Pekin 1871 Abysnecessary to provide themselves with armed vessels to protect their commerce and settlements from the Dutch or Portuguese and from the pirates which inferted the Indian coasts. The first two ships, the Dragon and Hoseander (or Onander), were depatched from England in 1612 under a Captain Best, and since those days under slightly varying titles and of various strengths the Government in India have always maintained a sea service.

The periods and titles have been as follows:-

Hon E I Co.'s Marine		1612168
Bombay "		1686-183
Indian Navy		1830186
Bombay Marine		1863187
H. M. Indian Manne	••	1877-189
Royal Indian Marine		1892.
Desail Indian Sans		1004

Royal Indian Navy India's Naval Torce has always been most losely connected with Bombay, and in 1668 rhen [h.: L India Co. took over Bombay, Captain Loung of the Marine was appointed Deputy Forthor. From then until 1877 the Marine vas under the Government of Bombay, and though from that date all the Marine Es-bli himsets were amalgamated into an Im-"mba: has continued to be the headquarters r) the official residence of the Tlag Officer Commarding.

African War. 1900-01 Boxer Rebellion in China relief of Pekin, 1902-04 Somaliland Expedition, Suppression of Arms Traffic operations, Persian Gulf, 1912-14.

During the War 1914-1918 Royal Indian Marine Officers were employed on many and various duties Royal Indian Marine Ships "Dufferin," "Hardinge," "Noethbrook," "Lawrence," "Dalhousie" and "Minto" had their guns mounted and served as Auxiliary Cruisers. Officers also served in the Royal Navy in the Grand Fleet, Mediterranean North Sea, North Red Sea and Caspian Sca Fleets.

In addition to transport duties in Indian In addition to transport duties in Indian Ports, Officers were sent to Marsellies, East Africa and Egypt for such duties, and on the entry of Turkey into the War were employed on duties towing and maining River Craft and Barges to and in Mesopotamia, and it was necessary to enlist a number of Temporary Officers, Warrant Officers and men to the numbers of approximately 240, 60 and 2,000 respectively for these and other duties. spectively for these and other duties.

When the War Office assumed full control of Operations in Mesopotamia a large number of Regular and Temporary Officers and men were seconded to the Royal Engineers General Service respectively for duties in the Inlend Water Transport which controlled all River Transport work in that country, and these officers held many important executive appointments in that unit.

The movements of all sea transports between India and the various theatres of War were controlled by Marine Officers.

Trawlers were built in the Bombay and Calcutta Dockyards and mine sweeping operations were carried our with these and launches off Bombay and elsewhere, the trawlers were also used for towing duties.

Retired Royal Indian Marine Officers were employed on naval transport duties in England and France, and also in very responsible positions with the Inland Water Transport in France.

Service in the War 1914-18—The Royal

Shortly afterwards the Esher Committee arrived in India to report on the Indian Army and although the R I M was not included in their terms of reference, they strongly recommended that the R. I M should be reorganised as a combatant service. The Government of India in 1920 obtained from the Admiralty the services of Rear-Admiral Mawby as Director, R I M, to draw up a scheme of reorganisation within limited lines. His scheme, however, was not adopted, and Admiral Mawby resigned his appointment.

The R I M then fell upon hard times, money was scarce, the report of the Inchcape Committee necessitated drastic retrenhments, and the working of the Montagu-Chelmsford reforms resulted in the Local Governments having to defray the cost of the work of R I M ships on their various stations, on lighthouse duties, transport work, carrying of officials, etc. The Local Governments were naturally inclined to think that if they had to pay they would like to have a say in the management, and that if the work could be done cheaper locally, they should arrange to carry out the duties themselves Further, the Inchcape Committee recommended that the three large troopships should be scrapped and all trooping carried out under contract, which would have left the Marine with only the Survey Department and the Bombay Dockyard.

'A Combatant Service—Happly for the Service, however, the Government of India in 1925 appointed a Departmental Committee under the Chairmanship of General Lord Rawlinson, in his capacity of Minister of Defence and Member of Council in charge of the Marine Portfolio, to submit a scheme for the reorganisation of the Service as a combatant force. This Committee recommended that the Service should be reorganised as a purely combatant Naval Service with the title of Royal Indian.

Navy, with a strength in the first in cores of 4 armed sloops, 2 patrol vessels, 4 rain compains trawlers, 2 surveying ships and a depot ship, the Service in the first instance to an commanded by a Rear-Admiral on the active isst in the Boyal Navy. The scheme was accepted by the Indian and Home Governments, and the necessary Act to permit India to maintain a Navy was passed through bein Houses of Parliament

To effect this change in the title, it was necessary to draw up a new Indian Naval Discipline Act and this had to be passed through the Assembly and Council of State in India

In February 1928, the Bill was introduced but failed to pass in the Assembly by a narrow margin of one vote In February 1934, the Bill was re-introduced to the Assembly with certain minor amendments but in response to a plea for circulation, the Government circulated the Bill.

In August, the Bill was re-introduced and passed by the Assembly and Council of State On 2nd October 1934 the Royal Indian Navwas inaugurated, the historic ceremony taking place in Bombay

The Royal Indian Marine which had rendered sterling service to India and the Empire in peace and was then ceused to exist

The Royal Indian Navy which has been evolved from the late Royal Indian Marine is one of the Empire's Navai Forces and is under the command of a Flag Officer of the Royal Navy Its work in addition to training its personnel for war, e.g., minesweeping, gunnery, communications, etc., includes fishery protection in the Bay of Bengal and other Naval duties. A close haison is maintained between the Royal Indian Navy and the East Indies Squadron

In addition to the above there are 11 vessels composed of minesweeping and steam travlers, service launches, target too ing tugs, distributed at Bombay, Calcutta, and Karachi

#### Docksards

There were two Royal Indian Marine Dockyards at Bombay and at Calcutta, the former being the more important. The one at Calcutta has been closed. There are 3 graving docks and a wet basin at Bombay, together with inctories.

#### Medical Staff

Medwal Officer, Major R. McKinlay, r & M.C.
Officer in Medical Charge, of Dispensary,
Captain J. B. D'Sonza, M.B.E., I M.D.

### R I N Warrant Officers

Officer-in-charge, Docl yard Police Force, Gunner P O'Hara, R I N

Boatswain of the Dockyard, Boatswain A H Lovett, MBE, RIN

# Appointments.

In addition to the regular appointments in the ships of the Royal Indian Navy, and in H M I N Dockyard, the following appointments under the Government of India, Commerce Department, are held by the officers of the Royal Indian Navy—

#### BOMBAY.

Principal Officer, Mercantile Marine Department, Bombay District, Nautical Surveyor, Mercantile Marine Department, Bombay District, Principal Engineer and Ship Surveyor, 2nd 3rd and 4th Engineer and Ship Surveyors,

### CAICUTTA

Principal Officer Mercantile Marine Department, Calcutta District: Nautical Surveyor, Mercantile Marine Department, Calcutta District, Principal Engineer and Ship Surveyor, 2nd, 3rd, 4th and 5th Lugineers and Ship Surveyors

#### MADEAS.

Principal Officer, Mercantile Marine Department, Madras District, and Engineer and Ship Surveyor

#### BURMA.

Principal Officer Mercantile Marine Department, Rangoon District, Nautical Surveyor, Mercantile Marine Department, Rangoon District, and Lugineer and Ship Surveyor, Rangoon

#### KARAODI.

Principal Officer, Mercantile Marine Department, Karachi District

### ADEY.

Principal Officer, Mercantile Marine Department, Aden District.

#### CHITTAGONG.

Nauti al Surveyor and Engineer and Ship Surveyor.

### PORT BLAIR.

Engineer and Harbour Master.

# Agriculture.

As crops depend on the existence of plant, are few soils in the world more surface for the food and moisture in the soil, so the character save agriculture so long as the vater surface of the agriculture of a country depends largely assured. The other soils are less tracted and call for greater skill in management and placed stated to small holdings, of these tracted are less adapted to small holdings, of these tracted are less adapted to small holdings. other considerations have their influence which from soils are the most valuable is not inconsiderable, but the limitations imposed by the nature of the soil and above all India is a country of small holdings and the comby the climate tend to the establishing of a cermonest type is that which can be cultivated with tain class of agriculture under a certain given one pair of bullocks under local conditions Large get of conditions

The climate of India, while varying to some extent in degree, in most respects is remarkably-similar in character throughout the country. The main factors in common are the monsoon, the dry winter and early summer months, and the intense heat from March till June These have the effect of dividing the year into two agricultural seasons, the Kharif or Morenon and the Rabe or Winter Season, each bearing its own distinctive crops Between early June and October abundant rains fall over the greater part of the continent while the winter months are generally dry, although North-West-ern India benefit from showers in December and January The south of the remission, and especially the Madras Presidency, however, is more truly tropical especially in the south, and depends mainly on the N -E. monsoon; here the two crop seasons can hardly be said to exist The distribution of the ramfall throughout the year, which is of considerable importance to agriculture, is none too favourable, but is not quite so bad as is often represented. The rainfall is greatest at what would otherwise be the hottest time of the year, viz, mid-summer, and when it is most needed It should be remembered that in a hot country intermittent showers are practically valueles as evaporation is very rapid Heavy rainfall concentrated in a limited period, though it has its drawbacks and demands a special sys-Heavy ramfall od, though it tem of agriculture, has many advantages in hot countries.

Soils—Four main soil types can be recognised in India, riz. (1) the Red soils derived from rocks of the Arch van system which characte ise Madras, Mysore and the South-Last of Bombay and extend through through the East Central Provinces East of and the Hyderabad Orissa, Chota Nagpur and the South of Bengal The black cotton or regur soils over-he the Deccan trap and cover the part of Bombay, Berar and the Western parts of the Central Provinces and Hyderabad with extensions into Central India and Bundel-The Madras repur soils though Lhand typical are also important (3) The great alluvial plains, agriculturally the most important typical are also important tract in India as well as the most extensive, hoes are in use in parts of Boinlay, Prices mainly the Indo-Gangelic Plain embracing Sind, and the Convert Provinces, but throughout the northern Rajputana, most of the Punjab, the greater part of the country the scel is tither plains of the United Provinces, most, of broadcasted or plouded in Hard implement Interite soils which form a belt round, the of which are the lot of any entry a blides; Peninsula and extend through East Bengal at an angle towards the labourer who does into Assam and Burma.

holdings are practically unknown, and are mainly confined to the planting industries. Farming is Forming 13 carried on with a minimum of capital, there being practically no outlay on fencing, and very little on buildings or implements Many causes militate against the accumulation of capital and agricultural indebtedness is heavy and the interest on loans high Great progress has been made by the co-operative credit movement during the last twenty years. There are now 105 262 Co-operative Credit Societies in India with 4 282,884 members and a working capital of nearly 96 crores of rupees Some 90 per cent. or these Societies are concerned with the financiar of agriculture. Not only have these societies brought cheaper credit to the cultivator but they have striven to inculcate the lesson that cheap credit is only valuable if applied to productive purposes and have encouraged thrift

Equipment —Practically all cultivation is done by bullocks and the capacity of these as draught animals varies from district to district as well as depending on the cultivator's individual curcumstances. The best types in common use are capable of handling what would be considered as light single-horse implements in Europe In those tracts where irrigation is from wells, bullocks are also used for drawing water they also drive the sugarcane crusher and trend out the grain at harvest, and they are still almost the sole means of transport in rural areas His implements being few, a cultivator - bullocks form by far the most important item of his movable property

Implements are made of word although plought are usually tipped with iron points, and there is a great similarity in their shape and ceneral design Iron ploughs were being introduced in large numbers in the decade following the war, but the fall in the prices of agricultural commodities in recent years has lessened the demand for these implements levelling beam is used throughout the greater part of the country in preference to the harry and roller, and throughout Northern India the plough and the levelling beam are the only implements possissed by the ordinary culti-ator.

On black cotton soils the commonest in-plement is the hallar, a simple stirring in ple-ment with a broad black. Seed drills and drill into Assam and Burma.

The great alluvial plains are characterised by consecutivation and rapid response to irrigation and manuring, broadly speaking there in gout wit oxen or braing out it is land, and winnowing by the agency of the wind, cullivators have come to recognize the efficiency of winnower and simple reapers and these, like iron ploughs, are likely to become popular when conditions improve Even motor tractor ploughs are now estimated to number hundreds and a few steam ploughing sets are at work reclaiming land from deep-rooted grasses

Cultivation —Cultivation at its best distinctly good but in the greater part of the country there is plenty of room for improvement As in any other country success in agriculture varies greatly with the character of the people depending largely as it does on thrift and industry In most places considering the large population cultivation is none too good. Agriculture suffers through lack of organization and equipment Two economic factors tend to keep down the standard of cultivation Holdings are not only small but fragmented and the Indian laws of inheritance both perpetuate and intensify this evil Very definite attempts are now being made in several provinces and states to amend matters and consolidate holdings but the process is necessarily slow. cultivators rarely line on or near to their holdmutual protection is less than formerly and though tradition dies hard sub-villages are now springing up in many places.

Rabicrops which demand a fine seed-bed preparatory tillago consists mainly with the of repeated treatments Indigenous plough (or on black roils the Bal har) which serves the purpose of plough, harrow and cultiva-tor, combined with applications of the levelling Crude as these implements are, they produce in Northern India a surface mulch and moist sub soil which is the aim of all dry-farming operations. For Kharif crops the preparation is much less thorough as it is essential to sow without delay Interculture is usually inadequate Manure is generally applied to more valuable crops like sugarcane, cotton, tobacco, etc. Seeding is either done broadcast or by drilling behind a wooden plough or drill Thunning and spacing are not nearly so well done as they might be, and intercultivation is generally too superficial Harvesting is done by sickle where the crops are cut whole, and there is little waste involved. At their best the ryot's methods are not ineffective but being uneconomical of both cattle and man-power, they are seldom carried out fully The use of simple improved implements and of machines which lessen the strain on the bullocks, which the agricultural department is steadily fostering, is an department is steadily fostering, is an important factor in raising the general standard of agriculture.

Irrigation —The concentration of the principal rainfall in less than a third of the year, which is not the sowing period of the rate crops, places a very definite limit on the yield which can be obtained from the principal cereal crops come other crops, \$g\$, Sugarcane, can hardly be grown indeed without supplementary watering. With adequate irrigation the yield from the principal grain crops in Northam India is doubled even in areas where the monsoon is generous, whilst in the great canal colonies and in Sind barren desert has become fertile land. The Indian canal system is by far the

largest in the world. In 1932-33 the total length of the main and branch canals and distributaries amounted to some 75,000 miles irrigating an area of 33 million acres, and the value of crope irrigated from Government norks was estimated at about 86 crores has been calculated that when worls under construction are completed, and when the various new canals are developed fully, the irrigated area will probably reach 50 million acres. The protective effect of the canals in many acres is no less important than the enhanced sickl Protect is o irrigation works have made agriculture stable instead of precarious in many districts. The Indian canals are of two types—perennial and inundation—and the trend of irrigation practice is to replace the latter by the former wherever possible. The great percennial canals in the North of India draw their supply from snov-fed rivers; the inundation canals run only when the rivers rise with the melting of the snow in April-Nay and must close when supplies fall at the end Other canals depend for their of the monsoon supply during the dry part of the year on water stored behind prest dams thrown across sultable gorges and are in consequence less dependable than the larger snow-fed systems. Unter rates are levial on the area of irrigated crops matured to that Government bears part of the risk of failure of crops. Different rates are charged for different crops and sary somewhat in different parts of India, rates are also lower when the water has to be lifted than when flow irrigation is given

The Madra and Bombay presidencies possess some of the most spectreular irrication schemes in the world. The Cauvery—Mettur irrigation system inaugurated in 1931 is considered to be the biggest in the British I'mpire and the largest single block masonay reservoir in the world, with a storage capacity of 93,500 million cubic feet. This project, together with the Kannlambudi project in Mysore, is said to bring into productive use about 80 per cent of the flow of the Cauvery river besides serving as a great moderator of floods. The Wilson Dam at Bhandardara, impounding 272 feet of water, is far and away the highest dam in India, whilst the Sükkur Barrage in Siad across the Indus irrigates a desert whose area far exceeds that of any other scheme conceived by engineers

Irrigation from Wells—About one quarter of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet. Their numbers have greatly increased in recent years largely through Government advances for their construction The recurring cost of this form of irrigation has, however, greatly increased owing to the high price of draught cattle and the increasing cost of their maintenance.

All agricultural departments are now giving increased attention to the better utilisation of underground water supplies, existing wells being improved by boring and tube wells of large capacity installed and equipped with pumping machinery. Efficient types of water lifts are lapdily replacing the old-fashioned mhotca

Tank irrigation is common in Central and Southern India Large quantities of rain water are stored in lakes (or tanks) and distributed during the drier seasons of the year.

Often the indirect effect of the tank in manntaining the sub-soil water level is as important as the direct irrigation.

Manures —Although the number of cattle maintained in India is very high and indeed excessive, there is everywhere a shortage of farm-yard manure. This is partly due to the small use of bedding, for which straw can ill be spared, and to the keeping of cattle in the open, but mainly to the use of dung as the principal source of village fuel. Hence the sapply of organic matter to Indian soils is deficient. Unfortunately the Indian cultivator does not possess the skill of the Chinaman in the making of composts and much valuable manural material is wasted in every Indian village and to the detriment of sanitation. Green-manure crops are spreading slowly and the use of oil-cakes, especially castor-cake, for the more valuable

crops like sugarcane and tobacco is increasing The general trend of the results of experiments carried on by the various agricultural departments is to show that a better supply of organic manures is everywhere important, nitrogen is the most common limiting factor for India as a whole, phosphatic manures are definitely advantageous in certain more limited tracts. Manuring for higher production is gradually spreading as the result of village demonstrations; at present prices of certain artificial fertilisers, notably ammonium sul-phate and the newer types of soluble phosphator manure are definitely profitable not only for tobacco, sugarcane and market garden crops butfor some staple crops, but generally speaking the fall in the prices of agricultural produce has arrested progress in the use of purchased ferti-

Rice.—A reference to the crop statistics shows that rice is the most extensively grown crop in India, although it preponderates in the wetter parts of the country, viz, in Bengal, Bihar and Orissa, Burma and Madras The crop requires for its proper maturing a moist climate with well assured rainfall. The cultivated varieties are numerous differing greatly in quality and in suitability for various conditions of soil and climate, and the people possess an intimate acquaintance with those grown in their own localities. The better qualities are sown in seed beds and transplanted in the monsoon. Brondcasted rice is grown generally in lowlying areas and is sown before the monsoon as it must make a good start before the floods arrive Deep water rices grow quickly and to a great height and are generally able to keep pace with the rise in water level

For transplanted rice the soil is generally prepared after the arrival of the monsoon and is worked in a puddle before the seedlings are transplanted. The land is laid out into small transplanted. The land is laid out into small areas with raised partitions to regulate the distribution of the water supply. The reed-hugs are planted either singly or in small bunches containing from 4 to 6 plants each and are simply pushed into the mud at distances of 6 to 12 inches apart. Either by bunding to retain rainfall or by artificial irrigation, the details varying with locality, the rice fields are kept more or less under water until the somely to high manuring and cultivation is act aron shows signs of ripening. The area under so thorough as for wheat. The crop is generalmproved varieties of rice distributed by the ally sown in the leginning of the moreous improved varieties of rice distributed by the

agricultural departments is now well over 2 A scheme for the intendication million acres of research on rice in all the principal rice-grown provinces of India has been launched o.. of funds provided by the Imperial Council Agricultural Research and the Empire Marketin;

Wheat.—Wheat is grown widely throughout Northern India as a winter crop, the United Provinces and the Punjab supplying about two-thirds of the total area, and probably three-quarters of the total outturn in India. The majority of the varieties grown belong to the species Truicium vulgare. Indian wheats are generally white, red and amber coloured and are mostly classed as soft from a commercial point of view. As seen in local markets Indian wheats frequently contain appreciable quantities of other grains and even of extraneous matter due to the method of threshing employed Wheat for export is well-cleaned and there has been great improvement in this res-pect of recent years Most of the Indian pect of recent years wheats are soft weak wheats but there are some well known Maccaroni wheats amongst them the largest wheat acreage of recent years was that of 1934-35, namely, 36.06 million acres, but the yield did not come up to the record harvest of 1930 which exceeded 101 million tons Recent crops have averaged 91 million tons per annum which is only slightly, if any thing, above internal requirements. Exports of wheat amounted to 197,000 tons in 1930-31 but have since been nominal, Indian wheat having been quoted well above world parity. With the development of irrigation from the Lloyd Barrage Canal in Sind and in the newer Punjab Canal Colonies a further increase in wheat production is practically certain and although the internal consumption of wheat will increase with the growth of population, there is likely to be an exportable surplus in the not distant future The crop is generally grown after a summer fallow and, except in irrigated tracts, depends largely on the conservation of the zoil moisture from the previous moneoon Rains in January and February are generally beneficial but an excess of minfall in these months usually produces rust with a diminution of the rield On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in March and April and the threshing and winnowing go on up till the end of May. The total area under improved varieties of wheat is now 5 3 million acres.

The Millets.—These constitute one of the most important groups of crops in the country supplying food for the poorer classes and fodder for the cattle. The varieties vary greatly in quality, height and suitability to various climatic and soil conditions. Perhaps the climatic and soil conditions. Fernance the two best known varieties are Jowar (Scry's religare) the great millet, and Bajra the Bulrush millet (Pernice on typicideum). Genature the lowers require beite: erally speaking the lowers require land than the bajras and the dash d.-tabatira of the two crops follows the quality of the soil. Neither for forms nor busin is mone usually applied though fowar respects hardExports.—The exports of the continuent pull links by an to femine courter a for the femine courter and other courter, or the continuent pull links by an to femine courter a for the femine courter and other courter, or the continuent pull links by an to femine courter a for the femine courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courter of the courte

heading are chiefly groundnuts, linseed, sesamum removed by washing and beating and the cruciferous oilseeds (rape, mustard, etc.) in 1934-85 was estimated at 2,497,000 million Although oilseeds are subject to great fluctua-lacres as compared to 2,517,000 millions in the

Groundnut, though of modern introduction, is already an important crop particularly in Madras, Bombay, Burma and Hyderabad The area in 1933-34 was 8 23 million acres and, although in the current year it has dropped considerably it is still for above the pre-war acreage The yield in 1933-34 was 3 33 million ton, of which 547,000 tons were exported as

Linseed requires a deep and moist soil and is grown chiefly in the Central Provinces, Bihar and Orissa and the United Provinces The crops is grown for seed and not for fibre and the common varities are of a much shorter habit of growth than those of Europe The yield varies greatly from practically nothing up to 500 to 600 lbs. of seed per acte It is grown largely for export At the beginning of the century Indua supplied practically the whole of the world's demand for inseed, the area having gone as high as 5 million acres with a yield of 030,000 tons In recent years foreign com-petition, mainly from the Argentine, has contracted the market for Indian linseed and with it the area under the crop Exports dwindled to 72,000 tons in 1932-33 as compared with the prewar average of 379,000 tons. The preference granted to Indian linseed in the United Kingdom under the Ottawa Agreement, combined with two successive short harvests in the Argentine, have helped India to regain her pre-war position, In 1933-34 exports again reached 379,000 tons of which the United Kingdom took more than half

Sesamum (Gingelly) is grown mostly in Penmsular India as an autumn or winter crop About 10 per cent of the production is exported and the rest consumed locally.

Cruciferous Oilsceds form important group of crops in Northern India where they grow freely and attain a fair state of development The area under rape and mustard, including an estimated figure for the area grown mixed with other crop is about 61 to 7 million acres annually Production in 1933-34 was estimated at 9-2,000 tons, of which 73,000 tons were exported as compared vith 115,000 tons in 1932-39 Several species are grown and there are numerous local varieties large portion of the crop is crushed locally for domestic consumption

Jute—I'mo varieties of the plant are valed as a crop, Capsularis and Olitorius Jute growing is confined almost entirely to Bengal, Assum, Bihar and Orissa. The crop requires a rich moist soil Owing to river inundation this part of India receives a considerable alluvial deposit a considerable alluvial deposit every year Suril buffaloes of the Bombay Presidency. The and the land is thus able to sustain this cattle and buffalo population in India is a norexhausting crop without manure. The crop mails high amounting to over 60 per cent of the is rather delicate when young, but once estab human population. The spread of cultivation lished requires no attention, and grows to a has diminished the graving grounds, insufative great hight (10 to 11 feet). Before repening fodder crops are raised and many of the crot.

Oilseeds—The crops classified under the about three weeks submersion the fibre is The areas tion in price and the crops themselves are previous year, production in 1934-35 was more or less precarious by nature, they cover 7,964,000 bales as against just over 8 millions an immense area in 1933-34 The total weight of raw and Groundnut, though of modern introduction, manufactured jute 'exported during 1933-34 is already an important crop particularly in amounted to 1,420,000 fons. This is a distinct recovery over the exports of the two previous Although the present acreage is much less than some years ago a vigorous campaign is in progress to reduce it still further

Tobacco is grown here and there all over ton, of which 547,000 tons were exported as the country chiefly, however, in Bengal, Bihar, compared with a prewar average export of Bombay, Madras and Burma. Of two varieties cultivated Nicolana Tabacum is by far the most common Maximum crops are obtained on icep and moist alluvium soils and a high standard of cultivation including liberal manuring re necessary The crop is only suited to small holdings where labour is plentiful as the atten tion necessary for its proper cultivation is very great. The seed is germinated in seed bedd and the young plants are transplanted when a few inches high, great care being taken to shield them from the sun. The crop is very carefully weeded and hoed. It is topped after the control of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of the sun of t attaining a height of, say, 2 ft, and all suckers are removed. The crop ripens from February are removed. The crop ripens from February onwards and is out just before the leaves become brittle. The greater part of the tobacco grown in India is intended for Bookah smoking and is coarse and heavy in flavour Lighter kinds are also produced for cigar and cigarette kinds are also produced for eight and significant manufacture. Of recent years there has been important development in the production, in commercial quantities, of better quality commercial quantities, of better quality elegarette tobacco both in Madras and in India exports about 29 million lbs of Bihar. unmanufactured tobacco annually of which about 35 per cent goes to the United Kingdom. This trade though a small proportion of Indian production (which is estimated at 600,000 tons per annum from an area of 1 3 million acres) is worth a crore of Rupees annually even at present prices.

Livestock —The livestock population of British India consists mainly of about 121 31 million buffaloes, million cattle, sheep, 35 million goats and 3 million horses, mules and donkeys, and in the 51 Indian States for which figures are available, there are 113 million cattle and buffaloes, 28 million sheep and goats, 1 million horses, mules and donkeys and half a million camels. For draught purposes cattle are mainly used everywhere though male buffalo are important as draught animals in the rice tracts and damper parts of the country Horses and mules are practically never used for agricultural purposes, For dalry purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in con's milk. The best known breeds are the Murra buffaloes of the Punjab, the Inflerabadi buffaloes of Kathiawar, and Co-Surfi buffaloes of the Bombay Presidency The the crop is cut and retted in water After are small, ill-fed and inefficient. Neverthele-

the best Indian breeds have many morits the draught types the best known breeds are the Hissar, Nellore, Amrit Mahal, Gujorat (Kankrej), Kangayam, Kherigarh and Malvi the Sahiwal (Punjab), Gir (Kathlawar), Scindi and Hansi are amongst the best milking breeds, - On the Government cattle-breeding farms pedigree herds are being built up and from these selected bulls are issued, preference being given to special breeding areas, to villages which undertake to exclude 'scrub' buils and where serious efforts to maintain a good strain of cow are made. Once established such breeding areas rapidly produce a supply of superior bulls for general distribution and in this way the valuable bulls from Government herds are used to advantage. The premium bull system is also working well in some tracts Cattle improvement is a slow process at the best and though a start on sound lines has been made in all provinces, continued effort and persistent endeavour are essential There is no branch endeavour are essential There is no branch of agricultural improvement where the land-

owners of India could render greater service.

Dairying.—Though little noticed hitherto dairying forms a very important indigenous industry throughout India. The annual cash

Of the best known products are native buttereds (ghee) and cheese (dahi). During recent rat years a considerable trade in tinned butter has sprung up and there seems to be no reason why an important industry should not be built up in other dairy products, such as milk-powder, condensed milk and casein. Pure give and milk can usually be procured in the villages but in towns dairy products can scarcely be bought unadulterated

The Government of India maintain an Institute of Animal Husbandry and Dairy ing at Bangalore where students are given 2 year courses for the Indian Dairy Diploma but little provision has hitherto been made for the extensive industrial research into the handling and processing of milk and dairy products under Indian conditions, which is essential for the development of dairying as a village industry. This matter is now receiving the attention of the Imperial Council of Agricultural Research.

Reference is made, electrons to the articles. Reference is made, elsewhere to the principal grants made by the Council for the promotion

of Veterinary Science and improvement of animal husbandry

It is sufficient here to say that there is a growing recognition of the fact that as India's value of dairy products has been esticonomic development proceeds a better balance mated at over 800 crores of rupees and the between crop production and a simal industry importance of milk and dairy products to the health and development of the people cannot feeding of dairy stock, instead of for sale as be over-estimated. Apart from liquid milk such, will be of increasing importance

# AGRICULTURAL PROGRESS.

Agricultural Progress.—The historical aspect of agricultural development in India has been fully dealt with in the report of the Linlithgow Commission. The Famme Commission as long ago as 1866 made the first proposal for a separate Department of Agriculture but little resulted except the collection of agricul-tural statistics and other data with the object of throwing light on famine problems. The Famine Commission of 1880 by their masterly review of the possibilities of agricultural development revived interest in the matter and their proposal for a new Department for Agriculture and allied subjects in the Government of India and for provincial departments of agriculture bore fruit eventually. Dr J. A. Voelker, Consulting Chemist to the Royal Agricultural Society, was invited to visit India and his book "Improvement of Indian Agriculture" is still a valuable reference book. In 1892 an agricultural chemist to the Government of India was appointed. Provincial Departments mainly concerned themselves at first with agricultural statistics but experimental farms were opened at Saidapet in 1871. Poona in 1880, Cawnpore in 1881 and Nagpur in 1883; there were various sporadic attempts at agricultural improvement but no real beginning was made until technical agricultural officers were appointed. the earliest were Mollison in the earliest were Mollson in Bombay (subsequently Inspector General of Agriculture), Barber and Benson in Madras, Hayman in the United Provinces and Milligan in the Punjab In 1901, the first Inspector General of Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agriculture and Agricultur ture was appointed and in the same year an Imperial Mycologist was added followed by an Imperial Entomologist in 1903. The present departments of agriculture, however, owe their existence to the foresight and energy of Lord

Curzon whose famous despatch of 1903 marked the commencement of the reorganization which took place in 1905 That scheme provided for a central research institute at Pusa, completely staffed provincial departments of agriculture with agricultural colleges and provincial research institutes and an experimental farm in each important agricultural tract. To the establishment of the Imperial Agricultural Research Institute at Pusa. Lord Curzon devoted the greater part of a generous donation of £30,000 given by Mr. Henry Phipps of Chicago to be applied to some object of public utility preferably connected with scientific research The Indian Agricultural Service was constituted in 1906 Since that date progress has been steady and continuous. With the advent of the reforms of 1919, agriculture became a provincial transferred subject but the Government of India retained responsibility for central research institutions and for certain matters connected with the diseases and pests of plants and animals The addition of the Imperial Institute of Animal Husbandry and Darrying (with a branch farm at Wellington) the Townsel Carllebook. Wellington), the Imperial Cattlebreeding Farm at Karnal and the Anand Creamery enabled livestock work to be carried out on a scale not possible at Pusa. The Imperial Sugarcane-breeding station at Coimbatore is yet another branch of the Imperial Agricultural Research Institute, Provincial Governments nave steadily developed and strengthened their agricultural departments. The total nett exhave penditure of provincial agricultural departments now exceeds 105, lakks rupees annually the nett annual expenditure on the Imperial Department of Agriculture is in the neighbourbood of 11 lakhs

Parallel developments took place in the provision made for matters connected with animal health. The now world-famous Imperial Institute of Veterinary Research at Muktesar started in 1893 as a modest hill laboratory for research on rinderpest It is now a fully equipped research institute which also manufactures protective sera and vaccines of which some 6 million doses are issued annually. The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector General The departments were completely provincialised in 1919, the Government of India continuing to finance and control the Muktesar Research Institute and its branch station at Izatnagar (Barellly)

Recent Progress —As now constituted, the agricultural departments include a complete organisation for bringing the results of the application of science to agriculture into the village. At one end of the scale are the agricultural colleges and research institutes—at the other thousands of village demonstration plots where the effect of improved seed, methods, implements and manures is shown under the cultivators' own conditions. Intermediate links in the chain are the experimental farms, where scientific research is translated into field practice, demonstration and seed farms and seed stores ascertained results of the work of the agricul-tural department are striking enough More than 15 million acres are known to be under improved crops—the further area due to natural, work in collaboration with the special r spread is indeterminable. Improved methods of staff appointed in the various provinces

cultivation and manuring are steadily spreading, work is in progress on most of the major crops and each year brings new triumphs The present position has been authoritative reviewed by the Royal Commission on Agriculture which reported in 1928 Recognising how much has already been done in the 20 years since the agricultural departments were created, the Commission also emphasised the enormous field for future work to which all witnesses had drawn their attention. The agricultural departments having shown that the application of science to Indian agriculture is a practical proposition and further that the individual cultivator can be reached and his method-improved, the problem is now to develop and intensity such work so that a general advance in agricultural practice will result. At no time has there been a greater need for co-ordinated effort directed towards the solution of agricultural problems. Only by increased efficiency can India meet the situation caused by low prices for all agricultural commodities and the intense competition in world markets arising from production in excess of effective demand

The Government of India have recently announced their intention to render further assistance to the agriculturists by providing better facilities for credit and for the marketing of agricultural produce. A central marketing section has been established under the Imperial Council of Agricultural Research which will work in collaboration with the special marketing staff appointed in the value of the second marketing staff appointed in the value of the second marketing staff appointed in the value of the second marketing staff appointed in the value of the second marketing staff appointed in the second marketing staff appointed in the second marketing staff appointed in the second marketing staff appointed in the second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second marketing second ma

# THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH.

method of infusing a different spirit into the whole organisation of agricultural research in India and of bringing about the realisation on the part of research workers in this country that they are working to an end which cannot be reached unless they regard themselves as partners in a common enterprise. They had found not only a lack of sufficiently close touch between the Pusa Research Institute and the provincial agricultural departments but also between the provincial departments themselves. After describing the way in which similar institutes had been approvinced to consider the difficulties had been overcome in Canada, the United States and Australia and dismissing as in-dequate the constitution of crop committees

In Chapter III of their Report, the Royal veterinary matters generally and would take Commission on Agriculture stated that the over the publication work at present carried out most important problem with which they had by the Imperial Agricultural Department been confronted was that of devising some The Commission proposed that the Council over the publication work at present carried out by the Imperial Agricultural Department The Commission proposed that the Council should be entrusted with the administration of a non-lapsing fund of Rs. 50 lakhs to which additions should be made from time to time 18 financial conditions permit Its Chairman should be an experienced administrator with a know-ledge, if possible, of Indian conditions and, in addition, there should be two other whole-time members of the Council for agriculture and animal husbandry respectively. The Commission suggested that the Council should consist of thirtysix members, in addition to the Chairman and the two whole-time members Of these, eight would be nominated by the Government of United States and Australia and dismissing as indequate the constitution of crop committees agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural and agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultural agricultu India, eighteen would represent the provincial, the triining of research workers, would act as a Council, his administrative duties being taken clearing house of information in regard not over by a who'e-time Director of the Pussonly to research but also to agricultural and Institute

Constitution of the Council—In a Resolu-Rs. 225 lables to the cost of its staff and tion issued on May 23rd, 1929, the Government screetariat The Council would have an entirely of India stated that whilst they were of opinion free hand in regard to the expenditure of the that the proposals of the Royal Commission grants made to it for scientific purposes subject were, on the whole, admirably designed to secure the objects for the attainment of which such matters as leave or pension contributions the establishment of the organisation outlined after the research for which the grant had been above was recommended, they considered a given would be incurred. In regard to the above was recommended, they considered a Council of thirty-nine members would be too large to be really effective and that it was not desirable that the Legislative Assembly should be deprived of its normal constitutional control over an activity which affects the staple industry of India. They had, therefore decided that the central organisation should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the management of all the affairs and funds of the Council subject to the limitation in regard to the control of funds which is mentioned below and an Advisory Board the functions of which would be to examine all proposals in connection with the scientific objects of the Council which might be submitted to the Governing Body, to report on their feasibility and to advise on any other questions referred to the Governing Body, to report on their feasibility and to advise on any other questions referred Body would consist of the Member of the Governing Body would consist of the Member of the feasibility of the Governing Body would consist of the Member of the funds of that meeting, it was announced Body would consist of the Member of the funds of the Council This offer was office of the Council, who would be exofficed of the Funds of the Council This offer was office of the Council, who would be exofficed of the Nizam's Government has been added to Vice-Chairman, one representative of the Council the Governing Body, the Directors of Agriculture of State, two representatives of the Legislative and of Veternary Services becoming members assembly, one representative of the European of the Advisory Board Since then donations of business community elected by the Associated one lake each, payable in 20 equal annual instal-Chambers of Commerce and Industry, the Tederation of Indian Dusiness Cochin and Travancore States and each nominand the Council Ministers of Agriculture, two to the Advisory Board The Bhopal State has representatives elected by the Advisory Board also been admitted as a constituent members of the Council might from time to time appoint.

The Advisory Board would consist of all those whose inclusion in the Council was recommended by the Royal Commission with the exception of the representatives of the Central Legislature and the representatives of the European and Indian commercial communities, who, under the modified scheme, would be members of the Governing Body In view of their exclusion from the Advisory Rosrd, the university representation would be Board, the university representation would be increased from three to four and the scientific representation by the addition of the Director of the Indian Institute of Science, Bangalore, a representative of the Forest Research Institute, Dahra Bangalore, and a proposed the science of the forest Research Institute, Dehra Dun, and a representative elected by the Indian Research Fund Association A representative of the Co-operative Movement would also be added. The Principal Administrative Officer to the Council would be ex-officio Chairman of the Advisory Board.

The Government of India further announced The Government of India further announced Holl die Sir Frank Moyce, additional member that for the lump grant of Rs 50 lakhs recom- appointed by the Governor-General in Council mended by the Royal Commission, they had The Chairman of the Council is the Hon'ble decided to substitute an initial lump grant of Member of the Council of His Excellency the Rs. 25 lakhs, of which Rs 15 lakhs would be Governor-General for the time being in charge said in 1925-20, supplemented by a fixed of the portfolio of Agriculture. The Hon. minimum grant annually. The annual grant Kunwar Jagdish Prasad, CSI, CIE, C.B.E. would be Rs. 7 25 lakhs, of which Rs. 5 lakhs would be devoted to the furtherance of the The Vice-Chairman—Diwan Bahadur Sir scientific objects of the Council and the remaining T. Vijayaraghavacharya, KBE The Expert

grant to meet the cost of staff, establishment, etc., the Council would be in the same position as a Department of the Government of India Secretarint The Council has since been constituted a separate Department of the Government of India

for the purpose of administring this grant

The Government of India also stated their decision that the Council should not be cou-

a Governor's province is now represented on the Governing Body by the Minister in charge of Agriculture and on the Advisory Board by the Agricultural Officer and the Superintendent, Civil Vcterinary Department. Personnel —In addition to the 18 ex-officion members the Governing Body includes the following gentlemen:

been allowed the same representation on the Council as has been granted to the States of Hy-derabad, My-ore, Baroda and Cochin The North West Frontier Province having been constituted

The Hon'ble Diwan Bahadur G. Narayana-swamy Chetty, elected by the Council of State; Pt Sa Krishna Dutta Paliwal, M.L.A. and Maulyi Mohd Shafi Daoodi, M.L.A., elected by the Legislative Assembly Sir Joseph Kay and Ir. Walchand Hirachand representing the business community: Messrs Carpenter and and Mr. Walchand Hirachand representing the business community: Messis Carpenter and Kerr, elected by the Advisory Board, and the Hon'ble Sir Frank Noyce, additional member appointed by the Governor-General in Council. The Chairman of the Council is the Hon'ble Member of the Council of His Excellency the Governor-General for the time being in charge of the portfolio of Agriculture. The Hon. #### RESOLUTION

Enquiry Committee drew attention to the loss which occurs through the ineffective marketing of agricultural produce and put forward recommendations for improvement The marketing of agricultural produce being mainly a matter of provincial concern, it is for Provincial Governments to consider what action, if any, they should take on the majority of the recommendations referred to but some are of all-India ımportance and application The Central Banking Enquiry Committee pointed out the need for some central agency to advise and assist in co-ordinating provincial activities particularly in the case of agricultural produce ntended for export and to give assistance to Provincial organisations by way of advice and research. It further recommended that this task should be undertaken by the Imperial Council of Agricultural Research.

2 Although they had accepted in general the recommendations of the Royal Commission on Agriculture regarding market surveys and the appointment of expert marketing officers in the Provincial Agricultural Departments and had in several instances taken such action in that direction as their finances permitted, Local Governments were in general deterred by financial stringency from making substantial The Government of India, in view of the importance of improved agricultural marketing as an aid to the general economic recovery of the country, came to the conclusion that a stage had been reached where action might usefully be taken to study in detail the all-India aspects of the problem and that subat a time of financial stringency—if the position officers

The reports of the Royal Commission on of Indian agricultural produce in world markets Agriculture in India and the Central Banking could be strengthened, and greater advantage could be strengthened, and greater advantage taken of the huge internal market for such produce

- 3 Accordingly, Provincial Governments, were consulted in July 1933, and, on receipt of their replies, the Government of India placed the matter before the Advisory Board of the Imperial Council of Agricultural Research for an expression of opinion In the light of the replies received from Local Governments the Board unanimously recommended action on the following lines -
- The first step should be the appointment for a limited period of a highly qualified and experienced Mirketing Expert with practical knowledge of the organisation of agricultural marketing in other countries of the Empire This Officer and the necessary assistants should be on the staff of the Imperial Council of Agricultural Research and should undertake the investigation of marketing problems and formulate schemes for the improvement thereof, make recommendation as regards standard grades for the various commodities and advise local Governments and Provincial Departments of Agriculture generally in regard to agricultural marketing
- Attention should be concentrated in the first instance on the principal commodities
- (c) Local Governments should be invited to collaborate with the Marketing Expert, stantial expenditure would be justifiable even is appointed, by appointing provincial marketing

- 4 The Government of India accepted the in accordance with a scheme of work prepared view of the Advisory Board and decided that a by the Marketing Expert Advisor on the star Marketing Expert should be appointed on the of the Imperial Council of Agricultural Research staff of the Imperial Council of Agricultural Ihis work, which will be undertaken by Research for a period of three years With the sanction of the Governing Body of the Imperial Council of Agricultural Research Mr A M Livingstone, a senior official of the Marketing Branch of the English Ministry of Agriculture, was accordingly appointed as Marketing Expert on the staff of the Council and took up his duties on the 28th April 1934
- The question of agricultural marketing was also discussed at the Provincial Economic Conference held in April 1934 and there was general agreement at the Conference that, of all practicable measures for improving economic conditions, an intensive programme to develop marketing facilities for agricultural products (both Crops and Livestock products) offers the best immediate prospects of substantial results. The Conference was of the opinion that action to be taken to deal with the main marketing problems should include propaganda and the supply of information in external markets regarding Indian products, the grading, sorting and bulking of the main staple products special market organisation for perishable commodities, information to India's producers of consumers' requirements both in India and abroad; the planning of production on the basis of quality and demand, the establishment and development of regulated markets, the under-taking of market surveys for the purpose of developing a common plan throughout India and the establishment of properly organised and the establishment of properly organised of transportation, storage and preservation of futures markets, commodity exchanges and the commodities dealt with, standardisation warehouses
- As stated in paragraph 9 of their Resolution No F-16 (1)-F/34, dated the 5th May 1934, the Government of India decided to proceed on the lines recommended at the Conference which included the following initial steps
  - (1) The appointment of a Central Marketing Officer and staff by the Government of India
  - (2) The appointment of Province al Marketing Officer«
  - (3) The inauguration of Marketing surveys
  - The appointment of special committees (4) for staple crops
  - (5) Work on grade standards

These recommendations broadly follow the recommendations of the Royal Commission on Agriculture which were endorsed in general by the Central Banking Enquiry Committee and steps will now be taken to give effect to them

of Government. In the menutime it has been a communitation and as a serior of the consideration will usually include the dimension of the decided however, that the other recommendately and traders of community is a superior of the community of the constant and as a serior of the community of the constant and as a serior of the constant and traders of constant and as a serior of the constant and traders of constant and as a serior of the constant and traders of constant and as a serior of the constant and traders of constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and the constant and

With Central Staff in conjunction with Provincial Marketing Staffs, falls into three main divisions,

- (i) Investigation work.
- (11) Development work . and
- (111) Work on grade standards

The work to be done under these various headings may be summarised as follows

Investigation work -- This will include a series of marketing surveys with immediate reference to the more important commodities grouped as follows -

- I Crops—(a) Cereals (wheat, barley and rice), (b) oilseeds (groundnuts, rapesed and linseed), (c) plantation and special crops (tob icco) fibres and fruit)
- Animal Husbandry Products -(a) Dairy products, etc (milk and butter, eggs and poultry), (b) Livestock, etc (hides, skins and wool livestock, meat and fish)

Certain general questions are also included within the scope of the surveys, tie, Regulited Markets, Marketing Organisation, the problems of containers, etc.

The marketing surveys when completed will set out in detail the present system of marketing of the commodities concerned not only in each of the provinces separately but in respect of inter-provincial, inter-state and foreign trule so as to provide an all-india picture of existing conditions and a common basis for future progress. The report on each survey will a out, in precise technical detail definite suzz -tions for standard grades container, liandling methods of preking, contract conditions et: Without committing either the Central Government or Provincial Governments, these report will also formulate proposals regarding and improvements in marketing organisation in the various areas which may appear to be prove-are and practicable

The work connected with the execution of these surveys will be shared between the factors and Provincial Marketing Staffs and the planning of the survey- compilation of data and pre paration of the report- wall fall in dals on " Central Staff

Development work -I or each comment is it programme of develop n pr north march The question of establishing additional depend on the real's ofth river answer - 1.

<sup>\*</sup> Exclusive of the value of crops raised on some 3 million acres irrigated by non-capital works.

Canals in Sind, the Cauvery (Mettur) project in Madras, and the Sutlej Vallet Canals in the Pun-leb. The Sukkur Barrage, which was opened by lsb. The Sukkur Barrage, which was opened by His Excellency the Vicoroy early in 1932, is the greatest work of its kind in the world, measuring 4.725 feet between the faces of the regulators on either side. The year 1932-33 was devoted to the design and construction of the remaining minor channels, including watercourses, together minor channels, including watercourses, together with the necessary regulators, falls, bridges and modules. The remodelling of the existing channels was also taken up and several of these projects were under consideration. The Barrage canals, which were opened early in the year, were tested to their full supply levels, and the necessity supply levels, and the result generally was satisfactory, though some of the banks showed considerable settlement and these were strengthened as required. The general working of the canals during this first year of their operation was very satisfactory. the total area frrigated being 25,00,007 acres of which 13 45,000 neres were in Kharif and 11,55,067 acres in rab: the area of wheat amounting to 7,00,230 neres as compared with an average wheat area during the five years ending 1930-31 of only 1,83,043 acres

ending 1932-39 all the State Can ils taking provides for hydro-chetric paner.

New Works.—The major works of excep- off from the first three headworks, namely the tional importance are the Sukkur Barrage and Bilaner, Fordwah, Lastern Sadiqia, Bahawalpur and Qaimpur Canals were handed over to the States The remuning two Canals, namels the Abbasia and Panjuad Canals taking off from the Panjuad Headworks, were also handed over to the Bahawalpur State during the year The total expenditure on the Project to the end of 1932-33 amounted to R= 21 12 crors which include Rs 11 63 crores contributed by the States of Bikaner and Bahanalpar—the co-pariners in the Project. The total are a to be irrigated is 5,108,000 acres, or nearly 8.000 square miles Of this, 2,075,000 acres are perennial and 3,033,000 acres non-perennial irrigation, 1,942,000 acres are in British territory, 2,825,000 acres in Bahawalpur and 341,000 acres in Bikaner.

The Couvery-Nettur Project was inaugurated on August 21, 1934 The dam which has some of its features is the largest in the world and took 9; ears to complete It is built across the rise Couver of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the the river Cauvery at a point 240 miles from its source in Western Ghats During the construction of the dam 200,000 tons of cement and 55 million cubic feet of masonry i are used

years ending 1930-31 of only 1,83,043 acres 1,300,000 acres of rice fields 125 miles away from in the same tract.

The Sutief Valley Works which reached the dam in the Cauvery drive The Vetter Completion by the end of 1932-33 received million cubic feet whilet the dam has an over all the sanction of the Secretary of State for India length of a lattly over a mill larger late on 1921-22. It falls into four natural groups be as sted by about 70 miles of claim carelatented on the Terozepur Suleminke, Island, together with holes of a Country Mercury Siles and Pangual Readworks. During the triannium torus. The Cauvery-Mercury Siles ending 1932-33 all the State Can its taking provides for hydrochectic power. The scheme is designed to irrigate some

# Meteorology.

the Indian Ocean to the southward are North-west India. This region during January, determining factors in settling its principal; February and part of March is traversed by meteorological features. When the North-a succession of shallow storms from the west-ern Hemisphere is turned away from the sun, ward. The number and character of these in the northern winter, Central Asia becomes storms vary very largely from year to very an area of intense cold. The meteorological and in some years no storms at all are recorded conditions of the temperate zone are pushed in normal years, however, in Northern India yourses of India the westerly winds and east of disturbed weather alternate with periods vinces of India the westerly winds and east of disturbed weather (occurring during the ward moving cyclonic storms of temperate passage of these storms) and light to moderate regions, while, when the Northern Hemisphere and even heavy rain occurs. In the case of is turned towards the sun, Southern Asia be-Peshawar the total minfall for the four month's, comes a super-heated region drawing towards! December to March, amounts to 5.75 inches comes a super-heated region drawing towards December to March, amounts to 575 inches it an immense current of air which carries while the total fall for the four months, June with it the enormous volume of water vapour to September, is 4.65 inches, showing that the which it has picked up in the course of its long rainfall of the winter is, absolutely, greater passage over the wide expanse of the Indian in this region than that of the summer monocean, so that at one season of the year parts soon. These two periods of subsidiary "raine"

Monsoons -The all-important fact in the meteorology of India is the alternation of the greatest consequence as on it largely seasons known as the summer and winter mon- the grain and wheat crops of Northern India soons. During the winter monsoon the winds are of continental origin and hence, dry, fine weather, clear skies, low humidity and little air June form a period of rapid continuous increase movement are the characteristic features of this season The summer rains cease in the pro-vinces of the North-West Frontier Province and the Punjab about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather con-ditions extend slowly eastward and southward so that by the end of October, they embrace all parts of the country except the southern half of the Peninsula, and by the end of the year have extended to the whole of the Indian land and see area, the rains withdrawing to the Equatorial Balt Than the Characteristics. Equatorial Belt Thus the characteristics in the Indus Valley near Jacobabad Temperof the cold weather from October to February ratures exceeding 1200 have been recorded over India are.—Westerly winds of the temperate zone over the extreme north of India; the West and South Punjab and the west of the south of these the north-east winds of the United Provinces, but the highest temperate recorded the contract of the south of these the north-east winds of the United Provinces, but the highest temperate recorded the contract recorded to the south of these the north-east winds of the United Provinces, but the highest temperature recorded to the south of these the north-east winds of the United Provinces, but the highest temperature recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded to the contract recorded t the winter monsoon or perhaps more properly rature hitherto recorded is 1272 registered at the north-east Trades and a gradually extend Jacobabad on June 12th, 1919. During this the north-east Trades and a gradually extend Jacobahad on June 12th, 1919. During this ing area of fine weather which, as the season period of rising temperature and diminishing progresses, finally embraces the whole Indian barometric pressure, great alteration tale land and sea area. Two exceptions to these place in the air movements over India, includfine weather conditions exist during this period. sine weather conditions exist during this period, of the winter moreon, and the north east winds riz, the Madras coast and the north-west of of the winter moreon, and the air circulation aways which set in over the Bay of Bengal in local circulation, characterised by strong for curves round over the Bay of Bengal in local circulation, characterised by strong for winds down the river valleys of Northern Ludia retreating summer monsoon, which current and increasing land and sea which in the coat curves round over the Bay of Bengal, and regions. These land and sea which, as they blowing directly on to the Madras coast gives become stronger and more extensive, in it to that region the whole year, for while the total which result in the production of victor 1 and reinfall for the four months June to September, storms. These take the forms of dury from the four months June to September, storms. These take the forms of dury from the first arms of the Madras ob-lin the dry plains of Northern laces are the servatory amounts to 15.46 inches the total thunder and halfrerns in regions.

The meteorology of India like that of other rainfall for the three months October to Decountries is largely a result of its geographical cember amounts to 31.78 inches. The other position. The great land area of Asia to the region in which the weather is unsettled, during northward and the enormous sea expanse of this period of generally settled conditions, is the India Ocean to the southward are Northwest India. This region during January, Ocean, so that at one season of the year parts soon. These two periods of subsidiary "raine" of India are deluged with rain and at another persistent dry weather prevails.

[all in Madra is, as shown above, of considerable actual amount, while that of North-west India actual amount, while that of North-west India though small in absolute amount is of the

> Spring Months -- March to May and part of of temperature and decrease of barometric pressure throughout India During this period there occurs a steady transference northward of the area of greatest heat. In Murch the maximum temperatures, slightly exceeding 100° occur in the Deccan; in April the area of maximum temperature, between 100° and 103°, lies over the couth of the Central Pro-vinces and Gujarat; in May maximum tem-peratures, varying between 105° and 116°, prevail over the greater part of the interior of the country while in June the highest mean maximum temperatures, exceeding, 1100 occur me the disarpearance of the north east winds

sive force, heavy hall and formalial rain and series, sive force, heavy hall and formalial rain and series, on that account are destructive belts; know as "Nor" western" in Bingral

By the time the area of greatest heat has been established over North west hadia, in the last week of May or first of June, India has been established over North west hadia, in the last week of May or first of June, India has been established over the sent of low barometric pressure relatively to the adjacent raw and the whole observed of the weather change. During of the weather neriod, discussed above, the Arabian was and fin, or lieuzal up to first whose and weather neriod, discussed above, the Arabian was and fin, or lieuzal up to first whose and weather are mainly determined extreme conflicts two weaks agreed over the hot weather period. Also weather the I qualout and Lat, 300 and weather are mainly determined in the outcomes of the weather are had gone in the south-east trades, that is to say from about Lat 302-325 south as wind from south-east blows over the surface of the results in the counter of the south-east how over the surface of the results in the provided the counter. Here the air rises into the upper strata to flow heal assian at a considerable elevation to the bouthern Trople or beyond. To the north art this circulation, there exists a light undersals circulate, that is to say about Lat 202 North there is north, and the first into the upper strata of the atmosphere, skill further to the north art and in the minimum at the provided provided the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the surface of the ern progress. At the same time the temperature over India increases rapidly and baro metric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea areas Thus we have the southern Trades circulation and pasing onward gives moderate to heave extending northward and the local land and rain in the flattern Punjab, Eastern Rajputana sea circulation extending southward until and the North-west Himalayas. In this region sea circulation extending southward until about the beginning of June the light unsteady interfering circulation over the Arabian Sea finally breaks up, the immense circulation of the south-east Trades, with its cool, moisture winds rushes forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by oceanic conditions the south-west monsoon proper. This is the most important season of the year as upon it depends the prosperity of at least five-eighths of the people of India.

is inter-notion between damp sea winds and dry built being the routh seas trailer and the north winds from the interior. These storms are sen built the continuest money on The meet frequently accompanied with winds of excess important fact about it is that it is a copilities also force, heavy hall and formulal rain and builtonial nic to between practice are account for destructive being retensive areas after where story evaluate how as "Norwesters" in Bengal

The northern portion of the current blowing across the Gujarat, Kathian and bind coasts gives a certain amount of rain to the coast districts and frequent showers to the Aranalia Hill range but very little to Western Rajputana, and Passing operated the mediants to heart the current meets and mixes with the monsoon current from the Bay.

The monsoon current over the southern half of the Bay of Bengal blows from sonth-west and is thus directed towards the Tenasserim hills and up the valley of the Irrawady to which it gives very heavy rain That portion of this current which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low-lying districts of East Bengal and immediately thereafter coming under the influence of the When this current is fully established a con-tinuous air movement extends over the Indian Ocean, the Indian seas and the Indian land area from Lat. 30° S. to Lat 30° N. the southern maining portion of the Bay current advances

from the southward over Bengal, is then of storms recorded during the period 1877 to directed westward by the barrier of the 1901 and shows the monthly distribution -Himalayas and gives general rain over the Gangetto plain and fauly frequent rain over the lower ranges of the Himalayas from Sikhum to Bay of Bengal ... Kashmir.

To the south of this easterly wind of the Bay current and to the north of the westerly wind of the Arabian Sea current there exists a debatable area running roughly from Hissar in the Punjab through Agra, Allahabad and part of Chota Naspur to Orlssa, where neither current of the monsoon prevails. In this area the ramfall is uncertain and would probably be light, but that the storms from the Bay of Bengal exhibit a marked tendency to advance along this track and to give it heavy falls of occasional rain

The Total rainfall of the monsoon period (June to September) is 100 inches over part of the west coast, the amount diminishes eastward, is below 20 inches over a large part of the centre and east of the Pennsula and is only 5 inches in South Madras. It is over 100 inches on the Tenasserim and South Burma coast and decreases to 20 inches in Upper Burma; it is over 100 in the north Assam Valley and dimmishes steadily westward and is only 5 inches in the Indus Valley.

The month to month distribution for the whole of lades is .--

May	••	8.1	inches.
June	••	7.9	,,
July	••	11 2	n
August	••	10.3	31
Beptember		7.0	,,
October	••	3.3	

mvariable feature of the monsoon period the Arabian Sea they ordinarily form at the clear weather prevailing throughout. This commencement and end of the season, riz, procession with the numerous variations and May and November, but in the Bay they form modifications which are inseparable from a constantly recurring feature of the monsoon meteorological conditions repeats itself year season. The following gives the total number after year

Jan. Feb Mar. Apl. May June 1 July Aug. Sep. Oct. Nov. Dec. Bay of Bengal 41 36 45 Jan, Feb. Mar. Apl. May June Arabian Sea 2 15

Arabian Sea

July Aug Sep. Oct. Nov. Dec.

The preceding paragraphs give an account of the normal procession of the seasons throughout India during the year, but it must be re-membered, that every year produces varia-tions from the normal and that in some years these variations are very large. This is more particularly the case with the discontinuous element rainfall The most important variations in this element which may occur are -

- (1) Delay in the commencement of the rains over a large part of the country, this being most frequent in North Bombay and North-west India
- (2) A prolonged break in July or August or
- (3) Early termination of the rains, which may occur in any part of the country.
- (4) The determination throughout the monsoon period of more rain than usual to one part and less than veval to another part of the country. Lxamples of this occur every year.

About the middle of September fine and liceh weather begins to appear in the extreme This area of tipe weather north-west of India and dry winds extends eastward and southward. the area of rainy weather at the same time cor-tracting till by the end of October the rain-area has retreated to Madras and the south Cyclonic storms and cyclones are an almost of the Peninsula and by the erd of December In has desappeared from the Indian region, fine the clear weather prevailing throughout. This

# INDIA METEOROLOGICAL DEPARTMENT.

Functions of the Department—The India Meteorological Department was instituted in 1875 to combine and extend the work of various provincial meteorological services which had spring up before that date. The various duties which were imposed on the Department at the time of its formation were from time to time supplemented by new duties. The main existing functions, more or less in the historical order in which they were assumed, may be

(a) The issue of warnings to ports and coastal districts of the approach of cyclonic storms

briefly summarised as follows -

- (b) The issue of storm warnings by wircless to ships in the Indian seas, and the making of arrangements for the collection of meteorological data from ships.
- (c) The maintenance of systematic records of meteorological data and the publication of climatological statistics. These were originally undertaken in order to furnish data for the investigation of the relation between weather and disease
- (d) The issue to the public of up-to-date weather reports and of ramfall forecasts. These duties were originally recommended by a Committee of Enquiry into the causes of famine in India
- (e) Meteorological researches of a general character, but particularly regarding tropical storms and the forecasting of monsoon and winter rainfall
  - (f) The issue of seasonal rainfall forecasts
- (g) The issue of telegraphic warnings of heavy rainfall by special telegrams to district officers on departmental warning lists (e.g., canal and railway engineers), and by means of the ordinary daily weather telegram to the public in general
- (h) Supply of meteorological, astronomical and geophysical information in response to enquiries from officials, commercial firms or private individuals
- (i) Technical supervision of rainfall registration carried out under the control of provincial Government authorities.
- (j) The study of temperature and moisture conditions in the upper air by means of instrument-carrying balloons and of upper winds by pilot balloons
- (k) The issue of weather reports and warnings to aircraft, civil and military, the latter being in collaboration with the Royal Air Force
- (l) The training and examination in meteorology of candidates for air pilots' heenses
- (m) Study of meteorology in relation to agriculture, a subject on which the Royal Commission on Agriculture in India made recommendations

In addition to there meteorological duties the India Meteorological Department was from time to time made responsible for or undertook various other important duties, such as—

- (n) Determination of time in India and the issue of time-signals, also the determination of errors of chronometers for the Royal Indian Navy.
- (o) Observations and researches on terrestrial magnetism at Bombay and atmospheric electricity at Bombay and Poona
- (p) Regular study (mainly by spectroscopic examination) of the sun at the Solar Physics Observatory at Kodaikanal

  (g) Maintenance of sermological instruments

at various centres

Definitions of different types and classes of

of systematic records and the publication of Observatories—Before proceeding to indicate the organisation of the Meteorological Departurnish data for the ment, it may be helpful to introduce here the following definitions—

Forecast Centre at which weather observations are collected by telegrams from a number of stations in order to form the basis of weather reports and forecasts issued therefrom. These may be (a) Main Centres, serving a large area for general purposes, or (b) Regional Centres serving more limited areas for special purposes

Upper Air Observatory undertaking observations of upper winds, and of upper air temperatures, humidities and pressures up to heights of about 15-20 miles by means of sounding balloons (\*\*\epsilon\*\* e , balloons with self-recording instruments attached)

Air Observatory to which Royal Air Force supply aeroplane data of temperatures and humidities up to heights of 2 or 3 miles

Prior Balloon Observatory at which pilot balloons (re, balloons without attached instruments) are released and observed through special theodolites for the determination of wind directions and velocities at various heights in the free atmosphere. The minimum staff is two full-time observers for one balloon flight per day and 3 full-time observers and a balloon maker for two balloon flights per day

A meteorological or weather observatory for the observations of such elements as can be recorded by an observer with the help of instruments on the ground (as distinct from upper air observations obtained by means of balloons, etc.). Observatories where the staff is provided and paid for by other agencies, e.g., Indian States, are called non-departmental although instruments are supplied by the Meteorological Department These surface observatories are classified according to the number of observations per day and the number and kind of instruments to be read Thus.

First class weather observatory (W1) which is furnished with autographic instruments for continuously recording pressure, temperature, humidity, wind direction and velocity, and minfall, in addition to instruments read by eye. It may also undertake special observations (e.g., on atmospheric electricity). The staff required varies from two part-time observers according to about four full-time observers according to the amount of special work and of computation and tabulation of data

Second class weather observatory (W2) at which observations are taken twice daily and usually telegraphed to one or more forecast centres. The existing standard times of observation in India are 8 hours (Local Time) and 17 hours (Indian Standard Time)\*, the observations being made by a part-time observer on Rs. 25 per mensem

Third class weather observatory (W<sup>3</sup>) where readings are taken daily at 8 hours and sent by telegram daily or by post at the end of each month to one or more forecast centres. At each observatory of this type there is one parttime observer on Rs 15 a month

Fourth class weather observatory (W4) at which observations (a) of temperature, wind and rainfall only or (b) of temperature and rainfall only are recorded. The staff of a 4th class observatory is one part-time observer on pay not exceeding Rs 12 a month

Fifth class weather observatory (W5) at which a part-time observer on Rs 5 p m records and telegraphs rainfall At some of these observatories certain non-instrumental observations are also taken and telegraphed in the "Brief Weather Code"

Non-instrumental (W6) observatory at which visual observations of weather phenomena are recorded. This class includes the type of observatory called the current reather station which is established on or near an air route for recording local current weather for airmen. At such a station observations of past and present weather, visibility, cloud, wind direction and force are recorded at certain fixed times daily and at other hours on request, the usual staff at a current weather station is one wholetime observer.

Magnetic Observatory (M) equipped with instruments for continuously recording the principal magnetic elements

Seismological station (S) equipped with one or more continuously recording seismographs

Time Observatory (T) equipped with instruments for the determination of time from observations of sun and stars and from European wireless time signals

Solar Physics Observatory (Sp.) equipped with photohellograph spectro-hellograph, etc.

Auxiliary centre (C) where a Professional or Meteorological Assistant receives copies of weather reports from the forecasting centres for transmission and elucidation to pilots, adding his own remarks or conclusions about the local weather situation if and when necessary

## ORGANISATION.

It is necessary to note that practical meteorology implies a meteorological organisation, note merely individual meteorologists relying upon their own personal and purely local observations. The making of a single forecast in any of the larger meteorological offices of the world requires the co-operation of some hundreds of persons. In India some 400 observes to-operate daily to take simultaneous observations at about 300 separate places and hand in their reports to telegraphists, who transmit them to forecast centres, where, for rapid assimilation, clerks decode them and chart them on maps, meteorological experts then draw therefrom the conclusions on which their forecasts are based. There are other observatories, which take observations for climatological purposes but do not telegraph them.

An efficient system of telegraphic communication of weather reports is an essential feature in all meteorological organisations. This is recognised in the International Tele-communication Convention

While the above is true, in general of all applications of practical meteorology, its application to aviation involves the existence of a specialised and particularly designed organisation Aviators require detailed information about the weather; they wish to know winds at different levels, have information about visibility, fogs, dust-storms, thunderstorms, height of low clouds, etc., along with forecasts of changes in these elements. Many of these are local, short-lived and rapidly changing phenomena

Definite recommendations regarding the nature of information to be supplied to pircraft, the exhibition of current weather information at aerodromes and the meteorological organisation of international aliverys have been embodied in Annexe G of the International Convention of Air Navigation. In accordance with these recommendations, expert meteorologists should be stationed at aerodromes at reasonable intervals along the airway to supply to the aviation personnel current information and forecasts of weather conditions along the routes up to the next aerodrome of the same class. Forecast centres should be established at least at each main acrodrome along aerodromes and forecasts prepared at such centres should be transmitted to the other aerodrome mendations refer to hours and kind of observations and manner of codifying them

In Europe practically all observatories record and telegraph readings at least torice duly, while stations near air motes do so ever three hours. In the United States of America readings are made at least twice dully at all observatories, every three hours at most observatories near air routes and every hour at observatories near along air routes. In addition, every a redemne receives by telewinter frequent fertilar rejurations.

<sup>\*</sup>Surrice observations at Persian stations are taken at 4 and 12 hours. Grant Million Time, (Add 5] hours to convert to Indian Standard Time,

of these at half-hourly and most at hourly intervals in order that the aviators may be supplied with current up-to date information of actual weather on the sir route itself. In India, the meteorological service for eviation is for financial reasons, not able to attain the minimum recommended in annexe G of the International Convention The act-work of observatories in India is much sparser than that in Europe and America and the frequency of observations taken at each of them much smaller. The four-thousand-nile air route between Bahrein and Victoria Point is served two forcensting century at Karachi and Calcutta, which prepare two synoptic charts a day basid on observations taken twice daily at observatories reporting to them. The sole forecasting centre in Southern India is at Poona where facilities are available for the issue of one forecast daily. The opening of a chain orceast daily. The opening of a chain wireless stations along the main trans-India fair route has enabled special meteorological facilities to he made available to atmen flying along that route A system of exchange of current weather reports at specifical hours between stations on the route and of voluntary roports of warning of adverse weather has been introduced with the co-operation of the Director of Wireless and the Director of Civil Aviation making it possible for each wireless station to have in a collected form the information regarding actual weather at neighbouring stations on the air-route for supply to filers Stations taking part in the scheme are Karachi, Jodhpui, Delhi, Allahabad, Calculta, Chittagong, Akyab, handowny, Bassein, Rangoon and Victoria Point. Apart from routing observations at stated times, alresen can obtain information of current local weather at any time by wireless, by special Further the transmission, along the wheless chain, twice daily, of the latest weather forecasts and upper wind and low cloud informa-tion for each part of the air route has been arranged. This enables the latest weather reports to be available to air-reaft in flight as well as at the principal acrodromes on the route where they are displayed suitably on weather notice boards,

For the Karnehi-Madras service, airangements for communicating current weather information to aerodromes from a few observatories or the route to supplement the information available in the reports supplied by the forecasting centres.

In order to fulfil the various duties described

from certain stations along the air routes a few ponsibility for signifing of records and for checking and computation of dala received from them is divided between the offices at Poona, Calcula and Karachi. Forcessing for aviation is divided between these three offices and the offices at Peshawar and Quetta; the last two forcest for military flying and do not serve civil aviation Storm-warning for shipping in the Bay of Bengal is carried on by the McLeore-legical Office at the latter white distance Autological Officer at Calcutta, while similar duties In respect of the Arabian Sea are undertaken at Poons, The Upper Air Observatory, Agm, is in administrative charge of all the pilot bulloon observatories in India, Burma and the Persian Gulf. The Bombay and Alibag Observatorics specialise in the study of Geophysics, particularly terrestrial magnetism and seismology while the observatory at Kodalkanal specialists in the study of the solar physics. The next section describes in somewhat greater detail, the general duties of the offices mentioned above.

# GENERAL DUTIES OF THE MAIN OBSERVATORIES AND OFFICES.

(a) Hondquarters Offices, Poona (F. U. W.)-10 general administration of the department is carried on by the Irendeparters Office in Poona. In addition, it is in immediate and complete charge of all second, third, fourth and lifth class weather observatories in Kashmir, Gujarat, Central India, the Central Provinces and the Peniusula and is responsible for the scrutiny of records and checking and computation of data received from them. It receives tolegraphic reports of morning observations collected at practically all pilot balloon and first, second, third and fifth class observatories in India and issues daily a telegraphic summary of general weather conditions with forecasts of probable changes in weather during the next 24 hours for the whole country. It undertakes the issue of heavy rainfall warnings for practically the whole country except north east India, and the issue of warnings for storms in the Arabian Sea. Its duties on briall of evilution conduct to the team of warning. of aviation consist in the issue of weather reports to airmen on routes in entral and southern India; for the Karachi-Madras air service, it issues forecasts for the major section see, Airmediated to Madras. This office property and authitiated the Table 2012 prepares and publishes the Daily, Weekly and Monthly Weather Reports, and an Annual Volume entitled the "India Weather Review," and issues two annual volumes containing rainfail data of about 3,000 stations in India. In collaboration with the Agra Observatory, it also publishes an annual volume containing all upper air data collected in India. It is responsible for the preparation of normals of reinfall, temperature. Involving the for all above, the organisation of the department is all upper air data collected in India. It is made up of a central office, 7 anti-offices, 36 responsible for the preparation of normals of pilot balloon observatories and 328 weather rainfall, temperature, hunddity, etc., for all observatories of various classes to distribute observatories in India, it issues long-range over a region stretching from Persia, Adan, scaronal rainfall forceasts for the country. Sanctuar on the west to Burma on the cast. It collects and examines weather logs from The central office at Pagent 4 the administrative site of the Arabian file. It guardles all The central office at Poons is the administrative ships in the Arabian Sca. It supplies all headquarters of the department. The control weather observatories with instruments over weather observatories, including the res- and stores from the stock, which it maintains.

<sup>\*</sup> Fuller details of the aviation organisation are contained in the departmental pamphle entitled "Meteorological Organisation for Airmen"

t Classified into various classes, the number as it shood on Sist March 1934 would be distributed as follows -

W1 -- 15, W2. 166, W1. -86, W4 c> 22, W6 ... 24 and W6 -- 15

It is also responsible for the design, specification, test and repair of all meteorological instruments. On its transfer from Simla to Poona the Headquarters Office was equipped as an upper air observatory and a first class weather observatory. It also has facilities for research thave been started at Drigh Road.

The Karachi Office administers all second. is now one of the two main centres for the conduct of upper air research in India, sounding third, fourth and fifth class observatories in balloon work directed from there has been Persia and Arabia, Baluchistan, the Northlargely responsible for our present extension of Rajputana and the west United Provinces As Pennsula Publications of meteorological the basis of the weather reports and forecasts research in the Department are edited and issued to aviators, it propares two weather issued from Poona. This office also collects and charts daily drawn up mainly from obserresearch in the Department are ented and issued from Poona This office also collects and charts daily drawn up mainly from obsercompiles, for the International Commission vations received from the observatorics under the upper air data collected over India, Ceylon its own control A daily weather report is siam, Indo-China, Malaya, the Dutch East also being published, as an experimental Indies, Somahland and British East Africa

A branch for agricultural meteorology has (d) Upper Air Observatory, Agra been sanctioned temporarily and is financed (U Wi S)—Agra Observatory is the head-by the Imperial Council of Agricultural Research quarters of all pilot balloon work in India It Its statistical investigations include a critical enquiry into the available data on the area and yield of crops for the various presidencies and districts in India and, after careful selection, the correlation of some of them with the accumulated meteorological On the experimental side, it aims to

- (b) Meteorological Office and Observatory, Alapore, Calcutta (F P. W1, S T.)—The Alapore Office serves as a regional forecast centre and is responsible for the publi-cation of the Calcutta Daily Weather Report for stormwarning in the Bay of Bengal and for heavy rainfall warning in north-east India issues weather reports to airmen on routes lying in Burma, Assam, Bengal Bihar and Onssa and the east United Provinces, on the trans-India route, its responsibility extends over the section Allahabid to Victoria Point To meet the needs of aviation, an afternoon chart is prepared in addition to the long established morning chart, the area of the latter being extended to meet the new needs It has charge of all second, third, fourth and fifth class observatories, in the area comprising Burma and the Bay Islands, Assam, Bengal, Bihar and Orissa and the east United Provinces including the checking and computation of
- seismological station

  (c) Karachi (F. W<sup>1</sup> P. A)—This office was established primarily as a forecasting centre for aviation. It now issues weather reports for airmen on routes lying along the Persian Gulf and Mickian coasts and in Sind, Rajputana, the Punjab, west United Provinces and north Gujarat. On the empire and international air route across India its responsibility extends over the section between Bushire or Bahrein on the west and Allahabad on the east.

The Karachi Office administers all second.

- is responsible for the maintenance and super-vision of the work of the pilot balloon obserratories in India, Burma and the Persian Gulf and supplies them with the equipment necessary to carry on their daily observations, these duties have necessitated the provision of a hydrogen factory to make hydrogen gas and study microchmatology, evolve suitable ins-truments for such work, standardize methods vision or a workshop for the design maru-of observations and in general undertake a facture and repur of instruments, principally detailed study of the air layer near the ground for upper air work. All data from pilot balloon observatories are collected, checked, and statistically summanised at Agra observatory is also a principal centre of upper air research work in India. The sounding balloon work there (in the course of which balloons have provided information of conditions up to as great a height as 60,000 feet) has been responsible for most of our present knowledge regarding the free atmosphere over India There is a seismological station attached to this observatory
- (c) Colaba and Alibag Observatories (W1 S T. M)—These observatories specialise in the study of geophysics, particularly terrestrial magnetism and seismology, and in addition carry on the duties of a first class neating observatory. The routine magnetic work at the publication of the magnetic Burma and the Bay Islands, Assam, Bengal, Bihar and Orissa and the east United Provinces including the checking and computation of data therefrom It also supplies time signals by time ball to Fort Wilham, by wireless to shipping at sea and by telegraphic signal throughout the Indian telegraph and railway systems. It is also a first class weather observatory, pilot balloon observatory and seismological station

  (c) Karachi (F. W<sup>1</sup> P. A)—This office:

  \*\*Albag, as well as the publication of the rachit class, is arranged in accordance with the recommendations of the International Commission for Terrestrial Magnetism. The observatories and estar or sun observations for the defermance of time; and the Colaba Observatory is responsible for the time-ball service at the Bombay Harbour and the rating of class.

  In recent years researches on a time-plant season of the International Commission for Terrestrial Magnetism. The observatories take star or sun observations for the defermance of time that the Colaba Observatory is responsible for the time-ball service at the Bombay Harbour and the rating of class and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba Observatory and the Colaba

# MONSOON OF 1934.

The S W Monsoon of the year was markedly and caused good rainfall all over the country normal in its incidence and gave well-distributed except in northwest India. The current rains all over the country throughout the remained active during the last week over the season without any abnormally prolonged break. Peninsula and in upper Burma, and from Assum Of the fifteen Divisions of the country, all were to the east and north Panjab. The total rainfall well served except Mysore which returned a for the month was 11.89 inches—practically normal. deficiency of 43 per cent in its rainfall

June.—Indications of the approach of the monsoon current over the South Arabian Sea monsoon continued to remain active practically were evident early in the month. Its regular over the whole country except in the northwest, meidence however on the Malabar Coast, of curred under the influence of four successive depressions on the 8th June—later than the usual date—after the first of which appeared over east Confrail Decimals on the State August—During the first three weeks the monsoon current over the south arabidates of the state of the south areas and the south areas are south areas and the south a which the current steadily advanced northwards Province on the 2nd August and moving along the West Coast A shallow depression northwards disappeared over the United Proformed on the 10th June off the Karwar-Konkin vinces on the 6th, the second which formed at coast which moving northwards in front of the the head of the Bay on the 9th and filled up over advancing monsoon, helped to carry vast voulmes the west Central Province on the 12th, the of most air inland well into the Decean, Central third which riving off the Orissa-Ganjam coast India, and parts of Northwest India, and provoke on the 14th and moving northwestwards broke in these regions widespread local thunder showers up in the Kumaon hills on the 20th, and the Though regular monsoon conditions were not fourth which formed at the head of the Bay fully established there before the 3rd week of the on the 19th and traversing the country northmonth, this branch of the current gave good westwards filled up over north Rapputana rains over its field of action—normal in the on the 20th. Widespread and heavy rains were provided and heavy rains were supported and he Peninsula and in excess of the normal in North-gathered all along and in the neighbourhood of west India and Central India

of May and caused widespread rains in Lower Burma Though by the end of the second week in June the current extended into Assam and active throughout the month A depression In June the current extended into Assum and Bengal, it remained feeble on the whole over its rising off the Orissa-Circars coast on the 6th field of action right upto the end of the third September which moved northwestwards and week. Two depressions which formed at the head of the Bay in the last week invigorated the lifet up over the east United Province on the current, and extending the monsoon into Bihar and Orissa, gave normal rainfall for the month in Burma and Northeast India. The depressions were also responsible for heavy rains in the Assum were also responsible for heavy rains in the Assum wave from Burma over the Bay resulted in the Hills, which raised severe floods in the Brahmaformation of a shallow depression off the puter River and caused damage to life and Chitagong-Arakan coast on the 17th. It property in some of the riverside districts of developed later into a storm, which traversed the Assam and southeast Bengal Averaged over the country, we stoothwestwards and filled up over the country.

over Bihar and north Bengal on the 10th July—was 8 11 inches, 9 per cent in excess of the the monsoon maintained its activity during the period practically over the whole country except in the south of the Peninsula. Thereafter though the Bay current continued active in the early reces, on of the near or for the Burma, southeast Bengal, and in the hills and submontance regions from Assam to east Panjab, the 7th October, and occurrence all nearly the Arabian Sea current weakened over the country of thunder storms with heary which are usually associated with proper transfers of the S W and N E means the Bay into Chota Nagpur and Orissa, strong-the plains of India was 3 55 inches, 2 per cent. over Bihar and north Bengal on the 10th July was 8 11 inches, 9 per cent in excess of the

normal

The Bay monsoon current advanced over the plains of India the total rainfall for the Bay of Bengal about the last week excess of the normal

September -The Bay monsoon remained Assam and southeast Bengal Averaged over the country westnorthwestwards and filled up over plans of India the total fall for the month was the west Central Province on the 25rd Though 9 09 inches, 4 per cent in excess the Bry monsoon weakened thereafter, it gave fairly nidespread rains right upto the end of the July.—Under the influence of two Bay month over its own field of action. In the depressions—one which had formed at the end Peninsula the monsoon current remained of the provious month, and moving northwest—markedly feeble during most days of the month, wards filled up over the central parts of the markedly feeble during most days of the month, wards filled up over the central parts of the middle of the month. Averaged over the plant formed about the 7th July and disappeared of India the total full for the month.

The total minfall for the seison—June to September—averaged over the plains of Indianas 42.0 inches to per cent in excess of the normal. The following table gives detailed information of the seasonal runfall of the period.

# Famine.

To the student of Indian administration lightened the pressure on the soil. The relation them and then fall into the background. This cultues: it has ceas general truth is illustrated by a study of the history of famine in India. For nearly forty years it was the bogey of the Indian administrator. The forecasts of the rains were studied with acute anxiety. The actual progress of the rains was followed with no less anxiety, and at the first signs of a bad or poor season the famine relief machinery was furnished up and prepared for any emergency. The reason for this is clear if we examine for a brief space the economic condition of the Indian peasantry Nearly three-quarters of the people are directly dependent on agriculture for their daily bread. Very much of this agriculture is dependent on the seasonal rains for its existence Immense areas in the Bombay Presidency, Madras, the United Provinces and Central India are in a region of erratic and uncertain rainfall. rainy season is short and if for any natural reason there is a weakness, or absence, of the rain-bearing currents, then there is either a poor harvest or no harvest at all In Western lands everyone is acquainted with the difference between a good and a poor season, but western countries offer no parallel to India, where in an exceptionally bad year wide tracts of thickly populated land may not produce even a blade of grass In the old days there were no railways to distribute the surplus of one part of India to the districts where the crop had failed There were often no roads The irrigation works were few and were themselves generally dependent on the rainfall for their reserves. The people lived from hand to mouth and had no store of food to fall back upon. Nor had they any credit. In the old days then they died. Commencing with the Orissa famine in 1865-67 the Government of India assumed responsibility for the saving of human life in such crises. After the famine of 1899-1900 this responsibility was also shouldered by the Indian States Stage by stage this responsibility was expressed in the evolution of a remarkable system of famine relief covering the whole fleid But now that machinery has reached a remarkable degree of perfection, it is rusting in the official armounes, because the conditions have changed The whole of India is covered with a network of raliways, which distributes the produce of the soil to the centres where food is required. The extension of irrigation has enormously increased the product of the soil and rendered large areas. much less dependent on the monsoon rainfall. At the same time the scientific study of the problems of Indian agriculture has raised the capacity of even the "dry" zones. The peasantry has accumulated a certain reserve against the rainless days from the presperity which accom- Marwar which was such a distinguishing feature panied the period of high prices. The rapid of the famine of 1899-1990; it is estim ted that spread of the co-operative credit movement out of a total population of a million and a half has mobilised and strengthened rural credit. In Marwar, one million emigrated There was the spread of manufacturing enterprise has famine in Behar in 1878-74, then came the grat

nothing is more remarkable than the manner of famine to the question of Indian administration which great problems arise, produce a correstion has therefore changed. In an exceptionally ponding outburst of official activity to meet bad year it may create administrative difficulties; it has ceased to be an administrative

## Famine under Native Rule.

Famines were frequent under Native rule, and frightful when they came. "In 1030," says Sir William Hunter, in the History of British India, "a calamity fell upon Gujarat which enables us to realise the terrible meaning of the word famine in India under Native rule. Whole cities and districts were left bare of inhabitants." In 1631 a Dutch merchant reported that only cleven of the 260 families at Swally survived. He found the road families at Swally survived. He found the road thence to Surat covered with bodies decaying on the highway where they died, there being none to bury them. In Surat, that great and crowded city, he could hardly see any living persons, but "the corpses at the corner of the streets he twenty together, nobody burying them Thirty thousand had pershed in the town alone. Pestilence followed famine "Turther historical aridance was adduced by Sir ther historical evidence was adduced by Sir Theodore Morrison in his volume on the Economic Transition of India It has come to be seen that whilst railways have checked the oldinshioned practice of storing grain in the ill-lages they have made the reserves, where they exist, available for the whose of India india there is now no such thing as a food famine; the country always produces enough food for the whole of the population; famine when it comes is a money famine and the task of the State is confined to providing the means for those affected by drought to earn enough to buy food. The machinery whereby this is done will be examined after we have seen the experiences through which it was evolved

### History of Recent Famines.

The Orissa famine of 1865-67 may be talen as the starting point because that induced to first great and organised effort to combat distress through State agency. It affected 160,000 square miles and 47,500,000 people. The Bongal Government was a little slow in appreciating the need for action, but late food was poured into the district in prodictions quantities five million units were relieved (a unit is one person supported for one day)at a cost \$5 lalls The mortally was very heavy, and it is estimated that a million propie or one-third of the porulation, died in Orissa alone. This was followed by the Madras famine of 1886, and the famin-in Western India of 1863-70. The latter famine introduced India to the great migration from

two years and in the second year extended to its was intense in Rajputana, Baroda, Central ports of the Central and United Provinces and India, Hyderabad and Kathlawar. It was to a small tract in the Punjab. The total area marked by several distinctive features. The affected was 257,000 square miles and the popularial over the whole of India was in extreme lation 58,500,000 Warned by the excessive defect, being eleven inches below the mean, expenditure in Behar and actuated by the desire in several localities there was practically no aggregated Rs. 84 lakhs

### The Famine Codes.

The experiences of this famine showed the necessity of placing relief on an organised basis The first great Famine Commission which sat under the presidency of Sir Richard Straches elaborated the Famine Codes, which amended to meet later experience, form the brais of the frmine relief system to-day. They recommend-ed (1) that employment should be given on the rehef works to the able-bodied, at a wage suffi-cient for support, on the condition of perform-ing a suitable task; and (2) that gratuitous recreat for support, on the condition of t Famine Code to the provincial governments, the Government of India laid down as the cardinal feature of their policy that the famine " is the lowest amount sufficient to main-Whilst tain health under given circumstances the duty of Government is to save life, it is not bound to maintain the labouring population at its normal level of comfort." Provincial codes were drawn up, and were tested by the famine of 1896-97. In that 307,000 square miles were affected, with a population of The numbers relieved exceeded was remitted to the extent of Rs 11 crore, and loans given aggregating Rs 12 crore. The charitable relief fund amounted to about Rs 12. erors, of which Rs 11 crore was subscribed in the United Kingdom. The actual famine Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, comparable with it in severity, and that the expense was moderate But before the Local Governments had been given time to digest the proposals of this Commission or the people for saving cattle. to recover from the stock, the great famine of 1809-1900 supervened

### The Famine of 1899-1900

population of 59,500,000. In the Central ment is kept informed of the meteorologics

South Indian Famine of 1876-78. This affected Provinces, Berar, Bombay, Amer, and the Madras, Alysore, Hyderabid and Bombay for Hissar district of the Punjab famine was acute Aymer, and the expenditure in Behar and actuated by the desire in several localities there was practically no to secure economy the Government relief prorain. There was in consequence a great fodder gramme was not entirely successful. The excess famine, with a terrible mortality amongst mortality in this famine is said to have been the cattle. The water supply was deficient, 5,250,000 in British territory alone. Throughout British India 700,000,000 units were relieved and brought a crop of difficulties in its train, out British India 700,000,000 units were relieved. Then districts like Gujarat, where famine had at a cost of Rs. \$\frac{1}{2}\$ crores. Charitable contriben unknown for so many years that the locality was thought to be famine immune, were affected: affected; the people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late to save life. A very large area in the Indian States was affected, and the Marwaris swept from their impoverished land right through Central India like a horde of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale At the end of July 4,500,000 persons were supported by the State, Bs. 10 crores were spent on relief, and the total cost was tion were insignificant, the extensive outbreaks of cholera, and the devastating epidemic of malaria which followed the advent of the rains induced a famine mortality of approximately a milion. The experiences of this famine were collated by the Commission presided over by Sir Antony MacDonnell. This Commission sion reported that taking the famine period as a whole the relief given was excessive, and inid down certain modified lines. The cardinal feature of their policy was moral strategy. Pointing out that if the people were assisted at the start they would help themselves, whilst 4,000,000 at the time of greatest distress. The at the start they would neep themselve, to a deteriorate cost of famine relief was its 71 crores, revenue it proceeded on a declining scale, they placed it proceeded on a declining scale, they placed in the forefront of their programme the neces-acty of "putting heart into the people." The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans, the early suspension of revenue, and a policy mortality in British India was estimated at the early suspension of revenue, and a policy 750,000. The experiences of this famine were ration of a large and expansive plan of relief examined by a Commission under Sir James, and secured by the propagators, constant ration of a large and expansive plan of relief and secured by liberal preparations, constant vignance, and a full enlistment of non-official help The wage scale was revised; the minimum wage was abolished in the case of ablebodied workers; psyments by results were recommended, and proposals were made recommended

### The modern system.

The Government of India are now in possess This famine affected 475,000 square miles with effects of drought In ordinary times Governmentalities of 50,500,000. To the Control of the Co conditions and the state of the crops grammes of suitable relief works are kept up-to-date, the country is mapped into relief circles, reserves of tools and related circles, reserves of tools and plant are stocked fireles, reserves of tools and plant are avoided if the rains fail, policy is at once declared, non-officials are enlisted, revenue suspended and loans for agricultural purposes made Test works are then opened, and if labour in considerable quantities is attracted, they are

Side by side with the perfection of the machinery for the relief of famine has gone the development of famine protection. The Famine Commission of 1880 stated that the best, and often the only means of securing protections of India, whose influence is widespread are many. We can only briefly indicate them here. There is a much greater mobility in Indian fabour. Formerly when the rains failed the ryot relief in one form from the extreme effects of famine and drought, are railways and irrigation. These are of two classes, productive and protective. Productive works being estimated to yield profits which will pay interest and sinking fund charges are met from loans; protective works, which do not pay, directly from revenue In order to guarantee that there should be continuous progress with protective works, the Famine Insurance Grant was instituted in 1876. It was decided to set apart from the general revenues Rs. 11 crores annually or one million sterling. The first charge on this grant is famine relief, the second protective works, the third the avoidance of debt. The chain of protective railways is now practically and silver bullion in which this is largely liquid-protective irrigation. Acting on the advice has in an elaborate pro
sum of two classes, productive and protective in family. We can only prienty indicate them here There is a much greater mobility in Indian isome. Formerly when the rainsfailed the ryot clong to nis village until State relief in one form or another was brought almost to his doors. # The Outlook.

Such in brief is the official programmer and organisation which has been built up ont of the experience and practice of the past. Yet everything goes to show that Government activity to save human life will never be regarded in the future of the control of the Test works are then opened, and if labour in considerable quantities is attracted, they are sonverted into relief works on Code principles. Poor houses are opened and gratuitous relief given to the infirm. On the advent of the rains the people are moved from the large works to small works near their villages, liberal advances are made to agriculturists for the purchase of plough, cattle and seed. When the principal autumn crop is ripe, the few remaining works are gridually closed and gratuitous relief ceases. All this time the medical tous relief ceases. All this time the medical staff is kept in readmess to deal with cholera which so often accompanies famine, and mairial, which generally supervenes when the Famine Protection.

protective irrigation Acting on the advice acting an over the country, in small of the Irrigation Commission an elaborate pro- sums or in ornaments, which can be drawn upon gramme of protective irrigation works has in an emergency. The prodictions coining of been constructed, particularly in the Bombay rupees during the last two years of the war, and Deccan—the most famine-succeptible district the continuous absorption of gold by India, reinform owing to the absorpt of backlery titless. Under the Statutory Rules framed under the Government of India Act of 1919, Provincial Governments (except Burma and Assam) are required to contribute from their resources a fixed sum every year for expenditure on famine These annual assignments can be expended on relief of famine only, the sum not required for this purpose is utilised in building up a Famine Relief Fund The Fund provides, as its main and primary object, and famine diseases, followed by the great infurence to drought or other natural calamities. Of congestion, let two give millions at the credit of the Fund is perfectly in the Indian State of the Sum under irrigation, and in other Providers, of the Bombay Decean, irrigation works have been a constructed, which break the shock of a failure of the rains. The natural growth of the Bombay Decean, irrigation works have been constructed, which break the shock of a failure of the rains. The natural growth of the population was for some years reduced by player and to drought or other natural calamities. Of congestion, let two give in the population was for some years reduced by player and to drought or other natural calamities. Of congestion, let two give in the general information of the foreign in the Indian Frairs, below their regarded as invested with the Governor-former population and in a saminable for experimental information of the famine surface of regarded as invested with the Governor-former population and in a large extension of the land in the Punlab form of the Bombay Decean, irrigation works have constructed, which break the shock of a failure of the rains. The natural growth of the population was for some years reduced by player can be discussed by player and samine and provides, and famine diseases, followed by the great information of the famine surface of population was for some years reduced by player can be added to cover famine form of the famine surface of population and in the Punlab form of the famine surface of the famine surface of the famine surface of the famine surface of form owing to the absence of banking institutions

considerable development of manufacturing andowmennt of its, "2,50,000 above mentioned industry, which is generally short of labour and its permanently lavested and the principal never helps to absorb the surplus of a famine 3 car. Whilst the Government is completely equipped utilitied for relief work as necessary and unexpension a famine code, there is no reason to suppose ded balances are temporarily invested, so as to that there will ever recur such an emergency as that of 1899. Tamine can now be efficiently accumulated when expenditure is not necessary, met by the liberal distribution of fagax!, the suspension and remission of the land revenue Securities—at the end of 1921 stood at demand, the relief of the aged and others. Securities—at the end of 1921 stood at demand, the provision of cheap fodder same time was Rs 14,015-6-2, so that the total for the cattle, with possibly some assistance of 1935 was Rs 17,759-62.

The increased resistance of the nearest the conditions to meet which the Trust.

s always scope for private philanthropy specially in the provision of clothes, help for

The income of the Trust is administered by a board of management consisting of 13 In 1934 a grant of Rs 8 lakes was given members appointed from different provinces for the relief and distress caused by the great and Indian States, Sir Ernest Burdon, K C.L.E., | Carthquakes in Bihar & Orissa.

of the co-operative credit movement has C.S.I., 1.0.8, Auditor-General in India, is the improved rural credit Timally, there is the Secretary & Treasurer of the Trust The considerable development of manufacturing indowment of Re. 12,50,500 above mentioned

The whole conditions to meet which the Trust as founded have changed in recent years. This The increased resisting power of the people was effectively demonstrated during the famine of 1920-21, which was due to the failure of the monsoon towards the end of the year 1920. The distress which appeared in the end of 1920 persisted during the early months of 1921 and regular famine was declared in parts of Madras, Bombay, Central Provinces and Baluchistan. Local distress prevailed also in Bengal, Punjab and Central India. The largest number of persons on relief of all kinds did not exceed 0 45 million which was considerably less than 3% of the total population of the area affected by the failure of the monsoon.

The Indian People's Famine Trust.

Outside the Government programme there always a cope for private philanthropy The increased resisting power of the people was founded have changed in recent years s always stope for private philanthropy specially in the provision of clothes, help for the superior class poor who cannot accept lation of the cultivators when the rains break. At every great fandine large sums have been subscribed, particularly in the United Kingdom, for this purpose, and in 1899-1900 the people of the United States gave generous help with the idea of providing a permanent famine fund, the Maharaja of Jaipur gave in 1900 a sum of Rs. 15 lakhs, in Government securities to be held in trust for the purposes of charitable relief in seasons of general distress periods of streze in a manner formerly unima-This Trust I and in a few years increased to Bs. 28,10 000 During 1934 it increased further family become grants of assistance to sufferers family become grants of assistance to suffere grants of assistance to suffere grants of assistance to suffere grants of assistance to suffere grants of assistance to suffere grants of assistance to suffere grants of assistance

# Hydro-Electric Development.

industrial development and the favourable is stated initial conditions caused by the war, the three mit enthusiasm for industrial development which has feet of seized nearly all classes of educated Indians, similar considerations apply to rivers in other and the special attention which the circumparts. Some doubt is expressed as to the stances of the war have compelled Government estimate of seven million horse-power in the to direct towards the scientific utilisation of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of tific Studies. India within the next few years Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil. These commodities are all difficult to obtain, and costly in India except in a few favoured areas Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy. Water power and its transmission by electricity offer, on the other hand, immense possibilities, both as regards the quantity available and the cheapness at which the power can be rendered, in all parts of India.

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year. Percinial rivers with sufficient water throughout the year are practically non-existent in India. Water, therefore, must be stored for use during the dry season. Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfalls occur and the progress already made in utilising such opportunities by the electrical transmission of power affords high encouragement for the Further, hydro-electric schemes can frequently be associated with important irrigation projects, the water being first used to drive the turbines at the generating stations, and then distributed over the fields.

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India On this recommendation the Government of India in 1918 appointed the late Mr. G T Barlow, C.I. E., then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr. J W. Meares, MIC.E., Electrical Adviser to the Government of India. Mr. Barlow died, but Mr. Meares issued a preliminary report in September, 1919, summarising the state of knowledge of the problem in India and outlining a programme of investigation to be undertaken in the course of the inquiry. Mr. Meares showed that industries in India absorbed over a million horse necessity for a Hydrographic Survey of India in India absorbed over a

India promises to be one of the leading countries of the world in regard to the development of bydro-electric power and great strides in this direction have aiready been made. India not only specially lends itself to projects of the practically all the great rivers, which are at precind, but peremptorily demands them. Cheap sent uninvestigated. Thus the minimum flow of motive power is one of the secrets of successful the seven great rivers eastward from the Indus industrial development and the favourable is stated to be capable of giving not less than three million horse-power for every thousand antipudasm for undustrial development which has lest of fall from the Himalayas, while Himalayas, fall from the Irrawaddy and Chindwin rivers, given in the report of the London Conjoint Board of Scien-

> The Report points out that the Bombay Presidency holds a unique position owing to its great existing and projected schemes at Lonavia, the Andhra Valley, the Nila Mula and the Koyna Valley and has the still greater advantage of possessing a firm ready to develop its resources.

### Bombay Hydro-Electric Works

The greatest Hydro-Electric undertakings in India are the three schemes developed and brought into operation by Tata Sons, Ltd., and continued under their management until 1929, when they were transferred to the management of the Tata Hydro Electric Agencies, Ltd., in which Messis Tata Sons retained a substantial interest These undertakings are -

(a) The Tata Hydro Electric Power Supply Company, Ltd Started in 1915

Valley (b) The Andhra Electric Power Sup-,, 1922 ply Company, Ltd

(c) The Tata Power Company, Itd , 1927.

These Hydro Electric schemes have a combined normal capacity of 246,000 HP and provide electrical energy for the City of Bombay, Bombay suburbs, Thana, Kalyan and Greater Poons

Bombay, after London, is the second largest City in the British Empire and is the largest manufacturing centre in India Its population including suburbs at the 1931 census was 1,326,313 with a total population of approximately 1,600,000 in all of the areas served by these companies Its cotton mills and other factorics consume about 150,000 H P., which until these Hydro Electric schemes came into operation, was entirely produced by thermal stations using fuel coming from great distances.

The ravourable position of the Western Ghats vinch rise to a height of more than 2,000 feet above rea-level within a few miles of Bombay, City situated on the shores of the Arabian sea with their heavy rainfalls was taken full advan-tage of for providing Bombay City and vicinity million horse with an adequate and economical power supply.

Electric Power Supply Company are situated trading and shipping centre. near Lonavla at the top of the Bhor Ghits. The monsoon rainfall is stored in three lakes. namely, Lonavia, Walwan and Shuawta, from which it is conveyed in open masonry canals to the Forebay at Khandala and thence through steel pipes to the Power House at Khopoli at the foot of the Ghats, where the head at turbine nozzles is 1,750 feet or approximately 750 lbs per sq mch The normal capacity of the Power station at Khopoli is 48,000KW or 64,300 H P This scheme was formally opened by H E The Governor of Bombay on the 8th of February

Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the North of the Tata Hydro Llectric Supply Company's of the later hydro Licettic Supply Company's lakes, where an additional 48 000 KW (or 64,300 HP) could be developed These investigations resulted in the formation of the Andhia Valley Power Supply Co and the construction of the schemes, the principal features of which consist of a reservoir formed by a dam about 190 feet high across the Andhra River and a tuppel 8 200 feet the Andhra River and a tunnel 8,700 feet long driven through solid trap rock to the scarp of the Ghats, from which the water is taken in steel pipes 4,600 feet long to the turbines in the generating station at Bhis puri. The head of water at turbine nozzles is 1,750 feet or approximately 750 lbs per sq mch The electrical energy is transmitted to Bombay over a transmission line 50 miles long for augmenting the supply from Khopoli

The Tata Power Company's scheme on the Nila-Mula River to the South-East of Bombay was investigated and developed along lines similar to the Andra Valley scheme and has a normal installed expansity of 87,000 KW or 117,000 HP The power is transmitted to Bombay over a transmission line 76 miles long and is used to augment the supply of the ino earlier companies to mills, factories and railways

The Tata Hydro Electric Power Supply Co. The Andhra Valley Power Supply Co and the Tuta Power Company operating as a unit under one management supply the whole of the electrical energy required by the Bombay Electric Supply & Tramways Co Ltd, the majority of the mills and industries in Bombay City the B B & C I Railway for their suburban Electric Supply Company and the distributing, lopment of the scheme are taken from the heensees in Thana, Kulyan and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and the Bombay, Pikara rater which drains from the Nitter and Rater burbs

### Mysore Hydro Electric Works.

The first Hydro Electric Scheme of any magnitude undertaken in India or indeed in the East, was that on the Cauvery River in My-ore State, which with its generating station, transmission line and distributing system was inaugurated in 1902

The Cauvery River rises in the district of Coorg in the Western Ghats and flow- across Mysore State The principal object of this scheme was the supply of power to the Mysore State Mining companies on the Colar Gold Field. about 92 miles from Sivasamudram, the site of the generating station. This transmission lunwas for a number of years the longest line in Asia Since 1902 the supply of electrical energy from Sivas unudram has been provided for Langalore and Mysore cities and about 200 other towns and villages in the South-Eastern Half of the State

The mitial undertaking has constantly been expanded so that its total capacity now stands at 46,000 E H P This is the maximum obtainable from the water available. This great increase has been made possible by the construction of the Krishnaryasagar reservoir near Mysore ity. which has a capacity of 44,000 million cubic fect of storage above the minimum draw off

The number of the consumers of all classes continues to increase rapidly every year with greatly increased demands. The Government of Mysore have encouraged this growth in the use of electrical energy and have made a survey of Hidro Power re-ources of the State and prepared plans for the construction of a second generating station at the mot economical site

The more important sites where a Hydro Electric power station can be constructed are Mekadatu, the Shimshaw Falls, the Krishnamussagar and the Jog Lall- (the Ger-offic Lall ) These power site provide My-ore state with ample hydro power resources to meet the requirements of the State for a long time to come.

### Works in Madras

The Pylari Hydro-Electric Scheme an electrification the whole of the energy required undertaking of the Medras Government, was by the G. I. P. Railway in Bombay City and for commenced at the end of 1920 the their main line traction up to Kalvan, the whole state of the project by ng completed at the electrical energy required by the Poor 1 and of 1922. The nat is utilised for the determinant for the descriptions. Plucin having a externing over of real, is so make. The average randell in the average

# Local Self-Government.

profoundly affected by the Reforms of 1919 is This is one of the that of local government subjects transferred to Indian ministers, and under their leadership considerable developments have been essayed. On the whole, the progress of local government in India for the past quarter of a century has been disappointing. The greatest successes have been won in the Presidency towns, and particularly by the Municipality of Bombay The difficulties in the way of progress were manifest. Local government had to be a creation —the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration Again, the powers entrusted to local bodies were insignificant and the financial support was small There are however many indications that the dry bones of the mofusil are stirring.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from villages are built up the larger administrative titles—tabsils. sub divisions. and districts.

"The typical Indian village has its central residential site, with an open space for a pond and a cattle stand Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood-cutting. The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a little community with its own organisation and govern-ment, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, e.g., in the greater part of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads,"-- (Gazelleer of India.)

The villages above described fall under two main classes, viz.-

Types of Villages —"(1) The 'severalty' or ralyatwari village which is the prevalent form outside Northern India Here the revenue is assessed on individual cultivators. There is no foint responsibility among the villagers, though some of the non-cultivated lands may be set apart for a common purpose, such as gray-ing, and waste land may be brought under the plough only with the permission of the Revenue authorities, and on pryment of assessment The village government vests in a hereditary headman, known by an old vernacular name, such as patel or relat, who is responsible for law and order, and for the collection of the Government revenue He represents the primitive headship of the tribe or clan by which the village was originally settled"

"(2) The joint or landlord village, the type prevalent in the United Provinces, the Punjab and the Frortier Province Here the revenue

A field of the administration of Indialits incidence being distributed by the body of superior proprietors, and a certain amount of collective responsibility still, as a rule, remains. The village site is owned by the proprietary body. who allow residences to the tenantry, artisans, traders and others. The waste land is allotted to the village, and, if wanted for cultivation, is partitioned among the shareholders. The village government was originally by the punchaget or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities; but the arti-ficial character of this appointment, as compared with that which obtains in a ralyatwari village is evidenced by the title of its holder, which is generally lambardar, a vernacular derivative from the English word 'number.' It is this type of village to which the well-known description in Sir H. Maine's Village Communities is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants of labourers under them."

> Autonomy.—The Indian villages Village formerly possessed a large degree of local au-tonomy, since the native dynastics and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large lauditolder as responsible for the payment of the Government revenues, and the maintenance of local order This autonomy has now disappeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the increase of com-munications, the growth of individualism, and the operation of the individual rangationri system, which is extending even in the north of India. Nevertheless, the village remains the first unit of administration; the principal village functionaries—the headman, the accountant, and the village watchman—are largely utilised and paid by Government, and there is still a certain amount of common village feeling and interests.

> Punchayets.—For some years there was an active propaganda in favour of reviving the village council-tribunal, or *Punchayet* and the Decentralisation Commission of 1908 made the following special recommendations:—

"While, therefore, we desire the development of a punchayet system, and consider that the objections urged thereto are far from insurmountable we recognise that such a system can only be gradually and tentatively applied. and that it is impossible to suggest any uniform and definite method of procedure. We think and definite method of procedure that a commencement should be made by giving certain limited powers to Punchayets in those villages in which circumstances are most favourable by reason of homogeneity, natural intelli-gence, and freedom from internal feeds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination was formerly assessed on the village as a whole, between the circumstances of different villages:

and there is a considerable consensus of opinion 'limits. Of these municipalities, roughly 710 have that this new departure should be made under a population of less than 50,000 persons and the the special guidance of sympathetic officers" remainder a population of 50,000 and over

This is, however, still mainly a question of future possibilities, and for present purposes it is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too early to say what life they have The Punjab Government has passed a Village Punchayat Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judical power, both civil and criminal or a minor character, may be assigned. In Bihar a Village Administration Act has been passed for the administration of village affairs by villagerathemselves, including minor civil and criminal cases. Other Governments are taking steps in the same direction.

Municipalities - The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute, from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Art passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India Under this Act and subsequent Provincial Acts large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self-government, these Acts did not proceed far. It was not until after 1870 that much progress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to beer on the management of funds devoted to education, sanitation, medical, charity, and local public works. New Municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the electric principle, but only in the Central Provinces was popular representation generally and successfully introduced in 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of municipal bodies, a wide extension being given to the elective system, while independence are responsibility were conferred on the committees of many towns by permitting them to elect a private citizen as chairman Arrangements were made also to increase municipal resources and financial responsibility, some items of provancial revenue suited to and capable of development under local management being transferred, with a proportionate amount of provincial The general prinexpenditure, for local objects ciples thus laid down have continued to govern the administration of municipalities donn to the present day.

The Present Position —There are some 781 municipalities in British India, with something over 21 milion people resident within their

a population of less than 50,000 persons and the remainder a population of 50,000 and over. As compared with the total population of particular provinces, the proportion resident within municipal limits is largest in Bombay, where it amounts to 20 percent, and is smallest in Assam where it amounts to only 2 per cent. In other provinces it varies from 4 to 9 per cent of the total population. Turning to the composition of the municipalities, considerably more than half of the total members are elected and there is a stendy tendency to increase this proportion. Ex-officio members are only 7 per cent and nominated 25 per cent. Elected members are almost everywhere in a majority. Taking all municipalities together, the non-officials outnumber the officials by nearly six to outnumber the officials The functions of municipalities are classed under the heads of Public Safety, Health, Convenience and Instruction For the discharge of these responsibilities, there is a municipalincome of Rs 14 03 crores derived principills from taxation, just over coming from municipal property. over one-third contributions from provincial revenues and miscellangous sources Generally speaking, the income of municipalities is small, the four cities of Calcutta, Bombay, Madras and Rangoon together providover 40 per cent. of the total heaviest items of this expenditure come under the heads of "Conservancy" and "Public Works" which amount to 14 per cent and 13 per cent.
respectively, "Water-supply" comes to 13 per
cent, "Drainage" to 4 per cent and over 11 "Lavertion" to per cent. some localities the expenditure on education is considerably in excess of the average. In the Bombay Presidency, excluding Bombay City, for example, the expenditure on education amounts to more than 21 per cent, of the total funds, while in the Central Provinces and Bertr it is over 17 per cent.

District Boards -The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards In almost every district of British India save in the province of As-am, there is a board subordinate to which are two or more sub-di-trict boards, while in Bengal, Madras and Bihar and Orisa, there are also Union Committees. Throughout India at large there are some 207 district boards with 584 sub-ils rict boards besides 457 Union Panchayats in Madres. This machiners has juri-diction over a population which was over 221 millions in 1950 21 Leaving asile the Union Committee and Union Boards or Panchayais the members of numbered over 16,000 Board-1930-51, of whom 73 per cent, were elected. As in the circ of muricipality a the tendercy has been throughout Irdia to merca a the elected riembers at the expine of th nominated and the others member 7 me Boards are pretically manned by Inline vio constitute 66 pre n' of the slow resister ship Only 11 percent, of the conding terof all boards are officed and are her. The total income of the Boards in 1920-21 recented to R. 1657 crores, the average large of each board being R. 2,00,000. The rest important from of reserved in traversal rates, which represent a proportion of the intal

Improvement Trust—A notable feature in the recent sanitary history of India is the activity played by the great cities in the direction of social improvements. In Bombay and Calcutta the Improvements Trusts are continuing the for the better. The new municipalities have superate chapter (q.v) In Bombay the work of the Improvement Trust is being developed by the Bombay Development Directorate Other cities are beginning to follow the examples of these great cities and Improvement Trusts have

number of these boards continues to increase, nessed the passing of a Local Self-Government of villages throughout the province

of village committees which was passed in 1920 by the Legislative Council In this presidency, some 145 out of 155 municipalities had a two-thirds elected majority of councillors in the year 1930-31, and a distinct step forward has been projected by the administration in the direction of the relief of the reli tion of liberalizing the constitution of all municipal bodies. The policy of appointing a non-official president has been extended both to district and sub-district boards, and a large number of non-officials have also been appointed presidents of sub districts (taluka) boards In Madras also the institutions of local self-government continued to progress in an encouraging manner. The number of district boards in the Presidency in 1931 was 25 with 1,005 The number of sub-district boards members The number of sub-district boards was 130. The total number of Municipal Councils during the year 1930-31 continued to be 81 and the proportion of Indian to European and Anglo-Indian members further increased. In 1930-31 there were 54 municipal councils, consisting entirely of Indian members, as against 51 in the previous year. The average imposition of taxation per head of population is still very low, being only about its 2-8

income varying from 25 per cent. in Bombay In the United Provinces the new District and in the N. W. F. Province to 63 per cent Boards, which consist of non-official members in Bihar and Orissa. The principal objects of only with elected non-official Chairman, were expenditure are education which has come plunged straight-way into financial different within the last three culties. cities are beginning to follow the examples of them. The stands of the great cities and Improvement Trusts have been constituted in Cawnpore, Lucknow and Allahabad in the United Provinces and in soveral tinued to show improvement, the general attitude of the larger cities of the Provinces of India of the members in regard to their responsibilities. Their activities have, however, been severely being promising for progress in the future curtailed by the financial stress.

Provincial Progress—There was passed in Bengal in 1919 a Village Self-Government Act previous years Lependiture on water-supply embodying the policy of constituting Union Boards at the earliest possible date for groups.

In the Central Progress, the year 1920 with the provinces The constitution of the control Progress, the year 1920 with the control Progress, the year 1920 with the control Progress, the year 1920 with the control Progress, the year 1920 with the control Progress, the year 1920 with the control Progress of the Provinces of the Provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the province of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the Punjab municipal administration continued to show improvement, the general attitude of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of the provinces of India of

In the Central Provinces, the year 1920 witnumber of these boards continues to increase, rising from 1,500 to more than 2,000 In 1930-31 undoubtedly growing interest in public matter than a second continued reduction of official members and they are in their infancy as yet, many of them show a remarkable aptitude for managing their development of local self-government, leading to an increased sense of public duty and responsible to an increased sense of public duty and responsible to an increased sense of public duty and responsible to an increased sense of public duty and responsible to an increased sense of public duty and responsible to an increased sense of public duty and responsible to an increased sense of public duty and responsible to an increased sense of public duty and responsible to an increased sense of public duty and responsible to the sense passed into law in the sense p In Bombay the development of village self-sibility. Another very important measure government is also proceeding, as the result regulating municipalities was passed into law in of an Act for constituting, or increasing the power 1922. Its chief features are the extension of village committees which was passed in the Municipal franchise, the reduction of official the Municipal franchise, the extension of the and nominated members, the extension of the powers of Municipal Committees and the relaxation of official control.

In the North-West Frontier Province, the institution of local self-government is somewhat of a foreign growth Cortain of the municipal committees are still lax in the discharge of their responsibilities, and meetings are reported to be infrequent, but the attendance of non-official members is gradually increasing. Concerning Municipal administration the Local Government reports that the members continue to take a year great interest in their duties and to take a very great interest in their duties and that their attitude towards the responsibility is imposed upon them is on the whole satisfactory Communal feeling shows itself in certain localities; but is in many instances off-set by the public spirit and initiative of individual membors and there are considerable symptoms of advance in independence of action and in the smooth working of the Committees. An important extension of the elective principle smooth has recently been made and it is hoped that this is proving a success

# Calcutta Improvement Trust.

tuted by Government in January, 1912, with a the Local Government. and expansion of Calcutta by opening up con-gested areas, laying out or altering streets, providing open spaces for purposes of venti-lation or recreation, demolishing or constructing buildings and re-housing the poorer and working classes displaced by the execution of improvement schemes.

The origin of the Calcutta Improvement Trust must, as in the case of the corresponding Bombay body, upon which the Calcutta Trust was to a large extent modelled, be looked for in a medical enquiry which was instituted into the sanitary condition of the town in 1896, owing to the outbreak of plague. It was estimated that the Trust might in the ensuing 30 years have to provide for the housing of 225,000 persons The population of Calcutta proper, which includes all the most crowded areas, was 649,995 in 1891, and increased to 801,251, or by 25 per cent, by 1901. The corresponding figure according to the 1921 Census was 993,508 and this had increased by 1931 to 1,196,784.

The problem of expansion was difficult, because of the peculiar situation of Calcutta, which is shut in on one side by the Hooghly and on the other by the Salt Lakes.

Preliminary investigations continued for soveral years, so that it was only in 1910 that legislation was eventually introduced in the provincial legislature and the Trust instituted The Bill provided for a large expenditure on improvement schemes and the provision of open spaces and for special local taxation to this end. It also provided for the appointment of a wholetime chairman of the Board of Trustees and the membership of the Trust was fixed at eleven.

The following constituted the Board of Trustees at 31st March 1934 .—Mr. J. A. L. Swan, 0.8 I, 0 I E, I O S., Chairman, Mr Mukherjea, Bar-at-Law, Chief Executive Officer, Calcutta Corporation (ex-office), Mr. S C Ghosh, elected by the Corporation of Calcutta under Section 7 (1) (a) of the Calcutta Improvement Act, 1911; Mr. Prabhudayal Himatsinghia, Alected by the elected Councillars Corporation elected by the elected Councillors, Corporation of Calcutta, under Section 7 (1) (b) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. Charu Chandra Biswas, O.L.E., elected by Councillors other than elected Councillors of the Corporation of Calcutta, under Section 7 (1) (c) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. W. H. Thompson, elected by the Bengal Chamber of Commerce; Sir Harl Sanker Paul, Kt., elected by the Bengal National Chamber of Commerce; by opening up new roads and wilester it. Mr. Unsud Dowie, Sir Badridas Goenia, existing ones This Scheme is known 2- Kt., OIE, Rai Bahadur Dr. Haridhan Dutt, Maydapati, Scheme No XXVII.

The Calcutta Improvement Trust was insti- Mr. A. J. Thompson, A.R. I B A, appointed by

During the 22 years that it has now been at work, the Trust have decided, and partly or entirely carried through many improvement schemes for opening up congested areas, taying out or widening streets and providing of ca spaces.

In Central Calcutta many highly insanitary bustees have been done away with and several roads of an improved type laid out, the most important of which is the Chittaranjan Avenue, 100 ft. wide, which at present extends from Beadon Street to Chowringhee, Shambazar It is intended ultimately to extend it up to the Chitpur Bridge But at present there is present there is between Chitpur direct connexion Bridge and the Barrackpore Trunk Road, as Lockgate Road has been severed by the sidings of the Eastern Bengal Railway In the circumstances the Board considered that traffic would be better served by postponing the extension to Chitpur Bridge and constructing a road to Shambazar which is the terminus of the Barrackpore Trunk Road and of the Dum-Dum-Jessore Road. A scheme known as Scheme No XXXVII has been sanctioned by Government under Section 48 of the Calcutta Improvement Act which provides inter alia for the extension of Chittaranjan Avenue up to Raja Rajballab Street and for the construction of a new 84 feet new road connecting it with Cornwallis Street The Section of Chittaranjan Avenue near the Chowringhee end is well placed for commerce and trade and is likely before long to gain increased importance by being linked up with Dalhousle Square on the Nest by means of a new road 84 feet wide which the Trust propose to construct between Mission Row and Mangoe Lane A further extension of this road from Chittaranjan Avenue to Wellington Street on the east was sanctioned by Goreinment after the close of the year.

In the north of the City, two large and thirteen small parks have been constructed in different quarters Of the two large parks one is named Deshabandhu Park and the other Cossipore Chitpore open space measuring 53 bighas and 156 bighas respective The Cossipore-Chitpore Park has a small artificial lake and the layout of the area sur-rounding the lake has been completed. Lour football grounds have been provided for schooland clubs of North Calcutta. Some tends courts are also being made. The De halanda. Park has also been provided with play-grounds Several wide roads have been driven through this highly congested ares. The approaches to the city have also been adequately widen 1.

Some progress has also been made with that highly congested area to the west of the C.7

The new 84 ft. road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Chat has been completed so that there is now a continuous main traine route with the same width of rowlway as Chittaranjan Avenue, extending right arrows Calcutta from Strand Road on the wait to Upper Circular Road on the east. The widenin, of Maniktala Road between Upper Circular Poul and Maniktala Bridge which has been completed forms a further ertengion of this main road yay which will eventually continue at a width of 100 ft to the extreme eastern limit of Mankinla important scheme which is now complete is the new 60 ft road between Darpanarayan Tagore Street and Pathuriaghat Street which, with its side roads, opens up a very congested area and form a portion of a main projected north and gouth road through Bara Bazar from Harrison Road to a new main east-and-west diagonal road through Ahirstolian,

The passing of the Calcutta Improvement (Amendment) Act, 1951, which empowers the Board of Trustee, in certain cases to levy ortherment iers on properties which abut on to a new or widened street instead of acquiring the proporties has an ide it financially possible for the Trust to proceed with some portion of its original programme for the improvement of line likeway. The Kalakar Street scheme in line light which forms the southern section of the alore all road is one of the scheme's to thica the new Actio to be applied. It has been problished under Section 43 of the Calcutta I notovement Act, and sanctioned by Govern mert. Another echeme which has received the P. ortion of Government and to which the "Act is to be applied is the Adening abortlength of Darmahatta Street and it a be intereding to see how the methods are ment provided for in the Act will work out in practice.

The Substrian Artic to the south and southepst of Calentta required greater attention and extent ive development schemes were under-Several open spaces and squares have been made in various parts. Insultury tanks requiring approximately 2 erores cate, of earth have been filled up. Hussa Road which forms the southern approach to the town has been widened to 150 it. for a length of one mile and 100 ft. for a length of another mile. It now to the first a tengen of another finite. It now present of the area a 100 ft. wide East to West road, trom Ballygunge Railway Station to Chetla Bridge, and for recreation an artificial lake of 167 higher with adequate grounds has been considered. completed.

Another small lake has also been completed and a road is being constructed round it to link up with the road surrounding the main lake The road round the main lake has been surfaced with asphalt and lighted with electricity and is much frequented in the evenings. Sites for club hours adjoining the main lake have been allotted to several clubs. Excavation has been continued in a new section of the larc which is Corporation in 1911 had a total area of about to be attractively laid out with an island to 96 acres. In 1912, Mr. Bompan, the first which the public will have access by means of Chairm in of the Trust, pointed out that in the a footbridge. The Calcutta Tramways Co, I ratio, viz., about 9 per cent. of its public open

Ltd., have now extended tram tracks from Rusra Road along New Sewer Road to Ballygunge Station.

The Board of Trustees have framed a reheme for the extension southwards of Lansdownc Road which has received Government sanction; acquirition of land was completed and all the new and widened roads have been completed and opened to traffic; surplus lands are now ready for sale; the Board in pursuance of its policy of carrying out schemes policy of centre of centre of the town and in the simultaneously, so as to have an supply of suburban sites for in tho Buburbs adequate supply of suburban sites for residential buildings to meet the needs of those displaced from overcrowded areas in the centre the town has also framed a scheme known as Scheme No. XXXIII for the improvement of another rection of the undeveloped area hetween Russa Itoad and the Lake District This too has received sanction of Government and land acquisition has made good progress and engineering works have been talen in hand

To the cast of the city, several new roads have been constructed in Scheme No. VIIIO (New Ballygunge Road—Park Circus to Old Ballygunge Road). They are now open to traffic, and the majority of them are surfaced with asphalt. Arrangements have been made for lighting the roads with electricity. The development of Calcutta cast of Lower Circular Road. Rold, between Park Circus and Middle Road, Itole, between Fark Circus and Middle Rodd, Entally, is a pressing need, but the work can only proceed slowly in small sections. The Trust in the execution of this scheme cannot ignore the busice dwellers, who are pushed further east, as the development from busice conditions to blocks of ma-onry buildings proceeds. The utilisation of highly-improved lands for busice purposes is not an economic proposition, but at the same time, it is necessary to provide the essentials of sanitation for the working clas\*08

The linking up of Amherel Street with Loudon Street by a broad thoroughfare has commenced in two small rections. The Trust has construct-(d a large park near Park Circus Scheme No VIII, known as Eastern Park, measuring 65 highes, with a large playing field for football and tennir. The Gorachand Road Scheme provides for the completion of the northern portion of this park and the com-mencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally. As the reheme involved the demolition of a large number of bustees, invisigations were made to ascertain the heat means of reducing the displaced busted population as a result of which a Rehousing believe at Christopher Road which will cost the ascertain the Trust Rs. 2,70,000 for land acquisition and Rs. 1,07,000 for engineering works has been framed and has received the sanction of Government. Acquisition of land was completed and the raising of land is in hand.

The public squares yested in the Calcutta

spaces which measured about 1,250 acres (in- has proved a striking success. There are 132 cluding the Maidan, the Horticultural and the suites for letting and the rent received from Zoological Gardens) to its total acreage, Calcutta these suites during the year 1933-34, amounted was almost on a par at that time with London to Rs 32,666. possessing 6,675 acres of public parks or gardens while its percentage exceeded that of New York, Berlin and Birmingham. But about 1,000 acres of Calcutta's 1,250 was accounted for in the Maidan and new open spaces in other parts of Calcutta were an urgent need. Up to date the Trust had added (including the new lake at Dhakuria)-another 250 acres

Lastly for the housing of the displaced population the Trust has undertaken on a large

lettable rooms were bullt in Wards Institution Street for persons of the poorer classes Street for persons of the poorer classes It was found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect basts of their own, the class of atructures they were accustomed to live in. These chawls were then filled with persons of limited means, e.g., school masters, poor students, clerks and persons of the artisan class. As many as 1,200 people are housed in these chawls, these buildings, including land, cost Rs 2,44,368 and are let at very low rents—ground floor rooms on Rs 6 per mensem and top floor rooms on lss 6 per mensem, each room measuring 12'×12' with a 4 ft. verandah in front opening on to a

tenants of all classes 18 out of the remaining 35 semi-detached houses This change of policy,

Paikpara Re-housing Scheme —This scheme has an area of 36 bighas well laid out in 96 building sites. A new re-housing cheme has been undertaken by the Board, as already stated, at Christopher Road for the bustee population to be displaced by the execution of scheme No XXXV (Lastern Park to Gorachand Road). A special feature of the new scheme is that the land is to be developed as a model bustee for displaced bustee dwellers. Special facilities In the early stages three blocks of three land in various improved areas for rejustate-storled tenement buildings containing 252 ment purposes

Bridges -Some progress has been made in replacing the old bridges of Calcutta, which is hemmed in by canals and railway lines inadequately bridged, by modern and up-to-date inadequately bridged, by modern and up-to-date bridges to suit the growing traffic requirements. The opportunity is being taken of widening the Maniktala, Narikeldanga and Bellaghata Bridge approaches on both sides—on the west (in the case of Maniktala and Narkeldanga Bridges) right up to Circular Road. The new bridges of the city will in their traffic capacity compare favourably with those of London. The new Bridges at Maniktala, Bellaghata and at Bhambazar have roadways of 37 feet, with two Shambazar have rordways of 37 feet, with two with a 4 ft. verandah in front opening on to a central passage 7 ft. wide. The total collection of rent during the year 1983-34 including previous year arrear was Rs. 14,243.

As these charts falled to attract the people. As these chawls failed to attract the people for whom they were meant, the Board next tried an experiment in providing sites for bustees. Two sites with a lettable area of 16 bighas were acquired within the area of 16 bighas were acquired within the area of 16 widths) and 2 footpaths of 6 feet cach, and these are also to be the probable within of the Tollygunge and Hastings Bridger which need re-building. The Chelses, Hammericans they were out of the way and were set and 2 feet, respectively. The readways and the set of the Tollygunge and Hastings Bridger which need re-building. The Chelses, Hammericans are successful. Kerbala Tank Inne Re-housing Scheme—
In this scheme 4 detached and 35 zemi-detached houses were built. The detached houses were built. The detached houses were roll as this scheme never became popular widths and Westminster Bridge with an all-over width of the class of tenants for whom they were originally intended. Owing to this unpopularity the Roard further decided to throw open to tenants of all classes 18 out of the remaining

sonants of an classes as out of the remaining 35 semi-detached houses. This change of policy, 1932-14 amounted to Rs of 31 lakin which however, produced no effect on the letting.

Owing to want of suitable tenants the entire dwellings in Kerbala Tank Re-housing scheme had been sold by private sale shortly after the last March 1927.

Boy Street Re-housing Scheme—Seven other Trust 1 as tornowed 1's \_4-5,000.

Boy Street Re-housing Scheme—Seven other Capital traciples (training from the sale of buildings containing one-roomed, two-roomed and three-roomed suites have been constituted to re-house Anglo-Indians displaced (after providing for the service of interpretable for the service for the service of interpretable for the service for the service of interpretable for the service for the service for the service for the service for the service for the

# The Indian Ports.

The administration of the affairs of the are subject in a greater degree than those of larger ports (Catcutta, Bombay, Madras, Karacht, municipal bodies to the control of Government. Rangoon and Chillagong) is vested by law in bodies specially constituted for the purpose. Stitute the majority and the Board for Rangoon They have wide powers, but their proceedings consists mainly of European members.

Figures for 1932-33 relating to income, expenditure and capital debt of the six principal ports managed by Trusts (Aden is excluded from the tables) as obtainable from the Department of Commercial Intelligence and Statistics (India) are shown in the following table --

						Іпсоте,	Expenditure.	Capital Debt,	
						Rs.	Rs.	Rs.	
Calcutta	••		••	••		2,46,36,681	2,53,65,301	24,81,38,001

<sup>\*</sup> Includes the first instalment of Rs. 15 lakhs, the record instalment of Rs. 5 lakhs, the third instalment of Rs. 2 lakhs, and the fourth instalment of Rs. 3 lakhs, of a loan of Rs. 50 lakhs from Government.

### CALCUTTA.

The Commissioners for the Port of Calcutta are as follows -

Mr T. H. Elderton, Chairman.

Mr W. A. Burns, Deputy Chairman and Traffic Manager.

Elected by the Bengal Chamber of Commerce—
Mr. G. R. Campbell, Mr A. L. B. Tucker,
Mr M A. Hughes, Mr K. J Nicolson;
Mr S D Gladstone; Mr. J. Reld Kay.

Elected by the Calculta Trades' Association.
Mr C H. Pratt

Elected by the Bengal National Chamber of Commerce.—Rai Bahadur A. C. Banerice, CIE.; Mr. Nalium Ranjan Sarkar.

Elected by the Indian Chamber of Commerce. Mr. D. P. Khaitan.

Elected by the Muslim Chamber of Commerce Mr. Kassim A. Mohammad.

Elected by the Municipal Corporation of Calcutta.—Mr. Rajendra Narayan Banerjee.

Nominated by Government — Captain L W. R T. Turbett, OBF., R.IN.; Mr. A. V. Venables, 1 C, V.D., HI.C.E., M.IE. (Ind.), Rai Bahadur B. R Singh; Mr. V. E D. Jarrad, Mr. W. J. Ward.

The principal officers of the Trust are .-Secretary -Mr. C W T Hook.

Traffic Manager,-Mr. W. A. Burns.

Chref Accountant -Mr J. Dand, OA.

Chief Engineer.-Mr. J. R. Rowley, A.K O., M. Inst. CE

Deputy Conservator .- Commander C. V. L.

Norcosk, o B E , R N. Medical Officer .- Lt -Col. F. J. Anderson,

M C., P.R.O S , I M S. Consulting Engineer and London Agent.—

Mr. J. Angus, M. Inst. C E.

The capital debt of the port at the end of the year was 114, 5,21,28,667. The balance (including investments at cost) at the credit of the different sinking funds on 31st March 1931, was Rs. 2,21,82,458-7-3

The total sea-horne trade of Rangoon during

the year 1933-31 was 6,066,333 tons of which 1,100,397 tons were imports, 3,913,952 tone exports and 21,981 tons transhipment. The total number of vessels (excluding Government vessels) entering the port was 1,652 with a total net registered tonnage of 4,215,003 showing an increase in the number of and of 115,734 tons in the net tonnage as compared with the provious year.

## CHITTAGONG.

Chittagong in Eastern Bengal, lying on the right bank of the river Karnafull at a distance of 12 miles from the sea, was already an important Port in the sixteenth century, when the Portuguese gave it the name of Porto Grande.

The construction of the Assam-Bengal Railway has facilitated the transport of trade with Assam and Eastern Bengal for which the Port of Chittagong is the natural outlet.

Ohittagong, Bengal, Lat 22° 21'N, Long. 91° 50'E, 1938 Pop 53,156.

Imports —Salt, mineral oil, machinery, tea estate stores, rice, coal and railway material.

Exports --- Wax, jute, tea, hides, cotton, capas, rice, paddy, eggs, poultry and livestock.

Accommodation —Vessels of any sire can proceed 9 miles up the Karnafuli to Chittagong

at H.W O.S draught of 23 ft to 26 ft.

There are 5 berths for ocean-going vessels at the Assam-Bengal Railway jettics, also two sets of fixed moorings

Jettles are 2,100 ft long, provided with hydraulic cranes 17 to lift 35 cwts and 4 to lift 10 tons, ample shed accommodation, and jettles are in direct rail communication with the Assam-Bengal Railway system, cargo in bulk being dealt with direct into wagons. Depth at jettles about 32 feet.

Broumons.—Fresh provisions, good drinking water and coal obtainable.

There are three river bars affecting navigation controlled by large suction dredger.

Night, pilotago is in force except during the S.W monsoon.

Charges —Port dues 4 annas 6 ples, per reg. n Hospital dues 2 ples per reg ton Harbour ton Hospital dues 2 ples per reg ton Harbour Master's fee Rs. 32 Mooring and unmooring in fixed berths Rs. 32, swinging berths Rs. 16 Borth alongside jettles Rs. 10, per day, night work and holldays extra.

# VIZAGAPATAM HARBOUR PROJECT.

The question of creating a harbour at Vizaga-patam to supply an outlet for a large area of fertile country adjacent to the east coast of India, hitherto undeveloped, with considerable mineral resources and without suitable access to the outside world, was first formulated by the Bengal-Nagpur Railway Company That the Bengal-Nagpur Railway Company That the creation of such a port would have beneficial influence on this area was unquestioned, for it is immed out that Vizagapatam, I ing as it does reinted out that Vizagapatam, lying as it does gating 140,000 sq ft of covered area, in three in front of the only practicable gap in the barrier the Cathe Lastern Ghats, is formed by nature to the Central Provinces, from which a considerable amount of trade has taken this route in the past, even with the imperfect communications, hitherto available A necessary complement of the scheme was the construction of the proposed railway from Parvatipuram to Mossing Storage accommodation aggrees in the case at the control of the scheme was the construction of the proposed railway from Parvatipuram to Mossing Storage accommodation aggrees in the case at the control of the control of the control of the scheme was the construction of the proposed railway from Parvatipuram to Mossing Storage accommodation aggrees at the covered area, in three single storied sheds has been provided in the vicinity of the quay, equipped with full railway and road facilities. Two additional Sheds with lighter Borths are in course of construction for export cargo. Special facilities have been provided for the storage and shipment of manof the proposed railway from Parvatipuram to Raipur now completed which, with the existing constline of the Bengal-Nagpur Railway would make a large and rich area tributary to the proposed port, and obviate the long and expensive circuit by Calcutta A link has also been supplied in the most direct route to Rangoon from Europe by way of Bombay, while, from an imperial point of view, the provision of a fortified port on the long and almost unprotected stretch or coast between Colombo and Calcutta is held to be a consideration of great importance The lofty projecting headland of the Dolphin's Nose would offer facilities for this purpose

The Government of India with the approval of the Secretary of State and the Legislative of the Secretary of State and the Legislative Assembly, sanctioned the construction of the new railway line from Ralpur to Parvatipuram. The work is completed and the line opened to traffic. They also decided to develop the port of Vizagapatam under their direct control and the port has accordingly have deleved to be a many Port. been declared to be a major Port.

The work is being carried out by a staff of Engineers under direct charge of an Engineerin-Chief who comes under the administrative charge of an Administrative Officer for the development scheme, a post which is held ex-officio by the Agent of the B N Railwar. An Advisory Committee consisting of the above mentioned officers and representatives of the Local Government, the Vizagapatam Port Administration and the commercial interests concerned, has also been constituted to advise

according to the demand of trade. The first stage has been completed sufficiently to enable the Harbour to be opened. Ships started using the Harbour in October 1933 and the official opening by His Excellency the Viceroy took place on 19th December 1933.

The present provision includes a 1,000 ft diameter Turning Bisin together with access to the three quay B rths and an Entrance Chan-

nel dredged out to afford a passage 300 ft wide at the bottom Vessels of 26 ft draft and 530 ft length are admitted at present and deep-ening is in progress to allow vessels of 28'-6" maximum draft to enter in the near future

A quay wall comprising three 500 ft Bertils has been completed and equipped with 3-ton electric cranes Storage accommodation aggrethe Basin and additional facilities provided for dealing with lightered cargo

A large area of land has been reclaimed in the course of the dredging operations and it has been laid out in blocks served by broad roadways. Plots are available for office sites and for industrial concerns Water supply and electric lighting have been arranged for.

The floating equipment of the Harbour comprises three tugs of 1,500, 600 and 450 H P. respectively.

A graving dock with an entrance 60 ft, 6 in broad has been provided; but though adapted for future extension and for use by resells larger than the dredging craft which now use it. length of ships is at present restricted to 200 feet

The port is at present capable of dealing with lifts of 15 tons.

The sea entrance channel is protected on the South side by the provision of a sand trap and protecting Breakwater

At present ships enter and leave the Marbour during day time only and pllotage is compulsory.

The future administration of the Port is still under consideration by the Government of India. At present, the Agent of the Bengal-Nagpur Ballway holds Administrative charge of the He is represented at Vizacapatum 17 a Port concerned, has also been constituted to advise Deputy Conservator, which office is le'd exint the development of the Harbour.

The scheme for the construction and development of the Harbour will be carried out in stages. Port Railways are being worked by the B. N. The first 'Rallway Company.

# Education.

Indian education is unintelligible except through its history. Seen that, it affords the spectacle of a growth which, while to one it will appear as a blund of her of on an initial error easily avoided, to can her it stands out as a symbol of tinerity and honest and avour on the part of a farme had rice of rule me whore aim has been to take a people allen in sentiments and prejudices into the Channels of thought and attitude by takentated to fit them for the needs of modern life and sestern ide its There is to-da, an subject in the place area of administrative activity in India which presents greater complexities and difference, of opinion than education Government, local bodies and private p reon of learning have in the put desofed their limited funds to meeting the demands of thorn who peroclyed the benefits of education, rather than to cultivating a desire for e-lucation where it did not exist. The result is that the atracture has become top-heavy. The lower classes are largely illiterate, while the middle classes who constitute the bulk of the urielly-pentra are in point of numbers at least educated to a pitch equal to that of countrie whose economic conditions are more highly developed As might be expected from this abnormal distribution of education, the form which it line eventually assumed contains corresponding defects. In reconductry, however, streamous efforts have been made to remedy the endelees-Primary Education acts have been propolar the several provinces in favour of the expansion of primary education among the mare On the other hand, the numbers of student- in collegeend universities have prown apice, and, e.g., call, during the period of fin milal depression, the volume of middle class uncaptorment has reached alarming proportions A movement has therefore set in with the object of the imming the drift of unsaltable students to universities by means of a ridical reconstruction of the school system of education

The Introduction of Western Learning —In the early days of its dominion in India, the East India Company had little inclination for the dombtful experiment of introducing western learning into India Warren Hustings, the dominion igure of the time was a genuine admirer of the laws and literature of the last. His policy was to enable the ancient hearning to revive and flourish under the protection of a stable government, and to interiere an little as possible with the habits and customs of the people Even the Aci of 1813 which set apart a lake of rupees for the introduction and promotion of a knowledge of the sciences was interpreted as a scheme for the oncouragement of Sanshrit and Arable. In the following year the Court of Directors instructed the Governor-General to leave the Hindus "to the practice of usage, long established among them, of giving instruction in their own homes, and to encourage them in the exercuse and cultivation of their talents by the stimulus of honorary marks of distinction and in some cases by grants of preuniary assistance"

It was from sources other than Government that the desire for western knowledge arose in India. In 1810, David Hare, an English watchmaker in Calcutta, joined hands with the enlightened Brahmin, Mohan Boy, to institute the Hindu College for the promotion of western secular learning. The new institution

was districted both by Christian missionaries and by ortholox Hindus, but its influence grow apace. I like a reast later, the Committee of Public Instruction in Bengal reported that a tracte for Luglish had been widely disseminated and that in ke now at achoes, conducted by young me neared in the Hindu College, very reliaging up in every direction. In Bombas, the Fighla tone Institution was founded in menors of the grant micromodule in menors of the grant micromodule in menors of the grant micromodule in the inclusion was founded in menors of the grant micromodule who left India in 1827. A still more remarkable invocation was made in 1835 by the establishment of the Calcuta Medical College, whose object to a to the Calcuta Medical College, whose object to a to the Calcuta Medical College, whose object to a to the fallow of the undertaking to be invitable; for, under the Hindu castors the light to a track a creoful idea to to ach the dead This of such a secondaried to Madewatan Gupta the, with a few conservation partial, because the discrete factor of a human body. From that these one and indians of the light of castor has devote late and, of me light in all the branches.

Another implies to the introduction of vestern harming was the desortion of Christian misolonaries. The humanitarian spirit, which had been Half. In Fractal by Wesley, Buthe and Willie free, induced laction also in India. Care f. Marketon and Ward opened the first mi tonary Coll year between the first mi tonary Coll year between the Interest the whole to not of mi tonary, policy in India by his insistence on to which with them on preceding, and by the foundation of the chool and College in Calcula In Madria, the missiscent had been still carlier in the filled, for a carlie as in 1767 a small your opened in 1837. In Bombay, the Wilson School (afterwards College) was founded in

Intel William Bertine's relinate of 1833 (bacel upon Nacculary's famous minute) marks of somewhat turk acceptance by (covernment of the new policy Government than determined, while observing a neutrality in religious matter, while observing a neutrality in religious matter, while observing a neutrality in religious matter, while observing a neutrality in religious matter, while observing a neutrality in religious matter, while observing a neutrality in religious matter, while observing should be the neutrality of the resident of the religious of the success of the neutrality should be discouraged Other changes powerfully contributed to the success of the new system. The freedom of the press was established in 1835, English was substituted for Persian as the language of the Courts in 1837, and in 1841 Sir Henry Hardinge ordained that preference in Government appointments should be given to those who had received a western education. In the following decade the new learning took firm root in India and, though the Muhammsdans still held aloof; the demand for English schools substripped the means of Government for providing them. Fortunately there has been of late a marked appreciation among Muslim leaders of the need of improving the instructional leaves of their co-religionists; and in many of the previnces of India a great impulse towards educational advance among the Muhammadan community is now noticeable.

## GROWTH AND ORGANISATION OF ENGLISH EDUCATION.

An epoch in Indian educational history is narked by Sir Charles Wood's despatch in 1854 Perhaps its most notable feature was the emphasis which it laid on the importance of primary education. The old idea that the education in parted to the higher classes of society would little down to have classes. society would filter down to the lower classes "13 distance. The new policy was boldly
"to combat the ignorance of the people which
"a) he considered the greatest curse of the
"untry" For this purpose Departments ntry" For this purpose Departments Public Instructions were created on lines which do not differ very materially from the 1 partments of the present day. The despatch broke away from the practice followed ence 1875 whereby most of the available public mads had been expended upon a few Government schools and colleges, and instituted a pulcy of grants-in-aid to private institutions. is ich a system as this, placed in all its degrees under efficient inspection, beginning from the himblest elementary institution and ending with the university test of a liberal education would impart life and energy to education in India, and lead to a gradual but steady ex-trusion of its benefits to all classes of people" Another feature of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Midras and Bombay three years later. The affiliating type of university then became the affiliating type of university then became the pivot of the Indian education system. It has a nicebedly been of value in several ways It enabled Government to select recruits for its service on an impartial basis it did much, through the agency of its Colleges to develop backward places; it accelerated the conversion of Indians to a zeal for western education, and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scholars, but corporations of administrators they ars, but corporations of administrators did not deal directly with the training of men, but with the examination of candidates, they were not concerned with learning, except in so far as learning can be tested by examination. The colleges were fettered by examination requirements and by uniform courses, their leachers were denied that freedom which teachers should enjoy and their students were encouraged not to value training for its own eake but as a means for obtaining marketable In certain Important respects qualifications the recommendations in the despatch were not fellowed The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts, they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions, they recommended the establishment of university chairs for advanced study. They were inverse of the dangers of a too literary course of instruction; it ey hoped that the system of education mould rouse the people of India to develop the vast resources of their country and gradually, but extainly, confer upon the advantages which accommons the Instruction: they upper that the system of openistics, not with the server's first be education mould course the people of India to placed under some I the action of their country would be representative of it is united its and them advantages which accompany the import validity of the explicit strate, in the side of the departments. They are made of the explicit strates, in the side of the country of the co encour-sement of the grant-in-all system was improve and to grant healt.

advocated to an oven greater extent by the Education Commission of 1882, which favoured the policy of withdrawing higher education from the policy of withdrawing higher education from the control of Government within certain limits and of stimulating private effort. In theory the decision was correct, but in practice it was irretrievably wrong. In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be maintained on the low fees which the Indian be maintained on the low fees which the Indian parent could be expected to pay. And, in the course of time, an unworkable system of dual control grew up, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eye on the private institutions and to be content with the development of a few favoured Government institutions. There can be little wonder that, under such a system of neglect and short-sightedness, evils crept in which are now being re-moved gradually by the establishment of independent Boards of Intermediate and Secondary Education charged with the administration of the high school and intermediate stage of education.

The Reforms of 1902-4
In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904 The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universities over the school, and colleges The Chancellors of the Universities were empowered to nominate 80 per cent. of were empowered to nominate 80 per cent. of the ordinary members of the Senates and to approve the election of the remainder . the Goapprove the election of the remainder the Government retained the power of cancelling any appointment, and all university resolutions and proposals for the affiliation or diraffiliation of colleges were to be subject to Government sanction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, the inspection of schools being ordinarily conducted by the officers of the Department of Public by the officers of the Department of Public Instruction. Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government succion, for these objects but their scope was in practice limited to port-graduate work and research. The territorial limits of each university were defined, so that universities were precluded from any council on with institutions him outside those bourdaries. Neither the Commission nor it? Governments the council of ment discussed the fundamental problems of university organization, but dealt only with the immediate difficulties of the Indian system. They did not inquire wheth the amil after system could be replaced by any other reces of organization, nor whether all store's rules be

## Preent Developments.

Indian Educational Policy—the Indian Universities Act of 1901 we followed by two important resolutions of the Government Indian of India on Indian Discussion of Police—one in 1904 and the other in 1913. The recolution of 1904 was comprehen by he chareter and reviewed the state of education in all its department. The following pressure from it summarlers the intentiors of terretament.--"The progre-sive accolution of primary, recondary and collective education upon private enterprise and the continuous with drawal of florenment from compatition therewith was recommended by the I ducational Commission in 1883 and the advice has prince dis been acted upon. But while recepting this policy, the Covernment of India et the same ting recognise the catema importance of the princi-ple that in each branch of education Genera-ment anough maintain a limited number of institutions, both as models for print senterprint to follow and in order to uphold shigh standard of education. In withdriving from direct management it is further exential that Government should retain a peneral control, hy means of efficient larpection, over all public educational in tilutions." The comprehensive instructions contained in this resolution sere followed in the next fes. resolution trie inforced in the next its, province of lere. Imperial grants, malphy for University, technical and chinentary education. The solution of 1913 advocated, arter also, the blishment of additional but smaller University of the teaching type, it restlicted the acy of reliance on private effort in recordary, accident, it recommended on increase in the salarles of teachers and an imprevenent in the amounts of grants in aid, and it in relyd on proper attention being prid to the formation of character in the education given to religious of all grades. It further discussed the desirability of imparting manual in-tructions and instruction in hygiene; the meeting for medical inspection, the provision of incilities for research, the need for the staffing of the girls'

Government of India Recolutions

Department of Education, Health and Lands of the Government of India—In 1910 a Department of Education was established in the Government of India with an office of its own and a Member to represent it in the Executive Council. The first Member was Sir Harcourt Butler. In 1923, the activities of the Department were widened, in the interests of economy, by absorption in it of the Department of Revenue and Agriculture. The enlarged Department has been designated the Department of Education, Health and Lands, Kunwar Tagdish Prasad and Mr. G. S. Bajpai are the present Member and Secretary, respectively. The Department possesses an educational adviser styled Educational Commissioner.

schools by women trachers and the expansion

of facilities for the training of teachers. The

policy outlined in 1913 materially accelerated

progress in the provinces, but the educational developments foreshadowed were in many

carcs delayed owing to the effects of the Great

War

The pre-ent I ducational Commissioner is Sirticized Ander on, has east, east, and a though the attention to the experience that has persent on a veral Constal tone and Committee on else show he fields

Calcutta University Commission.—The Report of the University Commission was published in Junual 1617 and in the following January the Government of India leved a the Original rum existent the reals features of the Pepert and the recommendations of the Commissioners.

The Government of India drew special attention to the following points in the Peppert -

(i) High rehools full to give that breadth of training which the developments of the country and new averus of employment demand

(h) The intermediate section of University of section should be recognized as part of school education and should be regarated from the University organisation.

(as) The defects of the present system of all listed colleges may be militated by the establishment of a strong central teaching hole, the incorporation of unlary unlars (as occasion arises), a modification of the educinistrative machinery which will admit of full representation of for a interest of and supersisten of different classes of institutions by several appropriately constituted boiles.

The Commission have detailed successions for the reorand atton of the Calcutta University, for the control of recondary and intermediate education in Bengal and for the establishment of a unitary tracking University in Daces. There in source concerned only Bengal but it was generally recorded that some of the criticism made by the Commissioners admit of a wider application. Committees were consequently appointed by the Universities of Maders, Bombry, Patna and the Punjab to consider the findings of the Commission. In the United Provinces two committees were appointed, one to proper a schume for a unitary teaching University at Luch not, the second to emisider measure for the reorganisation of the Allahabad University and the creation of a Board to control recondary and intermediate cheation.

In Exngal the first outcome of the Commission's Report was the passing of the Dacca University /ct in the Imperial Legislative Council in March 1920. It is remarkable that the University which appears to have been least affected by the recommendations of the Calcutta University Commission has been the Calcutta University itself. In spite of many discussions and draft proposals by both the University and the Government the organisation of the Calcutta University has remained unaffected.

The Reforms Act.—The Reforms Act of 1919 has altered the conditions of educational administration in India Reducation is now a 'transferred' subject in the Governors' province and is, in each such Province, under the charge of a Blinister. There are, however, some exceptions to this new order of things.

The education of Europeans is a 'Provincial' reserved' subject, . c., it is not within the charge of the Minister of Education; and to the Government of India are still reserved matters relating to Universities like Aligarh, Benares and Delhi and all such new universities as may be declared by the Governor-General in Council to be central subjects The Government of India are olso in charge of the Chiefs' Colleges and of all institutions maintained by the Governor-General in Council for the benefit of members of His Majesty's Forces or of other public servants or of the children of such members or servants.

Hartog Committee on Education —The most notable event in recent years has been the appointment of the Auxiliary Committee of the Indian Statutory Commission, under the Chairmanship of Sir Philip Hartog, to report on the growth of education in India. The report of the Committee, which was published in 1929, constitutes a valuable document on the present state of education in India.

Lindsay Commission —Another Commission, which deserves mention, was appointed in 1929 by the International Missionary Council to investigate the various problems connected with the higher education provided by the various Missionary bodies working in India It was presided over by Dr A D. Lindsay, Master of Balliol College, Oxford. The Commission visited India in 1930 31 and its report was published in 1931.

The Punjab University Enquiry Committee was appointed in 1932 and submitted its report in the following year The committee reported that "the University is overburdened by the immense area of its jurisdiction and by the ever-increasing number of its students many of whom are ill-fitted for such education. The main recommendation was that the school system should be re-adjusted so that many pupils would be diverted at an earlier age to vocational and other forms of education.

Administration.—The transfer of Indian education to the charge of a Minister responsible to the Provincial Legislative Council, of which he himself is an elected member, has brought the subject directly under popular control in the ten major provinces Generally speaking, education, excluding European education, is not, however, under the charge of a single Minister in all the provinces of India

provinces of their responsibilities in conn clin with intermediate education and with entrance to a University course of studies Institutions under private management are controlled by Government and by local bodies by "recornition" and by the payment of grants-in-aid, with the assistance of the inspecting staffs employed by Government and in rarer cases by local bodies.

Educational Services.—Until recently, the educational organisation in India consisted mainly of three services—(i) the Indian Liucational Service, (12) the Provincial Educational Service, and (12) the Subordinate Educational Service. The Indian Educational Service came into existence as a result of the recommendations made by the Public Services Commission of 1886, and in 1896 the Superior Educational Service in India was constituted with two divisions—the Indian Educational Service staffed by persons recruited in England and the Provincial Educational Service staffed by persons recruited in India These two divisions persons recruited in India These two divisions were originally considered to be collateral and equal in status, though the pay of the European recruit was higher by approximately 50 per cent. than the pay of the Indian recruit. Gradually, however, status came to be considered identical with pay and the Provincial Educational Service came to be regarded of inferior status to the Indian Educational Service. Later as a result of the recommendations of the Islandton Commission of 1912-10, the Indian Educational Service was formed into a superior educational zervice and all posts were thrown open to Indian recruitment The Provincial Educational Service was simultaneously reorganized and a number of poets, generally with their Indian incumbents, were transferred to the sup nor service This reorganisation resulted in a considerable Indianisation of the superior educational services in India It was then Indianisation down that the proportion of Indians in this service should on an average be 50 per cent of the total strength, excluding the posts in Burra

In 1924, all recruitment to the Indian Lineational Service was stopped as a result of the recommendations of the Royal Commission on the superior services in India The Commission recommended that "for the purposes of local Governments no farthy r re crultine at about be made to the all-India services which op rate in transferred fields. The personnel required for these branches of administration should in future be recruited by local Governments. Certain forms of education have been transferred to the technical departments concerned and come within the purview of the Minister in charge of those departments. In each province, the Director of Public Instruction is the administrative head of the Department of Education and acts as adviser to the Education Minister. He controls the inspecting staff and the teaching staff of Government institutions and is generally responsible to the local government for the administration of education. The authority of Government, in controlling the system of public instruction, is in part—chared with and in part delegated to Universities as regards elementary and vernation local bodies as regards elementary and vernation of secondary, or of secondary and intermediate, of it contains the provinces which the prevails which the province which the province in transferred fields. The prevail of administration of these branches of administration of the province, the Director of Public Instruction for the administrative the discretion of Europeans that "it will rest caim to the unit of the unit of the unit of the unit of the color of the control of Europeans that "it will rest caim to the result of the unit of the color of the

1932-83

and class II which may be said to represent the members, the history of the service which has old Provincial Educational Service. had a brief but fine record will be brought to an and Subordinate The present organisation of education The existing Provincial Educational Services in the provinces have been affected, more in some provinces that others, by the changes which have taken place since 1919. Communal interests have influenced

recruitment, and in some places they have influenced promotions also, in a direction which

has not always tended towards service content-ment. But these results are the natural conse-

quences of the devolution of control of education

in the provinces is largely the work of members of this service; while in the sphere of higher education, it has trained many men of more

than ordinary attainments
The new Provincial Educational Services,
which function under provincial control as the

superior educational services, have been consti-

tuted in most provinces. These schemes vary from province to province, but it may be gene-rally remarked that, while the rates of pay are not rally remarked that, while the rates of pay are not and power of recruitment to provincial and uniform, they consist of two main classes—class local authorities and will for some time continue I into which the existing Indian Educational to affect the efficiency of the Education Depart-Services have been merged for the time being, ments in the provinces.

Statistical Progress.

The two tables given below afford useful comparisons with previous years and serve to illustrate the growth and expansion of education in India.

NB—This table does not include areas for which schemes of compulsory primary education are under consideration or have been sanctioned but not yet introduced. It includes, on the other hand, areas in which such schemes have been partially introduced.

The poverty of local bodies is usually the cause | the Punjab the' school leaving examination is assigned to their diffidence to introduce compul- conducted by a Board But the main difficulty sory education to any appreciable extent.

Secondary and High School Education,-Some attempts have been made to give a greater blas towards a more practical form The Comof instruction in these schools mission of 1882 suggested that there should be two sides in secondary schools, "one leading to the entrance examination of the universities, the other of a more practical character, intended to fit youths for commercial pursuits " non-literary other years what were called B and later, classes were started in some schools in Bengal but, as they did not lead to a university course. they have not been successful. In more recent years the Government of India have advocated the institution of a school final examination in which the more practical subjects may be included. Efforts have also been made to improve the conduct of the matriculation and to emphasise the importance of oral tests and of school records. In Madras, this examination which was placed under the direction of a Board representative of the University and of proved somewhat cumbrous Gövernment, and certain modifications were made In the United Provinces and the Central Provinces the control of secondary education has been made over to special Boards created for this purpose Similarly, the Administration of Delhi has ostablished a Board of Secondary Education for that province and the Government of India have established a Board of Intermediate and High School Education, with headquarters at Ajmer,

for Raiputana, Central India and Gwalior. In

conducted by a Board But the main difficulty has not yet been touched. The University which recognises the schools has no money wherewith to improve them and the Department of Public Instruction, which allots the Government grants, has no responsibility for the recognition of schools and no connexion whatever with the private unaided schools. This dual authority and this division of responsibility have had unhappy effects. The standard of the schools also is very low so that the matriculates are often unable to benefit by the college courses. In some provinces an endeavour has been made to raise the standard of the schools by withdrawing from the University the Intermediate classes and by placing them in a number of the better schools in the State.

As has already been stated, there is now a widespread desire to cure these culs by a radical reconstruction of the school system of education. The main defect of the present system is that all pupils, even those in the primary stages, are educated on the assumption that they will ultimately proceed to a university. In consequence, very many pupils drift on to a university and prolong unduly their purely literary studies. In order to counteract this tendency, the school system should be divided into separate stages, each with a clearly defined objective released from the transmels of a university. On the successful completion of each stage, pupils should be encouraged either to join the humbler occupation of life or to proceed to separate vocational institutions, which should be provided in more ample measure than at present,

Reconstruction along these general lines was first proposed by the Punjab University Committee, and was subsequently endorsed by the Universities Conference which met in Delhi in 1934 Its details have been worked out in a citer detail in an important Resolution of the Government of the United Provinces later in the same year

There are schools for Europeans and Anglo-Indians which are placed under the control of special inspectors for European Schools The education of the domiciled community has proven to be a perplexing problem, and in 1912 a conference was summoned at Simla to consider the matter. The difficulty is that European Schools are very remote from the general system of education in India But efforts are being made to bring these schools more into line with the ordinary schools, and Indian Universities generally are affording special facilities for Anglo-Indian boys who may proceed for higher education in Indian colleges.

Recently, as a result of the recommendations made by the Liwin Sub-Committee of the Third Indian Round Table Conference, Provincial Boards for Anglo-Indian and European Education have been constituted in almost all Provinces, and an Inter-Provincial Board has all of the Conference of the Government of India 1935 under the auspices of the Government of India 1935.

Medium of instruction in public schools -The position of English as a foreign language and as a medium of instruction in public schools was discussed by a representative confrence which met at Simla in 1917 under the Chairmanship of Sir Sankaran Nair, the then Liducation Member. Although it was generally conceded that the teaching of school subjects through a medium which was imperfectly understood led to cramming and memorising of text-books, the use of English medium was defended by some on the ground that it improved the knowledge of English. The result of the conference was therefore inconclusive Some local authorities have since then approved of schemes providing for the recognition of local vernaculars as media of instruction and examination in certain subjects There seems to be no doubt that the use of the vernacular as the medium of instruction and examination is gradually increasing all over India

The main difficulty, however, is that school classes have often to be split up at considerable expense into a number of language sections. The problem needs further investigation, especially in the direction of evolving a common script for at least a single province, if not for the whole of India In this concession, Mr A Latifi, 10s, has done good pioneer work in respect to the Romanised Urdu Script

Boy Scout Movement—A happy development in recent years has been the spread of the boy scout movement which has had an excellent effect in all provinces in creating amongst boys an active sense of good discipline

It is gratifying that intimate contact is being establishment between the Boy Scout Movement and the Jumor Red Cross and St John's Ambulance Associations, as well as with riovenents for social uplift and improvement of village conditions

Girl Guide Movement —This movement is making steady progress There is, however, a lack of those competent and willing to rive instruction.

Medical Inspection -- Arrangements have been made for medical inspection of scholars but progress has been hampered by the shortage of funds and the continued indifference of parents In the United Provinces, schools are now inspected by officers of the Public Health In Madras, the scheme of medical Department inspection of schools has been made compulsory in all Government institutions, and it has been made a condition of recognition that all secondary schools should introduce the scheme. measure of economy, however, the payment of grants for medical inspection has been suspended, but the question of reorganising the system on an improved basis is under consideration Owing to lack of funds, it has not been rossible for the Bombay Government to set up an agency to direct and organise medical inspection work in schools on a satisfactory In Burms, the grants-in-aid for medical inspection have been temporarily suspended on account of retrenchment, but most medical officers have continued the inspection of pupils without remuneration In Bihar & Orissa, certain posts of school medical officers were abolished in 1932, for the same reason, but it has since been found possible to revive them. There is, however, still need for adequate facilities for the treatment of children suffering from diseases In a few towns in the Punjah, satisfactory arrangement exist not only for medical inspertion but also for effective treatment, and in extension of this useful scheme is under contemplation

The activities of Junior Red Cross and St John Ambulance Societies have been particularly beneficial in improving the health of school children and in interesting them in the health of others.

Intermediate Colleges.—One important part of the Calcutta University Commission's recommendations has been accepted by the Government of the United Provinces and the Government of India and incorporated in the Acts establishing the Lucknow and Dacca and reconstituting that of Allahabad, namely, the separation of the intermediate classes from the sphere of university work and of the two top classes of night schools from the rest of the school classes. The separated classes have been combined together and the control over them has been transferred from the University to a Board of Secondary and Intermediate Lduration. Such a Board was constituted for the Dacca University area by a notification of the Government of Bengri in 1921.

The United Provinces Board was constituted by an Act pissed in the same year. The Aligarh Muslim University has, ho ever, reverted to the old system under which the Intermediate classes form part of the University, and the system Intermediate College has been abolished. In Almer-Verwara, the Intermediate classes are under a sprate it and which constructed in Rajpation, Cantral India and divale have a superiority for the Punjab, but they are as it can establish in the Punjab, but they are as it is to the Punjab University.

Professional and Technical Education—A research institute in acriculture versitated by Lord Currer of Pusa in Binar, which has done velocity work. Conferences have been held at Pusa, Simh and Poons, with the object of providing a suitable training in agriculture A Royal Commission on Agriculture has a manifest their negative at their recommendations on Imperial Council of Agricultural Receases he had not reported by the Sydratical manifest of the covernment of India at their headquarters. Among commercial colleges, the most important is the Sydratical material of Commercial palitue or now boards, and others by private holdes. The most important are the Victorial India, for the Indian College Technical Institute in Bombas, The Lordence in Council of Science at Bancalore, the product of general Institute in Bombas, The Lordence in Indian to the control of the Indian for the training of codes for the control of the Indian for the training of codes for the Commercial institute in Bombas, The Lordence in Indian the control of the Indian for the training of codes for the control of the Indian for the training of codes to place these incidences are successful to a unit of Indian and Poorse, Which everys that at Roothee, Is an Indian, Ran, con, Patha and Binary and Sundary, Ran, con, Patha and Binary, Ran, con, Patha and Binary and Sundary, Ran, con, Patha and Binary, Ran, con, Patha and

<sup>\*</sup> Situated in an Indian State outside British India

B In constituent coll a s.

<sup>†</sup>An "Affiliating" University is a University which recognises external college of the instruction in its courses of studies, a "Teaching" University is one in which some exhibit teaching is controlled and conducted by teachers appointed by the University; a "University is one, usually localised in a single centre, in which the whole of the tracks of conducted by teachers appointed by and under the control of the University.

<sup>\*</sup> Faculties —A = Aris; Ag = Agriculture, Com = Commerce, Ed = Fine. sen (Tend) ).

Eng = Engineering; T = Torestry, FA = Fine Arte L = Lan; M = Melicre, U.= Gr / Learning, Sc = Science: Tech = Technology; Th = Theology;

<sup>§</sup> The term "lifthated Colleges" here includes all colleges ullhated to, as which is all or recognised by a University of any type.

Inter-University Board—The idea put forward by the Indian Universities Conference in May 1924 for the constitution of a central agency in India took practical shape and an Inter-University Board came into being during 1925 Twelve out of fifteen universities joined the Board Its functions are

i

- (a) to act as an inter-university organisation and a bureau of information,
  - (b) to facilitate the exchange of professors.
- (c) to serve as an authorised channel of communication and facilitate the co-ordination of university work,
- (d) to assist Indian universities in obtaining recognition for their degrees, diplomas and examinations in other countries;
- (e) to appoint or recommend, where necessary, a common representative or representatives of Indua at Imperial or International conferences on nigher education;
- (f) to act as an appointments bureau for Indian universities;
- (9) to fulfil such other duties as may be assigned to it from time to time by the Indian Universities.

Each member University has to make a fixed annual contribution towards the expanses of the Board

The meetings of the Board are held yearly. The Board consists of one representative of each of the member Universities and one representative of the Government of India.

The Board has not yet had much influence on University policy in India but it has done a con-iderable amount of useful work in collecting information and in stimulating thought regirding current University problems.

The Third Quinquennial Conference of Irdian Universities was held in 1934 under the auspl > of the Board It was opened by H F the Viceroy and passed several important resolutions.

Education of Indian Women and Girls—There is still a leaway to be made good. Al' the influences which operate against the spread of education amongst the boys are reinforced in the case of women by the purdah system and the custom of early marriage.

Arts colleges, medical colleges, and the life admit students of both sexes, and a few girls attend them. The Lady Hardinge Medical College for Women at Delhi gives a full medical course for medical students. The Shreemati Nathibai Damodher Thackersey Indian Women's University was started some ten years ago by Professor Karve It is a private institution and is doing good pioneer work.

The All-India Women's Conference on Educational Reform, which holds its meetings annually and has constituent conferences established all over the country, is also doing much useful work. An All-India Women's Education Fund Association has also been established in connection with this Conference This association appointed in 1930 a special committee to enquire into the feasibility of establishing a central Teachers' Training College of a special sed Home Science character. This committee reported at the end of the year recommending the establishment of such a college "on absolutely new lines which would synthesise the work of existing provincial colleges by psychological research" and the Governing Body of the Association supported the proposal at the Annual General Meeting of the Association which has adopted it A college, called the Lady Irwin College, has since been established in New Delhi

The comparative statement below shows the state of women's education during 1932-77 --

### BOY SCOUTS.

The Boy Scouts movement, imitated in England by Lord Baden Powell (the Chief Scout), has spread widely in India, both among Europeans and Indians The Viceroy is Chief Scout of India and the heads of Provinces are Chief Scouts in their own areas. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation obedience and self-reliance—inculcating louisity and thoughtfulness for others—and teaching them services useful to the public and handicrafts useful to themselves.

It is confidently anticipated that in the Boy Scout Movement will be found a natural means of bridging the gulf between the different races resting in India. The movement is non-official, non-military, non-political and non-sectarian its attitude towards religion is to encourage every boy to follow the faith he professes I very boy admitted as a Scout makes a three-fold promise to do his best. (1) to be loyal to God, King and country, (2) to help others at all times, and (3) to obey the Scout law. The law referred to lays down—

- 1 That a Scout's honour is to be trusted;
- 2 That he is loyal to God, King and country, his parents, teachers, employers, his comrades, his country and those under him,
  - 3 That he is to be useful and to help others,
- 4. That he is a friend to all and a brother to every other scout, no matter to what social class the other belongs,
  - 5 That he is courteous;
  - 6. That he is a friend to animals,
  - 7. That he obeys orders,

- 8 That he smiles and whistles under all difficulties.
  - 9. That he is thrifty,
- 10. That he is clean in thought, word, and deed

INDIA SUNDAY SCHOOL UNION—The India Sunday School Union is an interdenominational organisation having for its object the strengthening of religious and moral education in the Christian schools throughout the Indian Limpire. It has six full time workers, both Indian and European. It was founded in Aliniabad in 1876. Its General Committee is composed of representatives from the National Christian Council, from the Provincial Representative Councils and from local Sunday School Unions which are Auxiliaries of the ISSU.

The headquarters of the Union are at Cooncor on the Nilgiri Hills, where besides the office and well-stocked book shop, there is the St Andrew Teacher Training Institution In this institution Summer Schools are held where a short but intensive course of study and training is offered to leaders in religious education from all parts of India

Besides the activities at headquarters, the Union offers courses of lectures in any part of the country, delivered by members of its staff A Quarterly Journal is published in English, and Lesson Notes for teachers in English and several vernaculars. Text-books on subjects connected with the work of Bible teaching are also published in various languages, and Scripture examinations are organised.

The officers of the Union are as follows -

President The Hon Sir David Devadass,

Treasurers W H Warren, Madras, and J. G. Fritschi, Coonoor; General Secretary E A. Annett, Coonoor. Assistant Secretary Rev N Franklin, Madras The most recent statistics show that there are in India 18,322 Sunday Schools with 80,428 teachers, and 707,204 scholars

POONA SLVA SADAN SOCIETY.—This Institution was started in 1909 by the late Mrs. Ramabai Ranade, Mr. G. K. Devadhar, and a few other luics and gentiumen in Poona and registered in 1917. It is now voiling independently though for a few years in the beginning it was conducted as a branch of the Bombay Sova Sadan. Its main object is to make women self-rehant and to train them for mis-

sionary work undertaking educational and medical activities for their sisters and brethren, the former in backward areas and working on a non-sectarian basis Nominal fees are now being charged for instruction in all classes. There are eight different departments sub-divided into 60 classes Arrangements are made for training Nurses and Midwives and women Sub-Assistant Surgeons at the Sassoon Hospitals, Poona, and a hostel is maintained for the former and another for those attending the Sub-Assistant Surgeon's Classes There is a Public Health School affliated to the Lady Chelmsford League for Maternity and Child Welfare, Delhi, with a hostel The number in these three hostels is now about 85 Besides, there is a full-fledged Training College, named after Bal Mothbal Wadia with about 65 students excluding those in the V F Class for being trained as Mistresses for Vernacular schools This College is probably the only college in India maintained by a non-official, non-Christian missionary body teaching the full course. The results of the Certificate Maminations held in the year 1931-32 under the authority of the local Government Training College for Women were as follows I year senior B and II when 27 What total a temperature of certificates. II year 7 The total number of certificates The Practising granted so far is 350 now Schools for little girls attached to the Training College has now eleven classes with 290 students reading up to the Marathi VI Standard, English being taught in the V and VI standard classes Primary Classes for grown up women teaching up to the Marathi V Standard are attended by about 100 women It is here that poor women are recruited for their training as a teacher, nurse, midwife, or doctor Special classes for teaching English, Flist Aid, Home Nursing were attended by about 90 students, the Music Classes by 80 students, and the Work-room Classes for teaching Sewing, Embroidery, Hosiery, Composing, Weaving, etc., by 130 Women Thus, the total number of pupils is about 990 to-day There are two branches of the Society started at Stana and Baramati which are named after Lady Vithaldas Thakersey. It is here that poor women are recruited for are named after Lady Vithaldas Thakersey, the wife of the greatest helper of the Scenety so far, the late Sir Vithaldas D Thakersey Besides there are branches started at Bombay (Dadar and Girgaum), Sholapur, Ahmedragar, Alibag, Nasik, Nagpur, and Gwalior for either Thus the total number of women and girls including about 150 duplications on the rolls at these various Centres of the Society is over There are in Poons five hostels, three of which are located at the headquarters and the other two in the Sommar Peth for Nurses, etc, under training at the Sassoon Hospital The number of resident students is above 200 m these five hostels One of the three hostels at the headquarters is intended for women of depressed classes. The number of these women at present is 8 In connection with the medical branch a Committee has been formed in England, which will enable the Society to send fully qualified Nurses there to undergo further training. Two fully qualified Nurses have so far been sent by the Society for their post graduate course in Public Health Nursing at Bedford College for women,

London, with the partial help of a scholurship, of the League of Red Cross Society, Paris There is an active Infant Welfare centre and ante-natal clinics with the average daily attendance of 50 excluding expectant mothers The Society has extended its medical accivities in Bombay by undertaking, with the help of two charitable Trusts in Bombay, to work out the scheme of Maternity, Infant Welfare, Child Welfare and General Nursing for the women and children of the Bhatia Community under the supervision of Mr G K. Devadhar, the organiser of the society. This scheme has a Maternity Hospital and Nursing Home, and three Infant Welfare centres. REGREATION CLUB INSTITUTE—This Institu-tion was started in 1912-13 by the members of the Ismaily Dharmic (religious) Library in Bombay Its central office is in Bombay with branches at Ahmedabad, Ahmedaagar, Karachi, Hyderabad (Sindh), Poona, Warangal, The aims and objects of the society are to elevate and improve the social, ezonomic and spiritual condition of the depressed and poor classes of people and with that! intent to found primary schools, associations and such departments and to take all constructive means to achieve the above objects The Institute has 2 orphanages with 150 inmates, industrial works, domestic industries, sales depots, clubs, libraries, etc It also issues two Anglo-Vernacular papers, The Isnaily (a weekly) and The Nizari (a monthly). Hon. Secretary, Gulamhusein Virjee.

ROYAL SOCIETY OF ARTS, INDIAN SECTION.-This Society was founded in London in 1754. Its recently published history by Sir Henry Trueman Wood, late Secretary of the Society, gives the following account of the Indian Section In 1857 a proposition was made by Mr Hyde Clarke, who wrote to the Council suggesting that "a special section be formed for India, another for Australia, one for English America and so on" It was suggested that the Indian Section should meet once a fortnight for the reading of papers Nothing came of the suggestion until ten years later when Mr Hyde Clarke returned to England, and in 1868 he renewed his proposal, but only proposing the formation of a Committee which should organise conferences on Indian subjects This time the suggestion was taken up more warmly Mr Hyde Clarke himself was placed on the Council, and the Indian Conferences, which soon developed into the Indian Section, were started "The Indian Section thus established became a most important department of the Society It has had great results in India by spreading information as to the directions which the development of Indian manufactures and Indian products could most usefully take, and in England by giving similar information as to the industrial resources and progress of India itself. The Section has received great help from the Indian press and it has in return been of service to the Indian press in supplying useful information to it, It has been of great value to the Society itself as the means by which many members have been added to its list, so that in fact, thanks to a very large extent to the work of the Indian Section and of the allied section for the Dominions and Colonies, a large proportion of the present number of members come from the dependencies of the Empire abroad "Secretary of the Society G K Menzies, C B E, M A, Secretary of the Indian and Dominions and Colonies Sections · W Perry, BA, 108 (retired) 18, John Street, Adelphi, London, W. C 2

Hon Secretary Mrs C Peacock, 35, York Shryants of India Society — The Servants of India Society, founded by the late Hon Mr G K Gokhale in 1905, is a body of men who are pledged to devote all their lives to the service of the country on such allowances as the Society may be able to give Its objects are to train national missionaries for the service of India and to promote, by all constitutional means the interests of the Indian people—Its present strength is 21 Ordinary members, 8 members under training, 1 permanent assistant, The Society has its and 1 probationer headquarters in Poona with branches at

WOULT'S INDICY ASSOCIATION (PANTHEON GAPDINS, EGNORI, MADRAS)—This Association was started in Madras, in July 1917, with aims of service

Aims and Objects —To present to women their responsibilities as daughters of India To secure for every girl and boy the right of Education through schemes of Compulsory Primary Education, including the teaching of religion. To secure the abolition of child-marriage and to raise the Ago of Consent for married girls to sixteen. To secure for women the vote for Municipal and Legi-lative Councils on the same terms as it is or may be granted to men. To secure adequate representation of women on Municipalities, Taluk and Local

Boards, Legislative Councils and Assemblies To secure for women the right to vote and to be elected for the Council of State To establish equality of rights and opportunities between men and women. To help women to realise that the future of India hes largely in their hands; for as wives and mothers they have the task of training, guiding and forming the character of the future rulers of India To band women to groups for the purpose of self-development and education and for the definite service of others

It has 48 branches and over 4,000 members Each branch is autonomous and works according to the needs of the locality.

The Association grants scholarships to girls, interests women in maternity and child-welfare work in the uplift of the depressed class and in other social and welfare activities for the general betterment of Indian society, has worked successfully for securing Franchise for women in India, (see pages 93 and 94 of the Simon Report, Vol II) and compulsory education for girls and also actually helped in the passage of Child-Marriage Restraint Act in the Assembly and the Acts for the Suppres-sion of Traffic in women and children and the abolition of the Devadasi system, in the local legislature Holds regular meetings of women to educate them as to their duties as wives, mothers and citizens, publishes a monthly magazine titled Stri-Dharma, now edited by Mrs Meheroo H Dadabhoy for carrying out of the above objects. The Association is an All-India body Its largest branch being in Bombay and its branches are spread throughout India and flourishing as far as Kashmırand Lashkar It is found that women everywhere welcome the opportunities given for their self-development and self-expression. The Association is affiliated to ovpression all the important progressive women associations in India and throughout the world was the initiator of the All-India Women's Conference and the First All-Asian Women's Conference at Lahore The Madras Seva Sadan and the Madras Children's Aid Society, the Montessori School owe their origin to the efforts of this Association The Association have now opened a Rescue Home to facilitate the working of the Rescue Section of the Immoral Traffic Act, which have been enforced by Government The Home was opened on 21st March 1934 by Lady Beatric Stanley

Young Men's Christian Association,—
This Association, which was founded by the late Sir George Williams in 1844, is now a world-wide movement, well established in almost every country in both the hemispheres. The aim of the Association is, through its religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men and boys.

The Young Men's Christian Association, though relatively new to India; is spreading rapidly The 'local' Associations are autonomous and governed by local Boards of Directors These Associations in Convention

elect a National Council which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and Ceylon,

There are now over 60 Associations affiliated to the National Council and many other village Associations with many thousands of members of all races and creeds The following Associations own one or more buildings which serve as the local headquarters —Allahabad; Alleppey, Pangalore, Bombay, Calcutta, Calcut, Combatore; Colombo, Delhi, Galle, Hvderabad, Jubbulpore; Kandy, Karachi, Kunnamkulam, Kottavam Lahore, Madras, Madura, Nagpur, Naini Tal, Ootacamund, Poona, Rangoon; Rasalpur, Secunderabad, Simla, Trivandrum, Wellington The others use rented or rent-free buildings

The work of the National Council and of the local Association is carried on by numerous voluntary workers and Committees, assisted by 85 specialty trained full-time Secretaries A feature of the Y M C A in India is the international character of its Secretariat It is made up of 7 Americans, 2 Canadians, 5 Englishmen, 3 Scotchmen, 1 Swiss, 1 Swedish, 4 Anglo-Indians, 1 Danc, 2 Australians, 1 Burman and 58 Indians and Ceylonese

The classes of people reached by the Indian Y M C A and the lines of service it attempts to do for them may be stated as follows.—

Generally —1 Literature —Publication of original works and reprints Six series

"Heritage of India," "Religious Quest of India," "Religious Life of India," "Builders of Modern India," "Education of India," "Heritage of Ceylon," "Women of India"

A monthly magazine, the Young Men of India, Burma and Ceylon is issued at Rs 2-8-0 per annum, including postage.

The work of the National Council (excluding that of the 50 local Y M C As) called for a Budget of Rs 1,25,662 in 1983 Of this sum Rs 28,790 had to be raised from the public in India

The Headquarters of the National Council is 5, Russell Street, Calcutta The officers are ---

Patron —His Excellency the Earl of Willingdon, GMSI, GMIE, GCMG, GBE, Viceroy and Governor-General of India

President of the National Council —The Most Rev Dr Foss Westcott, Metropolitan of India

General Secretary.—B L Rallia Ram, B So, B T

The Bombay Association now possesses four well-equipped buildings — Wodehouse Road, Lamington Road, Rebsch Street, and Reynolds Road The President is The Hon Mr Justice K Barlee and the General Secretary is Mr H W Bryant, MBE In connection with each branch there is a well managed hostel providing accommodation for over 200 young men These branches are managed by a Committee working under the Board of Directors Each Branch organisation directs many and varied activities designed to meet the physical, spiritual, social, and mental needs of their members A Welfare Service agency for labourers started in 1924 is now conducting eight centres, serving mill workers, Municipal menial employees, Port Trust and Railway employees A programme of education, lectures, physical culture, play and general uplift, profitably fills up the lessure time of the workers and their families The Association is responsible for the direction of three public playgrounds in the city, which are financed by the Municipality.

YOUNG WOVEN'S CHRISTIAN ASSOCIATION OF INDIA, BURMA AND CEYLON —This Association founded in the year 1875 was organised nationally in 1896

The aim of the Assiciation is to unite women and girls of India, Burma and Ceylon in fellowship and mutual service for their spiritual, intellectual, social and physical development. The Association exists for Indian, Anglo-Indian and European girls and women There are

The Bombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special sub-committee, organized public meetings for women on subjects affecting their interests about which legislation was being or had been recently enacted

A valuable part of the work of the Association was the establishment of Women's Employment Bureau in Calcutta and Bombay. They were remarkably successful The Bombay Bureau was eventually merged into the employment Bureau established by the Women's Council, the Calcutta Bureau has censed to exist

As a means of promoting friendships between women from various parts of the United King-com, with widely differing tastes and interests and spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform.

This Association is Foderated to the "Federation of University Women in India," and thus forms one of the Units of the Indian Fedeı atıon

#### Federation of University Women in India

This is an organization conceived to unite for service and fellowship all University Women of whatever race or University who may be resident in India Units representing British Universities, Indian Universities and American Universities severally have existed since 1913 (Britain) and 1020 (India and America) respectively

These Units are now affiliated to the F U W I and are as such affiliated to the International Federation of University Women which embraces 31 countries of the world and has its headquarters at Crosby Hall, Cheyne Walk, London.

This International Federation is then a kind of League of Nations in which the University is the and the opportunities it affords for better understanding for world-friendship, and world service, will easily be imagined.

As forming one Family, its Members help the common cause of women; they help one another by inspiration and interchange of service they help the country for which as individual Units they stand, inasmuch as that country is swept forthwith by reason of its place within the International Federation alone, into world statistics Hon General Secretary and the dignity of recognition by the League of Nations at Geneva

The benefit to Members individually also is The Club Houses of the Federation all over the world are open to them are all Scholarships and Fellowships offered by the Federation

During 1929 these last have included. Scholarships from Great Britain and America which gave free tuition, board and residence at certain Colleges to students for a degree residential scholarships at Crosby Hall, valuable Fellowships and Prizes offered chiefly for Medical or Scientific research by Australia and America

A special scholarship was offered in 1929 by Barnard College, Columbia University to under-graduates from India

Membership is open to Women transcriptions any University through the Unit representing that University Colonial Graduates are at the British Unit The present attached to the British Unit. The Bombay Presidency Women Graduates' Union offers membership to a graduate of any recog-nised University in the whole world.

Subscriptions -- Each Unit pays capitation at 8 as per head

The Federation has Branches in Bombay, Lahore, Madras, Kodarkanal Each Branch has its local Committee But as a whole the Federation is under a Central Committee with Headquarters as Calcutta for the years 1928 and Headquarters are at Bombay from 1980

## The Church.

March 1, 1930, a self-governing branch of the Anglican Communion Until that date it had been an integral part of the Church of England and its bishops were considered to be suffragans of the Archdiocese of Canterbury This legal bond was severed by the passing of the Indian Church Act and Measure in 1927, and from the date of severance appointed under the Act, the Church of India, Burma and Ceylon has been free to manage its own affairs, although, as it states in the Preamble to its Constitution, it has no intention or desire "to renounce its obligations to the rest of the Holy Catholic Church and its fundamental principles, but on the contrary acknowledges that if it should abandon those fundamental principles it would break spiritual continuity with its past and destroy its spiritual identity

Like all the other branches of the Anglican communion the Church of India, Burma and (evlon is Episcopal It is composed of fourteen sees, Calcutta, Madras, Bombay, Colombo, Lahore, Rangoon, Travancore and Cochin, Chota Nagpur, Lucknow, Tinnevelly and Madura, Nagpur, Dornakal, Assam and Nasik Of these the first to be created was Calcutta. Of these the first to be erected was Calcutta in 1814 and the last was Nasik in 1930 Vacancies on the Episcopal Bench are filled by election, each diocese electing at own bishop The Bishops rule the Church and to them is reserved the final word in all matters of faith and order. but they rule in conjunction with a system of Councils which has been framed so as to give the greatest possible amount of representation to the whole body of the faithful foundation of the system is the Parochial Council of which the Parish Priest is the convenor and chairman Every baptised, and confirmed member of the Church residing in the parochial area who contributes, in some recognised way, to the financial support of the Church, is a member of the Parochial Council of the ecclesiastical area in which he resides and is called a Qualified Elector

Above the Parochial Councils come the Diocesan Councils All Priests holding the Bishop's license are members of the Diocesan Council and to it are sent Lay Representatives elected by the Qualified Electors of every Parochial Council The Diocesan Councils manage all purely domestic matters and have the right of petitioning the General Council about any subject of wider importance which may interest them. They elect a given number of priests and laymen to be their representatives on the General Council General Councils are held not less than every three years and usually at Calcutta They consist of three "Houses," Bishops, Priests and Laymen Every Diocesan Bishop has a place in the House of Bishops The other two Houses are formed by the elected

The Church of England in India became on | but any House has the right to meet alone if it desires to do so in order to formulate its policy or classify its opinions A "Canon" of the Church is a Resolution passed with additional precautions ensuring due considera-tion by all three Houses In all questions touching faith or Order the position of the episcopate as the divinely authorised teacher of the Church is most carefully safeguarded and the Bishops alone, without the concurrence of the other Houses, can issue Determinations about both subjects But no Determination of the Bishops can be the subject of disciplinary action until it has become a Canon.

> Every priest before being licensed to work the Church of India, Burma and Ceylon takes an oath of obedience to the Canons

> The Ecclesiastical Establishment—At the time of the passing of the Indian Church Act and Measure the Government of India acknowledged that it was responsible for providing for the spiritual needs of the Soldiers and Civilians whom it brought out to India responsibilities it discharges by maintaining an establishment of chaplains and churches for the four principal denominations of Christians-Anglican, Presbyterian, Roman Catholic and the Free Churches The Chaplains of the two first named groups are appointed by the Secretary of State for India, the Anglicans on the recommendation of a Selection Committee of which the Archbishop of Canterbury is the Chairman They are paid by Government and pensioned after a covenanted period of service Although they form a definite Department of Government they are not subject to the orders of anyone save their own ecclesiastical superiors The Presbyterian Chaplains are sometimes appointed to stations and sometimes to regiments The Anglican chaplains are always chaplains of stations and have the pastoral care of all the inhabitants of the station who do not deliberately withdraw themselves from their ministrations, but when troops are included in the number of their parishioners Government orders that they shall have the first claim on their services. The chaplains first claim on their services. The chaplains and their congregations are members of the Church of India, Burma and Ceylon during their residence in India and have full rights of representation in the Councils of the Church Their right to the use in worship of the Prayer Book of the Church of England is not only acknowledged in the Constitution of the Church but is also safeguarded by clauses in the Indian Church Act

Government gives to the Metropolitan an annual block grant which is divided between the seven bishops whom Government recognises as having jurisdiction over the Establishment Chaplains and their congregations Thes? representatives of the Diocesan Councils The are the Bishops of Calcutta, Madras, Bombay three Houses usually sit and vote together, Lahore, Lucknow, Rangoon and Nagpur

statesman and the publicist are chiefly inter-more acutely than Europeans the scandal ested in the excellent moral effect produced and disadvantage of the divisions of Christenby these institutions amongst the educated dom. These divisions are due to a very much by these institutions amongst the educated classes, and the higher educational ideals maintained by their staffs. The principal University colleges under Protestant auspices to the hiadras Christian College, the Duffi when they became crystallised, India had no College, Calcutta, the Wilson College, Bombay, the Forman College, Lahore, and three women's colleges—the Women's Christian College at Madras, the Isabella Thoburn College at Lucknow, and the Women's Christian Medical College at Lucknow, and the Women's Christian Medical College at Lucknow, and the Women's Christian Medical College or Shya and Vishnu. Standing before a backnumber of educational institutions, ranging ground of paganism they are conscious of a real at Ludhiana The Roman Catholics have a larged promation of educational institutions, ranging from small village schools to great colleges preparing students for University degrees But the proportion of Christian students in the proportion of Christian students in those of the Protestant bodies. The proportion of literates amongst native Roman Catholics is probably lower than amongst the Protestant converts, but compared with ligher The Roman Catholics have some formation of the South India it has already resulted in the hops and 41,000 girls are receiving instruction in middle and high schools they have a communion individually with all, or In middle and high schools they have are in communion individually with all, or 143,000 boys and 73,000 girls and in University colleges about 5,000 students of both reserves. These figures, however, include a large Protestant Union The S I.U O is at present proportion of Europeans and Ministers with the Anglesia Characteristics. proportion of Europeans and Eurusians, who negotiating with the Anglican Church If are an almost negligible quantity in Protestant as seems probable the negotiations are sucmission schools and colleges. mission schools and colleges.

spread results, is the philanthropic work of the Roman Catholics, on the basis of the last. Christian missions Before the great famine Lambeth encyclical This will mean that a of 1878, missionanes confined themselves real National, Indian Church will come into More recent, but producing even more wider almost exclusively to evangelistic and edu cational activity. The famine threw crowds cational activity. The famine threw crowds of destitute people and orphan children upon hands their schools became an urgent necessity schools became an urgent necessity But Episcopate, it will be linked up with the Catholic one kind of organisation or method. A great tradition of the Anglican Church. one kind of organisation or method. A great stimulus was also given to medical missions. Hospitals and dispensaries have sprung up in all parts of the mission field, and leper asylums are almost a monopoly of Christian missionary effort In 1911 the total number of medical missionaries working under Protestant socie-ties in India was 118 men and 217 women, the majority of the former being also ordained ministers of religion. There are 184 industrial institutions in which 59 different arts and crafts are taught, ranging from agriculture to type-writing. In this department the Salvation Army hold a prominent place, and the confidence of Government in their methods has been shown by their being officially entrusted with the difficult work of winning over certain criminal tribes to a life of industry The indirect effect of all this philanthropic activity under missionary auspices has been most marked. It has awakened the social conscience of the non-Christian public, and such movements as "The Servants of India" and the mission to the Depressed Classes are merely the outward and visible sign of adult communicants.

a great stirring of the philanthropic spirit far Society for the propagation of the Gospel beyond the sphere of Christian missionary Statistics of the work of this Society are not operations

cessful the result will amount to a union of all the Christian bodies in South India, except being. Although it will be tolerant of almost every expression of Evangelical opinion and eople and orphan children upon will retain the freedom of development characteristic of Protestantism, by its acceptance of the Catholic creeds and the Historic

# Anglican Missionary Societies.

The Unurch Missionary Society carries on work in India in seven different missions—the United Provinces, South India, Travancore and Cochin, Bengal, Western India, Punjab and Sind and the Central Provinces and Rajputana. The names are in order of seniority. Work was begun in what are now called the United Provinces in 1818, in Bombay in 1820, in the Punjab in 1851, and in the Central Provinces in 1854 The Society has always kept Evangelistic work well to the fore, but it also has important medical missions, especially on the N-W. Frontier, and many schools of the Primary, Middle and High standards The Church of England Zenana Missionary Society is an offshoot of the C. M S controlling the work of 162 missionary The number of ordained European ladies missionaries of the C M S. in India and Ceylon is 160, European laymen 30 and European laywomen 258 The Society claims a Christian community of 2,21,359 of whom 63,655 are

easily ascertained, as much of it is done through Reunion —For very many years Indian Diocesan institutions, which, while financed and Christians have shown that they felt much in many cases manned by the S P G, are

# THE ROMAN CATHOLIC CHURCH.

With regard to numbers, the Catholic Directory of India gives the following tables:—

	1011	1921	1931
1. British India and Indian States— (a) Letin Rite	1,814,620	1,851,408	2,164,918
(b) Syrlac Rites	364,660	440,488	540,981
2 French India	25,918	25,480	25,492
3 Portuguese India	296,148	288,741	326,690
Total, India	2,301,346	2,606,117	3,067,081
4. Ceylon	322,163	353,986	394,993
Total, India and Ceylon .	2,623,500	2,970,103	3,462,074

NOTE (1):--In 1860, the total for India and Ceylon was 1,170,854. In 1880 it had risen to 1,810,265 and in 1900 to 2,201,674.

Note (2) —In 1860 there were 1,504 priests In 1931 there were In 1921 there were 8,156. 3,625

The Catholic community as thus existing is composed of the following elements —

- (1) The "Syrian" Christians of the Malabar Coast, traditionally said to have been converted by the Apostle St. Thomas They were brought under allegnance to the Pope by the Portuguese in 1599, and placed first under Jesuit bishops and then under Carmelite Vicar-Apostolics They are at present ruled by an Archbishop and three suffragan Bishops of their own Syriac rite.
- (2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the pennsula and up the west coast, Ceylon, Bengal, etc
- (8) European immigrants at all times, including British troops
- (4) Modern converts from Hinduism and Animism in recent mission centres.
- (5) Recent converts from the Jacobite community in Malabar, of which 2 Bishops, 50 priests and Some 10,000 luty have been "united" to the Catholic Church

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline To meet this decline fresh missionaries were sent out by the Congregation de propaganda fide, till by the middle of the 19th century the whole country was divided out among them except such portions as were occupied by the Goa clergy. Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the "Padroado" or roval patronage, and the propaganda clergy. This conflict was set at rest by the Concordat of 1886 (amended by the Agreement of 1928, abolishing "double jurisdiction"). At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows—

Under the Sacred Congregation of Extraordinary Ecclesiastical Affairs —

The archbishopric of Gos and Damaun (having some extension into British territory) with suffragan bishoprics at Cochin and Mylapore (both in British territory)

Under the Sacred Congregation of Oriental Churches —

The archbishopric of Ernakulam, with Suffragan bishoprics of Changanacherry, Kottayam and Trichur.

Immediately subject to the Holy See -

The archbishopric of Trivandrum, with suffragan bishopric of Triruvella

Under the Sacred Congregation of Propaganda Fide —

The archbishopric of Agra, with suffragan bishoprics of Allahabad and Ajmere.

The archbishopiic of Bombay with suffragan bishopiics of Poona, Mangalore, Calicut, Trichinopoly and Tuticorin, and the Missions of Ahmedabad and Karachi. The archbishopric of Calcutta, with suffragan bishoprics of Ranchi, Dacca, Chittagong, Krishnagar, Dinajpur, Patna and Shillong and the Prefecture Apostolic of Sikkim.

The archbishopric of Madras, with suffragan bishoprics of Nellore, Hyderabad, Vizagapatam and Nagpur, the Prefecture-Apostolic of Jubbulpore, and the Missions of Cuttack and Bellary

The archbishopric of Pondicherry (French), with suffragan bishoprics of Mysore, Coimbatore, Kumbakonam, Salem and Malacca

The archbishopric of Simla, with suffragan bishopric of Lahore and the Prefecture-Apostolic of Kashmere

The archbishopric of Verapoly, with suffragan bishoprics of Quilon, Kottar and Vijayapuram

The archbishopric of Colombo (Ceylon), with suffragan bishoprics at Kandy, Galle, Jaffna and Trincomalee

Three Vicariates Apostolic and one Prefecture Apostolic of Burma.

The European clergy engaged in India almost all belong to religious orders, congregation or mission seminaries, and in the great majo-nty are either French, Belgian, Dutch, Swiss, Spanish or Italian by nationality. They number about 1,300 besides which there is a body of secular clergy mostly Indian, etc, numbering about 2,200, and probably about 2,000 nuns. The first work of the clergy is parochial ministration to existing Christians, including railway people and British troops. Second comes education, which is not confined to their own people, their schools being frequented by large numbers of Hindus, Mahomedans, Parsis, etc. Among the most important institutions are St Xavier's College, Calcutta, St Peter's College, Agra, St. Kavier's College, Bombay, St Joseph's College, frichinopoly, St Aloysius College, Mangalore, Loyola College, Madras, teaching university courses, besides a large number of high schools and elementary schools The educa-tion of girls is supplied for by numerous convent schools worked by religious congre-gations of nums to say nothing of orpha-nages and other charitable institutions The total number under education amounted in 1904 to 143,051 boys and 73 164 girls, unavallable As to figures being missionary work proper, the country is covered with numerous modern mission centres, among which those in the Punjab, Chota-Nagpur, Krishnagar, Gujerat, the Abmednager district and the Felugu coasts may be mentioned. (Full particulars on all points will be found in the Catholic Directory already quoted) The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few mulitary and railway chaplaincies are derived mainly from Europe, that is, from the coll ations of the Society for the Propagation of the Path and of the Holy Childhood, helped out by private or other donations secured from home by the different local mission area. In mission work the fathers count stonaries. In mission work the fathers count persevering as Christians, and no baptism except for infants or at point of death, is administered except after careful instruction.

-and probation. This, while keeping down the record, has the advantage of guaranteeing solid results.

he Holy See is represented by a Delegate Apostolic of the East Indies who resides at Bangalore. At present this post is occupied by the Most Rev Archbishop Kierkels, DD appointed in 1931

### THE CHURCH OF SCOTLAND.

The Church of Scotland and the United Free Church have become one The Union, effected in October 1929, has already exerted on profound influence upon the life of the Church of Scotland in India. The Chaplaincy work of the Church of Scotland dates from 1814, when the Rev Dr. Bryce landed in Calcutta, and organised a congregation of his Scotlash fellow countrymen. The centenary of the churches in the three Centenary of the churches in the three Presidency towns was celebrated: Calcutta, 1914 Bombay, 1919, Madras, 1921. Since 1903 there have been eighteen chaplains on the staff, of whom nine belong to the Bengal Presidency, five to Bombay, and four to Madras These minister both to the Scottish troops and to the civil population of the towns where hey are stationed, but when there is a Scottish regiment the chaplain is attached to the regiment, instead of being posted to the station where the regiment happens to be placed and as a rule moves with the regiment are three Presidency senior Chaplains in charge are three Presidency senior Unaplains in charge of Bengal, Bombay, and Madras respectively There are churches in the chief towns of the Presidencies, and churches have also been luilt, in all considerable military stations, eg, Chakrata, Lucknow, Peshawar, Ramkhet, Rawalpindi, Sialkot, Umballa and Jubbulpore. In addition to the regular establishment there are a number of acting Chaplains ment there are a number of acting Chaplains sent out by the Colonial Committee of the Church of Scotland, and these are serving in such stations as Rawalpindi, Lahore, Cawnpore, Meerut, Mhow and Quetta The Additional Clergy Societies in India contribute towards the cost of this additional establishment. In other places such as Sialkot, Murree, Dalhouse and Darjeeling, regular services are provided by Scottish Missionaries. Simia has a minister of its own sent out from Scotland.

The Mission work of the Church of Scotland dates from 1829, when Alexander Duff, one of the greatest of modern missionaries, was sent to Calcutta He was the first to open achools where English was made the medium for instruction, and where religious teaching was given daily Similar educational missions were soon afterwards stated in Bombay and Madras. Educational work is still an important branch of the mission work of the Church, but the Bombay College was closed in 1819 and in 1907 the College in Calcutta was united with the College of the United Free Church of Scotland, to form the Scotlish Churches College In the Punjab Evangelistic work is heing carried on from eight centres under sey 'teen missionaries' The haptised Chris-

tian community now numbers over 14,000 Work commenced in Darjeeling in 1870 is now carried on throughout the whole Eastern Himalayan district, and there is a Christian community there of over 8,000 In the five mission districts of Calcutta, the Eastern Himalayas, Madras, Poona, and the Punjab there were at the end of 1919 over 24,787 baptised Indian Christians In connection with these missions the Women's Association of Foreign Missions does invaluable service in school. medical and zenana work, having in India 41 European missionaries, 163 teachers, over 50 schools, three hospitals and six dispensaries.

three hospitals and six dispensaries.

The Church of Scotland has also done much to provide education for European children in India. Its two Churche in Bombav have six representatives on the governing body of the Anglo-Scottish Education Society, and the two churches exercise pastoral supervision over the Bombay Scottish Orphanage In Bangalore there is the St. Andrew's High School, and both in Bangalore and in Madras the local congregation supports the school for poor children. The Ayrelleff Girls' Boarding and High School is under the care of the Kirk-Session of St. Andrew's Church, Simia The now well-known St. Andrew's Colonial Homes at Kalimpong, Bengal, though not directly part of the work of the Church of Scotland, were initiated by and are being locally managed by missionaries of that Church The homes exist for the benefit of the domiciled European Community, and are doing magnificent work. There are now twenty cottages, and about 600 children in residence Further information may be found in "Reports of the Schemes of the Church of Scotland," Blackwood & Sons: "The Church of Scotland," Blackwood & Sons: "The Church of Scotland, Blackwood & Sons: "The Church of Scotland Year Book" and "The Handbook of the Church of Scotland in India and Ceylon"

Though the former Churches of the United Free Church now belong to the Church of Scotland they remain independent of the establishment recognised by Government They have only three purely European congregations in India, two in Calcutta, and one in Bombay

ant branch of the mission work of the Church, but the Bombay College was closed in 1819 different areas. They are Bengal (Calcutta, and in 1907 the College in Calcutta was united with the College of the United Free Church of Scotland, to form the Scottish Churches College In the Punjab Evangelistic work is heing carried on from eight centres under sev 'cen missionaries. The baptised Chris-

Bhandara, Wardha, and Amraoti); Raj-putana, where the extensive work in stituted by the United Presbyterian Church in 1800 is now carried on from eleven Bhandara, Amraoti); Rajcentres

The work falls into three main divisions, evangelistic, medical, and educational. The Christian community has been organised in all the chief centres into congregations which form part of the Indian Presbyterian Church, and this Church is seeking to take an increasing share in the work of evangelism There are representing several Missionary Societies. Other nineteen Mission Hospitals, among which are colleges are Wilson College, Bombay, and four excellently equipped and staffed Women's Histor College, Nagpur

Hospitals, in Madras, Nagpur, Ajmer, and Jaipur From the days of Duff in Calcutta and Wilson in Bombay the Mission has given a prominent place to education. It has many schools in all parts of its field and it has also made a large contribution to the work of higher education. education through four Christian Colleges The Scottish Churches College, Calcutta, is The Madras Christian College, well known which owes so much to the work of Dr. William Miller, is now under the direction of a Board representing several Missionary Societies. Other

# BAPTIST SOCIETIES.

THE BAPTIST MISSIONARY SQUIETY OF GREAT BRITAIN.—Formed m 1792, largely through the chorts of Dr. Wm Carey, operates mainly in Bengal, Bihar and Orissa, the United Provinces, stations Medical work connected with the English services are carried on in many of the Bengal, Bihar and Orissa, the United Provinces, stations Medical work connected with the the Punjab and Ceylon The Baptist Zenana Mission and the Bible Translation Society have been united with this Society. The staff of the united Mission in India and Ceylon numbers Calcutta and Outtack. The Secretary of the 206 missionaries and about 978 Indian and Mission is the Rev D Scott Wells; 44, Lower Singhalese workers Connected with the Society are 376 Indian and Singhalese Churches, 290 Primary Day Schools, 20 Middle and High Schools, and 1 Theological Training College The Church membership at the close of 1983 stood at 23,245 and the Christian community at 59,812 The membership during the past ten years has increased by about 53 per cent. and the community by 50 per cent in the same period. Amongst the non-caste people great (Nicholan and Singhalese, Condense of 1983, and is located in the Telugu Stepte. The Canadian Baptist Mission.—Was commenced in 1873, and is located in the Telugu Stepte. Welfar, Condense of Madras, in the Stepte. BRITAIN.—Formed in 1792, largely through the Churches connected with the Society, same period. Amongst the non-caste people great progress has been made in recent years, and many of the Churches formed from amongst these peoples are self-supporting

Special work amongst students is carried on in Calcutta, Dacca, Cuttack, Patna and Delhi where hostels have been erected for the prosecution of this form of work.

Educational department are 554 village day school to Colleges Serampore College with its Royal Charter granted by His Danish Majesty in 1827, confirmed by the British Government in the Treaty of Purchase of the Settlement of Serampore in 1845, and placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary Society to become a part of its Missionary Educational operations, in Arts and Theology It was affiliated in 1857 to the newlyformed Calcutta University, reorganised in 1910 on the lines of its original foundation with the appointment of a qualified Theological Staff on an Inter-denominational basis for the granting of Theological Degrees to community by 20 per cent, and scholars by 105 per cent Indian Secretary is the Rev A. Arthur Scott, Tuni, East Godawari

partents

The Women's Department of the Society also carry on an extensive Work in the places occupied Missions and Eveny Trading Act.—In ly the Methodist Missionary Society. There are 104 Women workers, including 16 doctors and 181 Bible Women; 115 Girl Day Schools and 181 Bible Women; 115 Girl Day Schools are declared companies under Act 2 (the Enemy there are 45 Boarding Schools and Training Trading Act) of 1916—The Leipzig Evangelical Institutions with 190 teachers and 2,505 boarders Lutheran Mission, Madras, the Hermansberg Evangelical Lutheran Mission, Madras, the Schleswig-Holstein Evangelical Lutheran Mission, Madras, the Gosner Evangelical Lutheran in Inspirals and 16 Dispensaries with 12,695 Madras, the Gosner Evangelical Lutheran in Inspirals and 393,702 Out-patients The Vethodist Episcopal Church is the organization in the United States of America which grew out of the Wesleyan revival in England and her American colonies during the latter part of the eighteenth century. This Church began its work in India in 1856, at first confining its activities to what is now the United Provinces. From that centre it spreads until the outposts of its work were found in Baluchistan, Burma, Maleysia, Netherlands, Indies and the Philippine Islands. In 1920 a rearrangement of the mission field of the Church separated India, Burma and Baluchistan into what is now known as the Southern Asia division Within this present field the Church now has a total Baptized Christian community of 525,668

The avowed task of the Church has been the uplift of the depressed classes, and its work has been largely among that class. As a matter of fact, however, it has large numbers who came from the alchammedans and the caste Hindus, and among such its influence is extend-

The educational work of the Church is extensive, it having in this area a total of 1,100, schools of all grades, including three colleges, twenty-two high schools, and numerous normal training and theological institutions. The registered attendants in these schools number 40,000

Special effort is made for the instruction and development of the young people of the Church, there now being 336 chapters of the Epworth League with 13,394 enrolled members, and 4,021 organized Sunday Schools with an enrolment 139 422

The publishing interests of the Church are represented by the Lucknow Publishing House at Lucknow doing work in English, Urdu, Hindi and other Vernaculars. The periodical issued cover the interests of both the evangelistic and the educational field, the Indian Witness, the Junior Mothodist and Christian Education being in English, while the Kaukab-i-Hind, and other periodicals are ssued in several of the vernaculars.

The governing body of the Church is the General Conferences held quadrennially in Americe in which the eleven conferences now existing in India are represented by twenty-four dele-The polity of the Church in India looks forward to complete independence under the general governing body, there at present being about two hundred American and women as compared to 600 ordained and 4,000 unordained Indian and Burmese workers At present the area is divided into seventy-two districts each in charge of a superintendent and among whom are many Indians The work is supervised by three Bishops, elected by the General Conference, and residents as follows: Bishop John W Lobinson, Delhi, Bishop Brenton T Badley, Bombay and Bishop Jasliwant Rao Chitambar, Jubbulpore

THE AMERICAN WESLEYAN METHODIST MISSION, Sanjan, Thana District Headquarters Stations with Missionaries, Dandi March, via Nargole, District Thana Pardi, District Surat Eight Missionaries on field. Two on furlough Four main stations Two Boarding schools One industrial school One Bible School One village farm project Eight village schools. Chairman of Field Committee, Rev. P D Doty, Sanjan, District Thana

THE METHODIST PROTESTANT MISSION began work in India in 1919, has a staff of six missionaries. The work is confined to Dhulia Taluka, with one Main station, Dhulia. There are two boarding schools, district evangelistic work and medical work. Secretary. Mrs. Paul Cassen, Dhulia, West Khandesh

THU FREE METHODIST MISSION of North America—Established at Yeotmal, 1893, operates in Berar with a staff of 11 Missionaries and 40 Indian workers · Organised churches 5, 1 Theological school, 1 Girls' Boarding School, 1 Vernacular Middle school, 8 Elementary Schools, 1 Dispensary and 5 centres for Clinical and village health work

Secretary. Persis M Phelps, Yeotmal, Berar

# THE SALVATION ARMY

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker, and was for many years under his control, with Headquarters in India For some time now, the areas occupied have been divided for administrative purposes into 6 Territorics, each under a Territorial Commander, and one smaller Command.

Northern Territory, with Headquarters at

Western Territory, with Headquarters Bombay

Matrus and Telugu Territory, with Headquarters at Madias Southern Territory, with Headquarters at

Trivandrum, in Travancore State

Ceylon Territory, with Headquarters

Colombo

Eastern Territory, with Headquarters

Calcutta

Burmah Command, with Headquarters at Rangoon

The Commanders are directly responsible to the International Headquarters in London

Northern Territory—The area in this Territory is the Salvation Army work in the Punjab, Delhi and United Provinces—The Territory is controlled from Lahore

Evangelistic work, especially among the "depressed classes," is extensively carried on, both in the Punjab and the U-P

at the Ealvation Army in the United Provinces (where this important reformative work was commenced), and also in the Punjab, great progress has been made A special Settlement the last few years

# Laws and the Administration of Justice.

The indigenous law of India is personal and in 1908 and the Code of Criminal Procedure divisible with reference to the two great classes in 1898. These Codes as amended from time to of the population, Hindu and Mahomedan time are now in force. Both systems claim divine origin and are in exists in combination with a law based on custom At first the tendency of the English under the presidency of the Hon Mr A. P. was to make their law public and territorial, Muddiman, I C 8, to deal with the question of and on the establishment of the Supreme Court statute law revision. The functions of the at Calcutta in 1773 and the advent of English Committee are to prepare for the consideration lawyers as judges, they proceeded to apply it to Europeans and Indians alke. This error was rectified by the Declaratory Act of 1780, by which Parliament declared that as against lormal perfection in the statute law of Indian 1 lindu the Hindu law and usage, and as against a Mahomedan the laws and customs of Islam should be applied. The rules of the Islam should be applied. The rules of the Islam should be applied. Instances can be caree altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1850, the Indian Slavery Act, 1843, the Islam Widows' Remarriage Act, 1856, and other Acts and Codes. To quote the Imperial Gazetteer, "A certain number of the older Inglish statutes and the English common law ree to a limited extent still in force in the Presidency. Towns as applicable to Europeans while much of the old Hindu and Mahomedan law is everywhere personal to their native in the present the personal to their native is everywhere personal to their native in the present the present the present the present the present the personal to their native in the present the present the present the present the present the present the present the present the country.

Committee are to prepare for the consideration of Government such measures of consolidation and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of Indian and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of Indian and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of Indian and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of Indian Perfection and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of India at Calcutta in 1773 and the advent of English the cutomary law, which is as far as possible recognised by the Courts, the law of British and for it either at Westminster or by the cedure have always been constructed in the cutomary law. anthorities in India to whom the necessary lawgiving functions have from time to time been delerated '

#### Codification.

### Statute Law Revision.

In October, 1921, a committee was appointed Committee are to prepare for the consideration

### **European British Subjects**

Whilst the substantive criminal law is the same for all classes, certain distinctions of procedure have always been maintained in regard to criminal charges against European British subjects Until 1872 European British subjects could only be tried or punished by one of the High Courts. It was then enacted that European British subjects should be hable to Before the transfer of India to the Crown the Line was in a state of great confusion. Sir highest class, who were also justices of the fleury Cunningham described it as "hope-peace, and by judges of the Sessions Courts; lessly unwieldy, entangled and confusing" but it was necessary in both cases that the The first steps toward general codification were magistrate or judge should himself be a Eurotaken in 1833, when a Commission was appoint-pean British subject. In 1833 the Government ed, of which Lord Macaulay was the moving of India announced that they had decided "to prepare a penal code. Twenty-two justile the question of unradiction over European. taken in 1833, when a Commission was appointed, of which Lord Macaulay was the moving of India announced that they had decided "to spirit, to prepare a penal code Twenty-two settle the question of jurisdiction over European years (lapsed before it became law, during which period it underwent revision from his successors in the Law Membership, and especially by Sir Barnes Peacock, the last Cinef Justice of the Supreme Court of Calcutta The Fenal Code, which became law in 1860 was followed in 1861 by a Code of Criminal law of British India is contained in these two Codes One of the most eminent lawyers who coversy ended with the virtual, though Codes One of the most eminent lawyers who aver came to India, Sir James Stephen, said by which the law previously in force was amendated commissioned and modified in some few particulars (they are surprisingly few) to suit the circumstances of British India It is practically impossible to musunderstand the code. The indian penal Code has from time to time been amended Integrated to the post of district magnitate or sessions judge, his in the Code of Civil Procedure, was remodelled Englishman holding the same office This provision however in subject to the condition Consultice of the Prixy Council in Engined, that every European herich subject brought the High Courts exercise superstain ever all for Irink before the district magnetate or evaluate the subordinate courts. Returns are regularlying has the right, however trivial be the its cut to them at short intervals and the Righ not less than half the number shall be Euro sending for precedings, and he called for peans or American. Whilst this change explanation, as well as four the cases that was made in the powers of district magnetas, come before the mappen, to the peans to the called magnetas, come before the negative of the first the called the law in regard to other magnetic remained to some extent acquainted with the rearest the law in regard to other magnetic remained to some extent acquainted with the rearest the law in regard to other magnetic remained to which the rounts generally are discharging unaltered." Since Is it no distinctions of race in which the courts generally are discharge; have been recognised in the civil courts through their duties.

#### High Courts.

The highest legal tribunals in India are the junca the opinion of the majority presults if High Courts of Judicature. These were constituted by the Indian High Courts Act of 1861 for law allows considerable latter in a positive of appeal Bengal. Bombay and Madras, and later for the last the is not any of Crimin Lype if and United Provinces and the Punjab superseding a the Judicial Councilts of the Prisy Courts the old supreme and Sudder Courts. More recently High Courts have been constituted for Patna and Rangoon as well. The Judge has repeatedly dischard to the Prisy Courts has repeatedly dischard to the Prisy Court of Crimin it type if, there is no allow for an appointed by the Crown, they hold office and interest for the High Courts in one-third of their number are barristers, one-third are recruited from the judicial branch of the Indian Civil Service, the remaining places the form available for persons who have held in the properties of mercy is exercised by the financial Offices in India or lawers qualified the superior power of the Crown in India. Trial by juryls the rule in original. The constitution and jurisdiction of the in India. Trial by jury is the rule in original. The constitution and jurisdiction of the criminal cases before the High Courts, but infrior civit courts varies. Broadly speaking juries are never employed in civil suits in one district and sessions judge is appointed for India.

Iower Courts.

After a discission on this subject in the The Code of Clindard Free here proxides for Logislative acceptly in September 1921, the constitution of infector estainal couple the following motion was adopted — 'That in tryl I courts of so for a stress of realistic following motion was adopted — 'That in tryl I courts of so for a stress all restal distinctions between trates. Users prospers, and the first Indicas and Lurope my in the actor of their, kines too ne, is district any district, and punishment for offens, a committee considing of one os more districts, and every has appointed to consider what ameadments resistant district and have court of so for and a should be made in the provisions of the Code of close finding the assert of so forminal Procedure, 1898, which differ an interest a stress courts to the procedure, 1898, which differ adopted of the Lawlin Asserts, and are competent to and American and Luropeans who are not try all norm of secons date consisted, and British subject in craminal trials and proceed to inthick any pund have a outseffed by law, mag and to report on the best methods of given that are pound have a outseffed by law, and effect to their proposite. As a result of the tion by the high secons of criminal appeal in recommendations of the British that the provinger, transfers courts are of the committee the recommendation of the cubicit was further, closes with the ending powers. Provider modelled and to be climinal law Amendment to med and traces utill to it the terms, Act Mi of the place of the old Chapter for the application to a place of the old Chapter for the application to the powers, manufactors. the following motion was adopted - That in style I courts of so from a decourts of tracts in place of the old Chapter for the upp distinct of knowers in managements is 163) the new Chapter in the Problems town Problems in sufficient o especial than 1812 for interest of the first distribution of the contract of this further of the Pears or henorary magistrates

Trials is fore courts of section are with new are at jury 1 Assessments, but

each district no District Judge he presides in For other parts of India High Courts have a principal court of original jurisdiction been formed under other names. The chief his functions as Sessions Judge have been de difference being that they derive their authority surfaced. For these posts members of the Indian from the Government of India, not from Parlia-Civil Service are mainly selected though some ment. In Sindh, N. W. F. Province and the appointments are made from the Provinced Central Provinces and Herar the principal legal Service. Next come the Subordinate Judges tribunal is known as the Court of the Judicial and Munstills, the extent of whose original Commissioner. Quite recently the Secretary incisdiction varies in different parts of India. Commissioner Quite recently the Secretary jurisdiction varies in different parts of India of State for India has approved the proposal like civil courts, below the grade of District for the establishment of a High Court in the Judge, are almost invariably presided over by Central Provinces and Berar Indians There are in addition a number of Indians There are in addition a number of the superior courts in the districts, criminoney suits up to Rs. 600 In the Presidence and and civil, and their decisions are final, Towns, where the Ciartered High Courts have except in cases in which an appeal lies to His original jurisdiction, Small Cause Courts dishapesty in Council and is heard by the Judicial pose of money suits up to Rs. 2,000 As Insolvency Courts the chartered High Courts of ed to the Bombay High Court in 1871 there

anaided by jurors

# Legal Practitioners.

Legal practitioners in India are divided into institution of the legal profession -Barristers-at-Law, Advocates of the High Court, Vakils and Attorneys (Solicitors) of High Courts, and Pleaders, Mukhtiers and revenue agents Barristers and Advocater are admitted by each High Court to practise in it and its subordinate courts; and they alone are admitted to practise on the original side of some of the chartcred High Courts. Vakils are persons duly qualified who are admitted to practise on the appellate side of the chartcred High Courts and in the chart subordinate to the Wart Courts. Courts subordinate to the High Courts torneys are required to qualify before admission to practise in much the same way as in England. The rule that a solicitor must instruct counsel prevalls only on the original side of the Bombay and Calcutta High Courts Pleaders practise and Calcutta High Courts Pleaders practise and in Bombay there is attached to the in the subordinate courts in accordance with secretariat a Legal Remembrancer and an rules framed by the High Courts.

# Organisation of the Bar.

At Calcutta, Madras, and Bombay there is a Bar Committee presided over, ex-office, by the Advocate-General This body is elected by the barristers practising in each High Court, and its functions are to watch the interests of the Bar and to regulate its etiquette. At Allahabad, Lahore, Nagpore, and Rangoon a similar Bar Committee exists, but the electorate is extended to include the vakils or native pleaders, and the president is either the senior practising member of the Bar or the Government Advocate In the larger Districts and Segsions Courts, an organisation representing the Bar is usually to be found, and in the sub-ordinate Courts, including the Revenue Courts similar machinery is generally in use. Pending an opportunity of detailed inquiries in India, these general descriptions must suffice. recommendations of the Indian Bar Committee of 1923 relating to the-constitution of Bar Councils for the several High Courts in India have been recently adopted by the Indian Bar Councils Act, XXXVIII of 1926. The sum and purpose of this Act is to abolish, as far as practicable the distinctions between the various creation of a uniform Bar

#### Composition of the Bar.

extract from an informing article in the Times Court extract from an informing arcicle in the Times Court. These appeals raise questions of Very (May 25, 1914) indicates the character and great importance, and the Council of Law incidence of this development. "During the Reporting for England and Wales show their last forty years, a striking change has taken appreciation by printing the Indian Appeals place in the professional class. The bulk of in a separate volume, and have also compiled practice has largely passed from British to a digest of Indian Appeals covering the period indian hands, while, at the same time, the 1874-1893. The other Provinces and States profession has grown to an enormous extent have sense of reports issued under the authority. One typical illustration may be quoted. Attach-leither of the Judiclary or the State.

Calcutta, Bombay and Madras have jurisdiction were 38 solicitors, of whom 10 were Indian in the Presidency towns In the mofusul and 28 English, and 24 advocates, of whom similar powers were conferred on the District 7 were Indian and 17 English. In 1911, attached to the same High Court, there were 150 solicitors by the Insolvency Act of 1906

### THE INDIAN POLICE.

Origins.—Cornwalls was the first Indian administrator to take the burden of policing the country off the zemindars and to place it on Government. He ordered the District Judges of Bengal in 1703 to open a Thana (Police Station) for every 400 square miles of their jurisdiction, and to appoint stipendiary Thanadars (Police Station Officers) and subordinates

In Madras in 1816, Sir Thomas Munro took superintendence of police out of the lands of the sedentary judges and placed it in the hands of the peripatetic Collector, who had the indigenous village police system already under his control. In this way the Revenue Department controlled the police of the districts and still to some extent does so, especially in Bombas Presidency.

In Khandesh from 1826-36 Outram of Mutmy fame showed how a whole time military commandant could turn incorrigible marauders into excellent police, and Sir George Clerk, Governor of Bombay in 1848, applied the lesson by appointing full-time European Superm tendents of Police in many Districts.

Madras had a torture scandal in 1853 which showed that 3 Collectors had no time for real police superintendence, in 1859 the principle of full-time European superintendence was introduced in a Madras Act of that year and the control of the Collector was removed

The Mutany led to general police overhaul and retrenchment and the Madras Act was mainly followed in India Act V of 1861, "An Act for the Regulation of Police", which still governs police working everywhere in India except Madras and Bombay, which has its own Police Act (IV of 1890)

Working.—Strictly speaking there is no Indian Police With the doubtful exceptions of the Delhi Imperial Area Police, and the advisory staff of the Intelligence Bureau attached to the Home Department, the Government of India has not a single police officer directly under its control The police provided for by the 1861 Act is a provincialised police, administered by the Local Government concerned, subject only "to the general control" of the Governor-General

Within the Local Government area the police are enrolled and organised in District forces, at the head of each of which is a District Superintendent of Police with powers of enlistment and dismissal of constabulary, and Police Station Officers may also be dismissed by the DSP

The D S P is subject to dual control. The force he commands is placed at the disposal of the District Magistrate for the enforcement of law and the maintenance of order in the District. But the departmental working and efficiency of the force is governed by a departmental hierarchy of Deputy Inspector-General of Police, Inspector-General of Police, and Home Department Generally speaking, the D S P, has to correspond with his District Magistrate on judicial and magisterial topics, and with his departmental chiefs on internal working of his force

The C. I. D.-- Ile ('BEZOS Poller Commission of 1902-3 moderated police working by providing for the direct enletment and training of I due sted Indiana to Police Station ! Officers, and by creating pecialized police agencies under each food Covernment for the investigation of specialist and professional crime. These agracies are known as Criminal Investigation Departments and work under Impector-feeneral Alex Deputy information about critic cult the Crime Geally, take over from the District Police erings with runifications into ecveral jurisdictions, and they control the working of such subuffac police developments as the Linger Print Identification Bureaux

Hendquarters and Armed Police At the chief town of each District the D. S Police has his office and also his Headquarter Police Lines and parade ground this is the main is the min centre for accumulation and distribution to the Police Stations and Outpost of the Ol-trict of clothing, arms, ammunition, and mecontrements Here are the Stores and the trinoury. Here also coust ibulars recruits enlisted by the D & P are taught drill, deportment, and duth and are turned out to till vacances. The Readquarter Lines also contain the two hundred or so armed police who mount guird on Treasuries in the District, and also provide Actually they prisoner and treasure eccort form a small and mobile local arms equipped with muslets (single fording) and bisonets The most highly trillied section of them go through a musketry course and are armed with 303 service rites. At most head-quarters but by no means all, there is also a reserve of mounted and armed police

Thanns and Thanadars—Almost throughout India the popular terms for Police Station and Police Station Officer are "Thana" and "Thanadar." It is at the Police Station that the public are most in touch with the police and the public are most in touch with the police and the police with the public Whether It be in a large city or in a moinsel hamlet, the Thana is the place where people come with their troubles and their gravances against their neighbours or against a person or persons unknown. In dealing with such callers, the Thanadar, who like police of all ranks, is supposed to be calways on duty, is chiefly guided by the Fo uricenth Chapter of the Code of Criminal Procedure, and the Second Schedule at the ond of that Code This schedule shows nearly offences and states whether or not they are "cognisable by the police." The courteenth Chapter lays down that a cognisable complaint must then and there be recorded, sisted and investigated. A non-cognisable complaint is merely noted in a separate book and the complainant is told to go to court

Police Prosecutors —The complainment in a cognisable case not only has his eximplaint recorded but investigated without proment of fee. If the Thanadar succeeds in establishing a prima facic case against the accused, the prosecution in court is conducted free of charge by a police prosecutor, who is generally a junior pleader, engaged by Government to conduct police of

to the Sessions are conducted by the Public Prosecutor or one of his Assistants, and the reports of these officers and the comments of the judge are a means for the D S P. to know whether his Thanadars are doing their work properly

Out Posts —When the Police Commission of 1860 devised the plan of police that still holds the field, they laid down two criteria of the numbers required. One was one policeman per square mile, the other was one per thousand of population. In towns it is well enough to is we the available police concentrated at the But in the mofussil the Thana jolice station is very often fifty miles distant from portions of its jurisdiction. It is in such cases profitable to artich a portion of the police station strength under a head constable to man an outpost where complaints can be received and investigation begun without the injured party having to undertake a long journey to the distant Thana The secret of good mofussil police working in normal times is dispersion A single policeman.

of Promotion —Ordinarily The Chain the constable may aspire to become a jamadar, or with ability and luck, a Police Station Officer or even Inspector The directly recruited matriculate who comes in through the Police Training School as a Thanadar may ordinarily become an Inspector or a Deputy Superintendent, or exceptionally a Superintendent The direct Deputy, an office reserved for Indians, has a good chance of becoming Superintendent, and perhaps Deputy Inspector-General The and perhaps Deputy Inspector-General The direct Assistant Superintendent, whether from Lingland, or from India, is sure of a Superintendentship, and has chances of D I G after 25 years' service The period of service for all ranks get his provident fund

and efficiency.

The Commissioner of Police of a Presidency Town is not the subordinate of the Provincial Inspector-General of Police and he deals direct with Government, just as the Presidency Magistrates deal directly with the High Court The Criminal Procedure Code of India is superseded in the Presidency Towns by special police Acts which prescribe police procedure Justice in criminal cases in Presidency Towns is somewhat rough and ready, not only from this cause, but also because Presidency Magistrates can give upto six months or Rs 200 fine summarily, i.e., without formal record of proceedings, and if only whipping or fine up to Rs 200 is an influence there need by not ever any statement. inflicted there need be not even any statement of reasons for the conviction.

Round Figures -The process of reorganisation and retrenchment goes on ceaselessly, annual administration reports for the ten major provinces and four minor administrations ap-peared tardily, and there are no unified statistics for the police of India and Burma The following figures are therefore merely to be regarded as however junior, represents the rule of law and approximations, giving a general idea of the numbers of police and the volume of work put through yearly -There are about 25,000 Military-Police, chiefly in Burma, Assam, and Bengal, and these cost about one crore The maintenand these cost about one crore ance of them is a departure from the principles laid down by the 1860 Commission and the 1861 Act

> Provincial Police including Burina total about 200,000 and cost eleven and a half crores or an average of over one crore per major Province

There are about 10,000 Thanas or Police Stations which annually investigate from five to six thousand murders, four dacorties, twenty-five thousand cattle thefts, one for full pension is thirty years, and if an officer hundred and seventy thousand ordinary theffs dies in the process of earning full pension his and as many burglaries. They place on trial every pension dies with him and all his dependents year about three-quarters of a million persons, of and as many burglaries They place on trial every year about three-quarters of a million persons, of whom about half a million or more are convicted The jail population of India, which is over a hundred thousand, consists of many habituals Presidency Police—In the Presidency The jail population of India, which is over a Towns there is unified police control for the hundred thousand, consists of many habituals Police Commissioner is responsible for both who on release proceed to prey on the public law and order and for departmental training until such time as the police again secure their conviction and incarceration.

### Jails

Tail administration in India is regulated to all India legislation. The obvious advia generally by the Prisons Act of 1894, and by bility of proceeding along certain general line rules issued under it by the Government of of uniform application led lately to the appoint India and the local governments The punishments authorised by the Indian Penul Code for convicted offenders include transportation, transportation, pensi servitude, rigorous imprisonment (which may include short periods of solitary confinement), and simple imprisonment Accommodation has also to be provided in the jails for civil and under-trial prisoners.

The origin of all jail improvements in India in reent jears was the Jail Commission of The report of the Commission, which consisted of only two members, both officials serving under the Government of India extended long, and reviews the whole question of Jail organization and administration in the minutest detail In most matters the Com-mission's recommendations have been accepted and adopted by Local Governments, but in various matters, mainly of a minor charac-ter, their proposals have either been rejected at initio as unsuited to local conditions, abandoned as unworkable after careful experiment or accepted in principle but postponed for the present as impossible

The most important of all the recommendations of the Commission, the one that might in fact be described as the corner stone of their report, is that there should be in each Presidency three classes of pails. in the first p'ace, large central jails for convicts sentenced to more than one year's imprisonment, secondir, district jails at the headquarters of districts, and, thirdly, subsidiary pails and lock-ups" for under-trial prisoners and districts, convicts sentenced to short terms of imprisonment The rail department in each province is under the control of an Inspector-General, he is generally an officer of the Indian Medical bervice with jail experience, and the Superiniendents of certain jails are usually recruited from the same service The district jail is under the charge of the civil surgeon, and is frequently inspected by the district magistrate. The staff under the Superintendent includes, in large central jails, a Deputy Superintendent to super vise the juil manufactures, and in all central and district juils one or more subordinate medical officers. The executive staff consists of Jailors and warders, and convict petty officers are employed in all central and district jails. the prospect of promotion to one of these posts being a strong inducement to good behaviour A Press Note issued by the Bombay Government in October, 1915, says.—"The cadre and emoluments of all ranks from Warder to Superintendent have been repeatedly revised and But the Department altered in recent years is not at all attractive in its lower grades two weak spots in the jail administration at the moment are the insufficiency of Central Prisons and the difficulty of obtaining good and sufficient warders '

The Jails Committee —Since the introduction of the reformed constitution the maintenance of the Indian Prisons falls within the

bility of proceeding along certain general lines of uniform application led lately to the appointment of a Jails' Committee, which conducted the first comprehensive survey of Indian prison administration which had been made for thirty years. Stress was laid by the Committee upon the necessity of improving and increasing existing jail accommodation, of recruiting a better class of warders; of providing educa-tion for prisoners, and of developing prison industries so as to meet the needs of the consuming Departments of Government. important recommendations included the separation of civil from criminal offenders; the adoption of the English system of release on license in the case of adolescents, and the creation of children's courts. The Committee found that the reformative side of the Indian system needed particular attention recommended the segregation of habituals from ordinary prisoners, the provision of separate accommodation for prisoners under trial the institution of the star-class system, and the abolition of certain practices which are liable to harden or degrade the prison population

Employment of Prisoners.-The work on which convicts are employed is mostly carried on within the jan walls, but extramural employment on a large scale is sometimes allowed, as, for example, when a large number of convicts were employed in excavating the Jhelum Canal in the Punjab Within the walls prisoners are employed on jail service and repairs, and in workshops. The main principle laid down with regard to jail manufactures is that the work must be penal and industrial. The industries are on a large scale, multifarious employment being condemned, while is taken that the jail shall not compete with local traders. As far as possible industries are adapted to the requirements of the consuming public departments, and printing, tent-making, and the manufacture of clothing are among the commonest employments. Schooling is confined to juveniles; the experiment of teaching adults has been tried, but literary instruction is unsuitable for the class of persons who fill lan Indian iail.

The conduct of convicts in fail is generally good, and the number of desperate characters among them is small Failure to perform the allotted task is by far the most common offence. In a large majority of cases the punishment inflicted is one of those classed as "muor" Among the "major" punishments fetters take the first place Corporal punishment is inflicted in relatively few cases, and the number is steadily folling. Punishments were revised as the result of the Commission of 1889 notable punishments then abolished were shaving the heads of female prisoners and the stocks The latter, which was apparently much prac-tised in Bombay, was described by the Commission as inflicting exquisite torture ments are now scheduled and graded into major and miner. The most difficult of all jail problems is the internal maintenance of order sphere of provincial flovernments and is subject among the prisoners, for which purpose paid With this is bound up the question of a special number of reforms were advocated but, owing class of well-behaved prisoners which was tried to financial stringency, it has not yet been from 1905 onwards in the Thana Jail

Juvenile Prisoners —As regards "youthful offenders"—1e, those below the age of 15—the law provides alternatives to imprisonment, and it is strictly enjoined that boys shall not be sent to rail when they can be dealt with other-wise. The alternatives are detention in a reformatory school for a period of from three to seven years, but not beyond the age of 18; discharge after admonition, delivery to the parent or guardian on the latter executing a bond to be responsible for the good behaviour of the culput and whipping by way of school

Jiscipline The question of the treatment of "young sdult" prisoners has in recent years received much attention. Under the Prisons Act. prioners below the age of 18 must be kept separate from older prisoners, but the recognition of the principle that an ordinary jail is not a fitting place for adolescents (other than youthful limbituals) who are over 15, and therefore in child of admission to the reformatory school, has led Local Governments to consider schemes for going beyond this by treating young adults on the lines followed at Borstal, and considerable progress has been made in this direction 1905, a special class for selected juveniles and young acults was established at the Dharwar pulsa Bombay, in 1908 a special juvenile pulsas opened at Alipore in Bengal; in 1909 the Merktila pail in Burms and the Tanjore fail 'n Vadras were set aside for adolescents, and convicts was opened at Bareilly in the United Provinces; and in 1910 it was decided to conc utrate adolescents in the Punjab at the inhere District jail, which is now worked on Bor-tal lines. Other measures had previously han taken in some cases, a special reformatory been in force in two central pails in the Punjab men in force in two central falls in the Punjabsince the early years of the decade, and "Borstil encourts" had been established in some
jula in Bengal But the public is slow to
appreciate that it has a duty towards prisoners,
and but little progress has been made in the
formation of Prisoners' Aid Societies except
in Bombay and Calcutta, though even in those
cities much remains to be done cities much remains to be done

Reformatory Schools —These schools have beer administered since 1899 by the Edu-cation department, and the authorities are directed to improve the industrial education of the inmates, to help the boys to obtain employment on leaving school, and as far as possible to heep a watch on their careers

Transportation —Transportation is an old

cum-liment of the British Indian criminal law. and a number of places were formerly appointed for the reception of Indian transported convicts The only pourlecttlement at the present time is Port Blair in the Andaman Islands.

Commission of Enquiry, 1919 -A comsystem of I am administration in India with, by their presence sp clal reference to recent legislation and ex-, refrence in Western countries. Its report, coss in dealing with the criminal tribes is the purished in 1921, was summarised in the provision of a reasonable degree of economic

warders and convict warders are employed. Indian Year Book, 1922 (pages 670-671). possible to introduce some of the more important of them.

> Fines and Short Sentences.—Those sections of the Indian Penal Code, under which imprisonment must be awarded when a conviction occurs, should be amended so as to give discretion to the court. Sentences of impri-sonment for less than twenty-eight days should be prohibited.

> The Indeterminate Sentences.-The sentence of every long-term prisoner should be brought under revision, as soon as the prisoner has served half the sentence in the case of the non-habitual, and two-thirds of the sentence in the case of the habitual, remission, earned being counted in each case. The revision should be carried out by a Revising Board, composed of the Inspector-General of Prisons, the Sessions Judge and a non-official. In all cases, the release of a prisoner on parole should be made subject to conditions, breach of which would render him liable to be remanded to undergo the full original sentence. The duty of full original sentence seeing that a prisoner fulfils the conditions on which he was released should not be imposed upon the police or upon the village headman, but special officers, to be termed parole officers, should be appointed for the purpose. parole officers should possess a good standard of education, though not necessarily a university degree, and should both protest and advise the released prisoner and report breaches of the conditions of release.

> Transportation and the Andamans.~ future of the penal settlement of Port Blair was continually under the consideration of the Government of India from the time of the publication of the Jails Commission report, but it was not till 1926 that a definite decision It was then decided that hencewas reached forth only those convicts should normally be sent to the Andamans who volunteered to come, that the old restrictions on life in the settlement should be sensibly relaxed, that convicts should be encouraged to settle on the land, that in certain conditions they should be entitled to release to obtain occupancy rights over the land which they had cultivated, and that the importation of wives and families should be The object of these changes was to promote the development of a free colony of persons, who would, after the terms of their sentences had expired, make the Andamans their permanent home. The effect up to date has been to introduce a completely new outlook on life into the settlement, but it is still too soon to appreciate its potentialities. It has recently been found necessary to send to the Andamans certain convicts either sentenced to transportation for life or to long terms of rigorous imprisonment for permanent incarceration in the Cellular Inil Such prisoners will not be released and allowed to go into the settlement, and its development will in no way be affected

> Criminal Tribes -The first essential of suc-

comfort for the people It is therefore of paramount importance to locate settlements where sufficient work at remunerative rates is available Large numbers of fresh settlers should is desirable to utilise both Government and the control of settlements as a private agency for the control of settlements

certaining whether there is work for them Commitment to settlements should, as far as possible, be by gangs not by individuals. It is desirable to utilise both Government and

The variations of the fail population in British India during the five years ending 1932 are shown in the following table:—

		1932	1931	1930	3129	1928

	94	100	· 37
	1,648	1,831	1,126

The total daily average population for 1932 was 144,004, the total offences dealt with by criminal courts was 310, and by Superintendents 97,786. The corresponding figures for 1931 were 121,900, 195 and 114,545, respectively.

The total number of corporal punishments showed a slight increase, viz, from 174 to 190. The total number of cases in which penal diet (with and without cellular confinement) was prescribed was 4,669 as compared with 3,684 in the preceding year. Total expenditure increased from Rs 1,75,48,041 to Rs 1,77,91,758, while total cash earnings decreased from Rs 25,72,343 to Rs 24,01,285, there was consequently an increase of Rs 4,14,735 in the net cost to Government

The death rate decreased from 12 42 per mille in 1931 to 10 19 in 1932. The admissions to hospital were higher, and the daily average number of sick fell from 28.78 to 28 12

ture or import issued under this Act 4 13 the penalty for contravening the provisions of a 9 is impresonment which may extend to in months or fine up to one thousand rupees S 20 brings into accord the customs duty on matches with the excise duty imposed by this 1ct

17 The Negotiable Instruments (Amend ment) Act.—The present Act by amending s 55 of the Negotiable Instruments Act, 1881 provides that cheques originally drawn to harer do not lose their bearer character not unhitunding any endorsement thereon whether in full or in blank and whether such endorsement purports to restrict or exclude further negotiation or not

18 The Indian Trusts (Amendment) Act.—Certain Provincial Governments were desirous that the status of trustee securities should be extended to debentures issued by Land Mortgage Banks and similar corporations, provided that both the principal and interest of such securities were fully and unconditionally guaranteed by the local Government concerned The present Act gives effect to this by adding a provise to clause (a) of a 20 of the Indian Trusts Act, 1882

19 The Indian Dock Labourers Act— The International Labour Conference at its twelfth session held in 1929 adopted a Draft Convention concerning the protection against accidents of workers employed in loading or unloading ships. At its sixteenth session held in 1932 the Conference adopted a Revised Draft Convention which is of exactly the same scope and character as the original draft convention adopted in 1929 and differs from it only in certain matters of technical detail The present Act r ttifics the Revised Draft Convention on behalf

S 2 defines "the processes" as including all work which is required for or is incidental to the loading or unloading of cargo or fuel into or from n ship and is done on board the ship or alongside it Under s 3 the Local Government may appoint Inspectors who are empowered by s to enter any premises or ship where the processes are carried on and make such examination of the premises and ship and the machinery and gear used for the processes, and of any prescribed registers and notices, and may take on the spot or otherwise evidence of any person for carrying out the purposes of this Act 8 5 empowers the Governor General in Council to make certain regulations, eg, regulations (1) providing for the safety of working places on shore and of any regular approaches over a dock, wharf, quay or similar premises which workers have to use and for the lighting and fencing of such places and approaches, (2) providing for the fencing of machinery, live electric conductors and steam pipes, (3) regulating the provision of safety appliances on derricks, cranes and winches

20. The Indian Carriage by Air Act—An International Convention for the unification of certain rules relating to international carriage by air was signed at Warsaw in October, 1929, Governments The certain damage caused to passengers or goods

Under [Convention was not signed on behalf of India but its provisions were examined by the Government of India and were found suitable to Indian conditions The present Act gives effect to the Convention in British India (8 2) The Convention applies only in respect of international carriage by air, is, carriage between two States signatory to the Convention, but as there is no law on the subject in India, beyond the general law of contract and the law relating to carriers on land, the Act empowers the Governor General in Council to make rules extending the provisions of the Convention also to internal carriage by air (s 4) The rules contained in the First Schedule to the Act are the provisions of the Convention relating to the rights and labilities of carriers, passengers, consignors; consignees and other persons Under rule 17 the carrier is liable for damage sustained in the event of the death or wounding of a passenger or any other bodily injury suffered by a passen-ger, if the accident which caused the damage so sustained took place on board the aircraft or in the course of any of the operations of embarking or disembarking The carrier is liable under or disembarking. The carrier is liable under rule 18 (1) for damage sustained in the event of the destruction or loss of, or damage to, any registered luggage or any goods, if the occurrence which caused the damage so sustained took place during the carringe by air The carrier is liable for damage occasioned by delay in the carriage by air of passengers, luggage or goods. The carrier is not liable if he proves that he and his agents have taken all necessary measures to avoid the damage or that it was impossible for him or them to take such measuses carriage of goods and luggage the carrier is not hable if he proves that the damage was occasioned by negligent pilotage or negligence in the handling of the aircraft or in navigation and that, in all other respects, he and his agents have taken all necessary measures to avoid the damage (r 20) Under r 21 if the carrier proves that the damage was caused by or contributed to by the negligence of the injured person the Court may evonerate the carrier wholly or partly from his liability. In the carriage of passengers the liability of the carrier for each passenger is limited to the sum of 1,25,000 francs By special contract, the carrier and the passenger may agree to a higher limit of liability In the carriage of registered luggage and of goods the liability of the carrier is limited to a sum of 250 francs per kilogram As regards objects of which the passenger takes charge himself the liability of the carrier is limited to 5,000 france per passenger (r 22) The sum in francs to be converted into rupecs at the rate of exchange prevailing on the date on which the amount of damages to be paid by the carrier is ascertained by the Court [s 2 (5)] Under r 23 any provision tending to relieve the carrier of liability or to fix a lower limit than that which is laid down in these rules is null and void contained in the Second Schedule determine the persons by whom and for whose benefit and the manner in which the liability of a carrier in respect of the death of a passenger may be enforced

The Sea Customs (Amendment) Convention Under s 42 of the Sea Customs Act, 1878, a defines the hability of air carriers for injury or drawback of seven-eighths of the customs duty damage caused to passengers or goods. The paid on goods on importation is remarkable at the time of ic-export of the goods subject to certain conditions. This provision was originally conditions This provision was originally present Act makes some necessary amend-intended to apply to merchandise imported for ments of a formal nature in certain enactments sale in order that goods remaining unsold in this specified in the I list Schedule to the Act and country might be sent for disposal in other repeals certain enactments to the extent menmarkets without the handicap of a tax practice, however, the concession was allowed oven in respect of goods which have passed into use after import in violation of the ordinary accepted principle that customs duty is a faxou consumption. In many cases—r.g., cars and einematograph films the goods spend much or most of their useful life in this country within the period allowed before re-exportation under tories Act 1911, which imbodied the great claim for drawback. The Government of India majority of the proposals and included some felt that the grant of drawback on used goods other alterations that experience had shown to be desirable. The present Act is based on the payment of such drawback should be discontained exempting special cases to be mescribed. Labour Commission's recommendations and the the period allowed before re-exportation under payment of such drawback should be discon-tinued except in special cases to be prescribed by tules made in this behalf. The present Act gives effect to this decision by amending the original Act. The Governor General in Council, under s 2, may make rules, in respect of goods which have been taken into use between importation and re-exportation, (a) modifying the amount of duty to be paid as drawback or (b) prohibiting the repayment of duty as drawback or (c) varying the conditions for the grant of drawback by restricting the period after importation within which the goods must be re-exported

of the present Act, was governed by the Indian Aircraft Act, 1911 In 1910 an International Convention was signed by the plenipotentiaries of 27 countries, with the object of establishing regulations of universal application and of encouraging peaceful intercourse with nations by means of aerial communications To this Convention India was a signatory The Convention deals with all questions relating to inter-national aerial navigation, and also provides for the institution of a permanent International Commission for Air Navigation, with very wide powers as regards the formulation of rules, the marking of aircraft, the grant of certificates, rules of the air and so forth, This Commission meets from time to time to amend the annexes of the Convention, which contain the detailed rules to be observed by the aircraft of all signatory States and by all aircraft when within the boilders of those States The present Act boiders of those States The present Act enlarges the rule-making powers of the Governor General in Council in order to meet modern an order sb-s. (1) of s 2 of the Bengal developments, enables Government to give full Criminal Law Amendment Act, 1930, might be effect to the provisions of the International made. The Supplementary Act expires in Convention and its annexes and provides for April 1935. The present Act removes the time certain other matters on which legislation has become necessary. The Indian Aircraft Act,

27. The Assam Criminal Law Amendment. 1911, is repealed

23 The Mechanical Lighters (Excise Duty) Act.—With the imposition of a considera-

to certain 24. The Repealing and Amending Act.—The originally present Act makes some measury amend-Initioned in the Second Schedule

25. The Factories Act.—The Royal Commission on Labour in India made a number of recommendations for the amendment of the Indian Factories Act, 1911—These were published with their Report in July 1931. After examining these in detail, the Government of India drafted a bill to replace the Indian Technology. India drafted a bill to replace the Indian Pacsuggestions offered by associations of employers and employed and like organizations. The following are some of the recommendations of the Labour Commission which have received 16 is designed legi-intive sanction 5 protect workers against the effects of excessive heat. The Chief Inspector may serve or give the Manager of a factors in order in writing "-pecifying the mersures which should be adopted if it appears to him that the cooling properties of the air in the factors are at times insufficient to secure workers against injury to health or againt 22 The Indian Aircraft Act.—Acrial serious discomfort 5 34 reduces the working navigation in British India, before the passing hours of adult workers to 51 hours in a week in of the present Act, was governed by the Indian non-seasonal factories and to 60 hours in seasonal factories In the proviso a special exception is made in favour of factories where the processes must go on throughout the day, such as factories providing electric power and light, waterworks, etc. 5.30 reduces the hours for adult work in non-seasonal factories from 11 to 10 hours in a day. S. 51 imposes restrictions on the working hours of a child. A child cannot be allowed to work in a factor; for more than five hours in a day. The hours of work in a factor, for more than five hours of work. than five hours in a day. The hours of work of a child must be so arranged that they do not spread over more than seven and a half hours in any day

26. The Bengal Criminal Law Amendment Supplementary (Extending) Act.—The Bengal Criminal Law Amendment (Supplementary) Act, 1932, empowers the Local Government, with the previous sanction of the Governor General in Council, to make an order committing to custody and applicated and previous against when in a jail outside Bengal any person against whom an order under sb-s. (1) of s 2 of the Bengal Criminal Law Amendment Act, 1930, might be made The Supplementary Act express in April 1935 The present Act removes the time

27. The Assam Criminal Law Amendment upplementary) Act.—S 15 of the Assam (Supplementary) Act. Criminal Amendment 1934, Lan Act, Act.—With the imposition of a considerable duty on matches an abnormal development of Judicature at Fort William in Bengal to of the use of mechanical lighters is anticipated. This would mean a loss of duty and interference Commissioners under that Act, and to provide with the business of the Indian match manufacturing industry. The present Act therefore and for the confirmation by that Court of senting industry. The present Act therefore and for the confirmation by that Court of senting industry and in the rate of one ruped and eight annua per lighter on every mechanical senting in the confirmation by that Court of senting industry in the rate of one ruped and for the confirmation by that Court of senting industry in the rate of one ruped and eight annual per lighter on every mechanical senting in the court in the rate of one ruped and eight annual per lighter on every mechanical senting in respect of persons arrested or detained customs duty leviable on these is also correst in custody under the Act of the powers exercisation of the code. purports to give jurisdiction to the High Court

The original Act did not permit the of the territories concerned also entered into an petroleum represent to take effective steps to put the issue by the Government of India of a set of scheme into operation the scheme were —(1) that the restriction scheme should remain in force in the first last ince up to the 31st December 1938, and its continuation thereafter should be subject to a review of the position by the Governments concerned, (2) that, during the currency of the scheme, the exports of rubber should be restricted to certain percentages of predetermined basic quotas, (3) that the import of rubber should be prohibited except under license, (4) that the stocks of rubber held by owners should be restricted, (5) that existing areas under rubber should not be extended except for exclusively experimental purposes, and in such cases only up to a maximum of one quarter of one per cent of the areas under rubber at the date of commencement of the restriction scheme and (6) that the replanting of areas under rubber should be restricted to a maximum of ten per cent of the area under rubber at the date of commencement of the scheme during each control year, and to 20 per cent, during the whole currency of the scheme. The present Act gives legislative sanction to this scheme

29. The Indian Income-tax (Amendment)
Act—In accordance with s 27 of the English
Finance Act, 1920, the United Kingdom grants a refund to a doubly taxed assessee (a) at a rate equal to one half of the United Kingdom rate of tax, or (b) at a rate equal to the Indian rate of tax, whichever is less. The relief given by British India is regulated by s. 49 of the Indian Income-tax. Act, 1922, which provides that where the relief obtained in the United Kingdom. is at a rate less than the Indian rate of tax, the assessee obtains a refund to cover the difference subject to a minimum of one half the Indian rate of tax Owing to recent increases in the Indian rate of tax Owing to recent increases in the Indian rate of taxation coupled with the protection offered to the steel industry in recent reduction in the British rate of Incomelludia by the Steel Industry (Protection) Act, tax from five shillings to four shillings six pence 1927, as subsequently amended, expired on the in the pound, in certain cases the effective rate 31st October 1934. In accordance with the of Indian income-tax is greater than the effective provisions of that Act an enquiry as to the rate of United Kingdom income-tax. In these extent, if any, to which it was necessary to cases a 49 of the Indian Act has the effect of continue protection to the industry and as to leaving the assesse after he has obtained refunds the manner in which any protection found both in the United Kingdom and in India, necessary should be conferred, was made by the hable to an amount of tax which is less than if Tariff Board The present Act gives effect he had been taxed singly at the higher rate to the protective measures recommended by The present Act therefore provides that when the Board The recommendations of the Board the income doubly taxed has obtained relief in involved a very considerable reduction in the the United Kindgom the balance of relief level of import duties in certain important cases

30. The Act.-The Petroleum Indian The Indian Rubber Control Act.—In Petroleum Act, 1899, was passed at a time of the catastrophic fall in the price of when the use of petroleum, particularly of The main features of rules applicable throughout British India and the only way in which it was possible to secure uniformity was by the issue by Local Govern-ments from time to time of similar rules with the sanction of the Central Government present Act transfers the rule-making powers to the Central Government

> The Act applies to the whole of British India [S 1 (2)] S 2 defines "petroleum" as any liquid hydro-carbon or mixture of hydro-carbon. and any inflammable mixture (liquid, viscous or solid) containing any liquid hydro-carbon "To transport" petroleum means to move petroleum from one place to another m British India, and includes moving from one place to another in British India by sea or across territory in India which is not part of British India Ss 3 and 4 provide for control over the import, transport and storage of petroleum by empower-mg the Governor General in Council to make Under s 8 no license is rules in this behalf needed for the import, transport or storage of dangerous petroleum not intended for sale if the total quantity does not exceed six gallons contains exemptions intended for owners of motor conveyances and stationary engines Clause (a) exempts petroleum kept in a tank in a motor conveyance or an internal combustion engine from the requirement of a license Clause (b) allows the owner of a motor conveyance or engine to keep a stock of spare petroleum not exceeding 20 gallons Ss 14 to 22 deal with the testing of petroleum Ss 23 to 28 Ss 23 to 28 usions Under contain the necessary penal provisions. # India and the League of Nations.

Indir is a Founder-Member of the League of Nations and enjoys in it equal rights with other Neinber-States, a position which she mainly owes to the goodwill shown towards her advancement and aspirations by Great Britain and the Self-Governing Dominions of the British Empire The League of Nations was established under the terms of the Peace Treaty which was signed in Paris in 1919 after the conclusion of the Great War Great Britain and the Self-Governing Dominions in 1917 passed a resolution which set India upon the road that led to the high international platform on which

she stepped India was represented at the Imperial War Conference of 1918, at the Imperal Conferences held in London in 1921, 1923, and 1926, and at the Imperal Economic Conference held in London in 1930 The report of the Inter-Imperial Relations Committee of the Imperial Conference, which was adopted by the Conference of 1926, stated the position of Great Britain and the Dominions to be "autonomous communities, equal in status, in no way subordinate to one another in any respect of their domestic or external affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of India is not yet a Self-Governing Dominion to the extent indicated in this formula The first stage in the direction of establishing Responsible Government in India was prescribed by the Government of India Act, 1919, but the Governor-General of India does not yet (to quote again from the Inter-Imperial Relations Committee) hold "in all essential respects the same position in relation to the administration of public affairs" in India as is held by His Majesty the King Emperor And there are certain other in Great Britain respects in which India's Constitutional position in the Empire is not the same as that of the Self-Governing Dominions India, for example, is not entitled to accredit a Minister

Plenipotentiary to the Heads of Foreign States
The position enjoyed by India in the Empire
governed the position which she entered when,
as one of the States of the Empire, she joined
in the Paris Peace Negotiations in 1918-19
India's membership of the League of Nations
places her in a unique position among all nonself-governing States, Dominions, or Colonies
throughout the world She is an original
member of the League by virtue of para 1
of article I of the Covenant by which the League
was established and which states that any fully
self-governing State, Dominion or Colony not
named in the Annexe may become a member of
the League She is the only original member
which is not self-governing, and in virtue of the
restriction under para 11 of virticle I, on the
admission of members other than original
members she will, so long as the present
constitution of the League endures, remain the
only member which is not self-governing. As a
member of the League, India was for the first
time brought into direct and formal contact
with the outside world as a separate entity

India is a Founder-Member of the League of She was treated as if she had attained to the ations and enjoys in it equal rights with other same kind of separate nationhood as that ember-States, a position which she mainly enjoyed by the Dominions

India's Attitude,
On questions coming before the League,
India has exactly the same rights as any other Member-State The Secretary of State for India in His Majesty's Government is ultimately responsible for the appointment of Indian delegates and for their instruction, but in practice, he and the Government of India act jointly in consultation and agreement with one another Partly as a result of her member-ship of the League and partly owing to resolu-tion No IX adopted by the Imperial War Conference in 1917, recommending inter alia recognition of the right of the Dominions and of India to an adequate voice in British foreign policy and foreign relations, India has been given the same representation as the Dominions at all international conferences at which the British Empire is represented by a combined Empire Delegation On many occasions in fact she has taken the lead in forming world opinion towards the achievement of the League's aims In particular in the international Labour organisation she has been successful in bringing Empire policy into line with her own on more than one occasion. In many of those conferences, particularly those of the League, Indian delegations have taken an independent line of action, sometimes directly opposed to the attitude of other parts of the British Commonwell. wealth One interesting case occurred in 1920 at the Genoa Maritime Conference when Indian delegates in the face of opposition from the Empire managed to secure a mandate for special treatment for Indian sailors in British shipping although there was a concerted move from the Empire delegation to get Indian lascars driven off British ships

#### India's New Status

It will be observed that the situation created by India's stepping from the Imperial Conference into the Paris Peace Conference and League of Nations in the manner in which she did was in certain respects highly anomalous and one impossible to harmonize with her constitutional position as defined in the Government of India Act. Nevertheless, as the Secretary of State, in a Memorandum presented to the Indian Statutory Commission by the India Office in 1929, showed, "It has been the deliberate object of the Secretary of State to make India's new status a reality for practical purposes within widest possible limits" It was not legally possible for the Secretary of State to relinquish his constitutional power of control, nor, consistently with responsibility to Parliament, could he delegate it "But it has been his constant endeavour to restrict its exercise to a minimum, to keep even its existence as far as possible in the background, and to allow to the Indian Government the greatest possible freedom of action under the original of their Legislature and of public opinion"

١.

# Labour in India.

Growth of the Labour Problem.—India is and has always been a pre-emmently and predominantly agricultural country and over 70 per cent of her people are dependent on the soil for their livelihood. Except in a comveratively few cases there is no settled and permanent labour force in most industrial centres in India The vast majority of industries draw the labour they require from the village—labour which seldom breaks its contact with village life and periodically returns to renew its associations with it. This fact cannot be too strongly emphasised. If it is lost sight of it would be most difficult to understand how large bodies of comparatively low paid men and women can afford to participate in strikes involving complete stoppage of work and loss in wages for periods of half a year Such strikes would be impossible if Indian industrial labour did not have agriculture to fall back upon as a -ubsidiary occupation during periods of pro-longed industrial disputes. The figures for the 1'31 Census show that the number of persons occupied in the whole of India amounts to 154 millions or 43 8 per cent of the total population Of this number 68 per cent are men and 32 per cent women The proportion of the working population, 1 c, earners and working dependants, engaged in agriculture is over 102 millions or 66 4 per cent

The emergence of Indian industrial labour as such may be considered to be associated with the year 1880. Its growth and development since that date may be divided, for purposes of broad generalisation, into four periods, (1) from 1880 to 1915. (2) from 1916 to 1921, (3) from 1922 to 1927, and (4) from 1928 to the present day The first period marks the growth of factory development with a slow but stendy decline in cottage industries The total steady decline in cottage industries The total number of cotton mills in India rose from 58 to 275 and the number of persons, employed from 40.000 to 260.000 The total number of jute mills rose from 22 to 65 and the number of persons employed from 27,000 to 216,000 There was a vast expansion in railways and many new There was industries were established Labour was immobile, earnings in agricultural pursuits were extremely low, commodities were compara-tively cheap, and industrialists were able to get all the labour they wanted by tapping the adjacent villages at any rates of wages they liked to offer so long as they were higher than those which could be carned by work in the Both the men and the women employed were considered to be a part of the plant of the factory, child labour was exploited, and little thought was given to the human element behind the machine Hours of work were excessive NO amenities were provided because the only thing that the worker was expected to do was to work, eat and sleep The provision of housing was a necessary evil which had to be provided where factories were situated away from towns Factories Act was modelled more on the lines of providing against loss of life due to accident rather than from the grinding work which a

factory worker was expected to do The humanitarian employer was considered to be a pest who would run industry and all that indus trialists thought of was the greatest return which could be obtained from the capital invested

The second period emerged soon after the out break of the great war Large contingents of Indian troops were sent overseas, and had to be supplied with adequate clothing and the muni-tions of war Imports of manufactured articles into India were restricted owing to the bulk of the available British tonnage in ships having been commandeered for transport of men and materials to the various seats of war Heavy demands were made by the belligerent countries for raw products India secured the opportunity for which she had been looking for generations. Her credit expanded, her industries thrived and the returns on capital invested in every branch of trade and industry became phenomenal Prices soared Owing to the influx of large bodies of persons into the towns, housing became hopelessly inadequate and rents rose to such an extent as to call for legislative restricsuch an extent as to call for legislative restrictions. But nobody thought of those who were mainly responsible for the creation of the added wealth of India. Labour was still considered to be that inarticulate part of the plant of the factory which it had always been. The end of the War brought visions of an Utopia. Big commercial and industrial enterprises were floated. Agriculturists were securing high press for their produce. Tabour was in great. prices for their produce Labour was in great demand not only in agriculture but also in commerce and industry. The successes which labour met with during the war in demands for increases in rates of wages impelled them to demand further increases with each increase in the cost of living Where demands were not granted strikes were threatened The influenza epidemic of 1918 which swept away large masses of the population of the country created a big gap in the evallable supply of labour, and almost all the strikes of the period for increases in wages were successful owing partly to the necessity for speeding up production and partly to the shortage in the available supply of labour

The gradual demobilisation of the Armies of the War and the closing up of the various Miuntions Works disbanded tens of thousands of men and women who rapidly spent the savings secured during the War The pre-war industries in the beligerent countries could not be reorganised at once. The spectre of unemployment loomed large Credit fell With the fall in credit the demand for manufactured articles declined and prices began to show a marked downward tendency. The year 1922 may be considered as the beginning of this period of reaction and depression and the beginning of the third period in the history of Indian industrial labour. Labour all over the world demanded an improvement in the conditions of life and work. The creation of an International Organisation to deal with all questions connected with labour from an

International point of view and the commitment of India, as one of the signatories to the Treats of Versailles, to the ratification and acceptance, as far as possible, of the Conventions and Recommendations adopted by the International Labour Conference have made it obligatory for her to fall into line with the other industrial world countries of the ameliorating ın The heginning of this conditions period, therefore, saw a radical revision of the existing Factory Law by an Amending Act passed early in 1922. The existing Indian Mines Act was replaced by another Act of 1923 during which year a Workmen's Compensation Act was also passed for the first time Union Act was passed in 1926

The depression in trade and industry which set in in 1922 continued, interspersed with a few short spells of transitory revivals, almost right down to the middle of the year 1934 since when there are apparent the beginnings of a diffinite return to prosperity attempts were made by all c Various all classes of industrialists to reduce the wages of labour in order to reduce costs of production Concerted action taken by the Ahmedabad Millowners' Association to reduce the wages of operatives in the Ahmedabad cotton mills by 20 per cent with effect from the 1st April 1923 was successful to the extent of an eventual cut of 15 625 per cent being agreed to after a general strike lasting more than two months A similar attempt made by the Bombay Millowners' Association in 1925 to reduce wages by 111 per cent was, however, frustrated by a strike lasting for nearly three months which nas eventually settled in favour of the workers by a maintenance of the existing rates on the removal of the Excise Duty of 81 per cent on cotton manufactures in India by a Special Ordinance issued by the Governor-General in Council. Similar attempts made in individual concerns in the Districts succeeded mainly for want of effective combination among the workers No other organised attempts were made to effect reductions in wages There were several reasons for this The most important of these was that after the period of the decline in prices had set in after 1920, real wages, in comparison with the standard of life of the year 1914, began to improve and labour was determined not to let go the advantage gained in the struggles immediately following the end of the War This period was one in which a considerable number of Acts in connection with labour were placed on the Statute Book In addition to these, the Government of India had asked Provincial Governments to consider proposals for legislating with regard to prompter payment of wages. The enquiries held in 1926-27 into the question of Deductions from Wages or Payments in respect of fines indicated legi-lation on the lines of the Truck Acts becoming obvious to the Industrial Limployer that Government were most anxious to do all ther could to improve labour conditions in India The employers, as a whole, therefore, did not de-ire to precipitate matters by insisting on reduction in wages. It was imperative however, that concthing should be done, and

worker to do more work during the existing hours of employment so as to enable the employer to dispense with a number of workers and thus to reduce his Wages Bill.

The fourth period beginning with the year 1928, therefore, saw the advent of Rationalisation or more efficient methods of working. Employers, particularly those in Cotton Mills in Bombay city, proposed to ask workers to mind more machines in return for a compensatory increase in wages. Some advanced firms con-trolling cotton mill agencies actually introduced various efficiency measures in their mills The introduction of these measures necessitated reductions in the numbers employed. The beginning of this period coincided with the entry of the Communists into the Trade Union movement in India

When the so-called Labour Group of the Indian National Congress failed to obtain acceptance of their ideas by the Congress, they formed in January 1927 a Workers and Peasants Party, one of whose objects was "to promote the organisation of trade unions and to wrest them from their allen control" Communist the Teach by the Third emissaries were sent out to India by the Third International to further war against Imperialism, to set ure destruction of capital and to sew the seed of revolution The Workers and Peasants Party started a paper called the "Kranti" (Revolution) in May 1927 which, however, had to cease publication at the end of the year owing to financial difficulties The members of the Party took an active part in the strike of the operatives in the cotton mills in the Sassoon group early in 1928, but their attempts to bring about a general strike in the cotton mills in Bombay failed owing to the opposition of the Bombay Textile Labour Union which had been formed by Mr N M Joshi in January, been formed by Mr & Al Joshi in January, 1926. When another great group of mills in Bombay under the agency of Messrs. Currimbhoy Ebrahim and Sons sought to introduce efficient methods of work, the Communists saw their opportunity. All the operatives of the Currimbhoy group were brought out on the 16th April 1928, and the Communists, with the help of the turbulent elements in the industry brought about a gamplete storyage of nork try brought about a complete stoppage of work by picketing, intimidation and stone throwing in all other mills in Bombay (except two mills at Colaba) by the 26th April Owing to internal dissensions in another Union of cotton mill workers called the Girni Kamgar Mahamandal, they secured the support of Mr A. A Alwe, its President, and formed a new Union called the Bombay Girni Kamgar Union on the executive of which several prominent Communists were appointed. The Communists revived the publication of their paper the "Kranti" and they were successful, by holding almost daily meetings at which revolutionary speeches were delivered and by the publication of hand-bills, in capturing the imagination of the workers and keeping the strike going for a period of nearly six months. They also took an active part in the prolonged strikes of the same year in the Tata Iron and Steel Works at Jamshedon reduction in wages It was imperative lowever, that concerning should be done, and done quickly to reduce costs of production. The only was to do this without reducing wages was, in the view of the employers, to ask the

lities, Port Trusts and other Public Utility Scrices. After the calling off of the General Strike in the Bombay Mills on the 6th October, 1928, they endeavoured to paralyse the cotton mill industry in Bombay by calling several lightning strikes in individual mills on the flimsiest of pretexts, even though the terms of the settlement of that strike required that all disputes between the employers and employed on the interpretation of the terms of agreement should be referred to the Bombay Strike Enquiry Committee which had been appointed by the Government of Bombay to express opinions on the matters in contention

Bombay has seen few riots and disturbances of the type which broke out in the City on the 3rd February 1929 and which resulted in the dc1th of 149 persons and the destruction of property. The Roots Enquiry Committee appointed by the Government of Bombay found that the origin of the roots was the series of indiammatory speeches delivered by certain leaders of the Girni Kamgar Union during the General Mill Strike of 1928 and again during the Bombay Oil Strike which lasted from the 7th December 1928 till after the date of the riots

In 1920 the Girni Kamgar Union succeeded in calling another General Strike in the Bombay Mills on questions connected with dismissals which they interpreted as a direct attack by the Millowners to undermine the Union. The strike, although not so complete in character as the strike of 1928, nevertheless lasted from 26th April to 18th September, 1929, and was called off only when the Court of Enquiry appointed by the Government of Bombay under the Trade Disputes Act had reported in unequivocal terms that the whole blame for this strike lay with the Bombay Girni Kamgar Union. But the Communist group was able to capture the Indian Trade Union Congress at the 11th Session held in Nagpur and to force the moderate elements, consisting of Messrs Diwan Chaman Lall, N. M. Joshi, B. Shiva Rao, V. V. Giri, R. R. Bakhale, etc., to secede from the Congress on that body passing resolutions boycotting the Royal Commission on Labour in India and the International Labour Conference, by appointing the Workmen's Welfare League, a Communist organisation in England, as their Agents for Great Britain, for the declaration of Independence and the-establishment of a Socialist Republican Government of the Working Classes in India.

It is of importance to lay stress on the problems connected with the Communist menace in India. The object of the Communists is not so much the welfare of labour as the spread of revolution. Their ultimate aim is the destruction of capital and the replacement of the established Government by a dictatorability of the proletariat. The manner in which they can achieve this is by penetrating trade unions, by calling strikes in industries, by unduly prolonging them, by putting up strings of preparation or arbitration, and by sending with a fear of back to work into the districts to preach their gospels of class.

thatred and class war to the ignorant masses in the villages of India Fortunately for Industry thirty of the more prominent and avowed Cummunists all over India were arrested in March 1929 under Section 121-A of the Indian Penal Code for organised conspiracy, under the direction of the Communist International and other Associated bodies, to deprive the King of the Sovereignty of British India The trial of these 30 persons in what is now historically known as the famous Meerut Conspiracy case lasted from 1929 to 1932 when some of the prisoners were released on bail pending final judgment Judgment in the case was delivered at Meerut by Mr Yorke, the Sessions Judge, on the 16th January 1933 One of the thirty accused died in prison, three were acquitted and the remaining 26 were sentenced to terms of imprisonment varying from transpor-tation for life to three years. All the convicted persons appealed and substantial reductions were made by the Allahabad High Court in the sentences passed by the Sessions Judge of Meerut reduced to three years' imprisonment victions of three persons were maintained to the extent that their sentences were reduced to the terms of imprisonment already undergone by them and they were ordered to be released from The convictions of nine persons were set aside and they were ordered to be released forthwith Some of the prisoners who were released have made frantic efforts to regain their hold on Labour Unions The good sense of the workers has prevailed in most cases, but the Communists have again succeeded in getting into some of the more important Unions—notably the Railway Unions, and they are again endeavouring to capture the workers in the Textile Industry in Bombay In the absence of strong leadership there are, however, several factions in their camps and different groups are working in the same industry.

The depression in trade which set in about ten 'years ago reached its zenith during the year 1933. The industry most affected was the Textile Several cotton mills in Bombay were closed down—some of them Bombay were closed down—some permanently and their machin of them permanently and their machinery was scrapped. The failure of Messrs Currimbhoy Ebrahım & Sons who controlled ten Mills, aggravated the position and tens of thousands of workers were thrown out of employment as a consequence of the closure of the Mills under this agency In many other cases, the alternative to closure was reduction in the wages in the operatives and over fifty cotton mills of Bombay City reduced their dear food allowances of 80 per cent for male piece workers and 70 per cent for men time workers and all women by an average of about 25 per cent One or two mills attempted working more machines to an individual with shorter hours of work, and, where workers refused, gave them the alternative of pre-war rates of wages for pre-war standards of work or more muchines with higher pay Strikes of comparatively short duration occurred in a few individual mills as a protest against these cuts in wages, but the absence of trade union organisation in the industry coupled with a fear of unemployment sent the workers back to work within a few days of their going

The beginning of the year 1934, however, House, on the 26th I chruary 1934 was darkened by threatening clouds presaging of the Departmental enquiry westiff fights between Capital and Jabour in on the 21st June of the same years connexion with actual and threatened wage A Labour Committee was formed on an all-India basis to call a general strike in all Cotton Mills in India This Committee, however, did not meet with much success except in Bombay and in Sholapur In Sholapur all textile Mills were closed on account of this strike for over three months. In Bombay City more than half the Mills were affected for over two months The Government of Bombay, as a result of the considerable amount of agitation carried on by labour leaders for a full enquiry by an impartial tribunal decided that the Commissioner of Labour should hold a Departmental Enquiry into the whole question of wage cuts in textile Mills in the Bombay Presidency, and the institution of this enquiry was announced in the Officer to look after the Bombay Legislative Council by the Hon'ble workers and for conciliate Sir Ghulam Husem Hidayatallah, Leader of the Commissioners of Labour.

The Report of the Departmental enquiry was published on the 21st June of the same year and the strike in the Bombay Mills was called off prictically simultaneously. This Report will be dealt with in some detail in several subsequent sections of this note

The outstanding events of the year 1934 in the field of Labour were (1) the passing by the Government of India of the New Factories Act, (2) the first Asiata Labour Conference held at Colombo, Ceylon on May 10th, 1931, attended by Labour representatives from India, Japan and Ceylon, (3) the publication of the Report of the Bombay Departmental enquiry into wage cuts, and (4) the passing by the Government of Bombay of the Trade Disputes Concilation Act providing for the appointment of a Labour Officer to look after the interests of textile Mill workers and for conciliation in disputes by the

#### ROYAL COMMISSION ON INDIAN LABOUR.

the Government of India, appointed on 24th May, 1929, a Royal Commission "to enquire into and report on existing conditions of labour in industrial undertakings and plantations in British India, on licalth, efficiency and standard of living of workers and on relations between of living of workers and on relations between employers and employed, and to make recommendations." The Royal Commission consisted of the late Right Honourable Mr J H Whitley as Chairman with the Rt Hon Mr Srinivasa Sastri, Pc, Sir Alexander Murray, Kt, CBL, Sir Ibrahim Rahimtoolah, Kt, KCSI, CIE, Sir Victor Sassoon, Bart, Dewan Chainan Lal, MLA, Miss Beryl M Le Power Power, Deputy Chief Inspector, Trade Boards, England, and Messis N M Joshi, MLA, A G Clow, CIL, ICS, G D Birla, MLA, Kabeer-ud-din Ahmed, MLA, and John Cliff, Assistant General Secretary, Transport and Railway Workers Union, Lingland, as members, and with Messis S Lall, ICS, and A Dibdin from the India Office, I ondon, as Joint Secretaries. Mr J H Green, ML1, was Assistant Secretary. Lt.-Col A J MLI, was Assistant Secretary. Lt.-Col A II Russell, C.B.E., 1 M S., was subsequently appointed as a Medical Assessor and Mr. S. R. Deshpande, B Litt (Oxon), Assistant Commis-sioner of Labour, Covernment of Bombay, was appointed as a Statistician to the Com-mission. The Commission arrived in India on the 11th October 1929 and after visiting several places in India and examining several representatives of the Central and Provincial Governments, the Railways and Associations of Employers and Employed left for England on the 22nd March 1930. The Commission returned on the 11th October 1930 and after touring Cevion and Burma went to Delhi in

The Report of the Commission was published in June 1931 and is a document of first rate importance which will be the text-book of social legislation and labour welfare in India for many scars to come Morcover, the value of its rethe considered opinion of employers, workers menting the Commission's recommendations

The British Government, in consultation with | legislators and officials, all of whom were represented on the Commission Every aspect of the labour problem in India has been considered and discussed and the recommendations number many hundreds and cover a very wide field

A summary containing the principal recommendations of the Royal Commission, classified according to the subjects with which they deal, was given at pages 474 to 484 of the 1932 edition of this publication. The Government of India, in the Department of Industries and Labour, classified these recommendations under six different groups according as they involved or required (1) Central legislation, (2) Adminisreturn action by the Government of India Provincial legislation; (4) Administrative action by Local Governments and Administra-tions, (5) Action by public bodies, e.g., Munici-palities, Universities, etc., and (6) Action by employees and their organisations or by Workers Umons, and the accommendations so grouped were forwarded by the Government of India to all Local Governments and Administrations under cover of a circular letter, dated the 30th September 1931, with a request that Provincial dovernments should give careful consideration and examination to those accommendations in connection with which they were required to initiate provincial legislation or to take administrative action and to bring such recommenda-tions as fell within the last two groups to the attention of public bodies and organisations of the employers and the employed concurned The Government of India published about the end of the year 1932, a first Report showing the action taken by the Provincial Governments up to the 15th July 1932, and by the Central Government up to the 30th September 1932 on the recommendations made by the Commission A second Report showing the action taken by Provincial Governments up to the end of July 1933 and by the Central Government up to the end of October 1933 was published in February 1934 Owing mainly to inancial stringency, Provincial Governments commendations is enhanced by the fact that financial stringency. Provincial Governments they are practically unanimous and represent have so far attempted little local legislation imple-

but the Government of India have not only also been included in the various chapters into passed nine Acts—(1) Act II of 1932 repealing which this note is divided. The changes effected the Employers and Disputes Act, 1860, (2) the in connexion with the Workmen's Compensation Ten Districts Emigrant Labour Act, 1932 which Act, 1923 The Indian factories Act, 1911, as replices the Assam Labour and Emigration amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1924, 1925, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1924, 1925, Act, 1901, as amended by the Amending Acts of 1924, 1925, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, 1923, Act, 1901, as amended by the Amending Acts of 1922, Acts of Act, 1901, as unicated by the Americang Acts 1920 and 1931 and the changes proposed in conformal of 1908 1915 and 1927, and which came into nexion with other existing labour legislation and force on the 1st April 1933, (3) the Trade Recruitment for Assam will be dealt with under Disputes American Act 1932 (4) the Children the various headings into which this chapter is (Pedging of I about) Act, 1933 (5) the Land divided Summaries of the proposals for new or Acquisition (American) Act, 1933, (6) other legislation already onacted are given the Workmen's Compensation (American) below —

Convention adopted at Geneva in 1932 concerning the protection against accidents of the several recommendations of the workers imploved in loading or unloading of Royal Commission is that the besetting Ships but they have also drawn up two others of a mindistrial establishment for the purpose of collecting dates about he made a several recommendation of the several recommendations of the workers. Bill. for (1) securing prompter payments of wages of collecting debts should be made a criminal Bills for (1) securing prompter payments of wages to consisting across angular so make a similar and for controlling deductions from wages in and cognisable offence. In this connection respect of fines, and (2) amending the Indian the Government of India invited the views. Mines 4ct 1923, for certain purposes, especially of all Local Governments and Administrations for reducing the statutory limits of hours of in the Department of India transfer and Labour work in Mines. The Government of India layer, Circular letter, dated the 27th August, 1932 also submitted proposals to Local Governments. The Government of India pointed out that the and Administrations for initiating new legislation proposal aims at preventing two practices in connexion with the following maters

- (1) Employees' liability (Re "Common Employment" and "Assumed Risk"),
- •(2) Extension of Workmen's Compensation to Agriculture and Torestry,
- (3) Making Illegal the Besetting of an Industrial Establishment for the recovery debte.
- (4) Fination of Hours of Work for Dock Labourers
  - (5) Allotment of Sermens' Wages.
- (6) Exemption of Salaries and Wages from Attachment
  - (7) Shortening wage periods, and
  - (8) Arrest and Imprisonment for Debt

for a new and a separate Act for the regulation of such factories Other matters are to be shortly taken up For a more detailed Lnowledge of the action taken administratively by the Provincial Governments, Public Bodies and After a careful consideration of the views of the Employers' and Workers' Organisations, the local Governments and the interested public reader is referred to the two reports referred to the Government of India have come to the above published by the Government of India as it is obviously impossible to give a recital of such matters in a compact book of reference such as the Indian Pear Book But, as it might be of where both official and non-official opinion is considerable interest to the users of the Pear strongly in favour of the proposed measure, to the Indian Year Book

associated with the recovery of debts from industrial workers. One of these is the system whereby money-lenders are permitted by some employers to enter the factory and to collect their dues before the workman receives his pay The other practice is for the money-lender to wait outside the factory gate and to secure payment before the workman can part with any portion of his wages. The objection to both these practices is that they tend to make the payment of interest and the repayment of debts the first charge on wages When the dues are collected within the factory the workman has, as a rule, no means of resisting the deduction, and when the dues are collected at the gate an element of intimidation not infrequently enters into the transaction Government of India recognise that the Commission's proposal does not go far mendations for the control of those factories the possibility of stamping out the practice of not regulated. The Government of India are checking at least the nower of the money leading present engaged in formulating presents. As such the Government of India were disposed provisionally to support the proposal Replies from the Local Governments were asked to be submitted by the 1st January 1933 conclusion that central legislation on the subject The Government of India, 15 not called for however suggested to the Government of Bengal, considerable interest to the users of the Pear strongly in favour of the proposed measure, to Bool to have a summary of the legislative proposals already put through or at present under consideration readily available, we propose to substitute in place of the summary referred to above, summaries of the more important changes already effected or proposed to be made in the near future. Other important recommendation The Principal Section of the mendations made by the Royal Commission have. Bill provides that "whoever losters at or near any Mine; dock, wharf or jetty; railway clauses designed to station or yard, or premises whereon any manufacturing process is carried on, in such manner or in such circumstances as to afford tion apparently becau just grounds for suspicion that he is so loitering with a view to recover any debt from any workman employed in such Mine, etc., shall be punished with imprisonment which may extend to six months or with fine or both Proposals to undertake similar legislation in other Provinces are under the consideration of some other local Governments

The Prohibition of the Pledging of the Labour of Children—The Royal Commission found evidence in such widely separated areas as Amritsar, Ahmedabad and Madras of the practice of pledging child labour, that is, the taking of advances by parents or guardians on agreements, written or oral, pledging the labour of their children. In some cases the children so pledged were subjected to particular larly unsatisfactory working conditions The Commission considered that the State would be justified in adopting strong measures to eradicate The Government of India accepted the exil the evil The Government of India accepted this recommendation and introduced a Bill in the cof Industries and Labourissued a circular letter. Legislative Assembly in 1932, proposing to dated the 3rd February 1932, addressed to all impose penalties on parties to agreements pledging the labour of children and on persons the Chief Commissioners of Delhi and Amer-knowingly employing children whose labour has Merwara on the subject. The Government of been pledged. The Select Committee on the India pointed out that the two main objections bill introduced an important modification taken by the majority of the Select Committee by providing that "an agreement to pledge to the proposal were (1) that it was the labour of a child "which is made uncertain that the Courts would accept the without detriment to a child and not made in defences which the doctrings were designed to the labour of a child which is made uncertain that the Courts would accept any thout detriment to a child and not made in defences which the doctrines were designed to consideration of any benefit other than reasonable remove, and (2) that if the defences were wages to be paid for the child's services, and inequitable they should be removed for all terminable at not more than a week's notice workmen and not only for specified classes will not be an agreement within the meaning. The latter objection, in their opinion, is met of the definition of such an agreement. The by the Commission's proposal. As regards the first that cases of the kind of the definition of such an agreement The Bill was passed by the Central Legislature in February 1933, under the title of "Children (Pledging of Labour) Act" Sections 2 and 3 of the Act were to be brought into operation at once and the whole of the Act with effect from 1st July 1933

Employers' Liability (Re: "Common Employment" and "Assumed Risk")—At page 315 of their Report, the Commission recommend that a measure should be enacted abrogating for all workmen the defences of "common employment" and "assumed risk" in civil suits for damages arising out of amples in civil suits for damages arising out of employ-ment Persons injured by accident may have a remedy by a suit for damages against their employers in the civil court, and it has been suggested that the law there applicable is inequitable because two defences may be evolved by the employer to defeat claims which he should justly be called upon to meet One is the defence of "common employment" by which an employer can plead that an accident was due to the default of a fellow-workman and the other is the default of a fellow-workman and the other is the defence of "assumed risk" by which an employer is not liable for injury caused to workmen through the ordinary risks of employment, and a workman is presumed to have assumed risks which were sumed to have assumed risks which were apparent when he entered upon his occupation

abrogate there defences in certain cases, but the Joint Select Committee of the Legislature deleted the clauses in question apparently because they were not satisfied that the doctrines, which were derived from the British Common Law, would be accepted by Indian courts They observed at the same time that if the doctrines in question were so accepted and were regarded as inequitable, they should be removed for all workmen and not for the limited classes to which the Workmen's Compensation Bill was to apply little evidence to show that the existing position gives rise to hard-hip, but it is possible that suits are not pursued because of the admitted ambiguity of the law, and the Royal Commission were of opinion that, as the defences in question are inequitable, there is need for ensuring that they cannot be invoked. The majority recommended that a measure for this nurrose should be enacted and that it purpose should be enacted might follow the lines of the clauses deleted in 1923, but should, of course, be applicable to all workmen

The Government of India in the Department former, they state that the cases of the kind to which the proposed law would be applicable are naturally rare, but that in the only reported case which they have been able to trace (9 A L J 173) the doctrine of common employment was unlesstatingly applied. The Government of India incline to the opinion that the defences in question are inequitable and they are therefore not disposed to attach much weight to the fact that they are seldom likely to be invoked or to any remaining doubt that there may be as to thereadiness of the Courts to apply them The clarification of the law would in itself be, in their view, an advantage and they were disposed to favour legislation on the lines proposed by the Commission. The Government of India however requested that Local Governments should consider the possibility of limiting the scope of the law so as to exclude all workmen covered by the Workmen's Compensation Act. or, alternatively, to include only such of these workmen who are in receipt of more than The whole question was Rs 300 per month re-examined by the Government of India in light of the replies received from local Governments and they have decided to defer legislation on the subject for the present.

Amendment of the Land Acquisition Act. 1894—A Bill further to amend the Land When the Indian Workmen's Compensation Act Acquisition Act, 1894, for certain purposes was was first introduced, it had, in addition to introduced in the Legislative Assembly on the the provisions for workmen's compensation, 12th September 1932, It was decided during concerns in the neighbourhood of adequate housing for workmen is one or the to the factory inspection staff urgent needs of industry and this Bill sought to give effect to that recommendation. The

of Work of Dock Labourers There is at present no legal restriction on the hours of work of dock labour in India, and the Royal Commission who examined this question n commended that the normal daily hours pre-criticed by law should be fixed at nine and that overtime should be allowed up to a maximum of three additional hours on any one day, overtime being paid for at 331 per cent over ordinary rates The Government of India line not been able to arrive at any definite conclusions regarding the practicability of controlling the hours of work in the present conditions of dock labour in India and feel a difficulty as to the form which the necessary legislation should take if the recommendations are finally accepted They therefore addressed a circular letter in November 1982 to Local Governments who control Ports, major or minor, asking them to examine the question and to furnish the Government of India with them and that if it be framed as a separate Act there and that it to be framed as a separate Act there would be difficulties in the use of the term "employer" and in framing penal sections. They are disposed to the view that the most suitable method of giving statutory effect to the recommendations would be to amend the Indian Factories Act on the analogy of the Factory and Workshop Act, 1901, of the United Kingdom, expanding the scope of the term "factory" so as to include docks, wharfs, quays, etc

India also ruses the question of minimum age

the debate that the Bill should be circulated tor, under the age of 12 years "upon the handling of purpose of eliciting opinion thereon. The goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of goods at piers, jetties, landing places whare of enactment did not prevent children below the prescribed age being employed on the waterside prophysical such employment or not. The matter prophysical such employment of the Royal Commission on Indian was put beyond doubt by a subsequent amending of a piers, jetties, landing places whare of goods at piers, jetties, landing places whare I abour that the Land Acquisition Act be so Act which covered all employment in handling amended as to enable land to be acquired when of goods "in any port subject to this Act" it is intended for the housing of labour either by The Royal Commission considered that work companies or by other employers. The Royal of this kind is not suitable for children and Commission stated that in a number of instances a system of half time working is not brought to their notice land suitable for the practicable. They therefore recommended that development of housing schemes had been held the minimum age should be raised to 14 years at the owners and that funtation. at ransom by the owners, and that fantastic The Government of India are provisionally in values were placed upon it as the result of the agreement with this recommendation and also construction of factories and other industrial with another which suggests that the enforce-The provision | ment of these provisions should be entrusted Local Government's with major or minor Ports were asked to give effect to that recommendation. The to submit opinions after consulting the interests. Bill was passed by the Indian Legislature in concerned. The majority of bodies consulted September 1933 under the title of the "Land were not in favour of legislation regarding Acquisition (Amendment) Act 1933."

| Acquisition (Amendment) Act 1933." the raising of the minimum age of children employed within the limits of Ports The whole matter is still under consideration of the Government of India in the Department of Commerce

Exemption of Salaries and Wages from Attachment—The Royal Commission have made several recommendations in connexion with the indebtedness of industrial workers and have suggested various methods not only for reducing such indebtedness but also to protect the workers from unnecessary harass-ment in the matter of the repayment of their debts. Their first recommendation in this connexion refers to the recovery of debts through employers The Commission state that under the Civil Procedure Code it is possible for a money-lender to secure the attachment of the wages of any one who is not a labourer or a domestic servant and they understand that the majority of workers in industry views The Government of India have pointed would not be regarded as labourers within the out in their circular letter that if the necessary legi-lation takes the form of an amendment or an amplification of the Indian Ports Act, 1908, it servants and the servants of local authorities, would be straining the scope of the Act thereby, the law allows the money-lender to use the would not be regarded as labourers within the employer as his debt collector to a much larger extent In such cases it is possible to attach half of the employee's salary or the amount by which that salary exceeds twenty rupees a month whichever is less In some cases private employers are required to make similar recoveries although the legality of this is doubtful Thus in the case of an employee in receipt of a regular salary, the money-lender can secure an order directing the railway administration to hand over, month by month, a large part of the employee's salary until the whole decree has The circular letter of the Government of been covered—a period which extends in some cases to years rather than months. The com-parative security of rallway service further increases the attraction of the railway servant India also raises the question of minimum age cases to years rather than months. The comfor the employment of children in ports. As a parative security of railway service further ington Convention fixing the minimum age for admission of children to industrial employment, received by the Commission goes to show that the Indian Legislature passed an Act in 1922 the level of indebtedness in terms of wages is making it obligatory on Local Governments to frame rules under the Indian Ports Act of 1908 prohibiting the employment of children mission, therefore, recommended that the

less than Rs 300 a month or compared entirely a discretion which they did not previously enjoy from the possibility of attachment. If on to refuse to issue a warrant of agreet at the examination there are found to be objections to pleasure of a decree-holder and also to order applying this exemption to exercise employed, the release of debtors who were grounds on a salary less than Rs. 300 ar onto the Corn-unite to pay. No appreciable advance has mission consider that the equinition of "works been made since 1888 for the climination of many in the Many and the contract of the climination of the contract of the climination of the contract of the climination of the contract of the climination of the contract of the climination of the clim man" in the Working of Compensation Actimprisonment of debt might be enitable

of Industry - 31 d 1.25 per 1--ned a circular letter dated the 25th November 1932 to all Local Governments or a Administrations inviting an expression of the services on the subject. The Covernment of India we of opinion that the Commission were disposed to awour the grant of such everyption to all persons receiving less for debt where no contumner is proved should than R-300 a month and they therefore, be abolished either generally or for particular consider that it is desirable to review the quest classes of persons is being considered by the tion-generally and not solely with regard to Government of India industrial employees. Replies to their letter vere a-ked to 6. -abmitted by the 1st April The Government of India is examining the 1933 Theopinio -viewed have been examined possibility of undertaking legislation on an and the question of undertaking legislation is experimental scale restricted to the province of under constitution

Arrest and Arrest and Imprisonment for Debt—should be entered providing a summary processor part 222 of their Report, the Royal dure for the liquidation of workers' unsecured Committee in received at least so debt. The proposals are that (a) the content of the indicate in received or wages should be required to estimate the probable of their amounting to less than Ps 100 per income and resonable expenditure of the work are concerned arrest and imprisonment worker during the ensuing two years; (b) the first discharged by all the content worker during the ensuing two years; (b) the intent has been proved to be both able and between the two sums (c) it should not be possible unvilling to pay. The form of the recommendation would have been also for more than the example in all (d) debts should rank preferentially in the suggests that the Commission would have, in all. (d) debts should rank preferentially in far outed a more general abolition for arrest order of their age, and (e) the possibility of air d'imprisonment for debt had their terms of appointing special courts for summary liquids. reflicate by on wider.

The present law on the subject is contained. Bombay Money-Lender's Bill—The Bombay in Sections 31 and 55 to 59 of the Civil Procedure. Legislative. Council at its meeting on 10th Code read with rules 37 to 40 in Order XXI. March 1934 granted leave to Mr. Seed Munaway Under the substantive provisions of the Code to introduce his Bill to regulate the mode a judgment-debtor other than a woman may be leading busines. In the Statement of Objects be arrested and detained in prison in execution, and Reason. Mr. Munaway stated that depter of a decree. But under rule 37 Order XXI. Extension of Workmen's Compensation to Agriculture and industry—In their recommendation No 234, the Royal Commission suggested that the question of the inclusion of persons employed by the larger agricultural imployers and of those employed in reserved The Government forests deserves examination of India addressed a circular letter dated the 21st December 1931 to all Local Governments and Administrations inviting their views on the subject after consulting the interests concerned Replies were requested by the 1st June 1932 In the light of the replies received, the Govern-ment of India arrived at the conclusion that no action is desirable at present on the question of the inclusion in the Workmen's Compensation Act of persons employed by the larger agricul-The proposal for the inclusion tural employers of freeh employees is still under consideration

Payment of Wages and Deductions -The recommendations of the Royal Commission on Indian I about in connexion with the disbursement of wages fall under three distinct catagories (1) Prompter payments, (2) a legal limitation of the wage period, and (3) the control of deductions from wages in respect of fines. The and the third heads and they introduced the employer or class of employers cannot with Payment of Wages Bill in the Legislative resonable diligence make payment within the Assembly on the 1st February 1933 A motion time specified, to exempt, by general or Assembly on the 1st February 1933. A motion time specified, to exempt, by general or for the circulation of the Bill was moved on the special order to such extent, and subject to 14th 1 ebruary and was adopted. The Bill such conditions as it may think fit such employer was then forwarded to all Local Governments or class of employers from the operation of this and Administrations for opinion after consulting Section, provided, however, that, notwithstandthe interests concerned A motion for the reference of the Bill to a Select Committee was Tabled during the Dellii Session of 1933-34, but was not reached and the Bill lapsed. The Government of Indus took this apportunity of reveing the original Bill throughout in the light of the criticisms received when the original Bill was circulated and a new Bill was introduced in the Legislative Assembly on the 13th Fev-A motion for the reference of the ruaiv 1935 Bill to a Select Committee was adopted on the 18th February 1935. The new Bill, it passed by the Legislature will be one of the most important pieces of Social legislation put through in We reproduce below the more important provisions of the Bill

The whole Act is proposed to be applied to all factory workers and the whole Act except the clauses relating to prompt payment of wages to all railway employees I ocal Governments are, however, to be empowered to extend the 1cf, subject to such relaxations as they may consider necessary to any class of persons employed in any industrial establishment or in any class or group of industrial establishment

(3) The definition of "wages" has been (a) deductions by way of fine, permitted amplified to cover all remuneration which is only under special notices to be posted in all capable of being expressed in terms of money factories, limited to six pies in every rupce of and which is, in accordance with the terms of earnings during the month in which the fine employment or by any contract express or or fines were imposed and not recoverable more implied, to be paid to any person employed in than 60 days from the time a fine has imposed

A motion for the consideration of his employment or of any work done in his employment but does not include (a) the value of any housing provided by the employer, (b) employer's contributions to Provident funds (c) travelling allowances and gratuities payable on discharge and, (d) any terms paid to an employee for defraying Special expenses entailed on him by the nature of his employment This definition will prevent employees from endeavouring to will prevent employers from endeavouring to get round the Act by Setting aside certain portions of mages as bonuses for good attendance or for good work

(4) Section 5 of the Payment of wages Bill requires that wages in all factories controlled by the Indian Factories Act shall be paid before the expire of the seventh day from the last day of the wage period in which the wages have been earned, unless the seventh day is a nonworking day in which case wages should be paid on the first working day subsequent to such non-working day. Where the employment of any person is terminated by or on behalf of the emplover, the wages due are to be paid before the expiry of the second day from the day his On which employ ment terminated As several factories, particularly cotton and jute mills, require considerable time to calculate de- carnings from piece rates of wages. The Bill The unpowers I ocal Governments of they are satis-(mycrnment of India have implemented the fied that owing to special difficulties relating to Commissions' recommendations under the first the calculation or distribution of wages any ing any such exemption, such portion of any wages due as can be paid without undue risk of overpayment shall be paid within the period tixed No provision is made in the Bill for payment for the prompt payment of wages to those workers who terminate their employment themselves with or without giving notice, nor have the Government of India accepted the accommendation made by the Labour Commission that a week's notice on either side should be made legally binding both for the employers and the employed Omission to provide for these matter raises a moot point as to whether the Common Law of Master, and Servant with regard to contracts of employment is to stand or whether the new Bill is intended to set such law aside

(5) The deductions which an employer can make from the wages due to his workmen are defined in Section 6 of the Bill which states that notwithstanding the provisions of sub-section (2) of Section 47 of the Indian Bailways Act, 1890, or of any other law for the time being in force, the wages due to an employed person shall be paid to him without deductions of any kind except those authorised by the Act Deducperson, whose carnings in any one month tions which are authorised by the Act may be amount to less than Rs 100

# INDUSTRIAL WORKERS IN INDIA.

In 1922 India obtained recognit on h; the League of Nations as one of the cight crici-Industrial States in the world. The grounds on -hen this claim was based are stated in the Henorandum prepared by the India Officer which gave the following figures to illustrate the industrial importance of the country :-

"25,957,030 agricultural workers (exclusing p-asant proprietors); 141,000 maritime wor'ers, lasers, etc., a neure second only to that for the United Kingdom; over 20,000,000 workers in industries, transport; railway a ileage in excess of that in every country except the Um: 3 States."

The Laure - for the 1: 31 Population Cense of India shim that the number of Agricultural Laboure - his mires oil to never 311 million This figure cyclides cultivating owners (27 milion) (ultivating Tenants (34 milion) Landlords (34 milion) and others (64 million) The number of carnes plus working dependants, in Industry, Trade, Transport and Minesamoun'to twenty six millions Nearly eleven Mill. including cottage industries, mines and persons are employed as domestic servant.

The latest figures for the numbers employed in factories are those available in the All-India Report for Factories for 1933, which are reproduced in summary form in the tables given below —

#### Growth of Factories

Year								Number of Factories.	Average Daily Number of Persons Employed

In 1931 for the first time since the publication | factories | In 1932, the total number of perenof the above statistics the figures for the number | nial factories amounted to 3,802 with 1,120,510 of factories and the persons employed are workers and the number of seasonal factories classified according to perennial and seasonal amounted to 1,439 with 299,201 workers.

#### MIGRATION.

darly

The principal occupation of India being prigrimages and fairs. (3) Periodic migration riculture there are naturally no large movel which is caused by recurring seasonal demands entry of population from one part to another (4) Semi-permanent migration is that of persons agriculture there are naturally no large movement's of population from one part to another (4) Semi-permanent migration is that of persons Where the migration figures are high it is who maintain constant contact with their generally in the small units. Thus Delhi has homes, although earning their likelihood else-41 per cent, of immigrants and Ajmere-Merwara 19, while in Ajmere City itself there are as many immigrants as there are natives

Immigration influences the population of India as a whole very little The 1931 census shows only 730,562 persons as born outside the country against 608,526 in 1921 As against this must be set off on account of emigration about one million persons who are estimated to have migrated during the decade 1921-1931

As between the different provinces of India, however migration is of more importance, varying in British India from 1,244,249 (net) immigrants into Assau to 15,536 (net) immigrants areasts into the North West Frontice In Assam immigration is the highest among all the provinces in India On the other hand immigration from Billiar and Origen is the In the past the tendency was for migration to take place from the Native States to British India but during the decade 1921-1931 this position has been revised and the trend of migration has been on the whole from British India to the States, where the density is generally lower Among the States, Bikaner provides a most striking example of immigration from British India In 1931, the number of immigrants in Bikaner was 161,303 or 58 per cent, of its increase in population Of the immigrants of its increase in population Of the immi-about 54 per cent were from British India

Internal inigration is of several Kinds, (1) casual inigration, involving minor movements

where, such persons often leaving their families at their native places during the period of migration where they themselves ultimately return from the place of migration, and (5) Permanent migration is that in which the migrants leaves one place for another for good In addition mention may be made here of

another form of migration which may be called

migration is The best example of casual furnished by the Punjab and Delhi migration is particularly heavy at harvest time and also at the changes of season when traders, herdsmen, graziers and labourer, from Kabul, Baluchistan, Kashmir and the hills move down to the plains for the winter months Temporary migration continues throughout the year

neither is Within the Provinces —It necessary nor feasible to deal with the various streams of migration between district and district of the same province or within a district. These movements vary according to times and seasons, but it may be useful to show the extent to which and the source from which some of the more important industrial centres draw their labour force.

Assam's immigration is generally speaking of the permanent type There have however been some changes since 1921 in respect of the sources Madras is the only of Assam's labour supply province showing any increase in emigration to casuat migration, involving minor movements Assam while there has been a great decrease in between neighbouring villages, (2) Temporary emigration to Assam from Bihar and Orissa migration which is mainly due to demand for labour on canals and public buildings and to obtained locally, indicating greater freedom and tinidats. On the other hand the whole complex ion of the population of Assam is being afterea In the permanent immigrants from Maniensingle n Benzul The third class of immigrant in Is-im is the Nehali but their numbers are do reasing

Piliter and Orissa is typical of the rest of India in its mimobility of labour, 959 personout of every 1000 being born therein It has, however a higher emigration figure thin an. other province. The net loss to the province of 15-iii here also a change is however tiking place and the loss by emigration is Laugrents have decreased by 1 97,000 and immerent-have increased by 79,000

In the case of the United Provinces emigration his mere and by a net balance of 1,58,000

emiliation is concerned but its emigration is rubber industries

mostly overseas The 1931 figures show a sery marked increase in emigration to Malaya In the Central Provinces there is a growth in

Duly Migration

As between British and State Territory migration in 1921 was against the States and in favour of British India but this position was reversed in 1931 Whereas in 1921 the net loss to the States was 1,24,000 in 1931 the states gained 4,90,935 from British India

As between British India and the French and Portuguese settlements the balance of migration is greatly in favour of British India

The two most important countries for Indian Recruiting of Indian labour to Malaya was however stopped in 1930 None the less in 1931 over 6 lakhs Indians were found in that country case of Ceylon immigration of Indian labourers Malris is the third highest province so far as continued in spite of the slump in the ten and

#### OCCUPATIONS OF THE PEOPLE.

it the 1931 Census several changes were made were workers and 56 16 rezirds the collection and presentation of occupational statistics. The principal amongst these was that a complete compilation of figures of substitute occupations was attempted for the first time The Census however shows that materid of the proportion of non-working dependents to workers having been reduced by the new distinction between earners and working dependents, the proportion of non-working dependents has actually increased Thus while in 1921 out of every 100 persons occupations per 10,000 hvelilloods according to 40 Were workers and 54 dependants, in 1931, 44 classes and sub-classes -

dependants This increasing dependence is attributed partly to the difficulty of finding employment

The proportion of earners to working dependants is about nine to two, ie, of the total working population 81 4 per cent is in direct receipt of wages or other sources of income and the other 18 6 per cent are helpers of the aroarage or a

The following table shows the distribution of

generally calculated at an evorbitant rate Generally, the employers do not deal directly with the labourers recruited by a contractor. The latter is paid a lump-sum from which he pils his men and retains a portion for himself. In the Central Provinces, however, it is reported that labour is actually purchased from private contractors at so much per head. The system of recruitment by contractors is most in use in burma owing to the scarcity of labour in that province and the necessity of recruitment from distant places.

The method of recruitment through Sardars is also dependent on the payment of advances which are however made at the cost of the employer. The Sardar is an operative already at work in the mill or plantation and is sent out to recruit labour from among his relations, acquaintances or neighbours. He is drawn therefore from the same class as the recruits themselves and can therefore be relied on to deal more fairly with them Another advantage of this system of recruitment is that the men recruited are insured against unemployment and find work waiting for them at their destination On the other hand, it does not infrequently happen, especially in the Tea Gardens in Assam, that the Sardar remits persons who are lured away from their homes by prospects of a bright future and who, on arrival, and that conditions of work and wages are not so bright as they imagined It is, however, only in plantations that this form of recruitment has been used to any appreciable extent.

The recruitment of labour at the mill-gate or at the pithead in the case of mines is of recruitment which 18 gradually gaining in importance over other two methods. The news of the much higher rates of wages paid in towns (which to the villager counds fabulous as he has no idea of the higher cost of living) spreads throughout the countryside and draws large crowds of would-be workers They are to be found at convenient gathering places on the thorough-fares waiting to be picked up for employment The older hands also return from their village with groups of friends, relations and neighbours who come in the hope of finding employment in the mills But the ignorance, simplicity and in the mills poverty of the Indian peasant render his explor-tation an easy matter The employer does not recruit himself the men required for his establishment but holds the overseer, jobber or mukadam responsible for the adequate supply of labour in the department The latter takes the place of the contractor and exacts bribes from the new He also acts as a money-lender and thereby reaps a double harvest from the needy labourer. It would appear therefore that education and organisation are the only means by which Indian workers can escape from the clutches of intermediaries who like harpies are ever ready to prey on them

In the coalfields in Bihar and Orissa unskilled labour is recruited by means of Sardars. The Sardar visits villages and brings the labour with him, and the labour brought by him forms his gang. He has to pay the labour bucksheesh, labour bucksheesh, labour bucksheesh, and travelling expenses, and for this purpose he frequently receives advances either lafter approved service.

from the contractor of from the Company concerned At the Bhowrs Colliery advances varying from Rs 3 to Rs 10 are paid to the recruits in addition to their travelling allowances and food Such advances are seldom recovered and never if the gang maintains good attendance at work. The Sardar obtains remuneration for his services in various ways. Sometimes he is paid a commission and a salary, but generally he is paid a certain amount on each ton of coal raised by miners working in his gang. Independent recruiters are paid at 9 pies per tub raised. In the Central Provinces the recruiters or mukadams as they are called receive 3 pies per head per week from the individual labourers whom they recruit and wages from the employers.

The Tata Iron and Steel Company at Jamshedpur maintain an Employment Bureau where skilled and unskilled workers are registered and employed Applicants for work assemble in a yard and daily requirements are selected by the officer in charge. No outside recruitment is done in the literal sense of the word, but in the event of special qualifications being required and no applicants being available, the post is advertised in a few leading newspapers

The methods adopted by different Indian railways for the recruitment of unskilled labour are generally the same as those which obtain in other industries. In the case of workshopmen, a trade test is generally given and in every case a medical examination has to be gone through. Special apprentices for the higher grades are engaged by all Railways. The terms and conditions attached to apprenticeship in most cases are similar.

The Royal Commission on Indian Labour has made several recommendations with regard to the employment of the factory worker for the guidance of employers in general We reproduce below some of the more important of these recommendations—

- (a) Jobbers should be excluded from the engagement and dismissal of labour.
- (b) Whenever the scale of the factory permits it, a Labour Officer should be appointed directly under the General Manager His main functions should be in regard to engagements, dismissals and discharge
- (c) Where it is not possible to appoint a whole time Labour Officer, the Manager or some responsible officer should retain complete control of engagements and dismissals
- (d) Employers' Associations in co-operation with trade unions should adopt a common policy to stamp out bribery
- (e) Where women are engaged in substantial numbers, at least one educated woman should be appointed in charge of their welfare and supervision throughout the factory
- (f) Workers should be encouraged to apply for definite periods of leave and should go with a promise that on their return at the proper time they will be able to resume their old work Whenever possible an allowance should be given to the worker who goes on leave after approved service.

Messrs E D Sassoon & Co, who control eleven cotion textile mills in Bombay and the Burma-Shell Corporation, have appointed Special Labour Welfare Officers to recruit labourers and look after their welfare. The acute trade depression has, however, prevented a more general adoption of this system but several firms are making noteworthy attempts to improve existing methods of reciultment in factories

Following the appointment, by the Government of Bombay, of a special Labour Officer (Mr. W. B. Gilligan 108) under the Bombay Trades Disputes Conciliation Act, 1934, to watch the interests of working a employed in cotton textile mills in Bombay City and the Bombay Suburban District with a view to promote Parmonious relations between employer and workmen and to take steps to represent the grievances of workmen to employers for the purpose of obtaining their redress, the Millowners Association Bombay, appointed, with effect from November 1st 1931, a special Labour Officer [Mr C A Dalal, BSC (Islon) (London)] to look after the interests of the Association

Recruitment for Assam I he Labour and Langration Act, 1901, was designed mainly to regulate the recruitment engagement of indentured labour It and It had not been possible for some years for any worker in Assam to be subjected to a penal contract and, in consequence of this and other changes, the law became entirely unsuited to present conditions. Attempts were made by amending Acts in 1908, 1915 and 1927 to adapt the Act to most altering conditions. Subthe Art to meet altering conditions Sub-stantial parts of the original Act were repealed and large numbers of rules framed in an en deavour to use the Act to regulate the recruitment of emigrants who are subject to no indenture. These changes proved inadequate and they made the law extremely confused. Large parts of the surviving provisions of the Act became completely ineffective and provisions which were operative were open to weighty criticisms

During the years 1926-1928 the Government of India carried on consultations with the Local Governments in regard to amending the law governing accountment of labour for the Assam tea gardens In the meanwhile, the Royal Commission on Labour had been appointed and they collected a large amount of evidence on the subject The Commission recommended the replacement of the existing legislation by a new enactment and suggested that the power conferred by section 3 of the Assam Labour and Langration Act of 1901 to prohibit recruitment for Assam in particular localities should be withdrawn immediately. They recommended that the new Act should provide (a) that no assisted emigrants from controlled areas should be forwarded to the Assam tea gardens except through a depot maintained either by the Tea Industry or by suitable groups of employers and approved by the Local Government or by such authority as it may appoint, (b) that the Government of India should have power to frame rules regarding transit arrangements, in particular for the laying down of certain prescribed routes to Assam and for the main-

that in the event of the recrudescence of abuses, Government should have power to reintroduce in any area the prohibition of recuutment otherwise than by means of licensed gardensirdars and licensed recruiters. Another recommendation of the Commission was that the Assam Labour Board should be abolished and in its place the Government of India should appoint a Protector of Immigrants in Assam to look after the interests of emigrants from other Provinces With regard to the question other Provinces With regard to the question of a patriation, the Commission recommended that every future assisted emigrant to an Assam ten garden should have the right after the first three venus to be repairanted at his comployer's expense and that the Protector should be empowered to repairate a garden worker at the expense of the employer within one year of his arrival if it is found necessary on the ground of health, unsultability of the work to his personal capacity or for other sufficient reason.

The Government of India framed a Bill called the Tea Districts Emgirant Labour Bill, based mainly on the recommendations of the Com-mission but with variations in respect of minor The Bill was introduced in the Legislative Assembly on the 11th March 1932 and was circulated to all Local Governments for opinion It was then referred to a Select Committee who presented then Report to the Assembly on the 5th September 1932. The Bill as amended by the Select Committee was passed by the Indian Legislature in September 1932 and received the assent of the Governor-General on the 8th October 1932 The new Act came into operation October 1932 from the 1st April 1933.

The Tea Districts Emigrant Labour Act, 1932, extends to the whole of British India including the Southal Parganus and repeals the Assam Labour and Emigration Act, 1901, and the subsequent amending Acts The first object of the Act is to make it possible, on the one hand, to exercise all the control over the recruitment and forwarding of assisted emigrants to the Assam Tea Gardens as may be justified and required by the interests of amijustified and required by the interests of emigrants and potential emigrants; and, on the other hand, to ensure that no restrictions are imposed which are not justified Local Governments are empowered, subject to the control of the Government of India, to impose control over the forwarding of assisted emigrants (Chapter III) or over both their iccruitment and their forwarding as occasion may dictate (Chapters III and IV) Limployers will be prevented from recruiting otherwise than by means of certificated garden surders or licensed It is made unlawful to assist persons under 16 to emigrate unless they are accompanied by their parents or guardians. With regard to by their parents or guardians the question of repatriation (Chapter II), every amigrant Libourer, on the expiry of a period of three years from the date of his entry into Assam, will have the right of repatriation as against the employer employing him at such expiry (Section 7) and any emigrant labourer who before the express of three years from his entry into Assam is dismissed by his employer otherwise than for wilful and serious misconduct will also have the right of repatriation (Section 8(1)) It will also be possible to claim repatriation within three years in the event of the tenance of depots at necessary intervals, and (c) emigrant falling in health, not being movided

with suitable work or having his wages unjustly ian annual cess called the Emigrant Labour withheld of for any other sufficient cause (Section 10 (1)) Further, repatriation can be ordered at any time by a criminal court in the ense of a Libourer who has been assaulted by the employer or by his agent (Section 11) Where an employer fails to make all the necessiry arrangements for the repatriation of a libourer working under him within fifteen days from the date on which a right of repatriation tions in the eight specified districts in Assam in crises to an emigrant labourer the Controller mix direct the employer concerned to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (Sections 13 and 15)

5 ction 3 of the Act makes provision for the appendment of a Controller of Emigrants with some staff and possibly one or more Deputy Controllers for supervising the general administration of the system which the Act seeks to establish, and the charges are to be met from an the previous year

cess which shall be levied at such rate not exceeding Rs 9 per each emigrant as the Governor-General in Council may, by a notifica-tion in the "Gazette of India," determine for cach year of levy

The provisions of the Act are intended to apply only to emigration for work on tea plantathe first instance, but power is retained to extend its application to other industries and to other districts in Assam if necessary (Section 38)

Latest Statistics -The Annual Report on the working of the Assam Labour Board during the year ending the 30th June 1933 is the latest available. The Report shows that the total number of persons who immigrated into Assam during the year was 39,901, as against 50,997

The following tables shows the number of immigrants into the province of Assam by age and sex groups for the last five years --

Sex and age of Labourers	1928-29	1929-30	1930-31	1931-92	1932-33

The birth rate in the Assam Valley Division was 36 41 as against 31 97 in the previous year and in the Surma Valley and Hill Division 32 32 as against 36 26. The death rates were 21 30 as against 22 16 and 19 69 as against 21 43 respectively. The total garden population rose by 17 000 during the year under report and stood at 1,089,490

Reforms in the Bombay Cotton Mill Industry—In a circular letter dated the 8th January 1930 the Bombay Millowners' Associa-tion instructed all mills affiliated to the Association to introduce, wherever possible, a policy of direct recruitment of labour instead of the existing practice of recruitment through The introduction of a system for jobhers providing Discharge Certificates to operatives leaving service was also recommended The certificates are to contain a record of the service of the operative concerned and in all cases of recruitment, the men presenting themselves for employment will be asked to produce their Discharge Certificates Kotices are to be their Discharge Certificates posted at all mills stating (a) that all persons heads of departments, assistants or obbers to be more generally adopted.

accepting bribes from the workpeople will be instantly dismissed

Several groups of mills are considering the possibility of employing labour officers who will be responsible for the direct recruitment of labour and for welfare work generally. The action taken by Messra E D Sassoon & Co in this connexion has already been referred to abore

As far as employment of substitute labour is concerned most concerns outside cotton textile mills keep a five to ten per cent force of spare hands in addition to the regular numbers required on the musters. In textile mills, substitute labour is engaged every morning at It is interesting to observe that the gates Messrs I D Sassoon & Co, for their ten mills in Bombay, and a few other employers in India have started the practice of "Decasualisation" by which employment tickets are issued to a number of workers generally about ten per cent of the standard muster, and substitutes are engaged only from those who have such By the adoption of this system will be engaged by the Manager or by the head influence of the Jobber is minimised and bribery of the department concerned, and (b) that any made difficult. The system is one which deserves

#### ABSENTEEISM AND LABOUR TURNOVER.

Though there is measte statistical information ; low-rate throughout the year and also of the himself. The renous for his alreace ire not, always connected with his love of real but in many cares absence is due to carres beyond his control such as sickness, domestic

The factory Jahour Commission of 1907 made an inquiry into the number of about workers and came to the conclusion that the average worker took 2 days off every month and workers and came to the conclusion that the sounds publishes in the Indian linear linear start a contract of the conclusion that the sounds publishes in the Indian linear the attention of the Indian Earth Board (Cotton, for each day during any month are examined Textule Industry) and it was until in exidence it is found that they are higher on days imme-Textile Industry) and it was useful in evidence it is found that they are higher on days immediately make them that the efficiency of thour in Bombay was greatly reduced by the high percentage of absenteels mamong the operatives the flaunce for presented at encentage of absenteels mamong that Ahmeda and the Board came to the conclusion that Ahmeda and the whole year for rotton to this bad had a great advantage over Bombay in infills in three important to attach it. Bombay the matter of absenteels, both in respect of a

exallable on this subject, it may be stated with a fair amount of accuracy that the hullan worl of the while research tarixions which is more habituated to about himself from work than his prototype in other countries industry. They therefore recommended that work than his prototype in other countries in order to minimize the effect of about that he has yet to get himself thoroughly adopted there should be a contribution of a system to the industrial review of the reason for his about the total which a contribution of a system to the reason for his about the total which a contribution of a system. which a certain number of spars hands are entert dued to each department, except the mersing. The Best hald "The percentage of extra men in each department is not necessally difficulties, etc. The effects which poor and the same, but we ver else not necessify indifferent hou me have on his work will be same, but we ver else no the mill, it usually dealt with in the section on Industrial Housing, worked out at about 10 per cent."

In the Electrical and Mechanical Departments of Railways, absenteeism generally amounts to 10 to 11 per cent. As in cotton mills, absenteeism is greater immediately after pay day. In Railways in Burma, absenteeism is lower and roughly amounts to 2 50 per cent

Labour Turnover —A charge is very often levelled against the Indian worker that owing to his migratory character, he changes his place of employment very frequently and that this results in a high rate of labour turnover. There is however, very little information available regarding the average period of service or the rates of turnover at important industrial centres in India In the case of the Empress Mills at Nagpur, it has been estimated that since 1908, the average period of continuous service or the employees amounted to 7 89 years another cotton mill in the Central Provinces the average duration of employment worked out at about 40 months while in the case of other factories it roughly amounted to about 30 months Out of a total number of 3,700 workers engaged in the Pench Valley Coal Mines it was found that 1,550 workers were in employment for less than a year, 650 from 1 to 2 years, 700 from 2 to 3 years and 800 workers had more than 3 years' continuous service to their credit. In the manganese mines in the Central Provinces the average duration of employment comes to about 9 to 10 months for the whole of the labour force in any one year. One to two years is on an average the period of employment of workers in the Tata Iron and Steel Works The total labour turnover during normal working for three years in the same Works amounted to 36 6 per cent, 31.3 per cent and 21.1 per cent respectively. In the Indian Cable and Construction Company in Bihar and Orissa, however, skilled labour has remained practically unchanged during the last five years but the unskilled workers recruited from the aboriginal class had changed to the extent of about 30 per cent annually. In one of the mills at Cawnpore the average period of continuous service amouted to 8.87 years

The Labour Office, of the Government of Bombay recently conducted a special enquiry into the length of service of cotton mill workers in Bombay City A sample of 1 in 10 tenements was decided upon and the information was collected in suitable schedules by the Lady Investigators of that Office from the inmates of such tenements who were reported to be cotton mill workers. Only the predominant working class localities were visited for the purposes of the enquiry and the total number of schedules accepted for final tabulation was 1,348.

Of the 1,348 workers, 988 or 73 29 per cent were men and 360 or 26 71 per cent were women Nearly 21 per cent, of the operatives began work in the mills before the 15th year, 38 per cent between the 15th and the 20th year, 32 per cent between the 20th and the 30th year and the remaining 9 per cent joined the first mill after they had attained the age of 30.

Sixty-three per cent of the workers were born in the Konkan and 27 per cent in the Deccan while the rest came from different parts of the country. It is very significant that not a single worker gave his place of origin as Bombay City.

About 48 per cent of the workers covered by the sample continued in the employment of the same mill without change, 34 per cent served in two or three mills and 18 per cent had served in 4 or more mills. The highest number of mills served by an individual was 16. The cause of leaving the mills was "for going to native place" in 26 per cent cases, "low wages and for bettering prospects" in 21 per cent cases, "absence due to illness" in 14 per cent cases, of the causes for leaving mills were unsuitable conditions of work, dismissal, strike, resignation, etc.

The approximate period of total service (including the period of non-attendance) was reported to be less than 5 years in 37.54 per cent cases, 5 to 10 years in 23.37 per cent. cases, 10 to 16 years in 15.88 per cent cases, 15 to 20 years in 9.13 per cent cases and more than 20 years in 14.08 per cent cases. The percentages of workers who had not changed mills was 67 in the case of operatives with less than 5 years' service and 42 for workers with 5 to 10 years' service In the other service groups, the percentage of operatives working in the same mill varied between 25 and 45

The actual active service was reported to be less than 5 years in 46 51 per cent cases, 5 to 10 years in 24.26 per cent cases, 10 to 15 years in 13.95 per cent cases and 15 to 20 years in 7 20 per cent cases. In the remaining 8 08 per cent cases the actual service was more than 20 years

A large number of workers in the age groups 15-20 and 20-25 had served for a period of less than 5 years while the most common period of service in the age group 25-30 was between 5 and 10 years. In the age group 30-35 about 30 per cent of the workers had served for less than 5 years and 19 per cent for a period of 5 to 10 years. Among workers of 35 to 40 years of age, the number of those falling in each of the first five service groups was between 16 and 20 per cent.

### LABOUR IN FACTORIES.

were regulated by the Indian Factories Act of 1881, as amended in 1891 Under the chief provisions of the amended Act Local Governments were empowered to appoint Inspectors of Factories and Certifying Surgeons to testify as to the age of children A mid-day stoppage of work was prescribed in all factories, except those worked on an approved system of shufts, and Sunday labour was prohibited subject to certain exceptions The hours of employment for women were limited to 11, with intervals of rest amounting to at least an hour and a half, their employment between 8 p m and 5 a m was prohibited, as a general rule, except The hours of work in factories worked by shifts for children (defined as persons below the age of 14) were limited to 7 and their employment at night-time was forbidden children below the age of 9 were not to be employed Provision was made for fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of overcrowding, etc
